Victor Diaz

Senior Software Engineer
Miami, Florida, United States

Summary

Passionate about clean and efficient software.

Experience

Microsoft

Senior Software Engineer
November 2022 - December 2023 (1 year 2 months)
Miami, Florida, United States

Working hard to contribute to Microsoft Azure using the latest cloud and UI technologies.

(C/C++/C#/.Net/SQL/TypeScript/Angular/React/REST APIs)

DG Pro Consultants

Software Engineer Manager
May 2018 - March 2022 (3 years 11 months)
Miami/Fort Lauderdale Area

In charge of a team of 5 senior software engineers to maintain and develop a set of C++ and C# tools that are custom made by this company, for internal use in trading and market research. User interface focused on Windows, 70% MFC, 20% WinForms and 10% WPF.

(C/C++14/C#/.Net/MFC/COM/Win32/SQL/CLI/Boost/JavaScript/NodeJS/Kafka/WPF/SVN/TeamCity)

C4 Planning Solutions (Federal Government)

Senior Software Engineer
April 2017 - April 2018 (1 year 1 month)
Doral, Florida

Development of web applications, REST APIs, database back-ends and desktop apps. Worked with modern tools such as React + Redux, JavaScript, Node.JS, Express, MongoDB and Electron. Also worked on classic desktop development and ASP.Net via C/C++/C#/Win Forms on Visual Studio 2017. Worked on Database with MS SQL and Entity Framework.

(C/C++/C#/JavaScript/.Net Winforms/React + Redux/MongoDB/MS

SQL/Entity Framework/NodeJS/Bootstrap/TFS and GIT/ASP.Net and Express REST APIs/.Net Win Forms and Electron)

Goverlan, Inc

Senior Software Engineer

July 2013 - January 2017 (3 years 7 months)

Miami/Fort Lauderdale Area

Software engineering for IT solutions and the Goverlan platform. Development includes client/server, cloud services, GUI programming, low level Win32 and COM interfaces, native web APIs, managed .Net integration using C++/CLI and .Net for Windows and Web.

In this role I developed a Windows driver for SmartCard remoting technology. The driver acted as a virtual SmartCard reader, the physical reader and card was across the internet in another computer and using custom made TCP and the low level translations of both the T0 and T1 protocols, the driver gave Windows everything required to believe there was a reader with a card locally. I worked alone on this project and it is now a feature release for Goverlan. (C/C++/Win32/SQL/CLI/C#/NodeJS/AngularJS/MFC/COM/Intel VPro/CodeJock)

Rapid To Software

Senior Software Engineer

November 2010 - June 2013 (2 years 8 months)

Development of desktop, mobile, web and client-server software.

"iPaint 3D" is a Objective-C++ iPhone/iPad application that was developed and released during this period. Truly an engineering success that went live on the App Store in July 2011, followed by a popular upgrade to version 2.0 (C/C++/VB)

Heidenhain

Senior Software Engineer

May 2005 - October 2010 (5 years 6 months)

Member of the R&D department on the CNC industry. We developed a brand new control operating system that will revolutionize the position control industry for the target market. I managed hard software problems, research and proposing solutions for them. Additionally I was in charge of maintaining the system configuration server, the PLC programming interface and other tools. The system software runs on a real-time Unix based operating system called HerOS that was written by this company to produce optimal speeds. (Technology used C/C++/VB/XML and SQL)

Top Site Solutions

Senior **Software** Engineer

August 2003 - April 2005 (1 year 9 months)

Retained by diverse industry clients we were compelled to solve many interesting automation needs, custom **software systems** and **web systems**. My consulting, analytical and implementation skills were exceptionally improved during this time working directly with highly diverse clients. We released offline and internet **systems** for both **Windows** and Linux environments. (Technology used C#/C++/**Java**/J#/VB/ASP/Python/PHP/SQL)

BC Matrix

Software Engineer / Project Manager

August 2002 - July 2003 (1 year)

Hired as an **Software** Engineer and promoted to Project Manager in December 2002 for my analytical and **engineering** skills. The company was created to develop a niche idea which consisted on automating the mortgage loan submission-approval **process** between brokers and lenders. We finished the project 85 days before the deadline. (Technology used MSSQL/VB.NET for the **windows client** MSSQL/ASP.NET for the **web client**)

Cardel Fire Protection

Software Engineer

March 2000 - June 2002 (2 years 4 months)

Worked on their **client/server** system which we rewrote almost completely. Also enhanced their website's functionality and provided other computer related **services**. (Technology used VB6.0/C++/ASP/XML/SQL)

Education

University of Miami

M.S., Master of Science, Computer Science / Math · (2003 - 2010)

Florida National College-Main Campus

A.S., Associate of Science, Computer **Programming** · (2000 - 2003)
