## Summary of Qualifications

---

### General Summary:

I have about 25+ years of IT industry experience within the major fortune 500 companies in sectors of media, financial, news, retail, wireless and major internet dot-coms. I have managed multimillion-dollar projects aligning business goals with technology solutions to drive process improvements, competitive advantage and bottom-line gains.

### Programming Lang:

#### AJAX

json, jsonp, Xml, websockets, web services, rest api calls, graphql, protobuf

#### JAVASCRIPT

object oriented, jquery, es5-es6, typescript, angularjs cli 1x-9x, reactjs, redux, react native, backboneJS, webpack, extJS, socket.io, vue.js, ionicjs, 1<sup>st</sup> & 3<sup>rd</sup> party cookies hacks, jsZip

#### CSS3

sass, less, responsive web design, aperspective web design, icomoon.io, bootstrap, materialize, flex-box

#### HTML5

canvas, audio, video, web storage, geolocation, file api, media capture

#### NodeJS

yarn, npm, express, body-parser, multer, formidable, request, fs-extra, nodemailer, handlebars, mysql, MariaDB, postgres GIS, mongoDB, cluster, nodegit (windows), isomorphic-git, child-process, worker threads, pm2, GraphQL

#### Python

python3

#### JAVA

gradle 5.x, kotlin, spock, jsp, jstl, javamail, jdbc, jersey 1.7 -1.8 jax-rs, xsl, xslt, xpath, dom, sax, jaxp, spring boot, jpa, maven, kafka, kotlin, ping, pkce, oauth, springboot, springsecurity

#### AEM (6.0 - 6.5.11.0)

java servlets, maven, crxde, sling, osgi, felix, jackrabbit, jcr, crx, slightly, htl

#### Salesforce

commerce cloud

#### DotNet

classic active server pages, asp.net, c#, kinect sdk

#### FLASH

air 4.0, professional cc, flex 4.9, as 3.0, pv3d

#### C, Object Oriented Perl

#### GIS

arcgis, arcims, arcroute, googlemaps api, postgis

### Frameworks:

singleton, mvc, dependency injection, mvvm, oop, functional programming, nojs framework ([www.alltechneeds.com](http://www.alltechneeds.com))

### Databases:

oracle, ms sql server, mysql, postgres, mongodb, xml-spy, influxdb, uml-schema tools, time series db

### Servers:

cold fusion, nginx, apache 2.4, iis, tomcat 4 - 9x, atg dynamo, fms 5 pro, aem 6.0 - 6.5, qc5, nodejs

### Dev Tools:

dreamweaver, flashdevelop, eclipse, sublime, intellij, vs code

|                           |                                                                                 |
|---------------------------|---------------------------------------------------------------------------------|
| <b>Dev Ops:</b>           | docket (kabana), ms virtualization                                              |
| <b>Operating Systems:</b> | windows, linux (centos 6, centos 7, centos 8), linux arm, mac osx, raspberry os |
| <b>Source Control:</b>    | cvs, svn, ssh, ftp, git (github, gitkraken)                                     |
| <b>Video:</b>             | adobe premiere, sony vegas                                                      |
| <b>Graphic:</b>           | adobe photoshop (jmx, sprites, embedded icons), flash                           |
| <b>Networking:</b>        | firewalls, switches, routers, wifi                                              |

---

## Professional Experience

---

**Positions Held:** Senior NodeJS **Developer** (Remote Contract Position)  
[AAMC.ORG](https://www.aamc.org) Washington, DC

**8/2023 – 1/2024**

**AAMC senior NodeJS developer for this leading is a not-for-profit association dedicated to transforming health through medical education, health care, medical research, and community collaborations.**

- Helped develop new features in nodeJS application that allowed academic divisions within a university, to review admission requirements and guide the end user to these objectives.
- Developed and deployed serverless **applications** using AWS Lambda functions, improving scalability and performance. Implemented event-driven **architecture** for real-time data processing, leveraging Lambda functions to handle data ingestion, transformation, and **integration** with AWS services such as S3, DynamoDB, and SNS.
- Integrated GraphQL with existing REST APIs, enabling gradual adoption and seamless migration to a more modern data fetching approach.
- Utilized Apollo Federation to create a unified GraphQL **gateway** for microservices, promoting modularity and improving the scalability of the system.
- Implemented robust and scalable backend systems using Node.js and TypeScript, optimizing performance and maintainability. Developed CI/CD pipelines using tools such as Jenkins or GitLab CI/CD, automating builds, **testing**, and **deployment** processes to ensure **continuous integration** and delivery of high-quality code.
- Managed npm package dependencies efficiently by setting up and configuring Artifactory as a private npm registry, ensuring secure storage, version control, and access **management**. Implemented caching and proxying strategies to optimize build times and minimize network dependencies, improving **development** workflows and reducing downtime associated with external npm repository outages.
- Designed and implemented comprehensive test suites using Jest, ensuring high code quality and reliability across the application.

