- Salesforce Certified Advanced Administrator
- Salesforce Certified Platform App Builder
- Salesforce Certified Data Architect
- Salesforce Certified Integration Architect
- Salesforce Certified CPQ Specialist

Professional Experience

Alku | Atlanta, GA
Senior **Salesforce** Administrator/Consultant (Remote)

03/2024 – Present

Admin Responsibilities:

- Responsible for converting old **workflow** rule and process builders into flows to keep **system** up to date with current technology.
- **Data** cleanup of old records and archived any unwanted **data**
- Converting profiles into permission sets and permission set groups to prepare for **salesforce** deprecation of profiles.
- Production **support**
- Lead Requirements meeting for new enhancements and new functionality within **salesforce**.

Gulfstream | Atlanta, GA
Senior **Salesforce** Administrator/Consultant (Remote)

05/2022 – 2/2024

Architect Responsibilities:

- **Solution Design:** Working closely with stakeholders, business analysts, and project managers to understand business requirements and translate them into **technical** solutions on the **Salesforce** platform. Create detailed **technical** design documents and architectural diagrams.
- **Governance and Best Practices:** Establish and enforce coding standards, development methodologies, and **best practices** within the development **team**. Promote adherence to **Salesforce** development guidelines.
- **Performance Optimization:** Identify performance bottlenecks and optimize the application for scalability and responsiveness. Conduct code reviews to ensure **best practices** are followed.
- **Data Management:** Ensure **data integrity** and **quality** within **Salesforce**. Design **data** models and provide guidance on **data migration** and **data integration** strategies.
- **Security and Compliance:** Implement **security** measures to protect **data** and comply with industry regulations and **best practices**. Set up roles, profiles, permissions, and sharing rules appropriately.
- **Customization and Configuration:** Assist in Developing custom solutions using **Apex** and Visual force if necessary. Leverage declarative **configuration** options such as Flows when appropriate.
 - Migrate existing process builders and **workflow** rules to flows
 - Evaluate existing business processes, workflows, and systems to identify areas for **improvement**. Analyze and document current state and future state processes to recommend effective solutions.
- **Integration:** Design and implement integrations between **Salesforce** and other external systems, such as ERP systems, marketing **automation** platforms, or third-party applications.
- Automate existing manual processes

Business Analyst

- **Requirements Gathering:** Collaborate with stakeholders to identify and document business needs, objectives, and requirements.
- Evaluate existing business processes, workflows, and systems to identify areas for **improvement**. Analyze and document current state and future state processes to recommend effective solutions.
- **Data Analysis:** Collect and analyze **data** from various sources to identify patterns, trends, and insights. Interpret **data** to provide meaningful recommendations and **support** decision-making processes.
- **Solution Design:** Translate business requirements into **functional** specifications and **system** designs. Work closely with development teams to ensure the proposed solutions meet the business needs.
- **Continuous Improvement:** Monitor and evaluate the effectiveness of implemented solutions. Identify opportunities for process optimization, **automation**, and innovation to drive **continuous improvement** within the organization.
- **Industry Research:** Stay updated on industry trends, **best practices**, and emerging technologies relevant to the business domain. Apply knowledge to propose innovative solutions and provide strategic insights to stakeholders.

CPQ Configuration:

- Initial CPQ setup

- User Licensing/Setup
- Quote Approvals
- Quote Submissions
- Drawers
- Quote Template
- CPQ Automation
- Build Products and Bundles
- Build out of automatically routing users to creating a new quote and adding products after an opportunity reaches a specific stage
- Segmented products both monthly and quarterly by configuring Price Dimensions on products.

Own backup (A third party tool that backs up data and metadata)

- Used own backup to seed lower dev and Devpro sandboxes with production data
- Create seeding templates for different sandboxes including Dev, DevPro, and Partial copy sandboxes for business to test new functionality and enhancements with real data without tainting production data.

ANTHEM | Atlanta, GA

08/2017 – 5/2022

Salesforce Consultant (Remote)

- **Version Control Management:** Setting up and managing repositories to track and version control code changes effectively.
- **Continuous Integration (CI):** Configuring CI pipelines to automate the build, testing, and integration of code changes into shared branches ensuring that code changes are continuously validated and merged into the main branch.
- **Continuous Deployment (CD):** Implementing CD pipelines to automate the deployment of validated code changes to production or staging environments.
- **Infrastructure as Code (IaC):** Treating infrastructure as code, allowing version-controlled definitions of infrastructure components and environments.
- **Automated Testing:** Creating and maintaining automated tests that run during the CI process to verify the correctness and stability of the codebase.
- **Release Management:** Managing the release process, ensuring that changes are rolled out smoothly and minimizing the risk of deployment issues.
- **Security:** Implementing security best practices throughout the development and deployment process. This includes secure code reviews, vulnerability scanning, and access control.

