OBJECTIVE

I have over a decade experience managing and supporting **Middleware** technologies in Prod, Pre-prod and QA environment and currently seeking a position where my exceptional blend of business and technical skill sets can be fully utilized to achieving company goals and objectives.

SUMMARY

- Expertise to install, integrate, manage, and configure **Application/Web Server** over a **UNIX/LINUX/SOLARIS/MICROSOFT** based environment.
- **WebLogic** 10g/11g/12c/14c, **WebSphere/Tomcat/Apache/JBoss** System Administrator
- Expertise in supporting high availability **enterprise** and highly skilled in performance tuning
- ITIL Certified
- Experience understanding and redesign business processes to fully utilize available technologies.
- Identify opportunities for **improvement** and make constructive suggestion for change.
- Strong interpersonal, communication, problem solving, analytical & presentation skills.
- Comfortable working independently, and in multi-team environments under tight deadlines.

TECHNICAL KNOWLEDGE

Operating Systems: Solaris, **Microsoft**, **AIX**, HP-UX, RHEL, **CentOS**

Databases: **Oracle** Database, sql **Server**

Servers: **WebLogic** 10g/11g/12c, 14c **TOMCAT**, JBoss, **Apache**, Nginx, **IBM WebSphere**

Monitoring Tools: SiteScope, HP Operations Manager, Splunk, **Enterprise** Performance manager, OEM etc.

Knowledge Skills: **Ansible**, **Jenkins**, Active Directory, Firewalls, **SSL**, etc.

Experience: Migration/Upgrade (**WebSphere/Oracle** fusion stack/**Tomcat**) **Patching** (All app/**web servers**)

Certificates (Renewals/Implementations) **Troubleshooting** (UNIX, Networking, SSL, Firewalls, Code)

WORK EXPERIENCE

United States Department of Homeland Security

VFI

Technical Lead: Middleware Administrator

Nov 2020 – Current

- Provide technical lead for Department of Homeland Middleware Infrastructure
- Lead and Responsible for Migration effort of WebLogic 12.2.1.4 to 14.1.1.0
