Current Location Apex, NC 27502

Professional Programming Skills

- **Programming** Language: Core **Java** (1.8 or higher), C#, Objective-C, **JavaScript**, NodeJS, **JSP**, HTML, **CSS**, **jQuery**, **Ajax**, **JSON**, **XML**, Linux Shell, and PL/SQL/HQL
- **Framework**: **Spring**, **Spring Security**, Hibernate, **Spring MVC**, **Spring boot**, **Struts**, **AngularJS**, Express, passport, Cordova IONIC, and EXTJS
- Service: Tomcat, **Apache**, Google Platform, AWS (EC2, Elastic Beanstalk, and S3), NodeJS, Linux, Docker & Docker Compose, Make, Terraform
- CI/CD: **Maven**, Pod, Gradle, and Jenkin
- Database: Peoplesoft, MySQL, MSSQL, Oracle, Realm, MongoDB and Google Database
- **Software Engineering**: UML, Scalable, OOP, **Agile**, TDD and **Scrum**
- API: **Spring Restful** and **SOAP**
- Code version control: GitLab, GitHub, and Bitbucket
- Payment: Stripe, PayPal, CashNet
- Ticketing System: Cherwell, ServiceNow
- Document Management: OnBase, SharePoint, Kiteworks
- Data Analysis: Power BI

Professional Certificates

- A certified Enterprise **Software Development** Associate and Professional
- A certified Oracle Database 12C SQL Associate
- A certified OnBase API **developer**
- A certified OnBase System administrator
- A certified OnBase Workflow administrator

1. NC State University

OnBase/ShareBase Functional Consultant (Analyst Programmer II Expert Level)
Dec 2022 – Present

- Change request evaluation; business requirements definition; **development** of functional and technical specifications; coding; system integration; **development** and execution of unit, system, and load test plans; code migration; production support; system configuration and maintenance; **development** and execution of regression test cases for applications, databases, infrastructure upgrades; and coordination with customers and OIT teams.
- Experience in OnBase technologies, including configuration and **development** in:
 - Core document management functions
 - Transcript Capture Solution
 - Financial Aid Solution
 - Full Text Search Module
 - DIP Processing
 - Advanced Capture OCR, Barcode Processing, Batch Scanning/Acquire
 - Unity Forms **Design**/Implementation, EForms, COLD Processing
 - Reporting Dashboards
 - SSO, Virtual Print Driver, Workflow, Scan Queues

YU (ARVIN) ZHOU

Email zhouyuzero@hotmail.com

Current Location Apex, NC 27502

- API, custom Web Services, External Autofills, Custom Queries
 - Document Retention and Records Management, etc.
- Experience in ShareBase technologies, including configuration and development in:
 - ShareBase, Security, ShareBase/OnBase integration
- Assistance with security access certification reporting and ultra-sensitive data auditing.
- Strong communication, collaboration, and organization skills, with experience working with a broad user base (e.g., central office and campus-wide customers), including developing and delivering customer training for OnBase and ShareBase implementations.
- Ability to interact positively and communicate effectively with team members, campus representatives, customers, vendors, IT support staff, and all levels of management.
- Capability to combine strong functional, conceptual, and technical knowledge with a deep understanding of customer requirements to provide practical, timely, and efficient solutions. Customer service skills are critical.
- Management, development, and support of system integrations with:
 - Student Information System, Human Resources, Financials
 - Advance Gift/Donor Management, CVM Hospital applications
 - SLATE Admissions, InfoEd Research Applications, Engineering Applications, etc.
- Required to stay current with industry standards, strategic directions, and best practices in document/content management, financial aid, OCR, and EDI for incorporation into NCSU architecture.
- Experience with:
OnBase, ShareBase, Kiteworks, Peoplesoft, Saml (Shibboleth), MySQL, Oracle, Java, C#, RESTful API, HTML, CSS, http-protocol

