AHEAD LLC, Chicago, IL
to 7/2024

5/2022

Observability Engineer

Managed the monitoring and integrated **automation** for digital business cloud-based LogicMonitor. Established and managed the system and identified and detected anomaly patterns and provided solutions. Alert **analysis** by customer to enhance client experience and metrics. SAAS monitoring setup for Azure, AWS and GCP cloud in LogicMonitor application and dashboard monitors created to monitor spending. Elastic ELK training provided on basics for future monitoring.

- Application Programming Interface used for gathering, sharing and changing information.
- Participation in **management** meeting on vendor cost **analysis** quarterly.

- Addresses scripting problems using bash, powershell, Groovy, and regex, python.
- LogicMonitor application **management** and providing support for all teams. Implementation of product, **software upgrades** and administration for the company and clients.
- In charge of proof of concept and change **management** for both new and existing solutions, as well as project management planning using ServiceNow stories to assess project scope.
- Provided POC on new products and existing toolset.

CANADIAN NATIONAL RAILWAY, Homewood, IL

5/2018 to

5/2022

System **Engineer**

Implemented, tested and supported the railroad application (PDS) Precision Dispatch System to address government mandated requirement standards for monitoring and controlling of train movements. Administered applicational support for Train **Management** Dispatch System (TMDS), Positive Train Control (PTC) and Siemens (BOS) Back Office Server.

- The CN railroad network improved by delivering the PDS application project service delivery ahead of schedule.
- Managed project **management** deliverables, incidents, and planned modifications pertaining to BOS, PDS, and PTC applicational **upgrades**; updates were supplied, authorized, and implemented.

ERIC ATWOOD

PAGE TWO

CANADIAN NATIONAL RAILWAY, Homewood, IL (continued)

- Responsible for application design, deployment, implementation and creation phases.
- Expert in Weblogic, Tuxedo, and MQ middleware components. In charge of all updates, **upgrades** and **troubleshooting**.
- Validated information on issues by querying SQL and Oracle databases. Grafana used to parse detailed database information.
- Served as SME on all transportation applications (TMDS, PTC, BOS, PDS) for rail traffic dispatchers and other CN personnel.
- Investigated and verified all railroad transportation-related concerns pertaining to train movement and applications in my capacity as a SME.
- Created and administered Confluence page for team knowledge articles and documentational reference.
- Java debugging and Oracle Weblogic tracking. JDK updates, server restarts, and locating JVM issues.

UNITED AIRLINES, Des Plaines, IL

10/2016

to 5/2018

System **Engineer**

Accountable for the remediation and support of critical airline applications and company website functions using

AppDynamics. Liable for the **troubleshooting** of all Middleware components (MQ, Tuxedo, Weblogic). Managed the support for all operating systems and applications. Administered all company monitoring tools HP (BSM, SiteScope, HPSM, Insight Manager, OpenView), SCOM.

- Managed teams daily change, **problem** and incident **management** calls, identifying root cause and next steps.
- Provided information for the escalation **management** team on all issues while serving as the lead for change and incident **management** on important outage calls.
- Ability to capture, organize, analyze information and concurrently work with various monitoring tools.

NUVEEN INVESTMENTS, (TIAA) Chicago, IL

7/2015 to

10/2016

NOC Technician II

Competent technical support and admin for a range of monitoring solutions in an enterprise setting, including (SCOM, SCCM, HP BSM, SiteScope, SMC, HPSIM, OneView, and SCOM). TWS batch job scheduling, processing and remediation. Coordinated request for datacenter and minor cabling, rack, stack. Worked closely with the virtualization team on monitors and remediating issues.

- Symantec NetBackup remediation and support.
- Supporting of infrastructure, applications and **troubleshooting**.
- Remediated network equipment issues reported in Solarwinds.
- Monitors and troubleshoots MPLS circuit problems until resolution with vendor.
- Microsoft patching validation through SCCM for server updates performed monthly.

MOTOROLA MOBILITY, (A Lenovo Company) Chicago, IL

3/2014 to

7/2015

NOC Lead Support/Shift Supervisor

Managed Corporate IT and Cloud Services 24x7 (NOC) and the operations of the **production** environment. Shift supervision and operational focus on the **production** environment to meet SLA and uptime requirements. Worked closely with Nagios, Cacti and HP BAC system **software** and VMware. Works with Google products GCE (Google **Computer** Engine), Big Query and GAE-(PaaS) Cloud computing for platform for developing and hosting web applications. Familiar with Apache Hadoop using Jetty for Java-based web server and java servlet support.