Business Analyst: Collaborate with stakeholders to identify and document business needs, objectives, and requirements.

- Strive to employ out of the box Salesforce solutions whenever possible to minimize the use of custom code and instead employ Salesforce Flows and other proprietary solutions. Design, Build and Document business Solutions.
- Transformed business requirements into solution designs for enterprise-led implementations in Salesforce.
- Served as the liaison between team members, vendors, consultants, and senior management.
- Carried out product evaluations and participated in vendor solution selections.
- Built and Configured Surveys
- Strong analytical, troubleshooting and leadership skills

Jr. Technical Architect/Jr. Solution Architect:

- Approach solutions from a config first perspective then development (Custom Code) approach if necessary.
- Translate business requirements to technical solutions to hand off to technical for build phase of SDLC.
- Build out technical solutions while working with development team to ensure that all components are working harmoniously.

Development Responsibilities: Service/Sales Cloud:

- Develop Custom Lightning Components
- Work as a member of a dynamic team to quickly address various ad-hoc data requests and reporting needs
- Develop and code software solutions via the use of Apex, Visualforce, SOQL, and Lightning within the Salesforce framework to meet and exceed defined business needs
- Created and customized Apex triggers and classes to ensure business requirements were exceeded and organizational test class coverage was maintained at a level of 90%

- Utilize Visualforce to create customized UI solutions that integrate Apex Controller classes to ensure that the end-user experience is both visually pleasing and in-line with the development standards of the delivery team

Admin Responsibilities: Service/Sales Cloud:

- Create and Maintain Conga templates, Conga custom buttons, Conga reports and queries, and installed packages from AppExchange with Conga Composer.
- Build out surveys and automate surveys being sent out to contact using Flows.
- Work with Senior Business Leaders to develop, define, scope and prioritize business needs
- Production support including: case/defect resolution, enhancements, etc.
- Full Data Migration Deployment (Pre/Post Steps)
- Release Management – Coordinated bi-weekly release with admin and development team to deploy release items into production.
- Migrated large volumes of external data on to Salesforce.com using Apex Data Loader or third-party data management tool as part of data management functions
- Export Data from third party system
- Clean Data
- Mapped Data to salesforce
- Mass Update/Upsert to existing salesforce records
- Mass Insert of salesforce records
- Relate existing or new records
- Configured Business Rules such as Workflows, Validation Rules, Process Builder and Flows.
- Data Mapping.
- Email-to-Case Configuration: Assignment Rules, Auto-Response Rules.
- Maintained and configured Multiple Environments throughout several business units.
- Implemented Live Chat
- Created Sharing Rules, Security settings, Permission sets.
- Installed, configure, and maintain Distribution Engine Application.
- Jira Ticket Enhancement Request, Defects, New Requirements.
- Created and maintained issues log and work with users and partners for resolution.
- Defined Role Hierarchies and Profile structure.
- Live Agent Configuration
- Configure Lightning Components (Global Actions, Lightning Record Pages, etc)

Third Stripe Technology | White Plains, NY

03/2017 – 06/2017

Salesforce Consultant (Sales Cloud) | Administrator | Business Analyst (remote)

Responsibilities:

- Collaborated with Sr. Salesforce Technical Architect and users to determine business solutions and/or issue resolutions.
- Gathered business requirements, technical and functional.
- Provided production support including: case/defect resolution, enhancements, etc.
- De-duped duplicate records, and inserted/upserted new records.
- Process Builder, Workflow Rules, Validation Rules, etc.
- Created Custom Objects, Record Types, Custom Fields, Change Sets.
- Developed and maintained UAT and CRPs.
- Created and maintained issues log and worked with users and partners for issues resolution.
- Migrated large volumes of external data on to Salesforce.com using Apex Data Loader as part of data management functions

Acumen Solutions | Mclean, VA

06/2014 – 02/2017

Salesforce Administrator – Sales & Service Cloud (remote/travel)

Responsibilities:

- Created new Conga template, Conga custom buttons and reports, and installed packages from AppExchange with Conga Composer.
