Business Analyst / Product Owner

Finance and IT industry professional with certifications in project management and financial risk management.

Self-motivated and experienced product owner, business analyst, and project manager, with over 14 years of experience and skilled in change management, process analysis and improvement, systems implementation, and data analysis and interpretation. Successful in owning and driving product level development through the Agile/Hybrid life-cycles, from planning to delivery. Proven track record of success in driving product development through planning, risk identification and mitigation, dependency management, and project management. Proficient at liaising with internal partners and clients to deliver cutting-edge business solutions, communicating effectively across the organization, training end-users and business analysts, and supporting client needs.

Highly skilled and experienced self-starter professional with over 14 years of experience in product ownership, business analysis, and project management. Areas of expertise include change management, process analysis and improvement, systems implementation, and data analysis and interpretation. Successfully driven product development through the Agile/Hybrid life-cycles, from planning to delivery. Possess a proven track record of success in driving product development through planning, risk identification and mitigation, dependency management, and project management. Adept at liaising with internal partners and clients to deliver cutting-edge business solutions, communicating effectively across the organization, training end-users and business analysts, and supporting client needs.

PROFESSIONAL EXPERIENCE

SEIC, Coforge, Remote, October 2021 – October 2024

Product Owner – Lead Business Analyst

End-Client Web Portal – Lead Business Analyst / Product Owner, September 2023 - Current

Managed feature delivery and documentation, and cross-departmental dependencies to ensure continued timely delivery. Championed continued process improvements and enhanced transparency to other departments.

Key Accomplishments:

- Transitioned team from a single grooming week per release, to iterative continuous grooming to better accommodate shifting requirements resulting in a 25% reduction in time-to-market for new features.
- Served as financial and data SME to guide development of UI features towards predicted client usage patterns – delivering the appropriate data in a user friendly and easily consumable format.
- Managed own features from prioritization to delivery, through story breakdown, Agile ceremonies, UAT, and user demonstrations.

Liam Hines

Page 2 of 6

Data Delivery (API) – **Product** Owner, October 2021 – December 2023

Managed and prioritized features to ensure **data** delivery stability and ongoing **development** of **data** delivery requirements to support end-client facing **user** portals, and end client change requests.

Key Accomplishments:

- Successfully delivered high priority features, with limited lead **time** in support of a multi-release initiative to support the end-client **user** portal.
- Managed a team of 3 Business Analysts, including training, feature distribution and monitoring, assisting as required, while guiding **documentation** initiatives, resulting in a 50% increase in feature delivery efficiency.
- Represented the team to numerous internal stakeholder teams, including the division wide Scrum of Scrums.
- Collaborated with **Product Manager** to ensure all required features were prioritized, planned, circulated, and delivered.

UBS Investment Bank, SoftCom Systems, Remote, May 2021 – August 2021

Business Systems Analyst and Consultant

Execute on **data analysis**, provide **data** intelligence, in support of **project** to re-engineer business consumption of large **data** pools. Worked between business end users and **IT** to clarify and document requirements.

Key Accomplishments:

- Performed UAT on **development** releases; Initiated and monitored JIRA Tickets.
- Using Oracle **data**, communicated to users an accessible view of **access** privileges.
- Simulated via SQL, large **data** pulls as requested, providing **analysis** and information to business users; ensured that **development** would match business requirements.
- Reviewed and updated documents related to an Operational **Risk** Finding.

Citigroup, HCL Technologies, Remote, April 2020 – February 2021

Business Systems Analyst and Consultant

Execute tasks and monitoring in support of the clients build out and parallel testing of systems to support the updated 2021 Volcker rule. Worked as liaison between trading systems, **data** warehouse / aggregation, and the business **project** monitors / regulation experts for assigned tasks. Act as client contact, working directly with client resources.

Key Accomplishments:

- Tracked and followed up with trading system teams in scope for the Volcker rule change including late trades, modifications, and cancellations as well as enhancements to capture accurate trade notional values for reporting.

Liam Hines

Page 3 of 6

- Used big-**data analysis** to validate in-**development** UAT environments, identifying gaps and variances, including in end **user** reporting.
- Reviewed updated regulator documents for changes, reported on updates and changes, and created **user** friendly versions for **development** and testing of final delivery files.

Fitch Ratings, RSC Solutions, New York, NY, August 2019 – November 2019

Business Systems and Analytics Associate

Execute root cause **analysis** to determine benefits and costs associated with migration of **data** sources for incoming feed **data**, assess system upgrade needs to improve efficiency and reduce errors and report results to executive team via PowerPoint presentations and detailed **data** spreadsheets, propose required capital expenditures to meet evolving **customer** needs, and document processes and systems flows.