**Positions Held: Senior Full Stack Developer**  
[Wellsfargo.com](https://www.wellsfargo.com) Summit, New Jersey

**1/2023 – 6/2024**

**WellsFargo Full Stack Developer for this leading American multinational financial services**

**company with a significant global presence. The company operates in 35 countries and serves over 70 million customers worldwide.**

- Helped develop new features in a Financial Crimes case work application, modernized the codebase to leverage new capabilities.
- Perform detailed examination to detect transactional and relationship **patterns**, trends, anomalies and schemes around complex business rules.
- Implemented single sign-on (SSO) and federated authentication using Ping Identity with Spring Security in enterprise **web applications**. Configured Spring Security to delegate authentication and authorization to PingFederate, enabling seamless user authentication across multiple **applications**. Collaborated with the security team to ensure compliance with security standards and **best practices**, resulting in enhanced security posture and improved user experience.
- Architected and developed high-performance **web applications** using Angular, resulting in a significant boost in user engagement.
- Mentored junior developers on **best practices** in **Javascript/Typescript development**, fostering a collaborative and knowledge-sharing environment.
- Spearheaded the implementation of advanced Angular features such as reactive forms, custom directives, and pipes.
- Integrated third-party libraries and APIs into Angular **applications** to extend functionality and improve user experience.
- Ensured adherence to security **best practices** in Angular **applications**, including implementing authentication and authorization mechanisms.
- Led **agile development** teams in Angular projects, coordinating tasks, code reviews, and **deployment** processes to deliver high-quality **software**.

**Positions Held:** **Javascript Developer** (*Remote Contract Position*)  
[Salesforce.com](https://www.salesforce.com) San Francisco, California

**6/2022 – 12/2022**

**Javascript Developer** for world's leading cloud-based **software** designed to help businesses find more prospects, close more deals and wow customers with amazing **service**.

- Developed Salesforce Lightning components for custom business solutions, enhancing the user **interface** and functionality of the Salesforce platform.
- Implemented **Javascript** Lightning **web** components (LWC) and Aura components to improve performance and maintainability..
- Integrated Salesforce Lightning with external systems using REST and SOAP APIs.
- Customized Salesforce Lightning pages and apps to meet specific business requirements.
- Provided training and support for users transitioning from Salesforce Classic to Lightning.

**Positions Held:** Senior NodeJS **Developer** (*Remote Contract Position*)  
[Boeing.com](https://www.boeing.com) Englewood, Colorado

**9/2021 – 6/2022**

**Senior NodeJS Developer** for world's leading American aerospace manufacturer.

- Refactored legacy **java** code (eLink portal) from BEA legacy systems codebase to the latest **java** spec 1.8 and 11 on AWS cloud platform.
- Worked in maven project with pom.xml.

- Installed and configured required **software's** for application **development** (Eclipse IDE, oracle database, WebSphere, Tomcat, plugin's for eclipse, required framework jar's).
- Ensure the correct SSL protocol is used for the correct hardening of servers along the segment **architecture**.
- Designed and developed presentation layer using JSP, HTML with client-side form validation by **Java** Script, Node **JS** and Struts built-in form validations.
- Worked closely with Global Tools Administration to ensure that requirements are completed, understood and trained for any changes in Oracle 11.
- Written test cases for **unit testing** using JUnit **testing** Framework.
- Worked with Express.**js** for **development** of RESTful **web** services and middleware configurations.
- Worked with Passport and JSON **web** tokens for authentication and authorization security configurations using Node.**js**.
- Worked in a waterfall environment hybrid model, and work well with others.

