Successfully contributes to organizational bottom-line results by combining technical, **management**, and leadership skills to drive productivity and savings. Eagerly assumes challenging roles and problems with a resolve to achieve great results. Dedicated people manager who loves to develop and grow talent. Open to remote and in-person work.

PROFESSIONAL EXPERIENCE

Expedia – Seattle, WA

2022-2024

Engineering Manager, Developer Experience Acceleration

As an **engineering** manager, I lead an international team of developers that developed and maintained key pieces of **infrastructure** designed to help Expedia developers to “ship on day one” and accelerate innovation.

- Mentored, coached, and led an international, blended team of FTEs and vendors across **time-zones** and continents. Our key platform, Backstage, is the largest implementation of Spotify's app **management** tool in the world - hosting thousands of concurrent users across Expedia.
- Led the drive to transform the team from kanban-based support engineers to an agile team of engineers that developed on multiple platforms in multiple languages. Drove education and adoption of agile best practices and ensured engagement and productivity were not impacted but instead fundamentally improved - seeing **development time** on tickets plunge to hours or days instead of weeks.
- Responsible for all internal Backstage support for plugin contributors, end users, and executives. My team worked closely with plugin contributors throughout Expedia to ensure a consistent, reliable platform that adhered to all compliance and security requirements. Ensured support SLAs were met and assisted Developer Support in troubleshooting issues and incidents - leading to 90% reduced incident occurrence for our platforms and response times of under 5 minutes.
- Lead the initiative to launch a homegrown ChatOps solution leveraging Stackstorm and Slack to enable developers to complete many **time-consuming** tasks from their chat clients. App deactivations, metadata look up, and ChatGPT **integration** were among the many solutions we launched, saving an estimated 6,000 plus hours per developer per year.
- Developed and managed the internal ChatOps contribution model to support Expedia developers who wanted to leverage ChatOps for their own solutions, decreasing onboarding **time** to the platform from a week to a matter of hours.
- Lead **engineering** efforts to launch LinearB at Expedia, including **API integration** and rollout support to key Expedia orgs while dog-fooding the platform to target productivity challenges on our own team. We identified key behaviors that were inflating our lead **time** that reduced it to 1-2 days.
- Provided introductory and advanced training on all of our platforms quarterly to drive adoption and innovation at Expedia. Topics covered included Backstage basics, plugin **development** and contribution as well as ChatOps and how to use our DORA platform to target productivity gaps. Training was always well attended and rated by surveys - achieving an 80% or higher approval rating from participants.
- Lead the international Culture Council for my sub-division, encouraging and elevating examples of innovation and customer-centric work among our teammates.

Pluto TV – West Hollywood, CA

2021-2022

STE Manager, Core Services Backend

As the STE Manager, I lead an international team of STEs to test the core backend micro services of the Pluto TV streaming platform.

- Directly led a large team of 10-15 contractors and FTEs across the globe - working closely with engineers in Eastern Europe, LATAM, and Africa as well as the US.
- Managed the validation and automation efforts for almost 30 micro services that provided critical components of the Pluto streaming experience.
- Directed mobile and web-based client validation to ensure **API** reliability after **release**.
- Worked closely with Product and mobile client teams to link validation efforts for feature rollouts across platforms.
- Worked closely with **engineering** and **devops** teams to validate and **release** the next generation production environment for the Pluto platform.
- Managed, created, and maintained functional **automated** tests using **Java**-based RestAssured and Postman.
- Ensured the validation of all releases met organizational standards and provided the correct coverage of all new features and updates.
- Created performance and load tests utilizing Jmeter and Jenkins to spin up extensive test environments in AWS' EC2 to simulate production-like traffic and instances.
- Managed extensive test suites in TestRails for each micro service.
- Led STEs throughout a SAFe Agile product lifecycle.

FastSpring – Santa Barbara, CA**2019-2021****Quality Assurance Manager**

As the **Quality Assurance**, Production Support and **Release Manager** of FastSpring I led efforts to develop and automate e-commerce **testing** suites, streamline and automate releases and deliver new high **quality** features to a global customer base.

- Led efforts to build an **automated** build and **release** process for several **java** applications and services utilizing EC2, Jenkins, Dynamo and other AWS technologies.
- Developed web and **RESTful API**-based commercial-scale **java** application test automation utilizing Jmeter, Blazemeter, Selenium, Postman, Jenkins, and WebDriverIO.
- Developed a cross-platform **quality** process utilizing Test Rails and JIRA for test case and test run **management** and **quality** metrics reporting.
- Managed a team of **Quality Assurance** engineers across web and backend platforms.
- Developed and managed an incident response process for immediate resolution of critical production issues.
- Led efforts to secure critical PCI-compliance including penetration **testing** and remediation, company training on security issues.
- Managed root cause **analysis** process to identify key improvements to reduce and eliminate reoccurring incidents in production applications.
- Develop, analyzed and presented critical **engineering** performance data - identifying trends and collaborating on initiatives to address issues exposed.

Vixlet, LLC – Los Angeles, CA**2015-2018****Release and Quality Assurance Manager**

As the **Release** and **Quality Assurance** Manager, I led efforts to reduce **time** to deployment through automation and to minimize production downtime.

