SUMMARY

Seasoned **SQL** and **R** developer with a background in **product** and project **management** and a focus on **business** goals, who has developed exception-based reports to proactively alert executives to potential risks, created **data** feeds of KPIs for leadership to review on-demand, and developed innumerable reports for internal clients, external clients and regulatory entities. Continually expanding subject matter knowledge so that I can converse with domain experts in their terms.

EXPERIENCE

Sr. **SQL Developer**, May 2021 – Present

King County Department of Public Health, Seattle

- Wrote and maintained **SQL** queries or stored procedures tailored to **business** requirements for:
 - Regulatory reporting, such as annual UDS reporting
 - Productivity **analysis**, such as tracking patient no-show rates of patients across a number of offices and departments and identifying trends
 - Program-specific logic for patient outreach efforts
 - Support for grant requests
- Reverse-engineered existing legacy queries
 - Documented the apparent **business** rules based on code and reviewed with stakeholders
- Created reports and visualizations for end-user self-service in:
 - Tableau
 - SSRS
 - **Power BI**
- Conducted code review for less experienced **SQL** users on team
- Lead on project to improve Community Outreach Healthcare database
 - Reworked legacy file specification for 10+ external organizations
 - Reworked **schema** to
 - handle updated file specification
 - maintain historical records
 - streamline querying, reporting, **analysis**
 - Reworked ETL process to load files using **R**
- Acted as technical liaison between groups
 - External Epic (Electronic Health Record) vendor
 - Internal analytics teams
 - External community partner organizations
- Communicated with stakeholders and end users across the Reporting Lifecycle, which included:
 - Receiving requests for new reports or changes to existing reports
 - Providing one-on-one training or documentation on how to run reports

Sr. **SQL Developer**, January 2019 – May 2021

Seagull Scientific, Bellevue, Washington

- Lead on project to improve legacy reporting database **schema** for Sales and Finance domains
 - Gathered requirements for future-state of reporting, including:
 - Desired levels of granularity of **data** across reports
 - Desired groupings and hierarchy
 - Analyzed legacy **schema** and reports
 - Designed **data** model & populated tables via SSIS packages
 - Coordinated **QA** & UAT effort:

- *Prioritized critical reports*
- *Researched and troubleshoot reporting discrepancies of legacy vs new reports*
- *Lead on project to replace 3rd party Sales Goals & Bonus Payout **management** and tracking tool*
 - *Gathered requirements for desired future-state of Sales Goals & associated Bonus Payouts*
 - *Analyzed legacy bonus calculation documentation*
 - *Created **schema** in **Microsoft Data Services** environment that offers/handles:*
 - *Differing high-level requirements for each of four worldwide sales teams*
 - *Per-salesperson configurability for individually negotiated goals and caps*
 - *Stakeholder-facing **web** UI for managing configuration*
 - *Created reports to allow real-time tracking of Sales Goal Attainment for Sales Personnel, HR and Finance*
 - *Created quarter-end reports that reflect Bonus Payout Amounts per salesperson*

SQL Developer, July 2018 – January 2019

Navos Mental Health Solutions, Seattle, Washington

- *Lead on project to deliver **Power BI** dashboards for Operations Managers and Directors to illustrate actionable information in real time*
 - *Analyzed related legacy views & queries*
 - *Designed **data** model & populated tables via complex stored procedures*
 - *Dashboards created illustrate:*
 - *Volume of patients per program month, including individuals whose program enrollment will lapse*
 - *Monthly snapshot of patient accounts whose state funding has expired*
 - *Individual patient progress over time to support outcome-based-care funding & illustrate month-over-month trend of population progress*
- *Coordinating report-related dependencies for change in server hosting providers*
 - *Created plan for testing various reports on new hosted environment (SSRS, **Power BI**, and Crystal within enterprise application)*
 - *Created instructions for post-cutover troubleshooting for junior team members*
- *Created text file parser to convert 3rd party **data** into database table*

SQL Developer & Sr. Business Analyst, June 2015 – January 2018

Entertainment Partners, Burbank, California

- *Lead on project to analyze and improve report performance for enterprise application*
 - *Analyzed and replaced or refactored 100+ **SQL** Stored Procedures*
 - *Consolidated largely redundant **SQL** Stored Procedures to reduce technical debt*
- *Designed an automated system to proactively analyze and alert Tax Department users of year-end compliance exceptions*
 - *Enabled the Tax Department to meet their year-end deadlines with visibility to over 450k+ employees*
 - *Analyzed and documented legacy **business** process*
 - *Designed **data** model, created **SQL** database **schema** to support replacement of legacy **business** process*
 - *Developed stored procedures to generate year-end discrepancy reports*
- *Analyzed and centralized **data** to enable consolidated reporting from two disparate payroll applications*
 - *Conducted end-user interviews to define **functional** requirements*
 - *Designed a common **data** model to support transformation and load from multiple sources of*

- Updated legacy **SQL** stored procedures and Crystal Reports per **business** requirements to keep in compliance with regulations
 - Created “**data** slicer” tool consisting of select statements that output insert & update scripts to allow **QA/UAT/Sandbox** users to test using a realistic set of relational **data** on servers without enough space for a full **production** backup to be restored

