SUMMARY

Certified Microfocus / OpenText ALM (Application Lifecycle Management) Administrator.

Certified ALM Octane Administrator.

Expertise in leading edge testing methodology and professional services that span the full Software Development Life Cycle (SDLC), Test Life Cycle (TLC), Agile Methodologies and Process Management Improvements (PMI) that interact with all phases of Project and Program Management (PPM). Able to manage Agile distributed teams in a wide range of technological areas and provide enterprise system support, quality assurance, testing and engineering projects with over 15 years of hands-on experience in software testing, test methodologies, and test architecture. Over 15 years of concentration in project management of shared services and return on investment of methodology and professional services for customer relationships. Organized and self-motivated with the demonstrated ability to handle complex responsibilities in a demanding work environment with the ability to motivate team members to deliver and exceed expectations in any situation or challenge.

HIGHLIGHTS

Extensive experience with the Software Development Life Cycle (SDLC) including quality assurance and all types of automated and performance testing. Created master test plans and quality assurance measurements (metrics/KPI) for execution of test case scenarios. Additional expertise includes implementation of test cases, management of product defects, change management and test automation tools.

Over 20 years of Software Quality Assurance experience - performance testing, performance analysis, performance monitoring, automated regression testing, storage testing, developing and implementing testing strategies, policies, procedures and best practices.

Automation

Over 20 years of extensive experience in Test Automation using UFT, Load Runner Enterprise LRE, Performance Center and ALM (QC) for clients like HP, Deutsche Bank, Comcast, UBS, OGC and others. Application Lifecycle Management (ALM) Administration and Support. ALM Workflow Coding and Customization.

VB Script; Over 15 years of experience in developing test data extract using VB Script.

Lead/Off Shore team lead; 10+ years of experience in leading test engineers, automation and manual testers both onshore and offshore.

Proven ability to work independently or as a member of a team under pressure, as well as, leading a team or a project. Skilled in adapting to rapidly changing work environments.

Expertise in planning QA strategies, timelines, process control, and mentoring junior QA analysts.

PROFESSIONAL WORK EXPERIENCE

May 2021 – Present

Lead Hands On ALM Admin, Microfocus Tools Support Specialist at DXC/Gainwell Technologies Inc.

ALM Administration and Support for the state of Tennessee (TennCare Project)

Performed ALM installation and configuration. Handled the upgrade from ALM 12.5 to ALM 15.5 to ALM 17.01. Supporting multiple ALM environments (Test, DR, and Production). Very large user community. Handling daily issues with ALM and closing tickets using Service Now. Validating all test tools after monthly patches. Handling vulnerabilities and other system/server related updates and patches. I am the only person responsible for workflow changes and updates for all ALM projects. The workflow update process is as follows:

Request/Approval/Implementation/Validation/User Testing and Sign Off. Every change to the workflow customization process is being coded and unit tested by Joseph Man.

Mar 2020 – May 2021 Contract

ALM Admin, Microfocus Tools Support Specialist at Federal Reserve Bank of PA (Remote)

Heavy on daily ALM support. Was involved in Upgrade/Migration assistance of ALM 12.53 to 15.01.

Responsible for upgrade of **over 100 ALM projects**. Created and wrote scripts to assist in install during upgrades. As part of **ALM Support team**, handled issues with environment, as well as, workflow customization and coding for all **ALM Domains and Projects**. Assisted in Developing and creation of over 100 different **ALM Reports**. Supported other teams within organization with Load Runner / **Performance Center Testing** and Training. Developed PC/LR **Test Scripts** and furnished training materials to get other **test architects** of the ground. Participated in handling **ALM patches** and vulnerability issues. Handled issues with restoring compromised **ALM projects** from backups and validated recovery.

ALM Admin, Microfocus Tools Support Specialist for Maximus Inc (Remote)

Mar 2019 – Mar 2020 Contract

Responsible for:

ALM 12.53 Microfocus Process **Development** and Implementation. **ALM** brainstorming, migration/upgrade process implementation. **ALM** Support pre/post migration. Heavy on **ALM workflow coding**.