- Developed an **automated** build and **release** process for several node applications utilizing Elastic Beanstalk, Route 53, SQS, DCOS, Dockerhub and Travis-CI.
- Developed **automated** build and **release** processes for iOS and Android applications leveraging Jenkins, Crashlytics, Hockey, and Fastlane.
- Managed **API testing** and test automation for commercial-scale node applications utilizing Jmeter, Blazemeter, Selenium, Mocha and Postman.
- Worked closely with marketing and client **management** for new product releases and implementation of AppBoy, Crashlytics, AppAnnie, Google Analytics and Urban Airship.
- Managed Google Play and iTunes Connect app releases and marketing updates.
- Developed a cross-platform **quality** process utilizing Test Rails and JIRA for test case and test run **management** and **quality** metrics reporting.
- Managed a team of **Quality Assurance** engineers across mobile and backend platforms.
- Developed and managed an incident response process for immediate resolution of critical production issues.
- Managed root cause **analysis** process to identify key improvements to reduce and eliminate reoccurring incidents in production applications.

Paramount Pictures - Hollywood, CA**2012-2015****Manager of Mobile App Development & Digital Content Distribution**

Managed the ongoing **development** and support for over thirty custom mobile applications for Paramount and other Viacom verticals, including MTV, often with five or more active projects concurrently.

- Worked closely with C-suite and **senior** executives to gather requirements for new corporate and consumer-facing mobile apps and digital properties.
- Worked closely with marketing teams to coordinate key deliverables for new film roll outs.
- Managed international **development** teams across India, Belarus, England, and Canada.
- Developed and maintained mobile app **development** budget and mobile app **project** budgets.
- Worked closely with the legal department to write, negotiate, and manage contracts for mobile and digital properties.
- Partnered with corporate security teams to develop and execute mobile app security standards.
- Managed and executed mobile app releases and corporate mobile policies through Cisco's Zenprise sever.
- Developed multi-platform mobile applications using the Capriza mobile **development** platform.
- Created and executed mobile app **quality** plans and test cases. Managed defect tracking in Atlassian's Jira defect tracking tool.
- Managed operations for ParamountMovies.com including end-to-end digital content workflow development.

DOUG GORMAN

- Worked closely with Home Media marketing groups to develop and launch sales campaigns for EST and VOD releases of digital content.
- Worked closely with EIDR, DECE, and UltraViolet retailers to coordinate digital product roll outs.
- Managed vendor selection and approval for mobile and digital products.

Creative Artists Agency - Century City, CA

2005-2012

Manager of User Experience, Continuous Delivery, Quality Assurance & Customer Services

Worked directly with CIO and senior IT executives to create, plan, and implement solutions to improve business and IT productivity.

- Performed business analysis and requirements gathering with company partners, agents, and executives for several lines of business applications including screenplay management, motion picture production, music and comedy touring, and executive call management systems.
- Responsible for corporate IT communications, product and service marketing and evangelizing.
- Managed and implemented user experience design methodologies including usability testing and user acceptance testing.
- Provided coaching and training for IT-wide conversion to Agile development and project management practices.
- Worked closely with the corporate PMO to plan product and development roadmaps and resource allocation.
- Managed global remote office and VIP customer support.
- Led the conversion of the company Help Desk to a Service Desk orientation.
- Participated in Microsoft Technology Adoption Programs to drive prioritization of features key to CAA in new releases of several products like Service Manager and Orchestration Manager.
- Implemented automated server alerting, incident tracking, and server provisioning.
- Managed quarterly corporate image development, roll outs, and monthly critical updates testing and releases.

Baxter Bioscience - Westlake Village, CA

2002-2005

Manager of Quality Assurance, Regulatory Compliance & Customer Services

Managed quality assurance and customer services for a web and mobile-based remote care platform for patients with hemophilia that was deployed globally in several languages and locales.

- Worked closely with global sales teams and senior executives at many regional Centers For Disease Control to capture and plan features for upcoming releases.
- Led patient and physician outreach programs for ethnographic studies to help improve quality and user experience.
- Developed a custom, Java-based automated test suite utilizing both on and off shore resources to assist in greater developer productivity and the implementation of daily build cycles.
- Managed FDA audits and ensured compliance with patient data privacy standards like HIPPA and Safe Harbor.
- Managed localization for all products in languages including Mandarin, Swedish, German, French, and Spanish.
- Created and managed a web-based defect tracking system for multiple core products and business teams.

EDUCATION

University of Southern California, Los Angeles, CA

TECHNICAL SKILLS

Applications

Xcode, Android Studio; IIS, Visual Studio, Azure, Team Foundation System, MSBuild, Sharepoint, Microsoft CRM; IntelliJ IDEA and Webstorm, Eclipse; Git, Github, SVN, Jenkins, Thoughtworks' Go, Ant, Bash Shell, Telnet, FTP, cURL; Apache, Apache Tomcat, IBM Websphere, Jmeter, Blazemeter; Crashlytics, iTunes Connect, Google Play Store; Jenkins, Travis-CI, Github, Elastic Beanstalk, Route 53, EC2; Invision Digital Content Management; Microsoft Service Manager, Orchestration Manager, Operations Manager, Active Directory, SQL Server; Atlassian Jira and Confluence, Rational Robot, QuickTest Pro, Load Runner; ServiceNow, Cherwell, Box, Dropbox; Google Analytics, App Annie; Adobe Creative Cloud, Sumo, Sentry, Cloudwatch, S3, LinearB, Backstage.io, DataDog, Stackstorm, Spinnaker

Programming Languages & Frameworks

HTML, CSS, JavaScript, JSON, Node.js, Typescript, Express, Mongo, Webdriver IO, SQL, MySQL, Postgres, Selenium, Cypress, Mocha, React, Java, Selenium, RestAssured

Operating Systems

Macintosh, Unix, Windows, Linux; iOS and Android
