- Build partnerships with business units to ensure that business requirements continually inform Role Based Access Control program
- Serve as internal liaison for RBAC/IAM issues with representatives from application solution owners and Information Security
- Coordinate analysis of discovered user accounts for risk, ownership and access appropriateness
- Coordinate with application owners during UAT post RBAC deployment
- Manage and engage change network and conduct change impact assessment
- Work with stakeholders to understand their access needs and design access roles accordingly
- Coordinate on-going remediation efforts by working with stakeholders to determine ownership and appropriate corrective actions
- Define roles and resource groups for standardization as per client security standards
- Review active privileges in the system and conclude on creation/modification of roles
- Communicate requirements to stakeholders, manage conflicts, issues and challenges in order to ensure that stakeholders and project team members remain in agreement on solution scope
- Plan and monitor to determine which activities are necessary to identify relevant stakeholders
- Analyze and document business requirements and interfacing with system/platform owners
- Manage Role Based Access Control (RBAC) process lifecycle
- Responsible to create RBAC template for Windows, SQL, Oracle and UNIX platforms
- Create and run test cases and follow defect lifecycle management in HP Quality Center
- Involved in Provisioning Roles in Net IQ
- Involved in Provisioning RBAC Resource Groups in Active Directory and CyberArk Safe
- Involved in Provisioning RBAC Resource Groups in the server Local Groups.

United Technologies
IAM Business Analyst

Hartford, CT
July 2019 - Aug 2020

Responsibilities

- Conduct project kick off meeting with Application Owners to explain about the migration project, roles, responsibilities, deliverables, timelines as well as set expectations from various teams.
- Gather **requirements** and developed processes to on-board **business** applications into SailPoint **Identity** for automated provisioning, deprovisioning, lifecycle events.
- Work with the Application Owners to understand the application technology and user **access management** process and onboard the applications in SailPoint as part of future phases.
- Deep understanding of best practices and **governance** in the **IAM (Identity and Access Management)** domain.
- Created standard **Business** Requirement Document template per application type to onboarding applications in SailPoint.
- Created standard Questionnaire Document which will be leveraged to understand about the **business** application, it's technology, number of users and its security platform.
- In process of onboarding various types of applications such as Active Directory, LDAP, JDBC.
- Performed Requirement Gathering, **Analysis & Management** by actively discussing and exploring the current state of user **access management** with the IDM team.
- Coordinate the end to end process on onboarding applications through different phases of SDLC.
- Deep understanding on **business** analytic tools such as QlikView
- Have excellent technical leadership, analytical, **problem** solving, **communication** and interpersonal **skills**, with ability to interact with individuals at all levels and can work as a part of a team as well as independently
- Attend weekly scrum meeting to provide status updates to the customer on the project.
- Deep understanding of RBAC (Role Based **Access** Control), Single Sign On (SSO) and **Identity** and **Access Management**.
- Deep understand of **IAM/IDM** and ensure proper compliance standards are met.
- Gathered **requirements** from application owner regarding **access** certification and reporting.

Environment

SailPoint 6.4, LDAP, Active Directory, **Microsoft** Power Point, Excel, Word, MS Visio, Windows, Service Now

Responsibilities

- Gather requirements by conducting meetings and brainstorming sessions
- Experience as a Business Analyst focused on Identity and Access Management, specifically SailPoint
- Experienced performing business analysis activities supporting the implementation for Identity Management and Access Governance and Administration solutions.
- Experience in validating all requirements, and separate key business requirements from wish lists.
- Expertise in configuring workflows and Integration for life cycle events.
- Expertise in Analysis, Design, Development and Deployment of SailPoint
- Direct provisioning using direct connectors for integration of target applications.
- Extensive experience in Role Mining, Entitlements Analysis, and Advanced Analytics.
- Experienced with all facets of SDLC (Requirements, Design, Development, Testing, Implementation, installation, documentation and Maintenance) using UML, MS Visio.
- Communicate to clients and partners aspects of both the product and the implementation at the technical and functional levels appropriate for the situation.
- Performed data analytics to ensure data is accurate prior to staging and activating certifications
- Served as liaison between platform, technical and business teams for end to end business process
- Direct provisioning using direct connectors for integration of target applications
- Manage project scope, schedule, status and documentation.
- Schedule and drive demo meetings and User Acceptance Testing with Business Line for new applications/ re-configured application integrations.
- Deliver technical training designed to enable/educate implementation partners.
- Excellent interpersonal skills, proven team player with an analytical bent to problem solving and delivering under high stress environment.
- Good analytical and communication skills and ability to work independently with minimal supervision and perform as part of a team.
- Working experience with Service Now ticketing system to generate ticket.
- Team Player and self-starter with effective communication, motivation and organizational skills combined with attention to details and business process improvements.

- Deep understanding of Role mining, Role Based **Access** Control (RBAC), Multi Factor Authentication (MFA), Single Sign on (SSO), PAM (Privileged Account **Management**), Entitlement **Management** and **Identity Management**
- Highly motivated team player with analytical, organizational and technical **skills**, unique ability to adapt quickly to challenges and changing environment.

Environment

SailPoint 6.3, **IAM**, IDM, Siteminder, Service Now, Qlikview, OIM

Wells Fargo
Sr. **IAM Business Analyst**

Phoenix, AZ
Jan 2014 – Mar 2016

Responsibilities

- Partners with **business** Owners to understand their needs and develop innovative solutions that balance timeliness, scope, and complexity.
- Facilitates meetings with stakeholders to elicit **business** and functional **requirements** and perform **business** process **analysis**.
- Created procedure documentation for system owners in order to follow PCI scoping processes.
- Involved in complete software development life cycle (SDLC) from gathering **requirements**, designing, planning and developing to implement several webs based and client-server applications.
- Played a key role in the **Identity & Access Management (IAM)** Information Security group in progressing the company's efforts toward maturing their **IAM** program and obtaining Payment Card Industry (PCI) compliance.
- Tasked with documenting the current state of resources that are targeted to be managed by the **IAM** program, **business** processes that relate to that resource usage, and key **IAM** capabilities that drive the approach to integrate the resource.
- Documenting the roles available from each resource and map them to related job functions.
- Gathering and documenting system workflows in order to understand how sensitive data travels across the company.
- Experienced in Designing the **Business** Case.
- Involved in Configuration and development of SailPoint Life Cycle Events (LCM).
- Prepared artifacts such as BRDs, FRDs, Use Cases & UML diagrams using MS Visio
