Cell: 678-702-3165 / Email: weidmanc@yahoo.com

Extensive functional and operations experience in **Transportation**, **Logistics**, and Supply Chain **Management**. Successfully participated in several projects, including project implementations at one of the largest office products groups in the U.S. Managed sustainment at several major clients. Over 20 years of industry experience managing teams and budgets with a special interest in helping clients develop innovative supply chain strategies. Demonstrated project **management skills** in a matrix organization, with the ability to build an effective cross-functional team and deliver projects on time and on budget.

Capgemini, Atlanta, GA
Senior Consultant

2010 – 2019

Capgemini Internal Resource

January 2019 – April 2019

- Conducted interviews of new Capgemini candidates to determine skill set and cultural fit within the organization. Candidates which passed initial interview were passed forward for additional interview process with the HR group.
- Industrialization / standardization of templates used in RFP process to present Capgemini capabilities and story to potential clients. This included PowerPoint presentations as well as narratives relating the Capgemini story.
- **Support** research of segmented competitors to compare stated capabilities with current Capgemini capabilities. Purpose was to determine where Capgemini was an acknowledged industry leader and to identify areas of opportunity.

Elementum

October 2018 – January 2019

Use Case / Test Case Manager

- **Description:** Elementum is a software-as-a-service company behind the first cloud-native supply chain automation platform. In today's world, instant gratification trumps brand loyalty. To survive, brands must connect across their extended ecosystem so they **can** operate in real-time and deliver at the speed of customer demand. By digitally mapping the \$25T product economy, Elementum's platform sheds light on the flow of goods around the world, and facilitates cross-ecosystem execution to ensure that products are available at the right time, place, quantity, and cost.
- Review, refine and update Business Requirements Documents (BRD) and PowerPoint presentation for delivery to Corning senior **management** team.
- Define use cases for Corning Life Sciences (CLS) group to address business requirements and demonstrate the value case to Corning for the Elementum platform.
- Created test cases and aligned with use cases to ensure delivery of Corning requirements as detailed in the BRD. Additionally, created dashboard to aggregate test case completion progress and pass / fail rate by facility and globally to enable efficient monitoring during testing phase.

Arrowhead Engineered Products, Jasper, In
Configuration Manager / Business Analyst

February 2018 – August 2018

- **Description:** Arrowhead Engineered Products (AEP) is a leading supplier of non-discretionary, mission-critical, aftermarket replacement parts for a wide variety of motorized vehicles. Based in Blaine, Minnesota, AEP has seven distribution centers in North America, one in the UK, and sourcing offices in India and China.

AEP's objective is to standardize the warehouse **management** platform and functions across multiple locations and subsidiary locations. AEP selected **Oracle** Cloud Warehouse **Management** as the system of choice and Capgemini as their implementation partner.

- Worked closely with client team to finalize evolving business requirements, implement and test final **configuration** prior to launch using Agile project **management** principles to deliver project go live one month early.
- Configured multiple client locations based on business needs; Two pre production sites and two production sites.
- Migrated multiple locations from test environments into production. Parallel testing in both environments to ensure requirements were met and system was stable prior to official cut over.
- Created multiple reports plus scheduled team members to provide business metrics.
- Configured zone picking in pre production and tested as part of phase II requirements.
- Created replenishment process to efficiently move higher priority items to pick fronts to improve fill rates. Trained with client resource to transition the process to the client team.

