SOFTWARE QA ENGINEER

SUMMARY:

Experience in **software QA** at some of well-known tech companies in the United States, process **management**, **engineering**, and **release**. As **Test Engineer**, process lead & individual contributor, I was on teams building, **testing** and **shipping software** for Desktop, Mobile, all-in-one entertainment Consoles. Successful launches included everything from startup proof-of-concepts, to v1 products, to major products used by millions of customers.

Specialties: QA Process, QA Technical Team **Management**, Manual and **Automated** test creation and execution, Windows, Web apps, Mobile device **testing** (Android, iOS, WP, Firefox OS), UI & UX verification, Smoke & Regression, BVT E2E and UAT, Test Case **Development**, **quality** metrics reporting, **API testing**.

TECHNICAL SKILLS:

Platforms:	Windows 10/8/7/Vista/XP, Mac OS, Xbox XDK, Ubuntu
Mobile Platforms:	Windows Phone, iOS, Android OS, Firefox OS
Programming:	HTML, CSS, XML, Python, Java , JavaScript
Test Automation:	Selenium IDE/RC/Webdriver, Appium, Selenide
Web Testing Tools:	Fiddler, Firebug, XPath, DOM Inspector, RegEx Tester, Splunk, Swagger
Networking:	TCP/IP, FTP, HTTP, Internet, Intranet
Virtualization:	VMware Server, Oracle VirtualBox
Bug Tracking:	Microsoft Azure DevOps , Jira, Bugzilla, HP Quality Center, Rally Atlassian
Browsers:	MS Internet Explorer, Mozilla Firefox, Chrome, Safari, Opera
Applications:	MS Office, Adobe Suite, CorelDraw

WORK HISTORY:

06/24 – present, Software QA Engineer, Microsoft, Redmond, WA, USA

*Market-leading **cloud identity and access management** solution*

- Contributed to the **development** and **testing** of secure identity solutions.
- Focused on Authentication and Authorization, including Evolved Security Token Service, Desktop Single Sign-On, and Customer Identity and Access **Management**.
- Tested MSA and MFA accounts creations and **management**, MSA/MFA login, ESTS, AccountUX.
- Conducted regression **testing** to verify bug fixes and new feature implementations.
- Created detailed test cases and test scripts in Azure **DevOps** based on functional specifications.

08/21 – 02/23, Software QA Engineer, Orchestra by MDF, Remote

Enterprise-grade platform, offering retailers and brands a single, scalable, user-friendly headless commerce engine to drive unified customer experiences online and in-store

- Led, estimated, and prioritized **testing** activities of the platform's components (Content **management** system, Order **management** system, Product **Management**, Marketing, Storefront page).
- Tested new product features as part of a user story-driven, Agile/Scrum **software development** process.
- Executed and coordinated **project testing** activities (functional, regression, E2E, smoke, performance, UI, etc.).
- Performed **API testing**.
- Reviewed and revised QA processes and **procedures**.
- Documented bugs and risks using a defect managing system.
- Assured that the **development** life cycle and activities that occur in each phase are compliant with the approved plans, customers and **Quality** requirements.
- Thoroughly documented test cases and **testing** results using a supported test case **management** system.
- Participated in product design reviews to provide input on functional requirements, product designs, schedules, or potential problems.

09/19 – 08/21, QA Lead, Learner, Remote

*LMS (learning **management** system) of tomorrow for learning organizations, aspiring to achieve maximum learning in minimum **time**.*

- Established and evolve formal QA processes.
- Acted as key point of contact for all QA aspects of releases, providing QA services and coordinating QA resources internally and externally.
- Reviewed requirements specifications and technical design documents to provide feedback and improvements.
- Led and mentored QA team members.
- Developed and execute test cases, scripts.
- Performed Application **testing** (End-to-End, Regression, Exploratory, UI).
- Covered **project**'s functionality with automation tests using Selenium.
- Communicated with customer, clarification design, requirements, etc.

08/18 – 07/19, Senior Software Test Engineer, T-Mobile, Bellevue, WA, USA

*Customer-facing Metro by T-Mobile user account **management** web app.*

- Provided competency **testing** of a web application across multiple platforms and mobile devices in Agile/SCRUM environment.
- Perform Acceptance **testing** of the user stories to make sure that they are meet all acceptance criteria.
- Participate in the e-Commerce **testing**.
- Conducted BVT Functional and System **testing**.
- Performed GUI **testing** (Font Size, Spell Check, Proper Labeling, Tab order for the form fields), performed UI and UX **testing**.
- Involved in **testing** in developer's environment.
- Performed Usability **Testing** (duplicated elements, misleading labels, information tabs, etc.)
- Participate in exploratory **testing** to avoid risks and uncertainty of the product.
- Worked closely with the application **development** teams to troubleshoot issues found.
- Report, Track, review and analyze defects using a Defect Tracking Database in Rally and managed the completed defect tracking cycles and coordinated with the **project management** on a daily basis.
- Actively participated in Daily Scrum/Stand-up/status meeting, Sprint planning and demo meetings, grooming sessions, weekly assessment meetings with **business** analysts, developers, designers and others.

