Education

2017
Purdue Global University
Associate in health science

2016-2017
METC- Army Medical School
San Antonio, TX

Womack Army Medical Center-
Clinicals
Fayetteville, NC
Certification of Completion: Radiologic
Technologist

Certifications

Registered Radiologic Technologist (R),
ARRT – 2018

Certified Imaging Informatics
Professional (CIIP), ABII – 2023

Basic Life Support (BLS), American Red
Cross- 2024

Key Skills

Healthcare Imaging Informatics
PACS Management
Networking
Data Integration
DICOM | VNA | HL7
System/Application Analyst
Healthcare IT/ Data Entry

Professional Summary

As an experienced PACS Administrator and Analyst with over eight years in healthcare, I have honed my technical skills through civilian and military service. My decade-long military career equipped me with a strong foundation in problem-solving, system optimization, and data security. Leveraging this expertise, I excel in resolving complex technical challenges and ensuring the seamless operation of PACS systems, EHR integration, and maintaining data integrity and efficiency within healthcare environments.

Experience

JAN 2020- AUGUST 2024

PACS Administrator/ Imaging Analyst | Tripler Army Medical Center

APRIL 2017-JANUARY 2020

Lead Radiologic Technologist/PACS | McDonald Army Health Center

TECHNICAL PROFICIENCIES

AGFA PACS | FUJI PACS | NUANCE POWERSCRIBE | CERNER GENESIS
EHR|CHCS/AHLTA |HYLAND AUCO| PHILIPS |SIEMENS| CARESTREAM | GE |VITREA|
DYNACAD| MICROSOFT OFFICE OS |POWERSHELL | ACTIVE DIRECTORY

Professional Experience

- Coordinate daily operations and maintain PACS/RIS equipment, including image workflow, archiving, auto-routing, prefetching, and other related activities.
- Troubleshoots and resolves technical issues related to digital imaging systems and technologies, ensuring a smooth user experience with minimal supervision.
- Installed and configured accounts for radiologists and residents in Fuji PACS, PowerScribe360 Voice recognition, and Cerner Genesis (EMR).
- Proficient in administering Active Directory domains, including user management, group policy, and DNS.
- Establish, manage, calibrate workstations, and troubleshoot DICOM connections between PACS and all imaging equipment to the hospital network (HIS/RIS).
- Provide technical guidance for interoperability and integration of interfaces and devices between the Cerner EHR platform and ancillary systems, providers, public health agencies, payers, other federal agencies, and patients using exchange standards (e.g., HL7, IHE), specifications, and integration platforms.
- Designated the Subject Matter Expert (SME) and possess comprehensive knowledge of applications within the Electronic Medical Record (EMR) system.

Clearance

Government Issued – Secret

Project **Management**

- Partnered with the DHA to implement a streamlined EMR system enterprise-wide, Go-Lives, improving efficiency and patient **care** across military hospitals.
- Manage and configure the **PACS** system merger across multiple military hospitals in Hawaii, Guam, Japan, and Alaska.
- Facilitates **communication** and collaboration between vendors, the IT department, department leaders, and end-users with new modality installation.
- Manage **PACS** as well as various clinical applications, both in-person and remotely, to ensure efficient and effective healthcare delivery.
- Configured and implemented Valor Teleradiology as a backup dictation system: Streamlined **workflow** and ensured uninterrupted exam reporting during peak workload and system outages.

Leadership

- Responsible for overseeing the professional development of newly hired IT personnel and radiology staff, which involved providing educational resources, assigning tasks, and implementing strategies to foster career advancement.
- Providing mentorship to junior radiology technologists and systems administrators to enhance the quality of **medical care** and foster their personal and professional development.
- Served as a key liaison between multiple departments, effectively coordinating agendas and resolving conflicts to ensure seamless project execution and the attainment of shared goals.

Quality and Improvement

- Performed revenue reconciliation as needed, requested new procedure codes, and ensured accurate charges were applied to accounts.
- Verify the system backups, monitor the HL-7 interfaces, review and revise the uptime and downtime procedures, and monitor the server performance.
- Partnered with 40 radiologists and 50 technologists, ensuring constant 24/7 x 365 operations and project success.
- Proficient in complex system **administration** duties, such as system table configuration, patient and exam merging, manual study routing, performance monitoring, and VNA storage queue **management**.
- Coordinates end-user access, provides training, and offers technical assistance to radiology staff, radiologists, clinicians, and other end-users
- Identify and resolve application issues, investigate potential defects, and document and submit findings according to standard processes.
- Experienced in technical and professional billing for hospital services, with a deep understanding of CPT codes, modifiers, and ICD-10 diagnosis codes.

Lead Radiologic Technologist/PACS

- As a lead technologist, I managed a team ensuring top-tier patient care, while simultaneously producing high-quality diagnostic images.
- Assisted the Radiologist with fluoroscopic, GU, GI, and pediatric procedures.
- Resolved studies that were broken or corrupted and performed split and merge operations on studies in Agfa PACS.
- Captured images using portable X-rays in operating rooms, emergency rooms, and patients' bedsides.
- Reviewed physicians' orders to determine medical imaging needs and operated radiologic equipment to capture, develop, and produce diagnostic images.
- Quality controlled imaging and patient information before sending it off to PACS.
- Maintained compliance by managing and inspecting all department TLDs and leading aprons as Radiation Safety Officer.
- Orients new personnel and assists in their transition to the work environment as assigned.
- Elevated customer service standards through efficient front desk management, expert call handling, and proactive patient assistance.