SCUBI, Columbia, SC & Raleigh, NC
Business Analyst / Team Lead

2014 June –2017 September

- **Description:** SCUBI (Southeast Consortium for Unemployment Benefit Insurance). The states of North Carolina, South Carolina and Georgia (the Southeast Consortium) have reached a major milestone in their collaborative effort to modernize state Unemployment Insurance (UI) systems. As unemployment rates remain high and state budgets stretched, states are exploring innovative ways to modernize aging UI systems. One promising approach for improving service levels and achieving efficiencies is the formation of multi-state consortia to share systems and resources.
- Working in a Agile environment with 120+ Capgemini consultants and business SMEs across three state governments to gather requirements, **design** a new system and ensure timely project outcomes.
- Conduct elaboration sessions with client representation from all three states of the consortium for clarification of client requirements (2,100) to ensure stated goals are defined and achieved.
- Create new **user** login process including twenty three new screens and process flows for successful account creation, errors and staff **support**. Create functional specifications for all new screens and events to **support** create account process.
- **Interfaces** team lead for the state of North Carolina. Worked closely with the Business and IT teams to identify 183 interface transactions necessary to

- **support** required information transfer inbound to system and outbound from system. **Interfaces** include state agencies, banking and federal **interfaces**.
 - Gathered business rules, requirements and necessary transformations from legacy system to SCUBI.
 - Mapping of legacy data from source system to SCUBI tables and fields.
 - **Documentation** for multiple file transport types including delimited, fixed length and webservice.
- Coordinate interface testing effort for NC and SC state **interfaces** through SIT phase and successful go live for SCUBI in SC.

Sears Canada, Capgemini, Toronto, Canada
Project Manager / Functional Lead

2014

- **Description:** Sears Canada Inc. is a retailer, headquartered in Toronto, Ontario, that operates in all provinces and territories of Canada with a network of 196 corporate stores (Sears, Sears Home, Sears Outlet/Fashion Outlet, Sears Central Services), 195 dealer stores, 38 home-**improvement** showrooms, with annual sales of approximately 4 billion (Canadian) annually.
- **Responsibilities:** Using Agile methodologies, gathered requirements and managed resources, budget and timelines for delivery of manual appointment process to manage inbound vendor shipments at seven distribution centers.
- Hosted weekly SCRUM meetings with Capgemini and client team to evaluate progress and identify potential impediments while maintaining project timeline to ensure project delivery on time and within budget.
- Subject matter and **configuration** expert on **Oracle Transportation Management (OTM)** 6.2.
- Configured location resources at each facility and calendars to manage hours of operation.
- Created custom agents to manage appointment scheduling process based on commodity, resource availability and facility calendars.
- Configured commodity profiles for each dock resource to manage the flow of goods to the correct location resource based on receiving requirements.
- Created custom screen sets to manage views and data accessibility in conjunction with custom menus.
- Migrated solution from Test environment into production. Ran both systems in parallel prior to cut over to ensure stability and solution accuracy.
- Knowledge transfer and **training** of super users to ensure system continuity and stability post go live. **Training** included creation of **configuration** documents and **training** guides.

DHL Freight, Capgemini , Dusseldorf, Germany
Functional Lead

2013

- **Description:** DHL Freight is a division of Deutsche Post DHL providing road and rail freight services across Europe, parts of the Commonwealth of Independent States (CIS), North Africa and the Middle East. Together with DHL Global Forwarding (formerly DHL Danzas), it forms Deutsche Post's Freight/Forwarding business division.

Bobcat, Capgemini, Bismarck, ND

2013

Training Lead

- **Description:** Bobcat is a leading provider of compact equipment for global construction, rental, landscaping, agriculture, grounds maintenance, government, utility, industrial and mining markets. We strive to empower our customers to do their jobs more efficiently and effectively. Bobcat is North Dakota's largest manufacturer, with the most extensive compact equipment distribution network in the world.
- **Responsibilities:** Led **OTM end user training** course. Topics included saved queries, equipment groups, **order** releases, rates, invoice matching, **user management** and agents.

