IT SUPPLY CHAIN & PROJECT MANAGEMENT EXECUTIVE

Versatile and results-driven Senior **Project Manager** and **SAP Consultant** with years of experience delivering IT ERP, **supply chain**, and infrastructure projects. Expertise in **SAP** systems (ERP, S/4 HANA, ARIBA, **eWM**), MS Dynamics, Oracle (eBS, and NetSuite), Infor Nexus, JDA Blue Yonder, and advanced technologies like IoT and AI tools. Adept at managing multimillion-dollar budgets, building PMOs, and aligning IT strategies with business objectives. Recognized for exceptional **leadership**, operational insight, and fostering **cross-functional collaboration**. Skilled in building PMO frameworks, executing ERP integrations, and managing enterprise-wide infrastructure projects. A certified PMP professional recognized for driving efficiency, mentoring diverse teams, and delivering consistent business wins through innovative solutions. Strongly committed to aligning IT investments with organizational objectives to enhance value creation. Over two decades of progressive experience in **project management**, **SAP** consulting, IT infrastructure, and **supply chain optimization**. Consistently delivered measurable results in organizations like Verizon, Elevance Health, IBM Global Services, Trinity Industries, Cardinal Health, RNDC, DFW Airport, FleetPride, Neiman Marcus, Ariat, and others. Known for leading multimillion-dollar ERP and IT transformation initiatives globally.

Core Competencies

- **Project & Program Management** (Agile, Waterfall, Activate, ASAP Methodologies)
- **SAP ERP Implementation** (S/4HANA, ECC, ARIBA, **eWM**, **SAP Hybris**)
- Oracle Implementation (eBS, NetSuite, Cloud ERP)
- CRM Implementations (MS Dynamics (Navision, AX, CRM), Salesforce, **SAP**)
- IT Strategy, Infrastructure, & Operations
- Stakeholder Engagement & Change **Management** (ADKAR, ITIL)
- **Supply Chain Optimization** & Business **Process** Reengineering
- Budget **Management** & **Cost** Control (\$10M+ Projects)
- Vendor & Client Relationship **Management**
- Cloud & **Data** Platforms (AWS, Azure, Snowflake)
- IoT, AI Tools (ChatGPT, Power BI, CoPilot, Generative AI)
- PMO Framework **Development** & Execution

Key Roles & Contributions

- **Senior Project Manager & SAP Consultant**: Led large-scale **SAP** ERP implementations (S/4HANA, ARIBA, **eWM**) and IT infrastructure projects, optimizing processes for global organizations across the USA, EMEA, and APAC.
- **PMO Development**: Built and executed PMO frameworks, including RAID logs, KPI dashboards, and intake processes, to streamline **project** governance and enhance **cross-functional collaboration**.
- **Stakeholder Engagement**: Delivered **high**-impact presentations and reports to C-suite **leadership**, fostering alignment on strategy and **project** goals in **high**-stakes environments.
- **Supply Chain & IT Integration**: Spearheaded integrations of NetSuite Financial, Blue Yonder, **SAP**, and **Microsoft** Dynamics, achieving significant **cost** savings and operational efficiencies.
- **Global Leadership**: Directed teams of 20+ on projects with budgets exceeding \$10M, mentoring **high**-performing professionals to deliver results aligned with corporate objectives.
- **Change Management**: Implemented ADKAR and ITIL methodologies to drive organizational change, improve adoption rates, and ensure seamless technology transitions.

PROFESSIONAL EXPERIENCE

FPC Consulting Services - Dallas, TX
Client: **Ariat International**

OCT. 2024 - DEC. 2024

SENIOR PROJECT MANAGER, GLOBAL SUPPLY CHAIN (SHORT-TERM CONTRACT)

Supported Infor Nexus enhancement and integration with the **SAP S/4 HANA project**. Drove RFP vendor software selection for the Free trade zone **project**. Facilitated the discovery sessions for phase 3 standardization of the master shipping counts.

- Aligned with all key stakeholders on the **project** deliverables for assigned global **supply chain** and WMS projects.
- Partnered with the **SAP S/4HANA** team on the number health check items and training requirements.
- Drove the UAT and Go-live transition from the old 3PL **transportation** and **Logistics** vendor to the new one.
- Supported the **supply chain** PMO team in selecting their PPM software, contributing to the evaluation of frameworks, governance requirements, and tools like BOX and Smartsheet.
- Built the one-pager and **project** plans for all assigned projects in line with the SOW.

