

Josh McLain

(480) 200-4615 | Phoenix, AZ.

Email: Joshmclain45@gmail.com | LinkedIn: [JoshMcLain](#)

SUMMARY:

Software Engineer with 5+ years of experience in full-stack development, specializing in JavaScript, TypeScript, Node.js, and React. Expertise in designing and building scalable web applications, optimizing system performance, and utilizing AWS cloud services for robust infrastructure solutions. Proven ability to lead end-to-end development, from ideation through deployment, while ensuring seamless integration across all stages.

EDUCATION &

CERTIFICATIONS: Certified Web Developer (MERN stack), Persevere Code Camp, Phoenix, AZ

CORE PROFICIENCY

& COMPETENCIES: Languages: Java, JavaScript, TypeScript, Node.js, Python, HTML5, CSS3, Bash
Frameworks: Spring Boot, React, Redux, Express.js, Vue.js, Next.js, Flask, Bootstrap, TailwindCSS
Databases: MSSQL, DynamoDB, MongoDB, PostgreSQL
Cloud & DevOps: AWS, Terraform, Docker, NGINX, Jenkins, GitHub Actions
Testing: Jest, Mocha, Chai, Supertest, Sinon, Playwright
Practices: OOP, Functional Programming, Agile, TDD, Clean Code, DRY

PROFESSIONAL

EXPERIENCE:

Dragon Cats Development, Phoenix, AZ.

07/23 – Present

Software Engineer

- Designed and implemented scalable, high-performance solutions for high-traffic web applications, achieving a 25% improvement in system efficiency.
- Leveraged containerization technologies, including Docker and Kubernetes, streamlining the deployment and management of microservices-based architectures.
- Integrated advanced security protocols, including encryption, authentication, and authorization, to safeguard sensitive data and ensure compliance.
- Developed and deployed automated testing frameworks, increasing test coverage by 20% and significantly reducing manual regression testing efforts.

OneOrigin, Phoenix, AZ.

04/23 – 07/24

Software Engineer

- Supported and developed a legacy Classic ASP application on IIS, performing regular releases and optimizing system performance, reducing errors by 15%.
- Set up CI/CD pipelines with GitHub Actions and automated infrastructure provisioning with Terraform, enhancing deployment efficiency by 20% and ensuring smooth transitions.
- Mentored a team of 4 developers, driving code improvements and the successful deployment of a new Java and Vue.js application, boosting code quality and team productivity.
- Developed a shim for traffic redirection in the admissions portal, ensuring zero downtime during system migration and improving the user experience by 25%.

Banyan Labs, Phoenix, AZ

04/21 – 10/23

Software Engineer II

- Directed backend and frontend development for a large-scale e-commerce site, driving architecture design and decommissioning efforts to improve scalability.

- Built key features using Node.js, Java (Spring Boot), and React, enhancing functionality and boosting site performance by 20%.
- Developed custom landing pages integrated with email/SMS notifications and survey tools, increasing user engagement by 30%.
- Optimized CI/CD pipelines using Docker and AWS, reducing deployment time by 25%.

Persevere Code Camp, Phoenix, AZ

11/19 – 04/21

Software Development Trainer

- Conducted one-on-one tutoring sessions in JavaScript, React, and backend technologies, resulting in a 95% course completion rate.
- Provided detailed feedback on assignments, enhancing code quality, adherence to best practices, and algorithm efficiency.
- Assisted in class instruction and troubleshooting for full-stack development, contributing to improved learning outcomes.