08/17 – 08/18, Software Test Engineer, Microsoft, Redmond, WA, WSD, USA

*Windows Shell team with focus on **quality** of in-box apps such as Windows Media Player, PDF Viewer, Media Center, Mail, etc.*

- Lead manual and **automated testing**, maintenance and migration of new versions of Windows applications and components
- Responsible for creating test strategy, designing and executing test scenarios
- Performed Functional, Regression and **Integration testing** of the applications
- Involved in Smoke and BVT **testing** of builds on daily basis
- Scheduled, monitor and triage daily, weekly, monthly test passes
- Investigated, unblock test automation and blocking issues
- Investigated and triage setup, **infrastructure**, and component code failures
- Filed, tracked bugs with Team Foundation Server. Verify fixes running automation in test passes
- Communicated with dev, test component owners to discuss, troubleshoot and refine **infrastructure**, automation job failures.

10/16 – 08/17, Software Test Engineer, T-Mobile, Bellevue, WA, USA

*Customer relationship **management** app suite including in-store mobile app, web apps, call center apps*

- Provided comprehensive test coverage across Desktop, mobile Web, native iOS and Android (Smartphone and Tablet) versions of the application
- Performed System, Functional, Regression, UAT and End to End and Browser Compatibility **testing** in Production and QA environments.
- Analyzed and reviewed **Business** Requirement (BRD), Product Requirement (PRD), Functional specification (FS) documents to gain a thorough understanding of **testing** requirement.
- Developed Test cases and Test scripts based on high-level and detailed design
- Executed Test Cases for modules of the Application under test using **Quality** Center
- Reporting and tracking defects using **Quality** Center

08/16 – 10/16, Software Tester, Oculus (Q Analysts), VR Project, Kirkland, WA, USA

Tested prototype handheld controllers for Oculus Rift. Tested two virtual reality content creation apps employing the controllers.

- Tested applications created for VR platform
- Testing out the builds to ensure they are fully functional, align with goals and objectives
- Planning, building and executing QA validation for the release
- Conducted exploratory and ad-hoc testing
- Develop and run daily BVT and UAT tests
- Analyzed software failures, reported issues to Jira
- Performed Bug verification testing

03/16 – 10/16 Mobile Test Engineer, AT&T (Q Analysts), Kirkland, WA, USA

Messenger web and mobile apps providing value-added messaging services to AT&T mobile phone users.

- Define and perform various test functions – User Acceptance Testing, Functional and End to End testing
- Execute test cases to compare the actual result with expected results in accordance with business, technical and functional specs of the applications
- Perform regression and exploratory testing
- Perform sanity and smoke testing for new builds
- Write debug and maintains test script and utilize automation framework using Appium and Selenium
- Identify and document test cases for multi component system form requirement
- Analyze software defects, prepared and submitted bug reports into HP ALM
- Verifying bug fixes in new releases
- Coordinate and communicate with developers on bug fixes and required modifications

08/15 – 03/16 Mobile Test Engineer, Mozilla (Q Analysts), Kirkland, WA, USA, Firefox OS

Open source operating system for mobile phones developed by Mozilla Foundation.

- Handling automation testing using continuous integration tool - Jenkins
- Performing daily smoke and sanity tests on mobile devices
- Conducting end to end testing of the Firefox OS on mobile devices
- Investigation of a new issues, rolling regression windows, verification fixed issues
- Analyzing software defects, prepared and submitted bug reports into Bugzilla
- Localization testing
- Creating test cases for new implemented features

03/14 – 08/15 Software QA Tester, Microsoft, Redmond, WA, USA, Xbox One

Monthly updates of Xbox ONE software including in-depth manual UX testing. Executed test suites for daily builds.

- Worked with Daily Production Releases to test all aspects of Xbox ONE console shell
- Performed Functional, UI, Regression, Integration, Localization, Load and Stress tests across different environments: Production, QA, Developers
- Tested video streaming application
- Handled Voice and Natural User Interface testing to ensure continued high quality of Kinect Sensor user experience
- Conducted applications and games compatibility testing
- Performed Licensing testing
- Participated in Security and Enforcement testing
- Worked with International builds of Xbox ONE console software
- Performed testing of the actual merchandising, purchase, and fulfillment UX flows
- Cloud user information store consistency testing
- Tested SmartGlass companion application across different platforms (IOS, Android, Windows Phone)
- Failover and Recovery Testing

Summary

It's all about designing, **testing** and **shipping** great **software** from inception to **release**. It's about defining and tracking metrics, improving customer experience, responding to customer input and maintaining high **quality**. I have developed, managed and executed test strategies with focus on customer experience, real-world user scenarios and customer satisfaction. I have 9+ years of experience in **software** QA at some of well-known tech companies in the United States, process **management**, **engineering**, and **release**. As Test **Engineer**, process lead & individual contributor, I was on teams building, **testing** and **shipping software** for Desktop, Mobile, all-in-one entertainment Consoles (Xbox 360, Xbox ONE, Scorpio). Successful launches included everything from startup proof-of-concepts, to v1 products, to major products used by millions of customers. Specialties: QA Process, QA Technical Team **Management**, Manual and **Automated** test creation and execution, Windows, Web apps, Mobile device **testing** (Android, iOS, WP, Firefox OS), UI & UX verification, Smoke & Regression, BVT E2E and UAT, Test Case **Development**, **quality** metrics reporting.