2. California State University, San Bernardino

Software Architect (Information Technology Consultant Career Level)

Sep 2017 – Nov 2022

Architecture and User Needs:

- Analyze user systems and CMS application needs; evaluate and determine optimal solutions and approaches to meet user needs.
- Provide technical input for new projects to address technical challenges.
- Write scripts for unit tests, functional tests, and integration tests; automate deployment between environments.
- Design, develop, and implement APIs to push/pull data to other campus systems.
- Integrate third-party systems with both on-premises and cloud-based campus systems.
- Fix bugs, add features, and work with third-party vendors to implement updates for university web-based applications and mobile apps.
- Develop specifications and requirements for the optimal integration and implementation of systems.
- Design application programs and structures that meet user requirements and optimize resources.
- Consult with users to define software/system objectives, address workflow issues, determine output needs, and develop technical system requirements and specifications.

YU (ARVIN) ZHOU

Phone 3106349826

Email zhouyuzero@hotmail.com

Current Location Apex, NC 27502

- Write code to meet user specifications, test and debug programs, and verify data acquisition, output media, and formats.

Database Administration and Analytics:

- Use CMS modules to meet complex university needs; perform module updates, database updates, and security updates for CMS installations.
- Manage cloud infrastructure, perform daily database and file backups, and optimize application server configurations.
- Structure, implement, and maintain databases to enhance data access and security.
- Utilize SQL Server and related technologies for data migrations and transformations.
- Create error logging and reporting solutions and deliver them to customers and partners.
- Follow policies, standards, and procedures for strategic data planning, data analysis, and data modeling to ensure data accuracy and accessibility.
- Analyze data requirements, develop a data dictionary, and document data models.
- Design database systems and programs to include access methods, device allocation, validation checks, statistical methods, and security.
- Analyze, administer, and optimize existing workflow solutions; manage and maintain document imaging systems.
- Collaborate with campus units to address document storage and workflow needs, integrating with existing document storage procedures and technology.

Maintenance:

- Support the development and maintenance of web content management systems (CMS) based on user requirements.
- Select appropriate development methodologies and write efficient, timely code that meets functional user requirements.
- Maintain and support assigned operating systems and applications to ensure minimal downtime and optimize productivity.
- Enhance the efficiency of existing programs to address current and future user needs.
- Maintain, update, and optimize workflow project procedures across platforms.
- Provide technical support and modifications for document systems; work with third-party vendors to address bugs and add features.
- Educate and train users on workflow systems and provide technical support as needed.
- Implement modifications as requested by users, ensuring functionality meets their requirements.

Upgrades and Training:

- Implement and support application upgrades.
- Train team members, troubleshoot issues, and collaborate with other divisions to ensure efficient system use and upgrades.

Experience with:

OnBase, Peoplesoft (HR, Financial Aid, PO, Student Record), Drupal (7, 8, 9), ModoLab, Cherwell, Linux (Ubuntu, CentOS, & Debian), Saml (Shibboleth), MySQL, Oracle, MSSQL, Java, C#, Spring MVC, Springboot, Spring Security(Oauth2),

YU (ARVIN) ZHOU

RESTful API, Javascript, JQuery, AngularJS, React, AWS Cluster, Terraform & Make, Tomcat (6, 8), Apache, HTML, CSS, http-protocol, Github, Bitbucket, Dell Boomi.

3. CAKNOW Technology Inc

Java/J2EE developer

Apr 2017 - Jul 2017

Responsibilities:

- Wrote the project PRD (project requirement document), development process plan, and task report
- In charge of developing finance and accounting report
- Designed the system DB Schema.
- In charge of setup meeting between marketing and development department for analyzing end-user requirements
- In charge of releasing products to two AWS services (Dev and Pro.)
- In charge of processing development process by using Agile
- In charge of reviewing code to ensure code qualities
- In charge of assigning tasks to other developers
- Designed web app, mobile app, and API software architecture
- Actively involved in making project tech. decision with marketing and company owner
- Used mantis as bug tracking and generated bugs report
- Used Microsoft project management tool making project process plan and assign tasks to developers
- Used OOP aspect to design and implement all project components and features
- Implemented web app, mobile app and API component