Product Manager & SQL Developer - Payroll, August 2009 – June 2015

Ease Entertainment **Services**, Beverly Hills, California

- **Product** Design
 - o Created **data** model and **SQL** database **schema** for key components of an enterprise payroll system capable of:
 - Performing gross-to-net calculations for thousands of timecards per week for employees across the U.S. and Canada
 - Storing and tracking rates of fringes and taxes across years for accurate calculations and reporting
 - Storing and tracking of minimum wage across federal, state and local levels to ensure compliance
 - Storing and tracking of employee **data**
 - Designed **data** model to support highly responsive reports to comply with federal, state and local jurisdictions’ requirements
 - Exporting W2 and 1099 **data** to 3rd party printing resource
 - Exporting weekly payroll costs to accounting application and applying customizable rules for general ledger account coding
 - Ingesting employee onboarding **data** from external sources
 - Ingesting weekly timecard **data** from mobile time capture application
 - o Created **data** model and **SQL** database **schema** for key components of an enterprise hours-to-gross system capable of:
 - Storing and tracking employees’ weekly work times and associated accounting costs
 - Using in-house-built rules engine that transforms work times into gross pay amount based on a wide array of working conditions and labor union contracts
 - Transmitting **data** to enterprise payroll system
- **Leadership Responsibilities**
 - Coordinated effort of developers & **QA** resources
 - Trained, mentored group of payroll system **software** support personnel
 - Taught **SQL** and Crystal Reports skills to **software** support personnel
 - Documented protocol for best practices of **software** support personnel, such as handling sensitive **data**, responding to emails and phone calls in a timely manner, and treating internal and external contacts respectfully and professionally
- **Analysis** and Documentation
 - Researched payroll implications of various working conditions, such as different combinations of work location and resident location, work in multiple states in a single week, work across international borders, and work under collective bargaining agreements
 - Documented payroll tax and fringe implications of working conditions, such as federal, state and local taxes, state disability insurance, state unemployment insurance, and provincial taxes across Canada

Payroll Coordinator, October 2002 – August 2009

Media **Services**, Westwood, California

- Handled employee onboarding documentation, ensured compliance on I-9s and W-4s and internal policy

forms

- Ensured timekeeping and paycheck accuracy including compliance with wage and hour laws, collective bargaining agreements and proper taxation at federal, state and local levels

SKILLS & TOOLS

- Languages: T-SQL, R
- Data Transformation / Data Management Tools: SSIS, Informatica, R
- Data Analysis Tools: SSMS, R, Excel
- Interfaces: Visual Studio, SSMS, R Studio
- Data Visualization Tools: Tableau, Power BI, SSRS, Qlik, Excel
- Version Control: Git, Subversion
- Collaboration: Jira, Confluence
- Database Platforms: MS SQL Server (2008R2-2022)
- Data Warehouse Design
- Data Warehouse Automation
- SDLC: Agile, Scrum
- Data Privacy Regulations: GDPR, HIPAA
- Epic Clarity EMR
- ICD/CPT/CDT/SNOMED Coding System Familiarity
- Data Engineering
- Data Modeling
- ETL Optimization
- Data Integration
- Data Quality Assurance
- QA/UAT
- Regulatory Compliance
- Healthcare Analytics
- Business Intelligence
- Data Analysis
- Data Cleansing
- Data Architecture
- Cloud Platforms: AWS, Azure
- Data Lakes
- Data Governance Frameworks
- Data Security
- Data Profiling
- Data Lineage
- Data Classification
- Data Strategy
- Data Standardization
- Data Federation
- Data Access Control
- Data Validation
- Statistical Analysis
- Data Exploration
- Data Manipulation
- Data Migration
- Data Mart
- Data Dictionary

- Business & Process Analysis
- Requirements Gathering
- Business Process Automation
- Business Intelligence Strategy

Work History

Total Work Experience: 22 years

- **Data Engineer** King County Department Of Public Health
Apr 01, 2021
- **Senior SQL Developer** Seagull Scientific
Jan 01, 2019
- **Sr. Business Analyst & Report Developer** Entertainment Partners
Jun 01, 2015
- **Payroll System Product Manager** Ease Entertainment **Services**
Aug 01, 2009
- **Payroll Coordinator** Media **Services**
Oct 01, 2002

Skills

- **documentation** - 18 years
- **business requirements** - 14 years
- **data engineering** - 14 years
- **database** - 14 years
- **reporting** - 14 years
- **sql** - 14 years

- **stored procedures** - 6 years
- **r** - 2 years
- **tableau** - 2 years
- **qa** - 14 years
- **sdic** - 14 years
- **data modeling** - 11 years
- **leadership** - 11 years
- **crystal reports** - 9 years
- **compliance** - 15 years
- **payroll** - 15 years
- **taxes** - 15 years
- **software** - 8 years
- **onboarding** - 13 years
- **best practices** - 6 years
- **mentorship** - 6 years
- **programming** - 6 years
- **forms** - 7 years
- **policies** - 7 years

Work Preferences

- Desired Work Settings: No Preference
- Likely to Switch: True
- Willing to Relocate: False
- Work Authorization:
 - US
- Work Documents:
 - US Citizen
- Security Clearance: False
- Third Party: False
- Employment Type:
 - Full-time
