Work Experience

DSV Air & Sea – Iselin, NJ 01/2020 to 08/2024

DSV is Global transport and Logistics – road, air, sea, rail freight and warehousing, keep supply chains flowing in a world of change. Provide and manage supply chain solutions for thousands of companies every day – from small family-run businesses to large global corporations.

Senior Software Engineer, 01/2020 to 08/2024

- Maintain and Support WMS application developed using IBM Mainframes (Z/OS, COBOL, DB2, JCL, VSAM, CICS, Changeman and File Manager) responsible for code changes, testing and deployment.
- Maintain and Support Cargo Wise One application forwarding and product warehouse modules, maintain registry, workflow templates, triggers and documents.
- Design, develop, and maintain integration solutions between various internal and external systems.
- Anticipate and identify issues that may impact the support or performance of systems and initiate corrective actions.
- Ensure appropriate systems documentations and training programs/materials are in place.
- Participate in on-call activities.
- Understand and apply the Service Level Management process consistently, establishing and ensuring quality and performance standards, deadlines and KPIs.
- Manage external and internal service providers to ensure that service levels are met.

Panalpina Inc – Morristown, NJ 04/2001 to 12/2019

Panalpina is Global transport and Logistics – road, air, sea, rail freight and warehousing, keep supply chains flowing in a world of change. Provide and manage supply chain solutions for thousands of companies every day – from small family-run businesses to large global corporations.

IT Service Delivery Applications Manager, 11/2013 to 12/2019

- Lead the Americas IT Service Delivery Applications Support team.

- Establish, implement, review and control best practices for IT Service Delivery related to Core, Finance, Customer and **Warehouse** applications throughout the regional organization.
- This position has an In-Market focus collaborating with all the Regional Product teams and IT teams (Think, Build, and Run) to deliver the required solutions helping the region achieve its strategic targets.
- Build and lead a **high** performing team.
- Set team and individual performance objectives and measure achievement against these.
- Provide appropriate coaching, training, and other **development** needs.
- Manage budget and headcount within agreed parameters.
- Maintain and Support Freight Forwarding and WMS applications developed using IBM Mainframes (Z/OS, COBOL, DB2, JCL, VSAM, CICS, Changeman, File Manager, IBM Websphere MQ) responsible for code changes, testing and deployment.

IT Team Leader, 08/2007 to 10/2013

- Organizing Training concepts, technical manuals, and updates according to application and environment needs.
- Application **cross** training to ensure adequate support as well as **development** of staff.
- Assisting APCO'S in **problem** solving and solutions.
- Meeting service goals with available resources.
- Managing staff induction, training, and performance reviews.
- Monitoring the staff to ensure the prompt resolution to service tickets opened in BMC.
- Delegating Responsibility and ownership of tasks to staff.
- Building up a working knowledge of core application systems.
- Managed external on-shore and off-shore consultancy teams and managed services, controlled **cost** efficiency and budget, including **planning**, monitoring, regular **analysis** and **reporting**.
- Maintain and Support Freight Forwarding and WMS applications developed using IBM Mainframes (Z/OS, COBOL, DB2, JCL, VSAM, CICS, File Manager and IBM Websphere MQ) responsible for code changes, testing and deployment.

Programmer/Analyst, 04/2001 to 07/2007

- Environment: OPEN/36, COBOL, QCOBOL, RS/6000, DB2, VSAM, OCL, JCL, RPG-II, z/OS and UNIX.
- Wrote highly maintainable, solid code in COBOL for forwarding system that formed core framework and has won consistent praise from subsequent developers since initial version.
- Performed regression and system-level testing to verify software quality and function prior to release.
- Technical maintenance of peripheral applications (EDI invoicing, **reporting** tools, **SAP** ERP etc.)
- Worked closely with products to establish **problem** specifications and system designs.
- Interfaced with **cross-functional** team of business analysts, developers, and technical support professionals to determine comprehensive list of requirement specifications for new applications.

Eastman Kodak Company, **Data Formix Technologies – Rochester, NY 06/2000 to 03/2001**

Programmer Analyst, 06/2000 to 03/2001

- AS/400, COBOL/400, S/36, COBOL, DB2, VSAM, CL, OCL, Java, Servlets, ATG Dynamo Server, HTML, XML, Java Script.
- Involved in design and **development** of B2B e-commerce **project**, which handles the order **management** for all Eastman Kodak internal and trade customers.
- Capturing business requirements using "Use Cases".
- Database was on AS/400 and System 36.
- Written COBOL programs for file manipulation.
- Designed physical and logical files for **data** entry and reports.
- Developing Dynamo Server Pages.
- Developing online interfaces using JSP and Servlets.
- Client-side validations using Java Script.
- Developing **reporting** tool for internal website.
- Designing and developing credit card payment module.
- Preparing Technical Documentation of the **project**.
- Performing extensive debugging and Exception Handling support.
- Extending the Logging API functionality to support for sending, receiving, and recording messages generated by components, this **project** completely automates the **sales** order processing for a particular company.

Data Formix Technologies Inc – Franklin Township, NJ 07/1999 to 05/2000

Programmer Analyst, 07/1999 to 05/2000

- Environment: AS/400, S/36, RPG/400, RPGII, COBOL, OCL, Application **Development** Tools.
- Client Insignia is a New York based real estate firm.
- The Client is involved in **Sales** and Rentals of properties throughout the world, specializing in New York area.
- Involved converting the programs that were Y2K affected.
- Also involved testing the application after the conversion was done and also interacting with the users after the implementation.
- The programs that were affected were RPG, COBOL/System 36 and OCLs.
- Involved in maintenance and the enhancements of the system by adding new options.
- Worked on conversion from COBOL and RPG programs from System 36 to AS/400.
- The second **project** that I was involved was in the writing of Queries using Query/400.
- The output of the queries was exported to Excel spreadsheets.
- Import the excel sheet to the AS/400 database.
- This **project** also involved the interaction with the users.

International Software Corporation – Houston, TX 01/1999 to 06/1999

Programmer Analyst, 02/1999 to 06/1999

- Environment: ILE RPG, RPG/400, CL/400, DB2/400, RLU, SDA, PDM, SEU, DFU.
- Logical files for reports were developed.
- Developed ILE RPG IV programs using sub files.
- Developed CL programs to monitor the errors.
- Used RLU (Report Layout Utility) to design reports.

Fourth Generation Info Systems Ltd – Hyderabad, Telangana 04/1997 to 01/1999

Summary

With over a decade of experience in IT service delivery, my core competencies lie in maintaining and supporting critical **logistics** applications for DSV - Global Transport and **Logistics**. My mission is to ensure operational excellence and system reliability, aligning with the company's goal of seamless global transport solutions. I bring to the table a diverse **skill** set in systems support, including proficiency in IBM Mainframes, Cobol, JCL, CICS and DB2, as well as a commitment to fostering a culture of continuous improvement and strategic innovation. My recent tenure with DSV involved overseeing the WMS application and Cargo Wise One, ensuring both applications' optimal performance and **compliance** with service levels. This role required a proactive approach to identify potential issues and initiate corrective measures. I was also responsible for developing comprehensive systems documentation and training materials, contributing to the overall efficiency and knowledge-sharing within our IT team. These responsibilities underscore my dedication to enhancing system support infrastructure and delivering exceptional service outcomes.