JPATS, Capgemini Government Services, Kansas City, MO

2013

Functional Lead

- **Description:** The Bureau of Immigration and Customs Enforcement (ICE) merged in 1995 to create the Justice Prisoner and Alien **Transportation** System (JPATS). JPATS supports the federal judiciary through its scheduling and **transportation** responsibilities. JPATS transports sentenced prisoners who are in the custody of the Federal Bureau of Prisons (BOP) as well as ICE criminal/administrative aliens to hearings, court appearances and detention facilities. JPATS completes over 280,000 prisoner/alien movements per year.
- **Responsibilities:** Subject matter and **configuration** expert on **Oracle Transportation Management (OTM) 6.2**.
- Created custom **user** roles and screens tailored to schedulers and administrators.
- Evaluated, enhanced and tuned the system **configuration** and processes used to plan prisoners on scheduled air and bus routings.
- Configured deeply complex itineraries and ground schedules to manage prisoner flow through the correct network path.
- Created multiple itinerary profiles to manage compatibility of prisoners and facilities in network.
- Created multiple agents and saved queries to improve and manage work-flow within **OTM**.
- Configured calendar based rate services to manage variable service provider availability.
- Refined and reduced rates within **OTM** to improve optimization **performance** and rate maintenance.

AT&T, Capgemini, Atlanta, GA
Sustainment Manager

August 2010- January 2013

- **Description:** AT&T is the industry-leading provider of wire **line** voice communications services in the US. Customers in 22 states use AT&T-branded telephone, Internet, and computer telephone services; it also sells digital TV under the U-verse brand. Key markets include California, Illinois, and Texas.
- **Responsibilities:** Provide sustainment lead **support** for client with **planning** activities in multiple locations and time zones. Managed on shore and offshore resources to ensure deadlines were met and risks were mitigated.
- Managed the weekly migration of new functionality and upgrades to the system while working closely with the technical team to ensure pre and post migration testing and system stability.
- Resolve all production related issues quickly and communicate status and resolution to the business team.
- Maintain rates in the system. Configure and load new rates, expire old rates.
- Optimized the solution to improve system **performance**.
- Create saved queries as required by the Business
- Configure and modify **user** roles as requirements evolve.

APL, Enterprise Integration, Alexandria, VA
Functional Lead Consultant

2010

- **Description:** APL is a global **transportation** and **logistics** company engaged in shipping and related businesses.
- **Responsibilities:** Providing third party **transportation management** services for client with multiple divisions and locations using **OTM** 4.0.
- Take over hosting and upgrade to **OTM** 6.1.
- Configure freight allocations to allow for cross SBU consolidation.
- Configure Domain structure for additional future customers.
- Configure service provider commitments and pools per client requirements.

Land O Lakes, Trissential, Minneapolis, MN
Functional Consultant

2008 – 2009

- **Description:** A farmer-owned cooperative, Land O Lakes is a leading marketer of dairy-based products, foodservice items, and agricultural supplies
- **Responsibilities:** Assisted client in managing production **support** of a previously installed **OTM** system.
- Created environment for Land O Lakes Feed business. Conducted testing based on use cases and refined solution to meet business requirements. Migrated solution to production and managed cut over process.
- **Support** included **analysis** of underlying issues with resolution of issues and recommendations for refining **configuration** to increase stability and take fuller advantage of **OTM** capabilities.
- Assisted client in developing and implementing a capacity **management** strategy to maximize low cost carrier assets. Strategy utilized various tools available within **OTM** to achieve the desired result based on clients business needs. Implementation of strategy will result in reduced freight spend, improved customer service and enhanced partnerships with service providers.

ACCO Brands USA, Lincolnshire, IL
Domestic Transportation Manager

2003 – 2008

- **Description:** Managed an annual freight spend of \$40 million dollars ensuring that high quality and customized logistics solutions are provided to customers, facilities and business partners. All modes of transportation included.
- Managed operational relationships with distribution centers and manufacturing facilities to ensure cost effective and service oriented decisions are made throughout the supply chain.
- **Responsibilities:** Oracle OTM TMS implementation system wide. Super user role configuring and testing carriers and rates within system including custom LTL tariff. Maintain and adapt system configuration as business needs evolve.
- Managed and led team the ACCO team during OTM 5.5 implementation. Scope included all modes of transportation including parcel, pooling and intermodal.
