Summary

Well-rounded, versatile, and detail-oriented technology professional, with strong UNIX, Internet, quality assurance, web **development**, and system administration experience, along with strong written and oral communication skills, leadership experience, and **problem** solving skills.

Specialties: **Java**, Selenium, Karate DSL, JMeter, Cucumber, PHP, SQL, JUnit, Unix/Linux, Bash, SSH, Git, REST, XML, **JSON**, HTML, HTTP

Additional skills: Python, JavaScript / Node.JS, Jenkins, JIRA, GitHub, NoSQL, OpenSSL, Postman, SoapUI, TestNG, Docker, OAuth, Groovy, IntelliJ, Eclipse, System administration, Test planning, Code review

Experience

SDET

Amazon via TekSystems – Seattle WA

Aug 2024 – Present (8 months)

- UI test automation **development** in JavaScript (Node.JS / TS based proprietary **framework**)
- User-facing functional and cosmetic format validation
- Root cause **analysis** of existing failures and best-practice process and code improvements
- Mocha-based **framework**, CI/CD, AWS, **cloud** desktop, APIs

SDET

Comcast via V-Soft – Remote (Philadelphia PA)

Aug 2023 – March 2024 (8 months)

- Developed Karate DSL tests and test **framework**
- Performance **testing** for APIs and Databricks notebooks \ Python
- Improved and expanded Concourse CI/CD test processes
- **Integration** with AWS, S3, Docker

SDET

Hulu / Disney – Remote (Santa Monica CA)

Sep 2021 – June 2023 (1 year 9 months)

- Developed test automation in **Java** JUnit, Karate, and Python PyTest
- Worked with streaming media, REST APIs, file processing
- Worked with SQL and Scylla databases, HLS, DASH, SCTE technologies
- Analyze realtime converted manifest data for gaps, fallback, out of sequence, ad timing
- Generate mock tools for emulating gap and out of sequence scenarios

Software Development Engineer In Test

SanMar – Issaquah WA

Apr 2018 – Sep 2021 (3 years 6 months)

- Developed UI automation **framework** and tests in **Java** / Selenium
- Reverse engineered automation of multiple third party web UIs
- **Testing** of and with APIs, D365, OData, XML, REST/SOAP, SQL, SSH
- Performance **testing** with JMeter

Sr. Test Analyst / Automation

Oculus via Q Analysts – Seattle WA

Aug 2017 – Feb 2018 (7 months)

- Hardware and **integration testing** for personal VR / gaming platform
- Reverse **engineering** and **testing** of hardware debugging interfaces
- Test **development** in Python
- Device access using ADB and SSH

Contract SDET

Level 11 via iMatch – Seattle WA

Mar 2017 – Aug 2017 (6 months)

- Testing for local-network realtime chat system
- Developed Test automation using Robot Framework
- Built Wiremock record/playback system to support QA and development

Contract SDET

Holland America via iMatch – Seattle WA

Aug 2016 – Dec 2016 (5 months)

- Automated UI tests using Protractor and Node.JS
- Manual UI testing with emphasis on accessibility (ADA/a11y)
- Developed framework and page object models

Contract SDET

Donuts aka Identity Digital Inc. – Bellevue WA

Feb 2016 – Aug 2016 (7 months)

- Developed UI automation framework and tests in Protractor / Node.JS
- Implemented headless testing in Chromedriver and PhantomJS
- Implemented CI/CD with Chrome in VM
- API mocking; XML handling; OAuth integration; DNS protocols

SDET / QA Lead

G2 Web Services – Bellevue WA

Feb 2015 – Jul 2015 (6 months)

- Manual and automated UI testing using Selenium and Cucumber
- API testing using Postman and by hand
- Data testing of Hadoop ETL under AWS EC2
- Lead team of 4 QAEs and coordinate with Dev and DevOps teams

QA Automation Engineer

Stella & Dot – Seattle WA

Sep 2013 – Nov 2014 (1 year 3 months)

- Developed automated UI tests using Cucumber and Selenium under PHP
- Improved automation framework and Cucumber statements
- Developed QA procedures, ran bug bashes, spec and test reviews

SDET

Live Nation Entertainment – Seattle WA

Jul 2012 – Sep 2013 (1 year 3 months)

- Manual and automated testing of API and Web UI
- SOAP API testing using SoapUI and Jenkins integration
- API performance testing using JMeter

Software Development Engineer/Test

GMI (Global Market Insite, Inc.) – Bellevue WA

Sep 2009 – Jul 2012 (2 years 11 months)

- Adopted, maintained, and expanded automation framework for UI and API testing in PHP
- Implemented performance testing and CI/CD
- Revamped and stabilized automated execution infrastructure

Contract QA Specialist

Big Fish Games – Seattle WA

Mar 2009 – Aug 2009 (6 months)

- Manual and white box testing of Adobe Flex UI and associated tools
- Data validation of Elastic Search / Redis data
- Automated test development using Selenium Flex
- Failure testing, functional testing for UI and backend, data verification

QA Engineer

HubSpan – Seattle WA

Aug 2006 – Nov 2008 (2 years 4 months)

- Introduced Selenium automation, developed **analysis** and reporting tools
- Grey box **testing** of web UI and SQL backends and raw data files
- Participant in design review and test planning

QA Lead

CypherEdge Technologies – Bellevue WA

Aug 2003 – Jul 2006 (3 years)

- Manual **testing** of Big Data warehousing/mining ETLs and reporting UIs
- Developed tools including a test case **management** system, equipment catalog system, and task scheduling system
- Developed QA **procedures**, built Wiki knowledge base, carried out bug triages and reviews

QA Engineer

WatchMark – Bellevue WA

May 2002 – May 2003 (1 year 1 month)

- Black box / grey box manual **testing** for non-web UI and SQL backend
- Test data generation and root cause **analysis**, security **analysis**
- Tools **development**

UNIX Systems Engineer

Thomson Reuters – Boston MA

Apr 2001 – Dec 2001 (9 months)

- Install and maintain big-data, high-reliability high-data-rate systems for financial services
- Trained on Reuters Kobra, TIBCO, Reuters 3000
- Manage hardware, lab resources, delivery and installation, client-facing

Lead System Administrator

Shore.Net – Lynn MA

Feb 2000 – Feb 2001 (1 year 1 month)

- Systems administration and monitoring for full-service local Internet Service Provider.
- Responsible for tier 3 support of advanced Unix and Internet Protocol services
- Troubleshooting, process automation, system maintenance
- Access control for onsite customer equipment

Unix Administrator

Harvard Law School – Cambridge MA

Jun 1997 – May 1998 (1 year)

- System administration, monitoring, and user **management** for institutional Web and Unix services.
- **Management** of web and email systems. Resource access, security **management**, system monitoring.
- Custom **development** for Perl based web calendar **software**.
- Support for students, administrators, and faculty including face to face interaction

Other experience

Quizmaster

Geeks Who Drink – Seattle WA

Hosting of live events and emceeing, scoring and judging

Board member

BritCon – Seattle WA

Assist in planning and execution of annual convention events

Head of Publications

Anglicon – Seattle WA

Manage and design published materials for multi-day event including program, advertising, event signage

Endorsements Chair

Political committee – Federal Way WA

Arrange meetings with candidates, design and process questionnaires, manage votes and present results

Education

Bachelor's Degree in Computer Science

Northeastern University – Boston MA

1994 – 1999

- Minor in Journalism
- Active in student government
- Active in student media
