Agile Development

A/B testing and experimentation

CERTS

AEM Certified Developer 2019

Sitecore Certified Developer 2003

WORK EXPERIENCE

Adobe Development Manager

Sagepath-Reply

July 2013 - current | Atlanta, GA

Summary

Built an Adobe Experience Manager (AEM) practice by assembling a team of adept professionals with specialized expertise in AEM development, content customization, and integration. Continuous investment in training and staying abreast of AEM's evolving capabilities ensured that the practice maintained a competitive edge. Client engagement played a central role, with a focus on understanding unique business needs and tailoring AEM solutions accordingly.

- Managed a portfolio of small, medium, and large product initiatives united under a clear product strategy that generated over \$20M in revenue.
- Played an active role in development standards in requirements, coding and qa.
- Directly managed 6 senior developers and many offshore contractors, provided regular job performance feedback to improve the team's output.
- Worked with Adobe to fix and build out Commerce Integration Framework (CIF) to work with Adobe Commerce

Skills: Java, AEM, Analytics, REACT, Adobe Commerce, GraphQL, Sitecore, C#, OSGI, DAM

Software Development Manager

Sage Software

July 2005 - July 2013 | Duluth, GA

Summary

As a Development Manager overseeing a team of over 20 individuals, I've navigated the challenges of balancing technical project execution with managerial responsibilities. This role has required effective communication, strategic planning, and fostering a positive team culture. By providing mentorship and professional development opportunities, I've contributed to the success of a high-performing and motivated development team. The experience has honed leadership skills and highlighted the importance of leveraging each team member's strengths for successful outcomes.

- Converted over 60 different websites, into Sitecore CMS sites.
- Improved SLA's from an average response times from 3 days to 1 hour.
- Work with QA to provide test builds and resolve all blocking issues identified by QA.
- Work with a quality review board to manage bug list for all major milestones leading to product shipment.
- Built custom commerce application to integrate with Sitecore and SAP

Skills: C#, Sitecore, Jenkins, ASP.net, SQL Server, Javascript, REST, SOA, Lucene

Senior Software Developer/Architect

ExpoExchange

April 2003 - July 2005 | Fredrick, MD

Summary

Managed a team of developers in replacing flagship product - customizable tradeshow registration framework. Provided estimates for development schedules and resource allocation. Updated and monitored development project plan. Worked closely with Chief Software Architect in designing and implementing a core set of assemblies and coding standards that the registration framework utilizes as well as all future development will utilize. Goal was to offer a highly customizable and scalable web and windows registration solution for over 350 tradeshow in a cost effective manner..
