

Teresa Barton

Surprise, AZ 85378

602-736-1324

Award-Winning Information Technology PM, Sr. BSA, Sr. QA Lead, Team Lead, Technical Writer, Communication Manager

Teresa quickly earns respect as an approachable leader. She is a kind, non-judgmental IT professional with outstanding leadership, interpersonal, and communication skills. She has worked at many major corporations both as a full-time employee and as a consultant, including MassMutual, American Express Technologies, the Arizona Department of Education, and Xerox Corporation Healthcare.

Teresa managed and implemented an award-winning, best-practices Disaster Recovery Program at American Express, increasing the number of applications covered by a Business Continuity plan from 64% to 98%. She also developed a mobile solution process to ensure consistent application access and usability for employees and customers in the event of a disaster.

Teresa is an experienced Project Manager, Business Systems Analyst, Implementation Consultant, Data Research Analyst, and QA Tester/Lead. She excels in technical writing and composing business requirements, design documents, testing strategies, test plans, and test cases. Teresa is also a Senior RFP Writer specializing in Healthcare and an SME in Pharmacy, PBM, Technology, Service Coordination, and Utilization Management. She has extensive experience working with state Medicaid agencies and programs.

EXPERIENCE:

08/2021 - Present:

IT Consultant at various corporations, including Pfizer Pharmaceuticals as a Product Quality Compliance Manager and Aetna as a Health Insurance RFP Writer. Business Analyst at the State of Arizona responsible for gathering and writing retirements for the Arizona Retirement System, testing/QA, and training users.

10/2019 - 06/2021:

Digital Operations – Underwriting Case Specialist | Enterprise Technology & Experience Group (ETX) Digital, MassMutual Life Insurance Company

- Interviewed applicants and researched cases to gather information for life insurance products. This highly confidential and visible position required the utmost data security.
- Interviewed potential new clients regarding their health, lifestyle, financial position (assets, liabilities), and DMV/driving history.
- Created legal documents and submitted them to Underwriting.
- Responded to and resolved inquiries, worked on IT applications, and ensured compliance with requirements.

- Obtained written and signed documentation regarding health, lifestyle, **financial** position (assets/liabilities), and DMV/driving history.
- Administered cognitive ability tests, validated and certified legal documentation, and submitted all required documents to the **underwriting** department.
- Ensured legal compliance in all processes.

02/2012 – 09/2019

Senior Healthcare **Consultant, Implementation PM, Xerox Healthcare (FTE and **Consultant**)**

- Directed end-to-end **project management** from kick-off to implementation.
- Managed **project budget** for Xerox, including reconciliation and data **management**.
- Oversaw client interactions, technical resource **management**, and communications.
- Led **engagement** for the 3M 360 Encompass System, integrating clinical and **financial** data.
- Managed technical client engagements for clinic and hospital chains, leading projects up to \$5M and teams of 150 staff.
- Executed projects end-to-end: kickoffs, requirements gathering, testing, go-live, and ongoing support.
- Upsold services by demonstrating new products to enhance implementations.
- Implemented Exact Cost for Mayo Clinic to evaluate laboratory testing needs.
- Developed Access databases for streamlining ExactCost tool updates.
- Created reports for tracking tests, calculating supplies, and analyzing costs for HR data.
- Managed establishment of the Molecular & Cyto Genetics lab, including QA reviews and data migration.
- Handled file setup and ensured accurate mapping of tests to instruments.

09/2011 - 02/2012

Lead QA **Consultant, Arizona Department of Education (08/2011 – 02/2012)**

- Implemented educational **software** for evaluating teachers and learning outcomes.
- Authored and validated test scripts.
- Assisted in coordinating user acceptance testing.
- Managed module testing and ensured user comprehension of requirements.
- Prepared a traceability matrix to align testing with **project** requirements.

09/2010 – 08/2011:

Lead Business System Analyst in PMO, Catholic Healthcare West (FTE)

- Researched proposals for medical **software** and/or equipment.

- Created **project** plans, staffed resources, obtained funding, and monitored projects.
- Assisted Site Leads with installations or any needs related to new products and/or **software**.
- Established repeatable processes, demonstrated those processes, and engaged associates to follow PMO-required processes.
- Showed how following repeatable processes reduces **project** time and ensures **project** success.
- Interfaced with all areas affected by the **project**, including end-users and vendors.
- Ensured adherence to **quality** standards and reviewed **project** deliverables.
- Communicated with **management** teams to advise on **project** status.
- Managed change, implementation, and delivery of solutions.
- **Project**-managed new technology implementations in various hospitals.
- Built relationships with businesses.
- Created specifications and standards for Data Migration, **Quality Assurance** Testing, and Release **Management**.
- Established a **work** plan for maintaining all records according to existing rules to meet audit expectations.

09/2009 – 09/2010:

Project Manager and QA Lead, Blue Cross Blue Shield (Consultant)

- Managed several projects including Medicare PDP, HIPAA 5010, EDI pharmacy transaction files 235 and 237, data mapping, and data migration.
- Ensured projects met tight implementation guidelines to comply with federal regulation dates and obtain stimulus funding.
- Scheduled and ran **project** meetings, kept track of **project** plans, monitored tasks and accomplishments, and handled obstacles and interference to **project** timelines.
- Coordinated activities with release **management** and data **management**.
- Managed staff, taught, and assisted users in UAT.

10/2007 – 05/2009:

Project Manager/Lead Business Systems Analyst, American Express Technologies (FTE)

- Managed the Global Disaster Recovery program to ensure all critical applications had a current and compliant disaster recovery plan, achieving RTO/RPO (Recovery Time Objectives and Recovery Point Objectives).
- Interacted with all levels of the IT organization as a primary resource for inquiries or training related to the X501 (Disaster Recovery Plan) process.
- Created and delivered the application X501 compliance monthly Scorecard.
- Increased DR Plan compliance from 62% to 98-100% through networking, follow-up, and process improvement.

- Developed disaster recovery solutions for all applications based on criticality and established dependencies.
- Engaged teams in tabletop (Disaster Recovery) simulations according to established requirements.
- Wrote requirements for automating processes to move from manual **management** to an automated demand **management** tool using **Microsoft SharePoint**.
- Conducted **project** definition meetings and requirements/design reviews, managing the full **life** cycle of projects.
- Managed technical teams and analysts to support projects.
- Designed, managed, and implemented the new Disaster Recovery Automated Tool, receiving several awards.

10/2002 – 10/2007:

Project Manager/Lead Business Systems Analyst, American Express Technologies (Consultant)

- Worked with marketing and **development** to produce new credit cards, **financial** products, and subsequent websites.
- **Project/Product** Manager of EMR (Expense **Management Reporting**) for merchants, including Drive to Web to encourage merchants to use web-customized **reporting** instead of paper reports via mail.
- Collaborated with the business partner to create and manage web campaigns, keep the site updated, and QA the site.
- Viewed and reported metrics of the website.
- Created **project** plans, business use cases, business requirements, and documentation across several lines of business and multiple data repositories.
- Tested new developments before turnover to users.
- Acted as a liaison between Business Partners and the Technical Team.
- Managed the audit trail and assisted users with user acceptance testing.
- Managed new product launches and the integration with small business applications.
- Managed production checkouts of all newly introduced code into the production environment.
- Worked as QA Lead for testing and was responsible for maintaining and validating test data specific to test requirements and test cycles.
- Mentored and oversaw **quality assurance** and testing.
- Managed the audit trail and assisted users with user acceptance testing.
- Managed new product launches.
- Managed funding, preproduction, and production checkouts.
- Earned several awards for managing card projects, bringing them in on time and under **budget**.
