

DELROY BATT

Lithonia, Georgia 30058 | (347) 322-5249

delroy.batt@gmail.com | www.linkedin.com/in/delroy-batt

SUMMARY

A diligent and agile cybersecurity professional with demonstrated success investigating security incidents, assessing vulnerabilities and risk, documenting processes, developing custom Splunk content (scheduled searches, reports, dashboards), installing, configuring, monitoring security tools and controls, and maintaining compliance standards. Leverages project management skills to solve problems with a variety of IT systems and deliver large-scale projects. Expertly recommends security improvements while aligning operational processes with network design and infrastructure.

TECHNICAL SKILLS

Security Tools:

McAfee Policy Orchestrator, Splunk, NMAP, Wireshark, Wire-Dump, Cisco Threat Grid, Cisco Umbrella, Virus Total,

Urlscan.io, Kali Linux, Sentinel 1, Crowd Strike, Symantec, Tenable IO, Scalar, Checkpoint, Palo Alto

Vulnerability Management:

Nessus, Qualys, FortifyData

Microsoft Operating Systems:

Unix / Linux

Risk Assessment:

NIST SP 800-30, Third-Party Risk Management PCI-DSS, HIPAA, NIST, ISO 27001, COBIT

Cloud Infrastructures:

MS Azure, AWS

EXPERIENCE

SIRIUS COMPUTER SOLUTIONS / CDW

Remote

Pre-Sales Security Solutions Architect

Aug 2022 - May 2023

- Led technical discussions with clients to understand their security requirements and concerns and to propose tailored solutions to meet their needs.
- Worked closely with cross-functional teams, including engineering, product management, and support, to ensure successful implementation of security solutions.
- Contributed to the development of sales collateral, including whitepapers, case studies, and technical documentation, to support the pre-sales process.
- Developed and maintained working relationships with key cybersecurity partners to improve sales within region.
- Stayed abreast of advances in cybersecurity events, technologies, and emerging vendors.
- Conducted security assessments and risk analyses to identify potential security threats and vulnerabilities and recommended appropriate mitigation strategies.
- Stayed up to date on industry trends and emerging technologies related to security architecture and recommended new solutions and best practices to clients

Go Cloud Careers

Remote

Security Cloud Architect Security Cloud Architect

Jul

2021 - Sep 2022

- Consult with stakeholders to identify business pain points and requirements, enabling targeted cloud migration planning.
- Serve on an Architecture Review Board to establish development guidelines and validating architecture changes complied to the business goals.
- Design high-availability multi-cloud and hybrid multi-cloud architectures resulting in 99.99% to 99.999% uptime. Ensured quick recovery during unexpected outages and protected business continuity for uninterrupted service delivery.
- Consult customers on avoiding technical debt and proper digital transformations to reduce future development challenges.

- Create **cloud** migration strategies to enhance scalability, agility, and cost-effectiveness.
- Document the design of proposed **architecture** systems in writing, diagrams, and presentational formats to improve communication between cross-functional teams.

BRIDGESTONE

Remote

Vulnerability Management Lead

Sep

2020 - Aug 2022

- Developed and delivered high-quality presentations and technical demonstrations to key stakeholders, including C-level executives, to showcase the benefits and value of cybersecurity solutions.
- Conducted **security** risk assessments to identify potential **security** threats and developed plans to mitigate those risks.
- Developed and executed **vulnerability management** programs to identify, assess, prioritize, and remediate **security** vulnerabilities across the organization.
- Implemented and managed **security** policies, procedures, and standards to ensure **compliance** with industry **best practices** and **regulatory** requirements.
- Created (VM) **vulnerability management** lifecycle and dashboards to analyze technical debt for the corporate organization.
- Handled high-priority incoming ServiceNow tickets for the cooperate environment to manage **security** workflow.
- Contributed to knowledge transfer to manage **security** service providers, enabling new engineers to understand cooperate environment triaging and remediating incidents.
- Provided updates and recommendations on remediating cooperate technical debt to C-level executive.
- Resolved and provided tagging within Tenable to organize and prioritize cooperate data.
- Led incident response efforts in the event of a **security** breach or incident, including investigation, containment, and recovery.

COMMONSPIRIT HEALTH

Remote

Cybersecurity Engineering

Jul 2021 - Aug 2021

- Conducted malware analysis and threat investigations by using McAfee antivirus software, resulting in the identification and containment of potential **security** breaches.

- Successfully deployed CrowdStrike on VM servers and host-based machines to enhance endpoint **security** and reduce the risk of cyber-attacks.
- Managed McAfee host and server patching and implemented McAfee policies to ensure **compliance** with industry standards and **best practices**.
- Utilized manual endpoint detection and response techniques to detect and remove viruses and other malicious software from Azure, **Windows** host devices, and medical devices.
- Managed Sentinel One patching, policy acceptance, and configuration to maintain the integrity of endpoint **security** measures.
- Successfully implemented and managed the Carbon Black **Cloud** dashboard to improve endpoint visibility and reduce the risk of data breaches.
- Submitted malware samples to Symantec for analysis and took appropriate action to mitigate identified threats.
- Conducted host-based implementations on CrowdStrike endpoint detection and response to proactively detect and respond to potential **security** threats.