**Positions Held:** Senior **Javascript Developer** (*Remote Contract Position*)  
[Landsend.com](http://Landsend.com) Grand Rapids, Michigan

**3/2021 – 6/2021**

**Senior **Javascript Developer** for world's leading American clothing and home decor retailer.**

- Developed an Angular 11 CLI application for LandsEnd Warehousing & Logistics Deptt.
- Built responsive **web design** (tablet and desktop) in **SPA** methodology, developing modules, services, templates, custom directives, and components for product channeling/assignment.
- Architected NodeJS modules with await/async **patterns**, integrating iFix and FactoryTalk APIs with Fastly/GraphQL endpoints.
- Packaged **development** code in AWS Amplify production servers.
- Coordinated with **management** to create a user-friendly UX/UI for warehouse users.
- Extensive experience with AWS (Amplify, Lambda, SimpleCognito).
- Worked well in a waterfall environment.

**Positions Held:** Senior **AEM/JSP Frontend Developer**  
[Cisco Systems](http://Cisco Systems)

**2/2020 – 3/2020**

**Senior **AEM** Frontend **Developer** world's leading American multinational technology conglomerate, manufactures and sells networking hardware, **software**, telecommunications equipment and other high-technology services and products.**

- Managed Sass and HTL templates files in Cisco **AEM** publishing tool, cleaned up the stylesheets for better code coverage and reusability of components.
- Managed Digital **Asset Management** (DAM) workflows for the Small Business **unit**.
- Resolved issue with **Management** about the correct plan of attack for Small Business **unit** rollout.
- Developed on a local environment via nodeJS.

**Positions Held:** Senior **Javascript Developer** / Architect  
[Pratt & Whitney](http://Pratt & Whitney)

**10/2019 – 2/2020**

**Senior **VueJS Developer** / Architect for this world's leading American aerospace manufacturer with**

**global service operations, Pratt & Whitney's aircraft engines are widely used in both civil aviation and military aviation.**

- Architected and developed an engine tracking application for maintenance actions based on fleet and engine types.
- Re-architected the framework in VueJS for reusable components, Webpack configuration of Sass/CSS, and improved code coverage to 80%.
- Coded components and methods using Vue.js and Vuex.
- Resolved Jenkins shell script errors to meet front-end coding specifications.
- Configured the local environment in Windows Subsystem for Linux to match staging, dev, and production environments.
- Developed SiteMinder SSO services by setting up policies, realms, rules, and responses.
- Worked in an Agile environment.
- Experienced with CI/CD methodologies using Jira and GitHub.
- Deployed and configured services on Azure Cloud.

**Positions Held:** Senior NodeJS Developer / Architect  
[KPMG](#)

**5/2019 – 9/2019**

**Senior NodeJS Developer / Architect for this world's leading global network of independent member firms offering audit, tax and advisory services.**

- Architected and developed a cost tracker application for estimating tax audit projects.
- Integrated Microsoft Azure SSO authentication in NodeJS, decoding complex JWT tokens from AngularJS applications.
- Utilized Async/Await features to simplify code and avoid promise chaining issues.
- Designed a NodeJS app structure for database pooling, RESTful calls, authentication, form processing, data visualizations, and server-side caching.
- Developed complex GraphQL data models for external NodeJS module consumption.
- Managed an offshore team of 3 developers, ensuring rapid sprint completion.
- Translated user story requirements for the offshore team.
- Troubleshot Azure issues and coordinated with internal teams for support.
- Provided Postman scripts with mock data for QA testing.

**Positions Held:** Senior Frontend Developer (Remote Position)  
[PricewaterhouseCoopers](#)

**11/2018 – 5/2019**

**Senior Frontend Developer for this world's leading multinational professional services company.**

- Frontend developer for ClubCorp, providing member services solutions to country clubs.
- Managed stored procedures mapping of legacy jQuery code using Oracle developer tools.
- Refactored frontend code to ReactNative for cross-platform support (desktop, iOS, Android).
- Implemented Axios async/await for RESTful service mapping.
- Used React mock server for rapid component development and POCs.
- Created pixel-perfect prototypes with InVision for desktop and mobile.

- Handled Jira backlog, active tickets, and sprint merge requests.
- Participated in **best practices** discussions and daily scrum meetings.

**Positions Held:** Senior Frontend Hybrid Mobile/Desktop **Developer** (Remote Position) **8/2018 – 11/2018**  
**Adobe**

**Senior Frontend Hybrid Mobile/Desktop **Developer**/Architect for this world's leading **software** company.**

- Developed a hybrid mobile/desktop app for the Government of Tennessee using Cordova/PhoneGap/Ionic/Angular.
- Integrated **AEM service** calls into TypeScript components.
- Rapid application **development** in Angular 2 with TypeScript and RXJS for async data streams.
- Worked with AngularJS directives, controllers, filters, services, templates, events, and injectors.
- Enhanced Ionic's native features via custom classes in Angular.
- Implemented localization (l10n) with translation engines and Unicode support.
- Integrated Isomorphic-Git for streamlined CI and real-time GitHub notifications.