- Managed the operational issues with network infrastructure and equipment to ensure maximum system availability and throughput is obtained. Assisted with scheduling projects, assigning tasks, and conducting daily & monthly status meetings.
- Investigate Netapp filer issues, validate the **problem** and works closely with vendor to schedule repair.
- Supported and managed OTA (Over the Air) smartphone campaign pushes and **upgrades**.
- Linux, Windows administration functions as needed.
- Supported the Hadoop framework, apps, and Cassandra database administration.

SPRINT, Overland Park, KS

2/2013 to 4/2014

Technical Operations / Web System Support /Project Program Mgr.

Assembled project teams and assigned individual responsibilities to guarantee project is completed on time. Utilized website monitoring and analytics tools, such as (Tealeaf, Keynote, Site Catalyst and Gomez). Tools used to Identify and repair **performance** bottlenecks before user experience degradation along with AppDynamics. Identifies areas for improvement in design, functionality, flow, and usability. Monitored measurements of web page availability and transaction **performance** with Gomez. Created Gomez scripts, dashboards and monitors.

- Measured web site page views, visits data with Omniture (Site Catalyst). Providing real-time web analytics intelligence for strategies and marketing initiatives, and **problem** resolution.
- Used Tealeaf CX to provide visibility into the online customer session experience. Monitored Tealeaf dashboards for changes affecting ecommerce.
- Investigated UI SDK captures for unusual customer behavior and interaction with RIAs in Tealeaf.

GLOBAL EMPLOYMENT SOLUTIONS / MORNINGSTAR, Chicago, IL

7/2012 to 2/2013

Network Technical Support Admin

Provides application support and load balancing (LTM, GTM). Implemented client requests for F5 load balancer configuration changes in an enterprise financial data network. Duties included the setup and use of Nagios, Cacti and BMC Patrol Suite (TM ART, BPPM). Complete monitoring of the availability and response times of events, websites and responsible for HP Insight Manager for server, device issues and network **management**. **Troubleshooting** of VMware ESX hosts issues reported and cloning of VM's also. Backup VM snapshots logs removal. NetApp monitoring of SAN and handling of incidents. Provided telephone, email support to both internal and external customers. Troubleshoot and resolves 1st, 2nd level technical issues with applications, websites and infrastructure hardware.

- Log issues and follow associated processes to ensure consistent service and tracking, triaging of problems.
- Maintain up-to-date inventories of hardware, cable identification, and floor plans and performs daily checks.
- Recommended monitoring aspects and scope for new additions to the environment accounting for both best practices and environmental nuances.
- Setup of new alerting on key events and additions or revisions for monitoring tools in HP SiteScope.
- Responsible for disk drive array replacements and service as well as file transfers remediation.

CLASSIFIED VENTURES, Chicago, IL

11/2010 to 01/2013

Operations Center Administrator II

Website **analysis** and application monitoring with tools such as Dynatrace, SCOM, Tivoli 6.2.3, NetCool, Omniture and Keynote. Managed the apps, website accessibility and access, **management** of databases, and associated hardware

for the infrastructure, which included round-the-clock support and monitoring. Appropriately investigated, remediated and escalated issues and also engaged level 3 technical support teams until the **problem** is resolved.

- Managed the code **release** process, implemented changes/project **management** and used Build Forge for monitoring.
- Monitor on-line applications and database systems using Dynatrace, submit jobs for execution for Data Systems
- Actively monitored Tivoli Enterprise/Integrated Portals (TEP, TIP) for application, database, system or server and cluster related incidents. Alerted on all SCOM, NetCool and Omnibus reporting of incidents through Tivoli (TEP).
- Demonstrated technical aptitude, including **troubleshooting** experience covering systems networking and website applications with Dynatrace. Identified and investigated areas needing improvement due to design, functionality, flow, usability, etc.
- Proficiently administered problems with Unix, Linux and Windows. Log file **analysis**, scripts execution and file manipulation. **Management** of the JVM instances.
- Performed Change **Management**, code **release** process and integration performed using Build Forge
- Supported and managed middleware components, such as WebSphere, for Java/J2EE based applications.