Artech - Dallas, TX
Client: **Verizon**

JAN. 2022 - AUG. 2024

SENIOR PROJECT MANAGER /PROGRAM MANAGER- SYSTEMS ARCHITECTURE - IV

Built RACI Matrix for the Business System Artificial Intelligence (BSAI) team. Facilitated the **SAP** vSAP resolution for the Storekeeper Application team. Handled daily truck RFID and GWC tag file requests for the Customer Service Services Group (CSSG) - Material Group

- Directed teams of 25+ on \$10M+ IT projects, ensuring 100% milestone achievement within budget and timelines.
- Led **SAP S/4HANA** and ARIBA integrations, optimizing **supply chain** operations and achieving 15% **cost** reductions.
- Led Generative AI and infrastructure deployments for advanced system enhancements.
- Built and implemented PMO frameworks, including RAID logs and KPI dashboards, enhancing **project** oversight and governance.
- Fostered **cross-functional collaboration** across global teams to stabilize ERP implementations in EMEA.
- Achieved 100% resolution rate for RFID truck cases by managing **SAP** integrations.
- Provided weekly **project**/program updates for IT projects to **leadership** and bi-weekly meetings to SteerCo.
- Worked as a Program Manager CICD and **SAP** Hybris App Modernization, creating lower parallel environments for **SAP** systems.
- Provided weekly **project**/program updates for IT projects to **leadership** and bi-weekly meetings to SteerCo.

- 100% resolution rate for RFID trucks & GWC tags cases by monitoring stock levels with **SAP** e-Commerce Cloud
- Has supported the integration of SharePoint with other applications like Lucid Chart, Clarity PPM, SNow, Atlassian Suite, **Microsoft** Teams, and **SAP** Suite in tracking and managing KPI dashboards and trends.
- Configured the SE16, ZMMM208, ZMMM209, ZMMM175, ZMMM174, ZMMM171, and ZMMM176 tables.
- Managed the database build spreadsheet in completing the updated RFID and GWC truck request files using the Bartendar file.
- Drove the ERP and 3PL **SAP** integration efforts using **Jira**, Confluence and ALM for ticket tracking.

Elevance Health - Remote

DEC. 2022 - JUN 2024

Client: *CarelonRx (PART-TIME)*

SENIOR PROJECT MANAGER/PROGRAM MANAGER, PMO CLIENT SERVICES

Educate **project** team and sponsors on PM methodology and practices. Challenged with building **Project Management** Office (PMO), defining missions, standards, and aligning with strategic business goals.

- Led NetSuite Financial and **SAP** S/4HANA implementations, optimizing business processes, and streamlining operations.
- Developed PMO structures and processes for the CarelonRx Account **Management** Services team.
- Designed strategic playbooks and dashboards for client **leadership** teams.
- Established GxP processes to ensure **compliance** and operational efficiency.
- Provided **project management** training for the staff members of different clients to those who are already working on the projects and are new to **Project Management** with different PMIS and other application tools.
- Managed the AM tools, PIC benefits mismatch, and service recovery projects with Salesforce COM2 and Power BI
- Evaluated and re-implemented NetSuite Financial, **SAP** ERP/ S4 HANA, and Blue Yonder to best fit the future state.
- Maintained and administered NetSuite, HubSpot, Infusionsoft, AWS, WordPress, and oversaw Celigo integrations for the TPA JAA Business Model and disaster recovery.
- Ensured that content was optimized via Salesforce E-Commerce Cloud search engine to improve website visibility.
- Managed RFP and RFI related projects and streamlined the Salesforce **Workflow Management** processes.
- Designed Rx account team playbooks and reports using MS Applications, Teams, Trello, **Jira**, and SharePoint
- Provided **project management** support for the client experience medical and pharmacy team.

Trinity Industries - Dallas, Texas

JUL. 2023 - NOV. 2023

SENIOR IT PROJECT AND PROGRAM, MERGER AND ACQUISITIONS (PART-TIME)

Steered the **development** and **management** of technology plans, infrastructure plans, business continuity plans, and maintenance standards for the team. Integral to prioritizing, forecasting, **planning**, reviewing, and budgeting technical projects and resources. Developed, controlled, and monitored the risks, actions, issues, and decisions (RAID) log; and stakeholder register for the IT M&A projects.

