Objective:

Experienced **Java Developer** with over 15 years of experience in building and modernizing applications using **Java** and related technologies. Proficient in multi-threading, **web services**, and database connectivity. Seeking to leverage my technical skills and expertise in a challenging environment.

Professional Experience:

Houghton Mifflin Harcourt, Boston, MA (04/2005 – 10/2023)

Senior **Software Engineer**

Nextgen Project (02/2021 – 10/2023)

Modernized **Java** middleware, implementing microservices **architecture** on a **Kubernetes** cluster in AWS **cloud**.

Developed connectors to SAP ERP systems using **Java**, enhancing system interoperability.

Transitioned **SOAP web services** to REST using **Spring Boot**, improving system efficiency and scalability.

Optimized **Java** applications by compiling code to native binaries with GraalVM, achieving a 5x reduction in memory requirements.

Technologies: **Java 17**, **Spring Boot**, **Docker**, **Kubernetes**, AWS RDS, Python, ActiveMQ, PostgreSQL, GraalVM, GIT, REST APIs, JMS.

Senior **Software Engineer**

Enterprise ESB Project (01/2014 – 01/2020)

Led the migration from TIBCO to open-source FuseESB, reducing annual costs by \$200K.

Re-implemented codebase to FuseESB, integrating Apache Camel for routing and Apache CXF for **Web Services** and REST.

Technologies: Java 7, Fuse-ESB 6.0, Apache Camel, Apache CXF, Apache Karaf.

Java Systems Engineer

BTI Project (01/2010 – 01/2014)

Re-architected TIBCO implementation, addressing performance and scalability issues.

Enhanced system efficiency, cutting memory usage by 50% and doubling throughput without hardware upgrades.

Technologies: TIBCO Active Matrix 5.4, SAP R/3 4.7, Java.

Software Engineer

Sunrise Project (04/2005 – 01/2010)

Contributed to SAP ERP implementation, focusing on credit card customization and configuration.

Technologies: SAP R/3 4.7, ABAP, RFC SDK, JCO, C++, Java.

Fintech startup Monetran.com (01/2019 – 03/2022)

Software Engineer

- Implementing Moneda token anchor on Stellar blockchain.
- Developed a custom wallet software with typical wallet functionality.
- Environment: Docker, Go-Lang, React, PostgreSQL, GKE (Google Kubernetes Cluster), Python, JavaScript, TypeScript

Education:

Master's Degree in Computer Science

Kiev Technical University, Ukraine

Skills:

Programming Languages: Java (1.8 and up), Python, Node.js, Go, Typescript.

Web Services: Experience with REST and SOAP, JSON/XML parsing.

Multi-threading: Proficient in handling thread synchronization issues.

TCP Protocols: Knowledge in HTTP/REST/**SOAP**, TCP Sockets.

Databases: Experience in connecting with various relational and non-relational databases.

Others: **Docker**, **Kubernetes**, AWS, ActiveMQ, PostgreSQL, GIT, JMS, GraalVM.