Performance Center: LoadRunner scripts assistance and error handling. Post **ALM** upgrade support with LR scripts re-run and upgrade.

UFT Support: Post upgrade support with scripts re-run and upgrade.

Heavy on VBScripting and code debugging.

Jira Support:

Assisting with integrating **ALM Octane** with Jira.

Handling all issues associated with **ALM Octane/Jira** support.

Overall Support of All Microfocus (**HP**) tools within the company. Serving as a liaison between user community and vendor support team.

ALM Admin, HP Tools Support, ALM Workflow/Script-VBScript developer for Wells Fargo (Remote)

Oct 2016 – Mar 2019 Contract

As an **ALM Admin** and **HP Tools support**, supported the following applications: **ALM12.01**, **ALM 12.53**, **HP Synchronizer**, **UFT 12**, **UFT 14**, Load Runner 12. And other in-house developed **software**.

Responsible for Installation, configuration and **administration** of **ALM (Application Lifecycle Management)** 12.01 and 12.53.

Responsible for upgrade of over **600 projects** of **ALM (Application Lifecycle Management)** 12.01 to **ALM 12.53**. Dealing with users' issues on daily basis. Providing top level **ALM support**. Created scripts to assist and save time during the upgrade. Managing large number of users (18,000) and about 3,000 concurrent users daily. Assisted in product packaging and installation pushes. Developed multiple different reports that extract **data** out of **ALM**. Daily/Weekly status meetings as well as tracking progress. Daily/Weekly issue/resolution reports on **ALM support**.

ALM Administrator and Reports Specialist CCAR Program for Deutsche Bank

March 2016 – Oct 16

Assisted with **ALM Administration** of multiple **ALM environments** in both Domains and Projects.

Responsible for **ALM 11.5** and then **AML 12.21 HP (Quality Center)** process **development** and implementation, **ALM workshops** and training. Worked on **ALM workflow customization coding** and managed **ALM Template coding** and implementation.

Heavily involved in **development** of over 100 different **ALM Reports** (CCAR Related as well as other daily and triage reports) out of **ALM modules**, as well as, standalone excel **automated** one-click reports. Performed full lifecycle of **testing** and documented the **Test Results/Status** on a regular basis. Introduced **test methodologies**, planned tests and managed manual and **automated testing**.

Used **UFT 12** for Automation **Testing** and performed **performance testing** using Load Runner 12 & **Performance Center 12.21**

ALM Developer for Hewlett Packard (HPE)

Aug 2014 – July 2016

Responsible for the leading of requirements gathering and design specifications meetings and workshops. Provided Process expertise on **Quality Management** process areas such as: Requirements **Management**, **Test Management**,

Defect **Management** and Release **Management**. Technical Lead for the implementation, configuration, deployment and validation of the solution of the HP Healthcare customized **ALM** solution. Hands on **development** of **ALM** Workflow customization, fields, and rules with **integration** with HP PPM, SharePoint and Rlink. Work experience with **Agile** System **Development** Life Cycle **management** methodology for the Implementation Team. Administrated and applied patches, performed Server Maintenance, User **Management**, Security Groups and Access **Management**. Managed projects with internal as well as external resources with a team size less than 15 people in 5 different States (Vermont, Indiana, Delaware, Arkansas, Colorado).
Designed and developed **ALM** workflow customization coding. Developed a **Test Data** Extract using VB Scripts. Worked on **ALM** Template coding and implementation. Assisted in training new users to get up the speed with companies **ALM** process. Integrated techniques with PPM, coding around the discrepancies to allow smooth **integration**. Supported large number of users.

ALM Administrator / Automation and Performance Testing Specialist for CR BARD

Jan 2014 – Aug 2014

Performed **ALM** 11 installation and configuration. Worked in **Test** Automation Environment (**ALM**, Quick **Test** Pro and Load Runner) Installation, **Testing** and Support. Administrated **ALM** environments (dev, validation, production).

Responsible for: **ALM** 11 HP (**Quality Center**) Process **Development** and Implementation, **ALM** Workshops and SDLC implementation. Assisted with Genilogix eApprove Template implementation and training. Functioned on **ALM** workflow customization coding and **ALM** Template Coding and Implementation.

