

PROFESSIONAL OVERVIEW

Mr. Stark is a highly experienced and versatile professional with over 13 years of **experience** in leading and participating in teams across various **software** development stages. He has a proven track record of delivering outstanding results through **analysis**, application **architecture**, **design**, and development of complex **web applications**. With extensive knowledge of **JavaScript** and versatility in other languages across server frameworks, Mr. Stark has created innovative **applications**, social networking platforms, and **business** tools that have significantly improved client and **business**-facing UX and performance. Beyond traditional **software** development, Mr. Stark also likes working with cutting-edge technologies such as **machine learning** and blockchain networking, enabling him to deliver state-of-the-art solutions that go beyond mere **programming** to solve complex **business** solutions. His expertise and commitment to delivering effective solutions make him an invaluable asset to any team. As Mr. Stark says, "I'm not just a programmer, I'm a **problem** solver."

Roles

- Solutions Architect – Specialized in designing and implementing robust system architectures, leading diverse development teams, and aligning technical solutions with **business** goals. Expertise in full-stack **integration**, performance optimization, and technology strategy formulation.
- Next **JS** / **React JS** Architect – lead the **design**, **integration**, and implementations to convert and update an older E-**Commerce** platform from the ground up involving full-stack development and operational standards.
- Front End TypeScript **Developer** – producing high-quality UX/UI implementations using **React** and Angular Development
- Tech Lead – responsible for running and organizing **agile** teams in the **delivery** of complex solutions, ensuring project goals are met, mitigating risks, mentoring team members, and providing technical guidance

Technologies

- Typescript, **JavaScript**, Next **JS**, **React JS**, Redux, Recoil JS, **React** Native, Redis,
- HTML5, CSS3, JSON, SQL, No-SQL, Laravel, **Git**, GitHub, GitLab, Docker,
- Caddy, Digital Ocean, C#, .Net Core/Framework, Unity Engine, C++, **Coveo** (**Search**)
- **Machine Learning** / AI, Unreal Engine, Plaid (FinTech), Blockchain Networking,

Key Engagements

<i>HealthFirst - TimeBank</i>	Solutions Architect / Team Lead	Developed a multilingual time management system, focusing on innovative system architecture and effective team coordination.
<i>Ford – LATAM</i>	Technical Lead	Delivered Minor Maintenance Issues fixes and helped leadership improvement training .
<i>Bass Pro Shop / Cabela's</i>	Solutions Architect / Project Management / Technical Lead	Developed the overall Architecture for BPS's conversion from a Java Framework (Dojo) to a more Lightweight and Robust Next JS Application to improve UX & Performance.
<i>HealthBridge</i>	Developer	Development of a Medical Location Application using Google Maps and user medical data forms to assist in locating medical facilities for users.
<i>Intrado / West</i>	Technical Lead	Developing and creating updated internal tool interfaces for network routing and optimization
<i>Nike</i>	Lead UX/UI Developer	Developing internal tools for documenting and organizing sales data reports and deliverables

Education

Bachelor of **Computer Science**,
Art Institute of Portland 2015

Professional **Training**/Certifications

Treehouse
Udemy

□ Vancouver, WA

Professional and Business Experience

Perficient, Inc.

Solutions Architect / Lead Technical Consultant

Sept 2019 – Present

CLIENT: HealthFirst Foundation - TimeBank

Directed a 17+ member team across offshore and national locations. The team was involved in developing a multilingual time bank management system, with roles spanning from backend developers using Laravel to frontend specialists in NextJs and ReactJs.

Responsibilities:

- SOW Discovery and Analysis
- Pre-Project Planning and Strategy
- System Architecture Design
- Team Coordination and Management
- Technology Selection and Integration
- Performance Optimization
- Stakeholder Communication and Reporting

CLIENT: Ford - LATAM

Took part in a small 4-person team to help continue maintenance, update KT and Agile techniques, and help improve leadership standards.

Responsibilities:

- Ticket Review
- Code maintenance and clean-up
- Leadership training
- KT review
- General tasks

CLIENT: Bass Pro Shop / Cabela's

Directed a 15-person team (5 PRFT, 10 Clients) in Architecture, Development, and Performance Standard Training for an E-Commerce Platform utilizing Next JS, React JS, Recoil JS, Storybook JS, Testing Library, Jest, Redis, Coveo, and the Atom Kitchen Design System.

Responsibilities:

- Architecting a Next JS/ReactJS/Recoil JS Frontend
- Pre-Project Planning and Strategy
- System Architecture Design
- Team Coordination and Management
- Technology Selection and Integration
- Performance Optimization
- Stakeholder Communication and Reporting

- Platform and Technology Education
- Project Management
- 3rd Party Delegation and Communications
- Performance Optimization
- Code Review and Repo Management

CLIENT: CCS – Health Bridge

Participated in a 6-person team doing the Development of a Medical Location Assistance Application utilizing C# .NET Framework, Angular JS, and React JS.

Responsibilities:

- Developing New Features & Tools
- Software & Technology Upgrade Consultation
- Developing New UI Framework Solutions with API integrations using Next JS & .Net
- Data Stewardship / Bugfixes
- CI/CD Setup
- Converting AngularJS to React JS

CLIENT: Intrado / West

Led a 5-person team doing the Development of internal tools utilizing PHP and React JS.

Responsibilities:

- Worked closely with customers to map out their application needs
- Connected ReactJS Application that integrated with a PHP CodeIgniter Framework
- Used ReactJS to replace bloated PHP UI Form code
- Created Order Data Objects (O.D.O) using JSON for easier BPM order processing and process tracking
- Create a Hybrid MySQL / NoSQL DB system manager in PHP
- Setup a framework for a new scalable BPM using O.D.O
- Reduced original PHP application code redundancies and file sizes
- Ran daily scrum meetings and organized Team Tasks
- Project tracking
- GitHub Management and Training

Nike

Aug 2018 – Aug 2019

Lead UX/UI Developer

Served as the sole Developer and UX/UI Designer of an Internal Finance and Spread Sheet Tool utilizing React JS, Redux, and Custom Middleware.

Responsibilities:

- Using Redux to Connect ReactJS Applications for Server-to-Client Connections
- Remodeling ReactJS UX/UI designs for Application Upgrades

- Documentation and Graphic Design and Video for Visual Documentation
- SQL work with Teradata
- GitHub, Circle CI, Docker, Node JS

Summary

Even though I have over a decade's worth of programming experience, I am not a Programmer...I am a Problem Solver. When I am presented with a problem or a set task I figure out the most effective and efficient way to solve the problem or complete the task given.
