

JULIAN THOMAS

SENIOR SOFTWARE ENGINEER

+1 339 368 8036 | julianlopezdev991@gmail.com | 3 LEWIS DR RANDOLPH, MA 02368-2417

SUMMARY

As a Senior Full-Stack Engineer with over 10 years of experience in developing scalable applications across e-commerce, healthcare, and SaaS platforms. Expertise in JavaScript frameworks such as React and Node.js, with a focus on enhancing user engagement and optimizing performance for applications with thousands of active users. Skilled in RESTful API development, CI/CD automation, and testing with Jest and Cypress. Committed to delivering high-quality code and ensuring robust functionality and accessibility.

PROFESSIONAL EXPERIENCE

Insight Global

FEB 2023 - JUN 2024

- Developed responsive E-Commerce web apps using NestJS, Node.js/Express, React, Next.js, React Native, and TailwindCSS, boosting user engagement by 12%.
- Built RESTful APIs with Node.js, Ruby on Rails, and Python (Flask) for SaaS and healthcare platforms.
- Engineered SSR using Next.js, React, and Redux for healthcare applications.
- Refactored legacy React codebase for Redux persist, improving load times by 30% on slow networks.
- Integrated MongoDB and PostgreSQL for optimized data storage, using TypeORM for performance improvements.
- Implemented CI/CD pipelines with Jenkins, CircleCI, and GitHub Actions, automating deployments.
- Implemented a testing framework for web applications, leveraging Jest and Cypress to enhance code quality and ensure robust functionality across multiple platforms.
- Designed infrastructure with SQL, MySQL, PostgreSQL, NoSQL databases, and built real-time apps using Kafka.
- Architected travel booking apps using React Native and Supabase, deploying serverless functions on Vercel.
- Managed cloud services (AWS, GCP, Azure), optimized performance, and maintained containerized applications.
- Developed cross-platform mobile apps in React Native, maintaining high code quality through reviews and Agile practices.

Codoxo

FEB 2019 - FEB 2023

- Developed and led various platforms in e-commerce, education, healthcare, and SaaS with a user base exceeding 10,000 active users monthly.
- Leveraged React.js (TypeScript), React Native, and Redux Saga for frontend development, utilizing Prisma, Node.js, and Express.js for backend functionalities.
- Implemented modules and React Hooks, along with the Context API, into NestJS to optimize performance through Virtual DOM usage.
- Employed Redux Toolkit for global state management on the e-commerce platform, dynamically rendering personalized product recommendations across 600+ pages.

- Integrated an AI assistant **web** application with Zustand to manage UI and data states, enabling tailored chat responses based on user inquiries.
- Conducted accessibility audits on an intranet portal using the React **Testing** Library and axe, ensuring compliance with WCAG 2.1 standards to prevent regressions.
- Designed secure authorization workflows using OAuth 2.0 for SPAs, mobile applications, and APIs, successfully integrating providers like Google and **GitHub** into complex MEAN/MERN architectures.
- Developed **RESTful** APIs for over 30 microservices using Swagger/OpenAPI Specification, and created a prototype social media app with Next.js and Supabase, delivering full CRUD functionality in just two weeks.
- Migrated a file-sharing PWA from Firebase to Supabase, significantly reducing **deployment** times from 30 minutes to under 5.
- Implemented multi-tenant SaaS platforms leveraging Supabase functions on Vercel, customizing **business** logic without requiring separate database schemas.
- Led cross-functional teams in integrating NestJS with **Java Spring** Boot and Ruby on Rails, while developing a Next.js project with various design frameworks.
- Employed **automated testing** and TDD practices to enhance code quality, collaborated with UI/UX designers to implement designs from Figma and Adobe XD, and managed **cloud services** to optimize performance and costs.
- Conducted code reviews and mentored junior developers while managing projects through the **software** development lifecycle using **Agile** methodologies and Jira for task management.