- Directed IT infrastructure integration for mergers and acquisitions.
- Developed risk **management** frameworks and executed strategic change **management**.
- Enhanced **supply chain** efficiency through advanced **process** roadmaps.
- Supported senior **leadership** with infrastructure and network integration efforts building the corporate change **management** plan, principles, and disaster recovery impact from an IT M&A perspective.
- Supported the Infrastructure team with device installation/ setup including RF login, SSO logins, and validations for the end users.

Belcan LLC - Remote

JAN. 2021 - SEP. 2022

Client: *RNDG (PART-TIME)*

SENIOR PROJECT MANAGER, PMO (PART-TIME)

Supported the **warehouse management** (WM) system implementation and the **communication** testing between the material handling equipment (MHE) and the **SAP** system for 14 warehouses with 30 DCs across 6 manufacturing plants. Challenged with building **Project Management** Office (PMO), defining mission and standards and aligning strategic business goals. Managed relationships with stakeholders, contract negotiations and re-negotiation of SOW agreements

- Provided **project management** support for ERP dropship and **warehouse** implementations to the cloud.
- Provided **project management** support for the **SAP** ERP/ PPDS with **Microsoft** Dynamics implementation to S/4 HANA and JDA Blue Yonder WM/SCPO.
- Developed and supported NetSuite automations to configure each contact record before being sent over to Infusionsoft.
- Drove M&A projects to completion in line with Master **Data Management** and **warehouse** requirements.
- Collaborated with the **cross-functional** teams in designing, developing, testing, and implementing legacy and new system applications within the enterprise as well as supporting disaster recovery initiatives.
- Managed S/4 HANA, AWS, Snowflake initiatives for the ERP M&A implementation projects using Smartsheet.
- Provided the training of **project management** implementation of a vendor's risk-based application within the client's Risk. **Management** System
- Facilitated the inbound and outbound Go-live phases by accurately segmenting the deliverables/ requirements for Hypercare and disaster recovery.
- Provided the training of improved **data analysis** for **cost**-savings related decision making to ERP and WMS
- Managed training requirements to ensure proper **data** gathering and meeting customer expectations.
- Involved in managing the master **data management** for Legacy and New systems with respect to order -to-cash and procure-to-pay cycles including **data** mapping, **data** migration and **data** cleaning processes.
- Worked with global and local teams in IT implementation and Hypercare with S4 HANA, SNow, MS Teams, and SharePoint.
- Supported Business and Operations with the RF device installation and setup including the RF login, SSO logins, and validations.
- Facilitated the ERP modeling for both the interface and application architecture proposed states.
- Helped to improve stakeholder engagement and **project** buy-in by conducting regular executive steering committee meetings.

Carerra Agency - Remote

SEP. 2022 - DEC. 2022

Client: *Solidigm - Carve-out of Intel (PART-TIME)*

SENIOR PROJECT/ PROGRAM MANAGER (PART-TIME)

Managed and supported the **cross-functional** relationships during the Go-live transition for the **SAP** ERP **SCM** Program Organized,

managed, fulfilled, and closed SAP HANA and ARIBA projects. Facilitated management styles through effective communication and led innovative activities throughout the project life cycles.

- Provided feedback and escalated to the Steering Committee on the status of the various projects/ programs.
- Provided post go-live support for the SAP ERP with Microsoft Dynamics implementation to S/4 HANA and Blue Yonder
- Collaborated with the cross-functional teams in designing, developing, testing, and implementing legacy and new system applications within the enterprise as well as supporting disaster recovery initiatives.
- Reported the status of the S/4 HANA, AWS, Azure, and ERP implementation using available PM tools.
- Facilitated the inbound and outbound Go-live phases by accurately segmenting the deliverables/ requirements for Hypercare and disaster recovery.
- Helped with the configuration management and proper documentation of the project artifacts like the Knowledge Transfer workshop sessions from the SAP and Deloitte team.
- Supported the completion of the SAP ERP SCM Program Go-live transition.
- Coordinated and organized the batch run and schedule with the SAP Batch Management team.
- Kickstarted the Anaqua Workday Integration Project that was geared towards automating and improving employee feed.
- Worked across the EMEA in stabilizing the implementation of SAP S4 HANA, NetSuite Financial ServiceNow, and Anaqua
- Organized Hypercare and stabilization sessions with executive stakeholders to review and track incidents and issues.
- Improved stakeholder engagement and project buy-in by conducting executive steering committee meetings.

