

Divya Yeddula

Senior QA Engineer

E-MAIL: divyasree484@gmail.com

PHONE:

(425) 542-0591

Professional Experience:

- 8+ years of experience in all the phases of Software Testing Life Cycle (STLC). Skilled in various program testing technologies using automation tools like Selenium, Appium and current QA methodologies.
- Diversified experience in Automation and Manual testing serving various domains such as Banking, Ecomm, HR and Subscription Based Application.
- Experience in preparing Test strategy, Test plan, Test methodology, Test scenarios, Test summary reports, Test cases and Test documents for both automated and manual testing based on User requirements, System requirements and Use case documents.
- Expertise in Entire Software Development Life Cycle (SDLC) and Software Test Life Cycle (STLC) in Agile as well as Iterative development environments.
- Strong knowledge in implementing Waterfall, V-model and Agile (Sprint/Scrum) Methodology by analyzing requirement specifications and responsible for developing Test Objective, strategies, Scope, Test procedures and Test Matrices.
- Proficiency in automating web-based testing including GUI Testing, Functionality Testing, Unit Testing, Integration Testing, Regression Testing, System Testing and User Acceptance Testing.
- Tested customizations, configurations, and enhancements made to Siebel CRM, including UI changes, workflow modifications, and business rule implementations.

- Having extensive experience in creating test scripts using **Selenium WebDriver** using **JAVA**.
- Expertise in **Grouping of Test Cases, Test Methods and Test Suites** for regression and functional **testing** using the **TestNG** annotations like **Groups, Parameter, Data Provider**.
- Designed and implemented different automation frameworks like **Data Driven Framework, Hybrid Framework** and **Page Objects** for a number of projects.
- Experience using **Accessing Forms, tables, link, Keyboard Mouse Events, Uploading File** using **Selenium WebDriver**.
- Hands on experience in using build and **project management** tools like **Ant, MAVEN** and **Configuration management** tools like **GIT**.
- Having good experience in **mobile testing** using **Appium** in both **Android** and **IOS** applications using **simulator** and **emulator**.
- I have good experience in **Test Plotting** to visualize **testing** metrics, enabling quick **analysis** of test trends and performance.
- Responsible for developing the scripts to support **Jenkins** (**Continuous Integration**) of the scripts with the build server.
- Good Experience on **API Testing** using **SOAP UI** and **PostMan**.
- Experienced in documenting defects with high level of detail, accuracy, and informative recreation steps using **Quality Center, HP ALM, and JIRA, ADO & TestRial**.
- Experience in **Non-Functional Testing**, **Performance Testing**, **Load Testing** and **Security Testing**.
- Experience in writing **SQL** Queries to retrieve the data from the database.

TECHNICAL SKILLS:

Test Approaches	Waterfall, Agile/Scrum, SDLC, STLC, Bug Life Cycle
Testing Tools	SeleniumWebDriver, TestNG, Selenium IDE, JUnit, Cucumber, Appium, NVDA, Lighthouse, SoapUI,

	PostMan, Azure Portals, Dynamics365, Azure Service bus
TestBuild& Integration Tools	Maven, ANT, Jenkins
AWS Services	S3 Bucket, DynamoDB, SQS & SNS
Frameworks	Data Driven, Hybrid & Page Object Model (POM)
Programming Tools	JAVA, JavaScript, Gherkin, SQL
Markup Languages	HTML, XML, XPath, Css Selector
Databases	MySQL, Oracle, SQL Server, Mongo DB, Swagger
Browsers	Internet Explorer, Mozilla Firefox, Google Chrome, Safari
Operating Systems	Windows 7/8, LINUX
Defect Tools	HP Quality Center, JIRA, ALM, ADO, Azure Portals
Networking Skills	TCP/IP, IPv4, NAT, ACL, UDP, DNS, DHCP (CCNA Certified)
MS Office Tools	Outlook, Word, Excel, PowerPoint, MS Access
Utilities	Eclipse, GIT, Firebug, Fire Path

PROFESSIONAL SUMMARY:

1. Project Profile:

Project	People Insights- Engage & Clarity
Client	AMAZON
Location	Seattle, WA
Duration	May 2023 – Present
Role	Quality Assurance Engineer

Roles/Responsibilities:

- Involved in analyzing Business Requirement Document and Technical Specification Document and developed test plan and test cases for testing the application.
- Led the creation and execution of detailed test plans, test cases, and test scripts for various applications and modules.
- Collaborate with cross-functional teams, including developers, product managers, and business analysts to understand business requirements and ensure high-quality deliverables.
- I performed functional, sanity, integration, regression, and end- to-end testing to ensure product quality and stability.
- Created automation framework and test scripts using Selenium WebDriver for browser testing.
- Design, develop and implement Page Object Model pattern-based Data Driven framework utilizing Java, TestNG and Selenium WebDriver.
- Perform backend testing by validating data integrity and consistency using SQL queries.
- Extensively worked on POM and locating a web element using id, CSS selector and Xpath.
- Responsible in writing Regression test cases and automated using Selenium WebDriver for Cross Browsers testing using Browser Stack.
- Used Jenkins as continuous integration tool to schedule and run the automated test scripts.
- Performed API testing using Postman.
- Used NVDA and light house for Accessibility Testing.

