

Denis Chebotarev

Software QA Automation Engineer

Bothell, WA (646) 240-6248 dchebotarev@protonmail.com

<https://www.linkedin.com/in/denis-chebotarev>

Summary

- Full stack Quality Assurance Engineer with over 7 years of Experience in both manual and **automated testing** of web-based applications in Agile/Scrum environments.
- Skilled in designing and implementing over 5K effective programmed test cases.
- Experienced with UI, **API**, Performance, Visual, Cross-Browser, and Mobile **testing**.
- Accomplished building robust and efficient **testing** frameworks from scratch and integrating them seamlessly into CI/CD pipelines to enhance workflow automation.
- Talented in fostering a positive and productive team environment, promoting knowledge sharing, and mentoring junior team members.

"Talent wins games, but teamwork and intelligence win championships." — Michael Jordan

Technical skills

Programming: JavaScript, TypeScript, SQL.

Test Automation: Cypress, Playwright, WebDriverIO, Axios, Appium, Rapid **API**, Postman, Supertest, Jenkins, Circle CI, GitHub Actions, AWS, Docker, Browserstack, Percy, POM, K6, Mailosaur.

Database/Version Control: MySQL, MongoDB, GitHub.

Project/Bug Management: JIRA, TestRail, Confluence, Qase.

Testing Methodologies: Agile/Scrum, SDLC, STLC.

Employment History

Software Developer in Test, Mediavine

August 2022 - March 2024

- Engineered an E2E **framework** from scratch using Cypress and integrated it into Circle CI pipelines, which enabled Mediavine to slash the regression **testing time** from 8 hours to under 1 hour.
- **Automated** over 2500 UI tests and approximately 1700 **API** tests using Cypress; organized 165 UI tests using Playwright since Cypress does not support multiple tabs. This significantly reduced manual **testing** overhead, boosted efficiency, increased test coverage by 65%, and ensured robust **software** quality.
- Spearheaded QA migration of 182 **API RESTful** endpoints from Ruby on Rails to NestJS (NodeJS) to improve performance and standardize technology stacks across the company. As a result, **API** performance improved by an average of 300ms per request - an 80-90% improvement for all endpoints.
- Configured TestRail and Qase reporters into our Cypress **project**, enabling seamless uploads of generated test results. This enhancement provides all stakeholders with a comprehensive view of test coverage.

- Mentored and trained 2 manual QA engineers on UI automation best practices with Cypress, leading to their promotion to **Software** Test Engineers I, reflecting their growth and contributions.
- Performed PR reviews from QA engineers within the company, expediting the CI/CD process by 25%.
- Designed over 100 visual automation tests using Cypress and Percy, reducing UI defects on mobile devices and across different browsers.
- Authored 52 performance tests with K6 to ensure system efficiency and reliability.

QA Automation Engineer, Tent Collective

February 2018 - August 2022

- Analyzed requirements, specifications, and technical design documents to provide timely, meaningful feedback.
- Developed 970 end-to-end tests using Cypress to cut the manual regression **time** twice.
- Assisted in integrating CI/CD workflow that boosted deployment frequency by 7.5x.
- **Automated** more than 350 **API** tests for core APIs with Supertest.
- Guided E2E strategy, vision, and roadmap for all QA and Developers.
- Increased overall test coverage by 80% in the first year.
- Managed **testing** for 2 major and a few minor releases on Android platforms.
- Monitored and analyzed debugging process results, resolving over 180 **software** defects and achieving a 30% improvement in overall system stability.

QA Engineer, Sigma Group

September 2016 - February 2018

- Engaged in the Sprint Planning and Backlog Refinement meetings, analyzing Acceptance Criteria to create test plans during the sprint.
- Constructed, executed, and maintained over 200 manual test scripts, providing feedback throughout the SDLC.
- Performed UAT **testing** before Production releases resulting in a 30% improvement in overall product quality.
- Executed smoke **testing** once code was deployed to production, reducing critical post-deployment issues by 90% and ensuring immediate detection of major defects.
- Delivered **API testing** using Postman.
- Tracked defects and created stories, bugs, and issues using JIRA
- Maintained all QA training documents using Notion.
- Delivered detailed health reports of the application to stakeholders during bi-weekly conference calls, ensuring transparency and addressing critical issues promptly to maintain a 99.9% application uptime.

EDUCATION:

State and Municipal Administration, Master's degree

Summary

Quality Assurance Engineer with 5+ years of experience in manual and automated testing for web-based applications in AgileScrum environment. Experienced in writing and implementing tests using Cypress and WebdriverIO frameworks using JavaScript. Developed Rest API tests to validate business logic and execute them via Postman and SuperTest HTTP Request client. My colleagues would say that I am a highly motivated and enthusiastic team player who is passionate about delivering high-quality software products. I enjoy learning new technologies and challenging concepts. Proficient in both Manual and Automation Testing including Back-end, Front-end, and End-to-end Testing in JavaScript Strong knowledge of Software Development life cycle (SDLC), Software Testing Life Cycle (STLC) and Bug Life Cycle within AgileScrum, Waterfall Methodologies Skilled in writing Test Plans, Test Scenarios, Test Cases for further Test evaluation and Test execution Participated in Agile ceremonies including grooming meetings, sprint planning, and daily Scrum meeting, sprint review, and sprint retrospective meetings for better understanding the business and testing requirements Collaborated with Product owners, Developers, and Testing teams to stay current on product features and intended functionality, tracked and analyzed test results Motivated and self-driven person with good soft skills and strong commitment to produce high-quality work and provide support to others when needed. Technical Skills Programming Languages: JavaScript, Bash, Python, SQL, XML, JSON, HTML, CSS Test Automation: Cypress, WebDriverIO, Mocha, Chai, Jasmine, Axios, CucumberJS, Postman, REST API, Chrome DevTools Testing ToolsUtilitiesEnvironments: SuperTest, HTTP Client, Swagger, XPath, Node JS, Express JS. DatabaseVersion Control: MySQL, SQL, MongoDB, Git, GitHub, GitLab ProjectBug Management: JIRA, Testrail, TestRail, Confluence, Slack