DFW Airport - Dallas, Texas

JAN. 2021 - SEPT. 2022

SENIOR PROJECT/ PROGRAM MANAGER, PMO (PART-TIME)

Drove to completion the following projects: Point-of-Sale Concessions Integration; Optimizing the MuleSoft Integration Platform; Migrate EDW to Snowflake Project; EDL Data Liberation Project; and Data360 Dictionary Tool.

- Provided feedback and escalated to the Steering Committee on the status of the various projects.
- Facilitated the project meetings by measuring actual versus planned deliverables/ requirements.
- Completed the proof-of-concept for the Wide Area Video Surveillance system project.
- Coordinated the development of the e-commerce platform, ensuring it met design specifications and business requirements.
- Monitored the cost tracking and budget management for the projects using Sciformix and the Microstrategy tool.
- Managed requirements to ensure proper data gathering to meet expectations for the Data360 Project
- Drove Agile and Waterfall projects for software development in both Legacy and New environments.
- Supported the decision-making process for the data mapping, data migration and data cleaning processes.
- Worked with cross-functional teams in the IT implementation and Hypercare using applications like Sciformix, MS Teams, Microstrategy reports, and SharePoint.
- Supported Business and Operations teams by collaborating throughout the project lifecycles using Sciforma.
- Facilitated the ERP modeling for both the interface and application architecture proposed states.
- Improved stakeholder engagement and project buy-in by conducting executive steering committee meetings.

IBM Global Services and ManPower Group - Dallas, TX

JAN 2020 - DEC 2020

Client: *Royal Canin, and Mars Group*

SENIOR LEAD CONSULTANT AND SR PROJECT MANAGER

Collaborated with executive team to create and implement strategic roadmap process for IT applications and network infrastructure, aligning IT resources and efforts with business objectives. Led projects for deployment and conversion of multiple systems. Managed relationships with multiple stakeholders, contract negotiations and re-negotiation of SOW agreements. Hired, mentored and trained a team of 12 direct reports. Worked with multiple teams both locally/globally in the USA and Europe for ERP & WMS implementation 40 warehouses with 65 DCs across 8 manufacturing plants. Established Project Management Office (PMO) processes / procedures, assisted the PMO to develop & deliver progress reports, proposals, requirements documentation, and presentations. Worked with cross-functional teams in different Countries & provided regular updates/alignment to the SteerCo.

- Integrated SAP S/4HANA with MS Dynamics for seamless operations.
- Mentored diverse teams, driving efficiency and innovation as the Lead Project Manager for IBM America to the Royal Canin.
- Successfully communicated project initiatives both locally and centrally to get a consensus on data migration and implementation strategies across the EMEA for setting up the segregation of duties, COA, and GCOA in NetSuite Financial
- Integrated SAP OTC & P2P in S4 HANA with MuleSoft to MS Dynamics NAV with BizTalk and Blue Yonder SCPO
- Led the teams through the fit-gap analysis phase, organized the key user training, & the user-acceptance tests
- Governed the resource plan with budget overruns, supported cross-functional teams through action item tracker, and the change control process using SNOW, JIRA, and Confluence.
- Ensured timely and accurate fulfillment of customer orders by proper use of their e-commerce and SAP ERP systems.
- Provided weekly status reports to the PMO & conducted daily standup meetings with the Global team.
- Implemented NAV ERP migration to the cloud including supporting Hypercare and disaster recovery.
- Developed both stakeholder / risk matrixes to manage important stakeholders & leverage critical risks.
- Reduced stakeholder confusion by providing regular updates meetings for both local, global, and executive teams by consistently expediting high-risk items to top management.
- Tracked budgets, RAID logs, WBS, risk / issues escalation, resource utilization, and weekly reporting.
- Aligned both local/global teams on the integrated change management process during project execution.
- Managed appropriate risk responses and documented workarounds to leverage negative risk impacts.
- Tracked open tickets issues, defects, and tasks as well as archiving project artifacts in MS Teams & SharePoint
- Built, managed/executed the To-Be architectural framework for the warehouse drop shipment schematic.
- Reviewed and designed SOPs, terms of reference (TOR), triaged risks/ issues by categorizing them.
- Directed both functional/technical teams across the local, Global teams in North America and Europe
- Led project planning initiatives by drafting SOW, project charters using project management tools.
- Built the team resource calendar to track team availability and T&E plans using ServiceNow and SharePoint
- Sensitized the Business Process Leaders / SMEs to develop the Fit Requirements and SOP documents.