4. BlueSun Solution

Java/J2EE, Android, and IOS Developer

Sep 2016 - Mar 2017

Responsibilities:

- Actively Involved in the analysis, design, development and testing phases of Software Development Life Cycle
- Developed java backend, payment components, and APIs
- Designed the system DB Schema
- Designed and developed finance reports to the company's high table
- In charge of project version control and deploying compiled project package to the Google Cloud platform
- Designed and developed the google map and tracking data report
- developed the project frontend with the angular material framework
- Actively involved in having meetings with end-users to discuss their requirements
- Actively involved in code review and support other developers' work
- Involved in designing APIs for loading web app and mobile app content dynamically
- Implemented APIs for old tracking system and connected it to external vendors in JSON format

YU (ARVIN) ZHOU

Phone 3106349826

Email zhouyuzero@hotmail.com

Current Location Apex, NC 27502

- In charge of **design** and implementation of **mobile** apps
- In charge of publishing **mobile** apps to the Apple store and Google Play
- Used OOP aspect to **design** and implement the entire **web** app and **mobile** apps' components
- Used Android Fabric to monitor Android **mobile** app for error receiving
- Used Google Objectify for **Java** entities
- Worked on new project features by using **Java Maven** and Aspect-Oriented **Programming**

5. Yunnan DFZC **Software Co., Ltd**

Java/J2EE Lead and Developer

Apr 2011 - Apr 2012

Responsibilities:

- In charge of system architecture **design** by using **spring** MVC, Hibernate ORM, and JDBC Template
- In charge of leading at least one small team to gather the end-users non-functional and functional requirement
- In charge of planning meetings with client and engineers
- Designed the system DB Schema
- Analysis, **design**, and **development** and testing phases of the **Software Development** Life Cycle (SDLC) with **Agile** and TDD
- Wrote specification and function **design** document
- Designed background scheduled task with **Java** thread
- Designed authorizing function for department managers (DM) to allow their low-level officers to act as their DM during a picked period when the DMs are on a business trip
- In charge of transferring data from MSSQL to MySQL
- In charge of reviewing code and giving solutions for new features and changed requirements
- In charge of a leading support team for fixing bugs and implement new features
- Used Mantis as the bug tracking tool
- Used MS planner to draw project deadline and milestone
- In charge of implementing **SOAP** API for external vendor and image system
- Used **Spring** IOC and AOP to implement business process and logic
- Involved in releasing project report for Fridays

6. Yun Power Telecom & Information **Software Co**

Java/J2EE Developer

Mar 2010 - Mar 2011

Responsibilities:

- Involved in redesigning and building BPM workflow engine to meet customized requirements, business needs and communicate to the office automation system
- Actively involved in the process of requirement analytics, system **design**, component **development**, and unit testing

YU (ARVIN) ZHOU

Phone 3106349826

Email zhouyuzero@hotmail.com

Current Location Apex, NC 27502

- Actively involved in the system DB Schema **design**.
- Designed and developed the system control panel and image management component
- Designed and developed the contract report (include finance and accounting)
- Actively involved in the complicated SQL query **design**
- Used PL/SQL to query large size data
- Involved in code review and giving solutions for new features and changed requirements
- Involved in leading a support team for fixing bugs and implementing the system new features
- Involved in implementing **SOAP** (API) for external vendors
- Designed and developed **java** thread to handle background service data checking such as task due date and sending reminders

Education Degrees

- Master of Science
California State University, San Bernardino,
Computer Science
Mar 2014 – July 2016
- Bachelor of Science
Kunming University of Science and Technology Oxbridge College
Computer Science
Sep 2007 – June 2011

Yu Zhou

- Apex, NC, US
