

Fikir Kebede Debele
Wylie TX
(Former Citi Contractor)

Summary

- Talented programmer with 6+ years of experience employing **Agile** and **Scrum** methodologies to guide the creation of **web** and desktop applications using **Java**, JSP, Servlet, AJAX, **JSON**, HTML, and CSS through their entire development lifecycle, including system assessment, back-end and front-end development, **integration**, **testing**, and **deployment**.
- Proficient with modern coding standards and emerging technologies. Adept at building complex modules for **business** logic, layer communication, Micro **Services**, data access, and multithreading. Implemented multiple projects using Service Oriented **Architecture** (SOA) and designs, **programming**, **testing**, debugging and **deployment**.
- Excellent interpersonal, communication and collaborative skills to enable seamless cross-functional cooperation and to achieve optimal project delivery.

Areas of Expertise

- Application **Programming**, Enterprise **Architecture**
- **Agile** Methodologies, Development Lifecycle
- User Interface, Libraries & Methods, Multithreading
- **Business** Logic, Asynchronous Messaging
- **Web Services**, Dynamic **Web** Pages, Data Access Objects
- Product **Deployment**, Performance Improvement
- **Unit Testing**, Coding Standards, Emerging Technologies

Technologies

- **Languages:** **Java**, JEE
- **Web:** HTML5, CSS, JavaScript, **JSON**, jQuery, AJAX, **XML**, JSP, Servlet, Tomcat
- **Frameworks:** **Spring** (MVC, Security, AOP, **Spring**-boot), Hibernate, EJB, Hadoop, MVC Framework, OAuth2, Struts
- **Databases:** MySQL, Microsoft SQL Server, REDIS
- **Tools:** NetBeans, Eclipse, JUnit, MySQL Workbench, Smart UML, Star UML, Maven, STS, Visual Studio, Ant, iReport, Weka, R-Studio, SPSS, Swagger UI, DML
- **SDLC:** Waterfall, **Agile**, **Scrum**
- **Design Patterns:** Factory, Façade, Mediator, Iterator, Command, MVC, Composite, Strategy, Singleton, Observer, State
- **Platforms:** Windows
- **Web Services:** SOAP, **RESTful**, JMS, JSF
- **Messaging Services:** Kafka
- **Cloud:** Predix UAA, Time series, **Cloud** foundry (PCF), Block chain, **Cloud** Bees.

Education

- **Master of Science in Computer Science (September 2016)**
Smart Choice Online Shopping: Online shopping system permits users to buy products online, allowing clients to register, login, browse, update products in cart, make payment, read feedback, Project built with **Spring**, ORM, JSP, MySQL, and JPA and **RESTFUL** API. (Done by September 1, 2016)
- **Maharishi University of Management - Fairfield, Iowa**
Coursework: **Software Engineering**; Object-Oriented **Programming**; **Spring** & Hibernate Frameworks; Enterprise **Architecture**; Advanced **Software** Development; Design Patterns & Frameworks; Database; Modern **Programming** Practices; Design & **Analysis** of Algorithms; **Software Testing**; Big Data; Big Data Analytics; **Web** Advanced **Architecture**; Advanced **Software** Design
- **Bachelor of Science in Computer Science**, HiLCoe **Computer Science** School - Addis Ababa, Ethiopia

- **Java** Programmer Certification, **Java** SE6, **Programming** SE6, Oracle Certified Professional, **Java** SE6 Programmer

Professional Experience

Wipro Limited CO, Plano, TX

Jun 2019 - Till date

UNION BANK SEM TEAM, Plano, TX

Sep 2022 - Till date

Responsibilities:

- Analyzing and fixing any reported defects. For any bug fix code change consuming **SOAP web services** to retrieve the information from the back end.
- Working on Migration Projects from Union Bank to US Bank.
- Writing scripts to migrate queries and to migrate standalone file which is working by creating new directory to drop different kind of files to that created folder.
- Developed back-end logic with Core **Java** using technologies including Collection Framework, Multithreading, Exception Handling, Generics and Annotation.
- Worked with core **Java** concepts like Multithreading, Collections Framework, File I/O, and concurrency.
- **Environment:** **Java**, **Spring** Boot, **Spring** MVC, **AJAX (JSON)**, **RESTful Web Services**, SonarQube, Open API

US-BANK PIVOT Development TEAM, Plano, TX

Aug 2021 - Sep 2022

Agile and **CICD** based consumer division for financial **services** and applications. **Java Developer** Worked with PIVOT team on a live profitable Pivot Applications, Having application, **Business** credit cards modules. Project has a complex design and a high code reusable approach for **business** borrowers of US bank in the US. And applied **spring cloud** and **cloud** bees, **spring** Boot framework and **Java implementation** to develop the application and ship multiple releases into production in iterative manner.