Fleetpride - Irving, TX

MAY 2019 - JAN 2020

Client: *FleetPride*

SENIOR PROJECT ERP AND WMS MANAGER

Acted as the interim QA Manager by monitoring test cases, test scenarios / test results, and provided weekly updates to the Steering Committee. Created / implemented **Project** Charters & implementation plans and directed work teams to implement 6 projects. Managed the completion of the **warehouse management** system (WMS) implementation across 13 warehouses with 40 DCs across 4 manufacturing network sites. Led collective **cross functional** internal and external team of about 30 members.

- Drove ERP migrations to cloud environments, optimizing **data** and system processes.
- Implemented predictive **analysis** tools for **warehouse** efficiency.
- Worked on PMO delivery capabilities by conducting predictive **analysis**, assessed efficiency, and ensured homogeneity across the **warehouse** and location sites.
- Tracked the invoices for hardware, JDA implementation / software CAPEX and OPEX on a weekly basis using **Project** Web Applications (PWA), GSuite, and SharePoint
- Managed multiple large projects from inception and built **project** plans with MS **Project** Online and PWA
- Drove the shared service environments for cloud computing and Blue Yonder SCPO/ WMS deployment.
- Ensured **cost** tracking sheets were updated, led collective **cross-functional** internal, and external teams.
- Drove the SCPO JDA implementation from cradle-to-grave on the system integration testing, UAT, cutover, and Hypercare with respect to cycle count, UOM, kitting, test cases, printer alignment, and SOTI licenses for the RFID devices and network infrastructure.
- Managed a portfolio of **project** managers and **development** leads with SharePoint and PWA, ensuring projects were on time/on-budget/ within scope, and providing PMO support.
- Used **Jira**/ Confluence for issue, defect/task tracking and archived artifacts for **warehouse** expansion projects.
- Designed swim lanes and **process** flows with MS Visio for the record, and **reporting** purposes.
- Managed ticket requests, reviewed & approved design documents, and SOP documentation.
- Monitored implementation bugs / issues relating to configuration, fixes, risks, issues, and changes.
- Provided visibility for **functional**/technical teams by facilitating **BRD**, **FRD** & **TRD** reviews for both the business & technical teams.
- Led both onsite/offshore teams through different test cycles unit testing, QAT, UAT, & production testing
- Managed risk responses and documented workaround for negative risk impacts for dropship initiatives
- Facilitated the golden transactions with the **cross functional** teams across four different states including but not limited to Atlanta, Elgin, Dallas, and Illinois

Global Bridge Infotech - Dublin, Ohio

NOV 2018 - MAR 2019

Client: Cardinal Health

SAP PROJECT MANAGER AND SAP BUSINESS SYSTEMS ANALYST

Managed **Microsoft** Dynamics, Oracle Agile, Oracle EBS, **SAP** APO, ARIBA, S4 HANA, IBP, and ECC material master attributes across the global teams with testing activities. Performed techno-**functional** duties with respect to their **supply chain** material master attributes as well as **cross**-referenced multiple ERP system interfaces and **data** migration/ **data** mapping applications across the EMEA. Worked with a global team of over 50 people. Developed SOPs, user documentation & **BRD** for **SAP process** improvement.

- Worked with Global trade resources and the SWAT team & third-party **logistics** (3PL) team.
- Developed SOP, user documentation/**BRD** for **SAP SD/MM process** improvement, and ensure projects were aligned for deployment.
- Defined **project** SOW, SOP, roadmaps for senior board reviews, and approval.
- Managed technical requests for open & closed tickets during disaster recovery sessions.
- Built and maintained the source-to-target master **data** documentation for the pharmacy team.
- Assumed the role of business systems analyst and collaborated with the team in master **data management**, **data analysis**, **data** conversion, and **data** governance.
- Collaborated with global teams across the EMEA to improve on the pricing model of the ERP system so markup algorithms were adjusted.
- Managed e-commerce and social media campaigns including SEO for the IT **Supply Chain** Services Department
- Defined the plant configuration, renumbering issues / Unit of Measure, and communicated via MS Teams
- Worked on RAID logs conducted for each program / **project**/ risks / issue & then handing over to PMO.
- Created **Project** Charters, developed architectural plans, and integrated other vendors.
- Designed flows lanes, identified batch jobs / helped to organize and categorize the playbook chapters into appropriate color-codes. Categorized multiple customers / **cross**-companies by grouping activities.

