Professional Experience

Zackria Fuel, LLC South Plainfield, NJ 07080

Oct 2007 –

May 2024

Project Management/Data Migration

- Using WMS software helped us ensure that goods and materials move through our warehouses in the most efficient, cost-effective way without any issues in inventory.
- Managed data migration projects focused on optimizing supply chain processes
- Collaborated with designers to develop and implement visually appealing webpages.
- Supply chain management (SCM) is the management of the flow of goods and services, including all the processes of turning raw materials into final products.
- Managed the data mapping process for the migration from legacy WMS to SAP eWM.
- Landed cost enables businesses to invoice goods before they've been physically received goods in transit order. It creates a new type of order to manage the receipt of goods after the original purchase order has been invoiced.
- Procure-to-pay is the process of integrating purchasing and accounts payable systems to create greater efficiencies. Selecting goods and services. Enforcing compliance and order.
- Collaborated with logistics and supply chain teams to gather and analyze business requirements.
- Master Data module is a powerful tool that enables Administrators to efficiently manage and maintain essential master data within the product. Master Data module to handle extraction rules and auto-correction services effortlessly.
- Used Softeon for inventory management and fulfillment software used in our warehouse to management and to distribute orders to keep alert on what was moving and what items were just sitting on the shelves.
- Utilized SAP Digital Supply, Intuiflow and NetSuite Supply Chain Software,
- Mitigated risks, and conducted IT Risk Assessments and created and maintained IT Risk Register.

- Experience with engineering **project management**, from conception through commissioning of equipment within a gas, chemical, or heat production related industry.
- Led **project** team to create an action plan, breaking the deliverables into smaller milestones and assigning individual responsibilities.
- **Warehouse management** systems was integrated with other tools, including basics like bar codes scanning and labeling materials making it easier for **inventory** purposes at our location to pick and distribute to the proper location.
- Proven ability to lead teams and drive results, through my experience in **project management** and my natural ability to motivate others.
- Using Softeon software helped our company manage and control daily **warehouse** operations, from the moment goods and materials enter a **distribution** or fulfillment center until the moment they leave our **warehouse**.
- Spearheaded the transition from traditional waterfall methodologies to Agile practices within the organization, ensuring a smooth and efficient changeover.
- Conducted comprehensive training sessions for application teams, educating them on Agile principles, methodologies (Scrum, Kanban), and practices.
- Used **warehouse management** system (WMS) software helped manage and control daily **warehouse** operations, from the moment goods and materials enter our shop and it was **distribution** or fulfilled until the moment they left our location.
- Created and maintained HTML email templates for marketing campaigns.
- Developing distributors concerns & credit card issuing industry and associated products.
- Assess the security posture of an enterprise environment and recommend and implement appropriate security solutions utilizing NIST framework principles.
- Production experience and strong **skills** in developing and overseeing work plans.
- Monitor and secure hybrid environments, including cloud, mobile, Internet of Things (IoT), and operational technology.
- Handle all complex queries, ETL/SSIS packages, stored procedures and triggers.
- Managed a team of 19 developers and testers on projects and career growth.
- Created and implemented **data** model into SQL database.
- Involvement using SQL in **data management**, **data** warehousing, database design query **optimization**, **data** migration, and performance tuning.
- Developing and deploying applications using JAVA, with databases, debug codes, and test applications.
- Utilized BPMN in making flowcharts, and used standardized graphics to represent the participants, choices and flow of the **process**.
- Primary focused to implement back-end applications **development** using Java, Groovy and PostgreSQL.
- Operate with an awareness of applicable regulations and **policies**, including principles of governance, risk, and **compliance**.

- Identify, analyze, and respond to security events and incidents.
- Giving **sales** presentations to explain benefits and capabilities of each product to developers and testers.
- Revise and/or formulate **policies** and promote their implementation.
- Performing on-site demonstration to train employees quarterly.
- Creating meeting minutes and maintaining **sales** progress and contact list.
- Answering vendor questions about products and prices.
- Closing a sale with our **Project** Owner's (PO), Scrum Master's (SM), Stakeholders, clients, & vendors.
- Coordinating **sales** efforts with marketing programs for distributors.
- Evaluate overall performance by gathering, analyzing and interpreting **data** and metrics.
- Getting **sales** forecasts from distributors.
- Supporting and generating new leads, experience with in converting to new **process** platforms.