**Positions Held:** Senior Frontend Mobile **Developer**/Architect (Remote Position) **5/2018 – 8/2018**  
[PricewaterhouseCoopers](#)

**Senior Frontend Hybrid Mobile **Developer**/Architect for this world's leading multinational professional services company.**

- Led a frontend team to create and update features using AngularJS, consuming JSON micro-services in an **Agile** environment. Managed front-end **architecture**, pull request reviews, deployments, and releases.
- Extensively used Angular CLI for components, services, pipes, and directives.
- Worked with AngularJS directives, controllers, filters, services, templates, events, and injectors.
- Developed SPAs using Angular 2, TypeScript, Webpack, and Grunt.
- Extensive **CSS** work for styling.
- Involved in TDD methodologies.
- Used JIRA for bug tracking and productivity improvement.

**Positions Held:** Architect / Lead **Developer** (Contract Position) **1/2018– 5/2018**  
[www.groupm.com](#) New York, New York

### **General Data Protection Regulation (GDPR) Project**

- Developed an optimized framework for cookie detection and synchronization, custom modal windows, and logging using Node.js and **Java** Spring Boot.

### **Digital Media Metric Project**

- Developed an isomorphic application using **React.js** and Redux with GraphQL to capture media metrics (Digital TV, Internet and radio).

**Positions Held:** Full-stack **Developer** (Contract Position) **1/2017 – 12/2017**  
[www.alltechneeds.com](#) Jersey City, New Jersey

### **ReactJS Project (ToysRUs)**

- Architected and developed a front-end **web** application for patient **management** using **React.js**, Redux, ES6/Babel, **Web**-pack, Materialize Sass and Tealium Tag **Integration**.

## **AEM Project (FlagStar Bank)**

- Strong **Java** (**OSGi**, JSP, Servlets) and **web development** (HTML, **JS**, **CSS**, jQuery, Bootstrap, etc.) background with experience building cutting edge **web** & responsive mobile experiences. Hands-on experience with Sightly (**AEM** Templating language) and CoralUI/TouchUI framework.

**Positions Held:** Senior Full-stack **Developer** reactjs / NodeJS (Contract Position) **10/2016 – 1/2017**  
[NBC Universal](#) New York, New York

- Refactored offshore defect-prone show scheduler in ReactJS 2.0 Hybrid App (Mobile/Desktop), optimized Ajax calls, replaced heavy assets, removed duplicates, added server-side templating and smooth scrolling, improving performance from 20s to 0.8s.

**Positions Held:** Senior Front-End UX UI Architect / **Developer** (Contract Position) **3/2016 – 10/2016**  
[Royal Bank Of Canada \(RBC\)](#) Jersey City, New Jersey

- Built a custom VaR single-page app for analyzing BigData from Hadoop clusters, using **web**-sockets for data, with features for chart visualization, data drill-downs, time period selection, confidence levels, and PDF export.

**Positions Held:** Senior Back-End **Developer** (Remote Contract Position) **8/2015 – 1/2016**  
[Walmart](#) Bentonville, Arkansas

- Coded .NET **applications** for Walmart's FSMA food safety **initiative** using Visual Studio 2015 and contributed to architectural designs, prototypes, and simulations..

**Positions Held:** Senior Front-End / Tech Lead /UX (Contract Position) **2/2015 – 8/2015**  
[Fidelity](#) Jersey City, New Jersey

- Developed a fully responsive **SPA** trading application with a custom media query framework for optimized breakpoints and **CSS** data handling.

**Positions Held:** Senior **Developer** / Tech Lead (Contract Position) **11/2014 – 2/2015**  
[Medical Knowledge Group](#) New York, New York

- Developed an interactive trade-show application for Novartis on a 12ft touchscreen, using jQuery, ReactJS, CSS3/Sass, HTML5, Flash, and D3JS for drug Q&A demonstrations.

**Positions Held:** Senior **Developer** / Tech Lead (Contract Position) **4/2014 – 10/2014**  
[CVS Health](#) Florham Park, New Jersey

- Developed front-end widgets (e.g., date picker, prescription refill, insurance finder) for CVS Caremark.

