Security Tools: Azure Sentinel, Microsoft Defender, Azure Monitor

Languages: PowerShell, Python, Bash

Operating Systems: Windows, Linux, UNIX

Soft Skills

Leadership, Communication, Problem-Solving, Adaptability, Time **Management**

Certifications

Microsoft Certified: Azure Administrator Associate
Scrum Master Certified

ITIL V3 Foundation Certified
CompTIA Security +

CyberArk PAM Defender

Education

Certificate in Cybersecurity, University of Toronto, Canada (2021)

Master of Science in Computer Technology, Anna University, India (2005)

Bachelor of Science in Computer Technology, Bharathiyar University, India (2003)

Professional **Experience**

Security Advisor **Senior**

Intact Financial Corporation, Mississauga, ON, Canada

April 2023

– Present

Intact Financial Corporation is a leading provider of property and casualty insurance, specializing in personal, commercial, and specialty insurance solutions. Known for its strong market presence in Canada, the UK, and Ireland, Intact is committed to helping people, businesses, and society prosper in good times and be resilient in

bad times. The company's core values include integrity, respect, customer-driven focus, excellence, and generosity, guiding its operations and ensuring a strong, customer-focused approach (IntactFC)

Responsibilities:

- Deliver **web** and application development, maintenance of Azure AD **services** Like single sign on (SSO) and multifactor authentication (MFA) and troubleshoot issues related to **API web applications**. Mainly focused on Azure MFA.
- Providing **web applications**, Single-Sign on and Federation technology with Azure AD using protocols like, SAML, OAuth, LDAP.
- Responsible to onboard/Integrate new **applications** to Azure AD.
- Working closely with **Architecture** and designed SSO authentication solutions for internal and third-party **applications** and vendors.
- Planned, tested, and implemented comprehensive security solutions for monitoring and protecting company assets in the Azure **cloud**, using threat detection and response and Azure security technologies, achieving a 25% increase in threat detection accuracy.
- Analyzed and monitored security tools and technologies, including Azure Sentinel, Azure Monitor, and Azure Firewall, enhancing endpoint protection and vulnerability **management**, leading to a 40% decrease in security incidents.
- Deployed and administered CyberArk Privilege **Cloud**, enhancing privileged access **management** and ensuring secure **cloud** administration.
- Led CyberArk Privilege **Cloud implementation**, improving privileged account security and reducing unauthorized access by 25%.
- Managed the IBM Security Access **Manager** (ISAM) platform and identity **management**, ensuring 99.9% system uptime.
- Managed certificate renewals and deployment for ISAM platforms, ensuring secure communications for over 50+ certificates annually.

Senior Consultant

CGI INC, Toronto, ON, Canada

May 2021 -

March 2023

CGI is a leading global IT and business consulting **services** firm, specializing in **strategic** IT and business consulting, systems integration, managed IT and business process **services**, and intellectual property solutions. Known for its commitment to insights-driven and outcomes-based **services**, CGI aims to help clients accelerate returns on their IT and business investments. The company's core values focus on building trusted relationships through client proximity, providing industry and technology expertise to meet the needs of customers and citizens (CGI Inc.).

Responsibilities:

- Designed and managed Role-Based Access Control (RBAC) models, facilitating accurate access permissions and minimizing privileged access risks.
- Led the **implementation** of an Integrated Risk **Management** (IRM) **solution**, using Cyberark, Linux, and Oracle, which reduced IAM task completion time by 80%.
- Implemented identity and access **management** solutions, enhancing data security and compliance across multiple platforms.
- Managed L2 & L3 infrastructure support for customer inquiries, effectively resolving incidents related to access and account **management**.
- Created and maintained detailed documentation on procedures, configurations, and technical settings.
- Supported application upgrades, evaluated new technology, settings, and functionality.

Lead Consultant

Virtusa Consulting & **Services** Inc, Toronto, ON, Canada

November 2019 -

May 2021

Virtusa Consulting is a global IT **services** and consulting company specializing in **digital** transformation, engineering **services**, and industry-specific solutions. Known for its "Engineering First" approach, Virtusa focuses on driving innovative, sustainable business outcomes for clients. The company is committed to core values of passion, innovation, respect, and **leadership**, aiming to deliver extraordinary results and improve business processes through cutting-edge technology and domain expertise

Responsibilities:

- Deployed and maintained Azure **cloud** infrastructure, collaborating with stakeholders to define **user** roles and manage Active Directory, resulting in a 25% improvement in operational efficiency.
- Analyzed and optimized data pulls to clean up **user** access, using SAML and Active Directory, enhancing security measures and reducing access-related issues by 40%.
- Managed network accounts, primarily in Active Directory.
- Addressed end-users' access and security-related issues, recommending improvements to enhance security posture.
- Maintained detailed documentation on procedures, configurations, and technical settings.
- Conducted operation-level troubleshooting to minimize end-**user** and system downtime.

System Analyst

Birlasoft Inc, United States

July 2015 - August

2019

Birlasoft Inc is a global leader in **digital** and IT **services**, specializing in **cloud**, AI, and **digital** transformation solutions. Known for its consultative and **design**-thinking approach, Birlasoft excels in enhancing business efficiency and productivity. The company is committed to values of engagement, dependability, and innovation, aiming to drive sustainable growth and societal productivity ([Birlasoft](#)).

Responsibilities:

- Provided comprehensive IAM support, including the **design** and **implementation** of RBAC, improving secure access **management** and compliance.
- Supported the migration of 45,000 employees from Oracle HRMS to Workday, ensuring seamless data transition and integration, which resulted in a 98% **user** satisfaction rate.
- Implemented Multifactor Authentication (MFA) and SSO, leveraging Workday and Oracle, which strengthened security protocols and reduced unauthorized access by 70%.
- Supported application upgrades, evaluated new technology, settings, and functionality.
- Generated reports for in-depth analysis and data collection related to IAM issues.
- Participated in projects and production support operations focused on implementing IAM integrations and RBAC strategies.

Achievements

- Reduced security vulnerabilities by 30% through Azure **cloud** security **architecture design**.
- Improved threat detection accuracy by 25% with comprehensive security **solution implementation**.
- Decreased security incidents by 40% through enhanced monitoring and analysis of security tools.
- Boosted system uptime by 35% by optimizing Azure **cloud** and container security tools.
- Achieved an 80% reduction in IAM task completion time with IRM **solution implementation**.
- Enhanced security compliance, reducing audit findings by 20% through detailed documentation and process automation.
- Reduced unauthorized access by 70% with MFA and SSO **implementation**.
- Enhanced overall security posture, reducing security-related downtime by 15% through continuous improvement initiatives.
