Senior iOS Software Engineer

<https://github.com/bmantzey>  
<https://www.linkedin.com/in/brandon-m-0377098>

## OVERVIEW

- Sixteen year mobile software engineering veteran with a diverse background.
- Native iOS development specialist with other various experience, including three years Android.
- Extensive development experience using Swift and Objective-C in Xcode.

## TECHNICAL SKILLS

|                    |                                                                                                                                                    |
|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| Technologies       | iOS, Swift, Objective-C, Kotlin, UIKit, SwiftUI, Flutter, Dart                                                                                     |
| Tools              | Xcode, VS Code, Android Studio, Firebase, Jira, Github, CocoaPods, git submodules, Postman, Instruments, Swift Package Manager                     |
| API/SDK Experience | AlamoFire, PromiseKit, GraphQL, Realm, Google Analytics, MapKit, Google Maps, MediaPlayer, CoreData, CoreGraphics, CoreLocation, OpenGL ES, OpenGL |
| Methodologies      | TDD, CI/CD, Agile, Sprint/Scrum, MVVM, Clean Swift, MVC                                                                                            |
| Other Skills       | Java, C, C++, FlutterFlow, JSON, REST, git, svn, SQL, OAuth, Bluetooth, SQLite                                                                     |

## DEVELOPMENT EXPERIENCE SUMMARY

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                       |            |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|------------|
| <b>Perficient</b> , <i>Lead Technical Consultant</i>                                                                                                                                                                                                                                                                                                                                                                                                                             | Nov, 2021 — Jan, 2024 | Remote     |
| <ul style="list-style-type: none"><li>• Developed and maintained mobile apps for major clients including Facebook, TD Ameritrade, and Charles Schwab using Xcode (Swift &amp; Objective-C) and Android Studio (Kotlin).</li><li>• Delivered a dynamic and robust messaging system which facilitated the transition of over 13.5 million TD Ameritrade customers to the Schwab Mobile app.</li><li>• Contributed to the development of an internal FlutterFlow project.</li></ul> |                       |            |
| <b>Garmin International</b> , <i>Senior Software Developer</i>                                                                                                                                                                                                                                                                                                                                                                                                                   | Oct, 2019 — Oct, 2021 | Olathe, KS |
| <ul style="list-style-type: none"><li>• Significantly contributed to the development and launch of a brand new app, Garmin Dive.</li><li>• Utilized MVVM architecture for the development of many features using many technologies such as Bluetooth, GraphQL, MapKit, PromiseKit, Realm, and Google Analytics.</li><li>• Collaborated and worked between different departments to support various features for Garmin Golf, Garmin Jr. and Garmin Connect.</li></ul>            |                       |            |
| <b>Lyndsay</b> (formerly Elecsys), <i>Senior Software Engineer</i>                                                                                                                                                                                                                                                                                                                                                                                                               | Apr, 2017 — Oct, 2019 | Olathe, KS |
| <ul style="list-style-type: none"><li>• Rewrote company flagship iOS app utilizing Clean Swift Architecture pattern.</li><li>• Collaborating closely with product owners and working alongside API developers, developed multiple features rapidly per business requirements, receiving special recognition from CEO.</li><li>• Lead and supported a team with the production and publishing of a brand-new Android version of their mobile app.</li></ul>                       |                       |            |

**GE Power and Water, Senior Software Engineer (Contract)**      Sept, 2016 — Feb, 2017      New Orleans, LA

- Work on iOS project showcasing technologies such as Fleece camera, various UIKit capabilities, utilizing RESTful API's, data persistence with UserDefaults and CoreData, and more.
- Created and demonstrated new maintenance tracking app for use internally by GE.
- Worked with consultants directly from Apple to explore other features which may provide useful utility for this maintenance tracking app.

**VML, Software Developer (Contract)**      Aug, 2015 — Feb, 2016      Kansas City, MO

- As a part of an Agile team, developed and implemented features for several clients.
- Utilizing Swift and the Clean Swift Architecture pattern, developed LegalShield and Hills Pet Nutrition apps from start to finish and contributed to the ongoing development of QuickTrip.

**Exploria, Lead iOS Software Engineer**      Apr, 2012 — Aug, 2015      Hartford, CT

- Maintenance on multiple iPad applications written in Objective-C, some with legacy with MRC and some with ARC.
- Ensured secure synchronization of data from web services utilizing OAuth2.
- Created a system to encrypt and decrypt data to and from a local SQLite database using 3DES encryption and loaded all relevant data into live presentations.
- Managed the development, distribution, and deployment of custom branded iPad projects for multiple Pharma clients.