- Played key role in reviewing test plans and test cases prepared by the QA team, providing feedback to ensure comprehensive coverage of all scenarios and requirements.
- Scheduled and led Bug Bash and Bug Triage meetings with QA, Product and Development team to address and resolve bugs.
- Actively engage in sprint planning, backlog grooming, and daily stand-up meetings to report progress and raise concerns.
- Effectively handled ambiguity by proactively collaborating with stakeholders, clarifying requirements and adapting testing strategies to ensure quality.
- Collaborate with developers to reproduce, isolate, and resolve issues, ensuring that defects are properly documented and tracked using TestRial.
- Provide insights and feedback on usability, performance, and overall user experience during testing cycles.
- Use functional specifications to plan, create, or sign-off on test plans and test cases.
- Provide regular detailed status report on project progress, including test cases executed, bugs discovered and bugs fixed.

Environment: Selenium WebDriver, IntelliJ, Core Java, TestNG, Jenkins, Maven, GIT, TestRial, Agile, AWS, SQL, Postman, S3 bucket, DynamoDB, SQS, SNS, NVDA.

2. Project Profile:

Project	Voyager Ecomm SQA
Client	SanMar
Location	Issaquah, WA
Duration	Jan 2023 – Feb 2024
Role	Sr. QA Analyst

Roles/Responsibilities:

- Assessed & analyzed user stories and participated in **Sprint planning, Review Sessions & Scrum Meetings** and developed **Test scenarios, Test cases, Test data, Test procedures, Test reports.**
- Developed and Executed Test Scripts using **Selenium WebDriver, TestNG**, analyzed **Test Results.**
- Involved in preparing test cases using **Selenium WebDriver** to validate all UI components, Popups, Browser navigations, Mouse Movements.
- Performed **Functional testing** as per user stories and also performed **Integration Testing & System Testing** using **Selenium WebDriver** automation scripts.
- Used the various complex data structures in collections **framework** in **Java/J2EE** for building the logic.
- Designed and Developed test automation **Artifacts** (scripts, functions, scenarios, processes) for simple to complex **automated testing** situations using various tools like **Selenium, Cucumber, TestNG** and **XPath.**
- Used **Hybrid, Keyword/Data Driven Framework** and extracted data from external Excel files using **Apache POI** and loaded into the variables in the scripted code.
- Configured the **Test Cases** to receive input **Test Data Sets** for the corresponding test cases using **TestNG Data Provider** Annotation.
- Used **FireBug, FirePath** to debug, edit and locate the objects based on ID, Name, XPath, CSS selector, Link, Partial Link, Attributes and Tags.
- Performed **Parallel and Cross Browser testing** on different browsers like Internet Explorer, Chrome, Safari and Firefox where multiple tests were run at the same **time.**
- Created **test reports** generated out of **TestNG** and captured the **error** screenshots.
- Having extensive experience in **API testing** using **Postman.**
- Collaborated with teams using **SharePoint Online** as a centralized platform for document sharing and updates.
- Experience in using **SharePoint** as part of **Microsoft 365** for seamless **integration** with **Teams, OneDrive, and Outlook.**
- Maintained the **Selenium & Java** Automation Code and resources in source controls like **SVN, Jenkins** for improvements and new features.

- Used Maven Performed continuous **integration** of code and scripts using **Jenkins**. Configured and launched builds using Jenkins jobs and analyzed the Test Results from **Jenkins UI**.
- Experience in defect tracking, test progress, execution and change **management** using **JIRA**
- Experienced in using **Test plotting** tools for real **time** tracking of test progress and defect density.
- Proficient in creating visual reports to represent **testing** data and to track test results and identify areas for improvement by utilizing test plotting.

Environment: WebDriver, Selenium IDE, Eclipse, Postman, HTML, CSS, XML, **JSON**, JIRA, ADO, Backoffice, Virtual Terminal, Test plotting, Microsoft Office, Microsoft365, Azure Portal, Azure Service Bus, Dynamics365, SQL, Cucumber, Jenkins, Maven, TestNG, Agile.

3. **Project Profile:**

Project	Subscription Based Application
Client	Techfynder
Location	Dublin, Ireland
Duration	Jan 2019- Nov 2022
Role	Sr. Automation Engineer

Roles/Responsibilities:

- Created and defined comprehensive test plans and test cases to ensure complete test coverage and meet **business** requirements.
- Interacted with the **Project** Manager, **Business** Analysts and Developers to understand the application design and functional specifications.
- Involved in writing and executing the **Test Cases and Test Suites** using **Java** and **Selenium WebDriver**.