Assisted in training new users to get up the speed with companies **ALM** process.

Assisted in **QA** and Validation **Testing** (Manual and **Automated** using **UFT** 11.5)

Developed and Implemented Load **Testing** Scenarios and Scripts to **test** the environment using Load Runner 12.0

Developed a **Test Data** Extract using **UFT** 11.0

Automation and Performance Testing Specialist for Warner Chilcott (US)

Jun 13 – Jan 14

Performed **ALM** 11 installation and configuration. Administrated **ALM** environments (dev, validation, production). Responsible for **ALM** 11 HP (**Quality Center**) Process **Development** and Implementation, **ALM** Workshops and SDLC implementation.

Assisted with Genilogix eApprove Template **development**, customization, and implementation

Worked on **ALM** workflow customization coding and **ALM** Template Coding and Implementation.

Performed **ALM** daily **administration** tickets and requests. Assisted in training new users to get up the speed with companies **ALM** process.

Supported in **QA** and Validation **Testing** (Manual and **Automated** using **UFT** 11.5)

HP Quality Center/Workflow Specialist ALM Administrator for Comcast, Mt. Laurel, NJ

Jan 13 – May 13

Performed **ALM** 11 HP (**Quality Center**) Process **Development** and Implementation, **ALM** Coding, **ALM** Workshops and SDLC implementation. Assisted in QC 10 to **ALM** 11 migration and implementation. Worked on **ALM** workflow customization coding and **ALM** daily **administration** tickets and requests.

Supported and customized multiple domains/projects.

Associate Director of TAPE (Test Automation & Performance Engineering) for UBS WMA

Jan 11 – Dec 12

Lead **Test** Automation & **Performance Engineering** teams and controlled multiple projects.

Performed coding QTP, **UFT** **ALM** using VB-script to deliver **automated test** cases and implementation techniques.

Responsible for **ALM** 11.5 HP (**Quality Center**) process **development** and implementation, **ALM** Coding, **ALM** Workshops and SDLC implementation.

Created **Test** Scripts for Automation **Testing** using **UFT** Unified Functional Tester 11 (AKA QTP 11.0)

Managed Testers on site and off-shore to provide **ALM** 24-hour support.

Lead QA PTG Analyst / Tools Specialist (HP QC, QTP) for Dow Jones

Jan 2011 – Dec 2011

Responsible for defining and developing detailed Functional Specs, Design Specs, Test Plans, and Test Results for Product Releases. Defined test methodologies, test requirements, setting up the required Test Lab and Equipment (Tools, Hardware etc.).

Performed All Cycles of testing of the features of client security products and documented the Test Results/Status on a regular basis.

Managed manual and automated testing, introduced test methodologies. Planned tests. Responsible for project certifications. Automated Testing performed using QTP 10 and 11.

QC 10 configuration, implementation and support.

Lead QA Analyst Automation Specialist for Morgan Stanley

Aug 2010 – Dec 2010

Served as a Lead QA Analyst and Mercury Quality Center Administrator, delivering solid QA Process and maintaining Requirements, Test Cases, and Defects.

Responsible for preparation and analysis, road mapping, and gap analysis. Created customized training, identified and created templates, documented best practices and recommendations.

Delivered and Customized New QC 10 Features such as Cross Project Customization, Version Control, Sharing Libraries, Risk-based Quality Management, Quality Center Dashboard Module, Test Resources Module, Dependencies, User Updates including Test Parameters, Copying Across Projects, Management Module, Site Administration Updates including Project Extensions, and Workflow Events.

Used external interfaces with Jira, Excel, Word, Eclipse should be included impact of new features on integrated use of QuickTestPro 10 & impact of new features on the use of Business Process Testing. Managed an Off Shore QA/QC teams to support the test automation process.

Quality Assurance Lead Tester / Tools Specialist for Screen vision Inc.

Jun 09 – Aug 10

Organized QA Process as part of SLDC. Performed as a Subject Matter Expert SME's to start a QA Department in this organization. Organized and maintained QA Environments (Builds in and Out of QA).