**Positions Held:** Senior Front-End **Developer** / Tech Lead (Contract Position) **2/2013 – 3/2014**  
[Audible.com](#) (Amazon.com), Newark, New Jersey

- Collaborated with business partners, attended daily scrums, and delivered biweekly prototypes ahead of schedule using rapid **development** techniques.

**Positions Held:** Senior Front-End **Developer** (Contract Position) **6/2012 – 12/2012**  
[Credit Suisse](#), New York, New York

- Developed a CRM Salesforce app for **Asset Management** using EXTJS and CSS3, with media queries for responsive **design** across mobile devices and browser.

**Positions Held:** Front-End **Developer** (Contract Position) **2/2011 – 6/2012**  
[Citigroup](#), Long island City, New York

- Lead **Developer** for Citi's GTS and Bankers Advisory Portal, a dashboard app with portlets technology and Salesforce CRM **integration**.

- Positions Held:** Front-End **Developer** (Contract Position) **12/2010 – 2/2011**  
[broadridge.com](http://broadridge.com) (ADP Company), Jersey City, New Jersey
- Developed client-side **web** standards **API** for use by internal and offshore teams.
- Positions Held:** Front-End **Developer** (Contract Position) **1/2009 – 11/2010**  
[Omgeo.com](http://Omgeo.com), (Financial) New York, New York
- Developed an advanced OOP **JavaScript** framework with jQuery **API** plugin, using HTML5 for a unified UI across mobile devices and **web** browsers, including components like accordions, grids, and charts.
- Positions Held:** Lead **Developer** (Contract Position) **8/2008 – 11/2008**  
[RockstarGames](http://RockstarGames), New York, New York
- Developed an ActionScript 3.0/Flex 4.0 framework for a social club network, enhancing Rockstar Games' **web** portal communication and game experience.
- Positions Held:** Technical Lead (Contract Position) **1/2008 – 8/2008**  
[Associated Press](http://Associated Press), New York, New York
- Coded projects and mentored video editors on **best practices** for encoding, decoding, and metadata.
- Positions Held:** Technical Lead (Contract Position) **3/2006 – 12/2007**  
[Jones Apparel Group](http://Jones Apparel Group), [Barneys.com](http://Barneys.com), [Ninewest.com](http://Ninewest.com), New York, New York
- Developed and integrated **Java**/JSP front end for storm® e-commerce **software** on multiple sites.
- Positions Held:** Technical Lead (Contract Position) **11/2005 – 3/2006**  
[MTV.COM](http://MTV.COM), New York, New York
- Enhanced MTV's Overdrive and Urge (VOD **service**) with ActionScript 2.0.
- Positions Held:** Front-End **Developer** (Contract Position) **1/2005 – 11/2005**  
[AOL.COM](http://AOL.COM), New York, New York
- Developed **Web** 2.0 front-end code (**JavaScript**, ActionScript 2.0) for AOL.com music section.
- Positions Held:** Technical Lead (Full-Time Position) **9/2002 – 12/2004**  
[WASCOMAT.COM](http://WASCOMAT.COM), Long Island, New York
- Handled full life cycle **development**, data modeling, UI **design**, and implementation of the corporate website, e-commerce, and extranet.
- Positions Held:** **Applications Developer**/Technical Lead (Full-Time Position) **1/2001 – 1/2002**  
[UNIVISION ONLINE](http://UNIVISION ONLINE), New York, New York
- Extensive experience with **Java** (J2EE) using JBuilder 5.0, ERwin for database modeling, SQL **programming** in Oracle, and Starbase CVS.
- Positions Held:** **Developer**/SiteBuilder (Full-Time Position) **10/1999 – 12/2000**  
[AGENCY.COM](http://AGENCY.COM), New York, New York
- Developed with JHTML, WML, CGI, PERL, HTML, DHTML, **CSS**, and **JavaScript**.
- Positions Held:** MIS Manager/Retail Link Administrator (Full-Time Position) **4/1996 – 10/1999**  
[LION BRAND CO](http://LION BRAND CO), New York, New York
- Set up and maintained the computer system for sales, inventory, manufacturing, and accounting. Managed US inventories, warehousing, transportation, and export documentation, including Awl-Mart's B2B retail link system..

## Education

---

**High School:** New Rochelle High School, New Rochelle NY 10801  
Graduating Class of 1993

**College:** Pace University, New York NY 10001  
1995 to 1999 – Equiv 2 Yrs BSCS