Plego Technologies

FEB 2015 - JAN 2019

- Developed a project management system using Node.js, Express.js, and React.js, incorporating D3.js and Chart.js for advanced data visualization.
- Collaborated with backend developers to create and implement **RESTful** APIs with Node.js, Python, and Ruby on Rails, ensuring smooth data interaction.
- Built an e-commerce storefront leveraging **AngularJS** and Angular, enhancing user experience and driving customer engagement.
- Utilized an Object-Relational Mapping (ORM) tool to efficiently manage data interactions with MySQL databases, optimizing retrieval processes.
- Achieved a 25% reduction in response times by crafting efficient SQL queries for data retrieval, updates, and management.
- Maintained a comprehensive design system and component library in React, ensuring consistency across multiple projects.
- **Automated deployment** processes using Ansible while provisioning **cloud** infrastructure with **Terraform** and scaling applications through **Docker** and **Kubernetes**.
- Designed intuitive data visualizations with Tableau and configured Nginx for load balancing to enhance server performance.
- Managed AWS **cloud services**, including EC2, S3, and DynamoDB, through the AWS Management Console for streamlined **cloud** operations.
- Gained experience in Azure **cloud services** for application **deployment** and **cloud** infrastructure management.
- Assisted in deploying applications on Google **Cloud** Platform (GCP), further expanding **cloud** technology expertise.

EDUCATION

Siena College

2010 - 2014

Bachelor's Degree in Computer Science

SKILLS

- **Languages:** JavaScript, TypeScript, Python, Ruby, Java, PHP, Go, C#, C++, HTML, CSS
- **Frontend:** React, Angular, Vue.js, Next.js, Nuxt.js, React Native, Svelte, Gatsby, Ember.js, Bootstrap
- **Backend:** Node.js, Express.js, NestJS, Ruby on Rails, Django, Spring Boot, Flask, FastAPI, Laravel, ASP.NET MVC
- **Database:** MySQL, PostgreSQL, MongoDB, Redis, Firebase
- **ORM Tools:** Sequelize, TypeORM, Mongoose, Prisma
- **APIs:** RESTful, GraphQL, Swagger/OpenAPI
- **DevOps Tools:** Docker, Kubernetes, Jenkins, CircleCI, GitLab CI/CD, Terraform
- **Testing:** Junit, TestNG, Mockito, JMeter, Gatling, Cucumber, Spring Test, Jest, Selenium, Cypress
- **Cloud Platforms:** AWS (EC2, S3, Lambda), Azure, Google Cloud Platform (GCP), Heroku
- **Data Visualization Tools:** D3.js, Chart.js, Tableau, Power BI
- **Project Management:** Agile methodologies (Scrum, Kanban), JIRA, Trello
- **Version Control:** Git, GitHub, GitLab, Bitbucket

Work History

Total Work Experience: 9 years

- Senior **Fullstack Developer** Insight Global
Feb 01, 2023
- Junior **Fullstack Developer** Codoxo
Feb 01, 2019
- **Software Developer** Plego Technologies
Feb 01, 2015

Education

- **Bachelors** | Siena College

Skills

- **angular** - 10 years
- **golang** - 10 years
- **javascript** - 10 years
- **mysql** - 10 years
- **react** - 10 years
- **node.js** - 8 years
- **vue.js** - 8 years

- **c#** - 7 years
- **laravel** - 7 years
- **mongodb** - 7 years
- **python** - 7 years
- **typescript** - 7 years
- **next.js** - 6 years
- **postgresql** - 6 years
- **aws** - 5 years
- **django** - 5 years
- **microsoft azure** - 5 years
- **ruby on rails** - 5 years

Work Preferences

- Desired Work Settings: Remote
- Likely to Switch: True
- Willing to Relocate: False
- Travel Preference: 0%
- Work Authorization:
 - US
- Work Documents:
 - US Citizen
- Security Clearance: False
- Desired Hourly Rate: 70+ (USD)
- Desired Salary: 120,000+ (USD)
- Third Party: False
- Employment Type:
 - Full-time