Responsibilities:

- Involved in designing and developing **Restful** API's and creating micro service applications.
- Integrated with SonarQube to improve the code quality, decrease major and minor tech debts. If there is any vulnerability checking from Black duck and fortify and upgrading libraries.
- Developed Required Action classes and presentation layer forms and **Java** beans containing the **business** logic with the help of Core **Java** and **java** 8 features.
- **Unit testing** of developed features using Junit and Mockito frameworks, cucumber, and feature
- Developing Micro **Services** Applications for **Business** borrowers credit application forms
- Creating new API's and updating existing APIs as per Management (product Owners) request.
- Deploying the changes to **deployment** env, from test to Production
- Messaging service using Kafka.
- **Deployment** env **cloud** bees, and Orchestration **Kubernetes**. (**Cloud** bees internally using AWS)
- **Deployment** Environment **Cloud** Bees
- Worked on core **java** technologies like Multithreading, collections, and exception handling mechanisms.
- **Environment:** **Java**, **Spring** Boot, **Spring** MVC, **AJAX (JSON)**, **RESTful Web Services**, Black Duck, Fortify, **Cloud** Bees,

MUFG-Union Bank, Plano, TX

Jan 2020 - Aug 2021

Team: AIP

Responsibilities:

- Consumed **SOAP** and REST **Web Services** to retrieve the information from the back end.
- Implemented code using core **java** technologies like Array, Collections, multithreading and exception handling methodologies
- Interfaced with the MySQL back-end database by integrating **Spring** with Hibernate.
- Expertise working on **continuous build integration** (CI/CD) tools **Jenkins**.
- Developed JUnit test classes for **unit testing** purposes.
- Fixing existing project bugs, defects, and adding new functionality for MVC project, Technology, **Java**, JS, HTML.
- Developing API's end to end using Micro **services**.
- Deploying to **deployment** environment, **deployment** environment open-source **cloud** foundry (internally using AWS)
- Rest **services** templates are generated using swagger specifications.
- Applied **Spring** AOP for cross cutting concerns to avoid scattered and entangled codes.
- Improved **software** debugging by writing JUnit tests.
- Worked on Core **Java** and its libraries in creating the **java/J2EE web** application's **business** Logic.
- **Environment:** **Java**, **Spring** Boot, **Spring** MVC, AJAX (**JSON**), **RESTful Web Services**, Open API.

T-Mobile Device finance and collection, Plano, TX

Jun 2019 - Oct 2019

Responsibilities:

- Added Logging and Exception for 131 APIS, by using cross cutting concern AOP Logic.
- Proof of Concept for credit upgrade Limit (working in technical **Architecture** and Develop APIS).
- Core **java** methodologies exception handling, collections, Arrays, and using **java** 8 lambda expressions.

TCS

Nov 2016 - Jun 2019

CITI GROUP (CITI Bank Corporate), Irving, TX

Aug 2017 to Jun 2019

- **Agile** and CICD based consumer division for financial **services** and applications **deployment** environment PCF. **Java Developer** Worked with multiple teams on a live profitable Acquisition application, Having application, credit cards and invoice modules.
- Project has a complex design and a high code reusable approach for multiple boarded partners of Citi bank in the US. And applied **spring cloud** and Netflix co technologies mixed with **spring** Boot framework and **java implementation** to develop the application with test driven approach (JUnit, Power mock and Mockito) besides, Struts and **spring** legacy application and ship multiple releases into production in iterative manner.
- **Environment:** **Java**, **Spring** Boot, **Spring** MVC, AJAX (**JSON**), **RESTful Web Services**, Struts, PCF.

General Electric Power Project, Boston, MA

November 2016 - August 2017

Java Backend Developer

- Created a rail transport Application. Working Backend **Developer**, create data access objects. Created **java**-based relational mapping tool. Performed impact **analysis**, **unit testing**, and troubleshooting, I used the technologies **Java**, **Spring** MVC, **Spring** Boot, Micro **Services**, **Web Services** (**RESTFUL** API), Junit **Testing**. **Cloud** Space (Predix), Data Base PostgreSQL. By using Linux commands push project to **Cloud**.
- Changing the existing Health control system application to a Multi Tenancy pattern based micro application.
- Implemented the application security using OAuth2.0 to apply a layered token-based authentications on the user's **RESTful** requests, Token generation based on Predix UAA working

with most of predix.io **services**. For this application microapps **architecture** and adding security(oAuth) by using **Cloud** Foundry Predix catalog **services** API to Generate token, create tenants, oAuth2 clients, and users, also identify the tenant's identity and functionality when the user use the application from the client side by sharing the application schemas hierarchically.

- For Gen & Motor Monitoring App I had a module Time Series, Predix **cloud** foundry has time series catalogue service APIs, I implemented **java** code to use the time series APIs from my application, after passing the necessary security to ingestions and Querying data from Time Series database.
- **Environment:** **Java**, **Spring** Boot, **Spring** MVC, AJAX (**JSON**), **RESTful Web Services**, App Hub, MicroApps, **Cloud** Foundry (Predix-> internally using AWS).