Key Accomplishments:

- Employed **user** interviews to identify measures to drive increase in efficiency of **product** feeds and mitigation of risks.
- Landed half million increase in operating budget and quarter million increase in systems capital expenditure.
- Analyzed and documented key business processes and identified system upgrades and process alignment options.

MUFG Bank, New York, NY, May 2016 – July 2019

Associate – Business Analyst - Accounting Operations

Programmed chart of accounts (COA) database to increase controls, incorporated **data** validation against production systems, and enhanced environment control, led **data** mining efforts and account activity evaluation for certification assignment, and reviewed outside consultancy work **product**. Acted as a SME on system enhancement and migration projects, new entity initiatives, and **regulatory** and audit response efforts; wrote output reports for senior **management**. Involved in numerous **data analysis** and flow projects between Trade Source, General Ledger, and reconciliation / clean-up of the **Data** Warehouse.

Key Accomplishments:

- Identified and troubleshooted General Ledger **data** integrity issues, eliminated legacy **data** and increased GL control structure, enhanced downstream **financial** reporting, and document all processes and controls.
- Developed and implemented COA control processes and reporting structure, automated process mapping and reporting.
- Key driver of Trintech's Certification (AssureNet) implementation for enhancement of controls and **risk** mitigation.
- Test Scripts, Test Cases, and **User** Requirements document developed for **user** testing.

Liam Hines

Page 4 of 6

- Reconciliation of GL **data** to **Data** Warehouse.
- Trained new users, hosted department end-**user** engagement sessions and systems implementation training sessions.
- Authored business and functional requirement documents; streamlined processes through **development** of spreadsheets, Macros, and SQL queries.
- Developed solutions (VBA) to automate controller processes leading to significant reduction in task **time**.

Barclays Capital Inc, New York, NY, October 2013 – February 2014

Consultant - Business Analyst

Authored business requirement protocols for reconciling and synchronizing proprietary book hierarchy **data** sets and **data** flows between legacy and newly developed systems; identified critical **data** attributes and key risks in transition to new systems; led requirement elicitation teleconferences with book hierarchy system **user** community.

Key Accomplishment:

- Led effort to replace one book hierarchy system with an improved one, delivered **data analysis** support, and obtained stakeholder approval.
- Analyzed **data** and created SQL database queries to simulate production **data** for testing.

UBS Investment Bank, Jersey City, NJ, July 2010 – November 2012

Associate Director - Project Management

Spearheaded portfolio of 20+ **user** driven business process and **software** system improvements that took 10+ projects through **software development** life cycle (SDLC) within an established annual budget of \$300K; directed **project** schedules, conflicts, and performance against forecast. Liaised between **finance** and **IT** departments, briefed senior **leadership** bi-weekly to report on portfolio activity, **project** prioritization plans, and budget. Reconciled **data** flows to ensure accuracy between Trade Capture, GL, and **Data** Warehouse systems.

Key Accomplishments:

- Authored and validated business requirement and **IT** functional requirement documents.
- Prioritized projects based on added functionality, potential for system improvements, and **regulatory** considerations, while ensuring no GL collateral impact.
- Migrated IAS 39 population to an **IT** supported system.
- Developed database for pricing and valuation of portfolio via SQL.

Liam Hines

Page 5 of 6

UBS Investment Bank, Milestone NYC, New York, NY, December 2008 – July 2010

Senior Consultant and Business Analyst - Project Management

Championed finance department goals within offshore IT development team to ensure projects met end-user critical requirements. Piloted implementation of new independent price validation (IPV) SAP business object and business intelligence (BI) application for New York equities rollout.

Key Accomplishments:

- Led innovative application of effective interest rate (EIR) models to 30 billion USD portfolio, leading to re-designation under IAS 39 and avoidance of two-plus billion in fair market value losses.

Ernst & Young, New York, NY, July 2004 – February 2008

Senior Consultant - Risk Advisory, Project Execution / PMO

Led 12 major client engagements, leveraging knowledge of financial products and audit processes; engaged in business process engineering efforts to identify risks and recommend mitigation solutions to top tier clients.

Key Accomplishments:

- Enhanced IPV process for key client's equity and derivatives portfolio through design and implementation of automation.
- Formalized client's processes on fair value prices via user interviews and documentation review.

EDUCATION & CREDENTIALS

Bachelor of Arts in Economics | Drew University, Madison, NJ | GPA 3.5

Certifications

Project Management Professional (PMP), PMI, 2015 (On suspension per CPE)

Financial Risk Manager, GARP, 2005
