TOP SKILLS

- **Software** tools: Python, **SQL**, **SAS**, **Tableau**, **Excel**, UNIX
- **Fraud risk**, **analytics**, **segmentation**, **waterfall risk setups**, **credit risk**, **machine learning** (classification and regression), **data** pipelines, **feature engineering**, **data visualization**, **A-B tests**

EXPERIENCE

EXL Service (Consulting at Large Bank)

New York, NY

Senior Data Analytics

Consultant

Aug 2021-

Present

- **Manage bank's debit signature card fraud analytics portfolio and determine risk strategies while managing customer experience expectations.**
 - Portfolio has lowest losses in years under my leadership (**estimated over \$10M loss reduction**).
- Train and develop **team** members in risk **data** analytics.
- **Leverage analytics and decision trees to identify risk and build risk controls.**
 - Highlights include a rule built on crypto merchants and rules on Apple Pay and Google Pay transactions that are **projected to reduce \$6M and \$800K in fraud annually**, respectively.
- Optimized risk setups for more than 10 payment product lines **reducing hundreds of operations hours**.
- **Built decision trees and logistic regression functions, created pipelines and engineered new features in SAS and SQL to better augment our fraud detection and prevention abilities.**
- **Top 10% finisher in company's time series forecasting ML competition** (November 2022) and awarded **EXL Emerging Analyst** award for **January 2023**.
- Provide custom ad hoc analytics queries and summarize projects to stakeholders.

Fiserv (First **Data** was acquired by Fiserv)

Jersey City, NJ

Senior Risk Analyst

July 2019-July 2021

- Responsible for determining and implementing risk strategy for the largest revenue generating merchant, Walmart.
- Portfolio met or surpassed every month's revenue forecast due to excellent customized risk controls and innovative risk strategies.

- Decreased gross warranty by **\$700K in 2019, \$1.5M in 2020, and \$3.5M in 2021**
- Used **machine learning** algorithms such as random forests, decision trees, and stepwise logistic regression functions to more effectively select variables and identify high risk segments.
- Responsible for “purchase product code” project where we implemented new variable and variable derivatives into our risk strategy to increase accuracy of existing rules and **models** in risk setup.

Risk Analyst (First Data)

May 2018-June 2019

- Created predictive **models** using stochastic gradient boosts and regression **models** in **SAS, SQL and UNIX** to reduce risk and increase revenue associated with our transaction warranty product.
- Improved our model evaluation **process** by implementing “Area Under the Curve(AUC)” and Gini **statistics**.

EDUCATION

Baruch College, Zicklin School of Business

New

York, NY

MS Statistics

December

2016

Syracuse University

Syracuse,

NY

BA in Economics and Psychology

May

2010

ADDITIONAL SKILLS & QUALIFICATIONS

- Volunteer SAT Math Tutor/Site Leader for New York Cares (August 2014-March 2021)

John Rabovich

- New York, NY, US

Contact Information

- 20f-v7y-iiu@mail.dice.com
- 3473340979

Summary

Data Science | Analytics | Fintech | Risk | Crypto A half-decade of **data science** and analytics experience in fintech, with a specialty in the consumer payments risk analytics space and a proven track record of end to end project development. 2023 EXL Emerging **Analyst** Award Top 15 finisher (top 8.5%) in EXL **Machine Learning** Time Series Forecasting Competition (Q4'2022): -Predicted NASDAQ 100, FTSE 100, and NIFTY 50 index prices on future out-of-sample **data** Main **software** stack: Python, **SQL**, **SAS**