Responsible for estimating all QA projects in as early as Architectural Phase and QA Planning Phase. Performed automation, managed evaluation and purchasing of QA Testing Tools (SpiraTest, QTP 10, and Load Runner 10). Responsible for resource allocation and hiring people in QA Department to accommodate the project's needs.

Created and Maintained QA Deliverables

Produced QA Test Plans and developed QA Test Scripts and Test Cases. Worked with On-Shore and Off-Shore Development and QA Teams.

HP Automation Tools Specialist for Brown Brothers Harriman (BBH)

June 2008 – April 2009

Installed and customized HP Quality Center 9.2 on Web sphere using Oracle 10G. Heavy on workflow customization and coding using VBScript. Served as a Mercury Quality Center Administrator, delivering solid QA Process and maintaining Requirements, Test Cases, and Defects.

Upgraded Quality Center from 8.2 to 9.2 and restoring over 100 projects into a new environment.

Responsible for developing automated test cases and test scripts using HP (Mercury) QTP 9.0 using conditional statements, regular expressions, data table and parameters. Defined and Developed custom functions and verifications to handle dynamic objects (Descriptive Programming) Used and maintained global object repositories.

Performing Load Testing using Mercury Load Runner 9.10

Responsible for all performance tests including Load, Stress, Capacity, an Volume. Coordinated test results in search for inconsistencies and ways to improve overall companywide performance. Assisted in database and hardware performance tuning.

Director of Quality Assurance for Schematic

May 2007 – June 2008

Responsible for overall QA Testing mechanism of the company following the basic SDLC and Agile Methodology.
Responsible for Hiring new talent, testing tools acquiring, implementation, training of staff members and understanding / computing the ROI (Return on investment) reports and metrics.

Assisted as a hands on lead tester on all projects and phases:

QA Planning Phase, Functional Testing, Automation (QTP 9.0), Performance etc.

Created and Maintained QA Deliverables.

Responsible for implementation and management of Defect Tracking tool(s)

Sr. Manager, Mercury Interactive Tools Specialist for Context Web

May 2006 – May 2007

Installed and customized HP Quality Center 9.0 utilizing JBOSS to unify testing process and improve overall testing as part of SDLC. Developing automated test cases using Mercury QTP 9.0 using conditional statements, regular expressions, data table and parameters. Furnished custom functions and verifications to handle dynamic objects.

Used/maintained object repositories. Excellent VB Script programming skill

Serving as a Mercury Quality Center Administrator, delivering solid QA Process and maintaining Requirements, Test Cases, and Defects. Managing an Off-Shore Team of 12 testers located in India.

Performing Load Testing using Mercury Load Runner 8.1.

Responsible for all testing environments as well as build and version control.

Reported progress to higher management and passed the feedback to my team members.

QA Lead Analyst/Tester System Integration Group for American Home Mortgage

December 2004 – May 2006

Developed and executed software test plans and specifications for the software packages and related systems using Mercury Quick Test Professional 8.2. Developed and executed performance test scenarios using Mercury Load Runner 8.1 Used functional requirements and specifications to develop software test cases in Mercury Quality Center 8.2

Led software problem isolation and resolution processes, including use of problem tracking systems QC 8.2 and interaction with software developers in problem isolation. Collaborated with business analysts, software developers, project managers and development managers in the development of software test cases using Mercury Quality Center 8.2. Led effort to improve Software Quality Assurance practices, including software test design, coverage and execution; test automation; software metrics and technical reviews.

Performance Test Lead for Telcordia Technologies (CMM Level 5, ISO 9001 Certified)

January 2000 – December 2004

Was responsible for Performance Test Scripts Development and Implementation utilized Silk Test and Silk Performer 4.1 and 3.5.

Weekly Build Updates. Heavy on Load/Stress/Volume Testing. Heavy on Analysis and Performance Tuning suggestions. Used (JAT) Joint Application Testing approach to tune up the performance and get maximum results in a given amount of time for Software Testing and Implementation to PROD Environments. Managed Performance Test Environment (Software in and out).

Furnished Performance Test Plans and produced Weekly Status Reports.

Environment: Windows NT 4.0, UNIX. Databases: MS SQL Server 7.0, Oracle