- Extensively worked with POM and locating a web element using Id, CSS selector and Xpath.
- Experience with **Selenium/Appium** for web and mobile applications. Assist in the evaluation of automation test tools and proof of concepts.
- Performed **Data Driven testing** using **Selenium WebDriver** and **TestNG** functions which reads data from scripts using property and XML files and Performed **Continuous integration** automation using **Jenkins**.
- Selected the test cases to be **automated** and performed functional **testing** of the front end using **Selenium Web Driver**.
- Performed system and functional **testing** on Linux based environments, ensuring stability and performance of applications.
- Participated in peer review with team and developers to **review test cases/test scripts**.
- Continuous test **integration** and automatic build by using **Jenkins** and mailed the build outputs to the team members.
- Implemented **Page Object Model Automation framework** with **Java**, **Selenium Web Driver** and **TestNG**.
- Executed mobile **UX testing** across various devices and screen sizes, optimizing mobile interfaces for responsiveness, touch interactions, and performance.
- **Regression testing** was performed after each build **release** of the application and updated the Scripts by executing the Regression suites built using **Selenium** and approve for regression suite
- Performed **back-end testing** by writing and executing **SQL** queries.
- Implemented test automation scripts for mobile **testing** using **Appium** for Android and IOS platforms.
- Performed various mobile gestures (Long Press, Multi Touch, Drag & Drop, Swipe). Identified mobile elements using **Appium Inspector**, **UI Automator Viewer**.
- Generated test logs using **Log4j** for various log levels.
- Executing **API** calls in **Swagger** and validates the responses. Also used **postman** to validate responses.
- Worked with developers to Create and update the defects, resolve and track their status using **JIRA**.

- Participate in iteration retrospective meeting to discuss previous iteration's success, failure and recommend process improvements for next iteration.

Environment: Selenium Web Driver, Appium, Eclipse, SQL Server, HTML, XML, TestNG, Jenkins, SoapUI, PostMan, Swagger, MongoDB, SQL, JMeter, JIRA, Zephyr, Confluence, Maven.

Project Profile: 4

Project	Banking Application
Client	Danske Bank
Location	IBM- Bangalore, India
Duration	May 2015- June 2018
Role	Software QA Tester

Roles/Responsibilities:

- Involved in the design and **development** of test plan from **business** and Functional requirements which includes test objectives, test strategies, test environments etc
- Understanding the **Business** requirements, Application and function specifications, Design documents.
- Extensive experience in preparing Test cases for Siebel CRM as well as Web based applications.
- Involved in Preparation of Test Scenarios and review of Test Cases.
- Interacted with the **Project** Manager, **Business** Analysts and Developers to understand the application design and functional specifications.
- Performed Functional, Regression, System, **Integration**, Sanity, End to End, Positive and Negative **testing** and monitored the behavior of the applications during different phases of **testing** using **testing** methodologies.

- Collaborated with **business** users to conduct UAT for **Siebel CRM**, validating user workflows, system behavior, and overall usability.
- Used HP **Quality** Center, ALM for Test Case **Management**, Test Case Execution, Defect Tracking and Reporting test progress to the **project management**.
- Coordinated on-site and offshore **development/testing** teams in various phases of the **project**.
- Participated in weekly QA status and **project** status meetings to **report any defects and issues encountered in application**.
- Created test cases for regression, GUI **testing** and functional **testing**, Backend **testing** and Compatibility **testing** based on system requirements.
- Performed functional **testing** of SOAP and RESTFULL Web Services using SOAP UI Tool.
- Executed test cases and participated actively in **Regression Testing** and Used **SoapUI** to test the application web service.
- Interacted with the **Development** team and the Environment team in prioritizing the **defect list** and validating known **bug fixes**.
- Performed backend **testing** to validate database contents by writing and executing **SQL** Queries.
- Shared **Daily Status Reports** with all the team members, Team Leads, Managers and Clients.

Environment: Windows, Siebel CRM, **Quality** Center, HP-ALM, Core **Java**, SOAP UI, SQL, MS Office.

Education Details: B.Tech, ECE, JNTUA, 2014.

Divya Yeddula

- Bellevue, WA, US

Contact Information

Summary

A Proactive and motivated individual having 7 years of experience in Quality assuranceSystem testing and Performance testing with ability to develop effective and efficient solutions with zero tolerance for errors. Intimately familiar with STLC SDLC and Extensive background in troubleshooting the performance and system issues and quality assurance.Strong attention to small details while creating bug reports with recommended solutions. Excellent professional communication, both written and verbal.

Work History

Total Work Experience: 10 years

- QA Engineer Amazon
May 01, 2024
- Senior QA Analyst Sanmar
Jan 01, 2023
- Senior Automation Engineer Techfynder
Jan 01, 2019
- Software QA Tester IBM
May 01, 2015

Education

- **Bachelors** | 2014-ECE

Skills

- **automation testing** - 5 years
- **selenium webdriver** - 5 years
- **testng** - 5 years
- **aws** - 2 years
- **dynamodb** - 1 years
