Expertise in Identity Lifecycle Management, Access Provisioning, process improvement and automation, and operational support of Identity systems. Experienced team lead with a customer service and security mindset.

PROFESSIONAL EXPERIENCE

Microsoft Corp via Insight Global, Issaquah, WA

2022 – 2023

Azure Identity Support Engineer – Contractor

- Contractor
 - Providing support primarily in Conditional Access, Identity Protection, and Multi-Factor Authentication for our customer's Azure Cloud environments
 - Troubleshooting for technically complex problems identified in Microsoft products
 - Managing case resolution in Dynamics 365 and Rave
 - Managing critical situation issues promptly, coordinating resolution to major incidents.
 - Collaborating with Technical Leads and escalation resources when appropriate
 - Contributing to improvements in customer satisfaction metrics
 - Collaborating on cross-team and cross-product technical issues by working with resources from other teams to resolve customer issues
 - Providing up-to-date communications to my customers on the progress and status of their cases
 - Responsible for efficiently managing the relationship with customers
 - Thoroughly documenting my customer's cases, including scope, troubleshooting steps, logs, and resolutions

Centene via TEKsystems

2021 - 2022

IAM Analyst

- Analyst
 - Work with **management** and system owners to gather requirements for systems and applications, intake process, for **Sailpoint** system.
 - Termination support to ensure access of accounts, including their access entitlements, are done accurately and completely
 - Adhere strictly to compliance and operational risk controls in accordance with regulatory standards, and client's policies and practices

B|E|C|U, Tukwila, WA

I have held several positions at BECU during my 24 year career with the credit union and have developed my cyber security and **technical skills** and capabilities over this **time**.

Identity Access Management (IAM) Administrator

1997 – 2021

July 2016 - Present

Working within the IAM Team, a division of the Cyber Security (Information Security) organization, consisting of IAM Engineers and Administrators, I contributed with administrative and operational activities:

- IAM administrator lead:
 - Ensure that employee transitions are conducted in a timely manner
 - Point of contact/escalation between Service Desk, and other operations teams, for IAM
 - Point of contact for IAM team for provisioning activities, numerous projects and acted as team lead to cover manager PTO
- Role Based Access (RBAC **implementation**):
 - Created role templates for over 25 roles in the organization
 - As part of an agile team focused on **Identity management** automation, transitioned the existing role templates to Access Profiles and Roles in IdentityNow
- Managed, provisioned, deprovisioned, and troubleshooted identities in CyberArk, ERPM, MFA, and

- RSA.
- Access Certifications:
 - Developed the early process of intake and execution of the manually managed access review / certifications
 - Provided requirements, oversight, and QA in the process for migrating access certifications to automated IdentityNow solution.
 - Developed intake process for new applications into automation
 - Responsible for ensuring application certifications were managed and completed within schedules stipulated by compliance and audit. Designed and implemented a process to ensure timelines were met and ensure compliance with NCUA and other governing entities.
- System configuration and administration for IAM systems, such as Identity Lifecycle and Governance (RSA), IdentityNow (SailPoint) and Imprivata OneSign Single-Sign On
 - Support the organization by performing on-call duties on a rotating basis
 - Respond to security alerts that are triggered in SIEM (Exabeam) and work with SOC to identify proper action in response
- Audit and Compliance:
 - Provide evidence and assist auditors with testing and validation processes
 - Participate in solutions to resolve findings that may result from audits
- Access Provisioning:
 - Granted access to network resources and applications after validating approval, and adhering to the least privileged access model
 - Provision elevated accounts for administrative access
 - Follow change management standards when performing system or large end user based changes
 - Work with vendors and partners to configure, maintain and support IAM systems
 - Managed, provisioned, deprovisioned, and troubleshooted identities in CyberArk, ERPM, MFA, and RSA.
- System management for Imprivata application:
 - Managed the health of Imprivata appliances
 - Conducted testing for new agent and appliance versions in the test environment
 - Managed users and devices in the system

- Managed licenses and usage
- Managed upgrades to appliances and agents
- Managed testing installations
- Communicated with end users and managers regarding testing opportunities and upgrades
- Created and maintained **documentation** for the application
- Submitted trouble tickets when issues arose
- Training:
 - Provide hands on training for new Interns, Contingent Staff, Contractors, and new Employees in our department
- Maintain and document the workflows for **onboarding** employees, contingent staff, and contractors, transferring employees, terminating employees, and receiving requests for name changes
- Participate in the creation of system and process **documentation**, including data flows, process maps and support plans
- Azure Environment:
 - Being developed shortly before departure
 - Managed provisioning via on-site Active Directory when security group name was provided

BECU Service Desk

Service Desk Analyst Lead

July 2003 – December 2016

Promoted from Analyst to Lead role to be acknowledged for the leadership work I took on in the analyst position, and the capability of performing the additional responsibilities for leading the team of analysts:

- Support Schedule **Management**:
 - Create our schedules, work from home days, on-call schedule and any PTO requests as needed to ensure proper coverage
 - Point of contact when my manager is out of the office
- Setup of new Neighborhood Financial Centers, including having created and maintain the **documentation** for setting these centers up in all the necessary applications as well as ensuring the computers, printers and telephone setups are complete and documented

- Ensure all **documentation** for the Service Desk is accurate and up to do date as well as coordinating the creation of new documents
- Represented the Service Desk on numerous projects
- Go-to person on the Service Desk for the business department managers

Service Desk Analyst

January 2001 – June 2003

Promoted from Member Services Consultant to Service Desk Analyst, selected by leadership for mentoring and provided a **technical** training path to acquire foundational **skills** for the service desk role. Highlights of my **time** in this role include:

- Development of the security process in place to validate a caller, prior to releasing any access or password information
- Setup of new Neighborhood Financial Centers, including having created and maintain the **documentation** for setting these centers up in all the necessary applications as well as ensuring the computers, printers and telephone setups are complete and documented
- Conducting training for staff, group or individual to grow overall capabilities
- Learned how to complete hardware builds for laptop and workstation replacements and issue to new hires
- Ensure all **documentation** for the Service Desk is accurate and up to do date as well as coordinating
- Answer calls and respond to requests, provide service and **technical** support to credit union staff