CHILDREN'S HEALTHCARE OF ATLANTA

Atlanta, Georgia

Cybersecurity **Engineering**

Sep 2020 - Jun 2021

- Provided patch **management** on Linux-based servers.
- Managed patching of Linux-based servers to ensure system **security** and integrity.
- Conducted wireless **network** scans by using Kali Linux to identify and mitigate rogue **access** points and improve **network security**.
- Performed Qualys **vulnerability** scans on application servers and conducted gap analysis to identify and remediate vulnerabilities.
- Successfully configured and launched **Amazon** EC2 Ubuntu Linux instances to support organizational needs.
- Developed custom Splunk content, including scheduled searches, reports, and dashboards, to improve visibility and analysis of system data.
- Identified and documented potential threats and vulnerabilities to proactively address **security** concerns.
- Provided McAfee policy orchestrator DLP incident response and configuration to ensure **compliance** with data protection standards.
- Utilized SolarWinds to review data logs and identify potential compromises, allowing for timely and effective response to **security** incidents.

- Configured wireless **network** SSID to comply with HIPAA standards and maintain data privacy and **security**.
- Conducted email threat analysis on incoming emails by using Cisco Umbrella to prevent **security** breaches and data loss.
- Oversaw medical server updates and remediation to ensure system stability and **security**.
- Successfully oversaw **Windows** 7 device remediation by updating to **Windows** 10 to ensure **compliance** with industry standards and **best practices**.
- Conducted medical devices mitigation on potentially outdated devices to ensure the integrity and **security** of patient data.
- Tracked ticketing updates and responses by using ServiceNow to ensure efficient and effective communication and resolution of **security** incidents.

DOMINION VOTING SYSTEMS

Atlanta, Georgia

IT Specialist

Jun 2019 - Mar 2020

- Developed custom Splunk content, including scheduled searches, reports, and dashboards.
- Deployed **IT security** policies and procedures to establish and maintain consistency across **IT security** operations.
- Proposed **identity management** solutions for **access control**, including **IT security** policies.
- Provided support for any **IT security**-related escalations.
- Oversaw program to provide **IT security** training to user community and conducted ongoing **IT security** tests to measure effectiveness.
- Owned day-to-day **monitoring** of **IT security** systems and coordinated responses to any incidents.
- Adhered to all local, state, and federal regulations pertaining to operation of voting systems.
- Developed expertise in use, maintenance, repair, and application of voting systems across all product lines.
- Gained understanding of hardware, software, and troubleshooting.
- Applied understanding of general database applications and interaction of those applications with external systems.

STREET CONSTRUCTION AND **MANAGEMENT**, INC.

Lithonia, Georgia

Assistant Project Management Intern.

Jun

2018 - Aug 2018

- Coordinated with all utilities during project design and construction.

- Communicated with neighbors adjacent to development to inform them of project status and address any concerns.
- Ensured customer satisfaction with condition of facility.
- Oversaw permits, change orders, material, equipment for jobs, and coordination with contractors.
- Reviewed SCAD and architect design with lead project manager.

EDUCATION

GEORGIA STATE UNIVERSITY, Atlanta, Georgia
Bachelor of Business Administration in Computer Information Systems, January 2024

CERTIFICATIONS

Certified Cybersecurity Ratings and Risk Management Associate, 2021
CompTIA Security+, 2019, expired
Certified Information Systems Security Professional (CISSP), July 2023

PROFESSIONAL DEVELOPMENT

Palo Alto Networks Security Training, 2023: Hardware Firewall, Virtual Firewall
Check Point Networks Presales Architecture Training, 2023: Quantum Network Products, Cloud Guard, Harmony
Z Scalar Product Architecture Training, 2023: Secure Internet Access, Secure Private Access, Data Protection
Go Cloud Architects, 2021-2023: Cybersecurity Careers, Server Virtualization, Containers, Apache Web, Servers, Relational, Databases, Firewalls, VPN Concentrators
Go Cyber Sec Cybersecurity Training, 2020: Cybersecurity Career Roles including Network Administrator, Incident Responder, System Administrator (SysAdmin), Cloud Engineer, Cybersecurity Manager, Privacy Analyst

Summary

As a pre sales **security** solutions **architect** at Sirius **Computer** Solutions, I led technical discussions with clients to understand their **security** requirements and concerns and to propose tailored solutions to meet their needs. I worked closely with cross-functional teams, including **engineering**, product **management**, and support, to ensure the successful implementation of **security** solutions. I also contributed to the development of sales collateral, such as white papers, case studies, and technical documentation, to support the pre-sales process. I have a degree in **Computer** and **Information** Systems SecurityInformation Assurance from Georgia State University and a CompTIA **Security**+ certification. I have experience in investigating **security** incidents, assessing vulnerabilities and risk, documenting processes, developing custom Splunk content, installing, configuring, **monitoring security** tools and controls, and maintaining **compliance** standards. I am passionate about solving problems with a variety of **IT** systems and delivering large-scale projects. I always seek to recommend **security** improvements while aligning operational processes with **network** design and **infrastructure**.