Global Bridge Infotech - Irving, TX

MAR 2018 - OCT 2018

Client: Neiman Marcus Group

SENIOR TECHNICAL PROJECT MANAGER III

Managed and drove the implementation of the enterprise and **warehouse** application upgrades and patches, as well as administering the network operations **planning** team. Directed / drove **project** delivery for complex ERP applications & ordered **management** systems including but not limited to coordinating multiple interdependent **supply chain** Projects within **cross-functional** departments, **supply chain**, **warehouse**, PMO, VMO, and NM IT team 5 warehouses with 13 DCs across 3 sites. Managed large projects like the Sorter Replacement **Project** (for both shipping and packing sides), the Quality **Management** Upgrade **Project**, and the Voice Picking Upgrade **Warehouse Management Project** ensuring end-to-end **compliance** with **SCM** model was met.

- Managed multiple projects of varying sizes of \$15MM IT budget across **cross-functional** teams.
- Ensured shipping / packing sorter interfaces were thoroughly tested and installed prior to go-live.
- Managed large projects like the sorter replacement **project** (for both shipping and packing sides), the quality **management** upgrade **Project**, the voice picking upgrade **warehouse management Project** ensuring end-to-end **compliance** with the **SCM** model was met, and concurrently managed multiple teams.
- Coordinated the functionalities of the proposed state for both outbound and inbound test scenarios.
- Coordinated with both the packing / shipping sorter installation projects as well as network infrastructure remediation, and empty totes platform installations.
- Set strategic **leadership** collocation meetings for onshore/offshore resources using Teams & WebEx
- Organized schedules and followed-up meetings to address all concerns from an IT standpoint.
- Controlled the RAID logs, facilitated gap **analysis**/business impacts, & identified root causes / resolution.
- Developed business plan, **project** charters, budget / scheduled plans / **project** closing reports, delivered all portfolios / projects in a timely manner with **high** quality, and within approved budgets.
- Managed all test plans, test cases, and led the team implementing the new order **management** system.
- Facilitated status meetings, with **project** teams, PMO, **project** sponsors, users, and the steering committee.

- Managed **Project** transition from Verint/Nice CRM to Salesforce and **Microsoft** CRM platforms with Confluence
- Managed service requests, risks, and issues with the **Jira** platform for the new drop shipment initiative
- Optimized applications relevant to business and operations by managing applications approaching end-of-support.
- Created RFS, quotation/ budget drafts, **project** plans, updates, and schematic layout designs.
- Ensured all projects met COE standards / requirements in line with corporate strategic priorities.

Quentasia Industries - White Plains, NY

DEC 2016 - JAN 2018

Client: **Standard Fiber, FDE, and NDA**

SENIOR PROJECT MANAGER (CONTRACT)

Managed **sales** orders, purchase orders, master **data**, and order fulfillments using **SAP** ECC, Excel, and Tableau. Supporting the strategic **planning** and execution systems for the clients' **supply chain**. Assisted **functional** and technical team with testing activities. Provided **supply** end-to-end solutions for clients in New York, USA. Managed large aggressive **project** timelines and challenging scope, including being able to create and execute **project** work plans to meet changing requirements resulting from evolving business needs. Led a team of 5.

- Supported change **management** processes by adhering to the requirements of the Governance Board.
- Setup recurring meetings with stakeholders on NetSuite Financial G/L and P&L statements, **project** timelines, and COE standards
- Improved **supply chain** programs by developing **process** maps, **project** plans and strategy **development**.
- Worked with **SAP**, NetSuite Financial in setting up AR/ AP, SalesForce, Oracle eBS, and MS Dynamics CRM applications.
- Provided the **Supply Chain** / PMO Departments with status reports for all projects with **Jira**, Confluence, and Smartsheet
- Adopted the MoSCoW method in driving decision-making & **project** prioritization with ServiceNow.
- Provided meeting agenda, recaps, meeting notes, and assigned action items with Confluence and **Jira**.
- Oversaw the creation of product descriptions, blog posts, landing pages, and other e-commerce content pages.
- Created and defined **project** SOW, plans, decks, timelines, layouts, and roadmaps for board approval.
- Managed all the IT **Supply** change requests for both opened and closed tickets during execution.
- Assisted **functional** and technical team with testing activities and provided bi-weekly ad-hoc reports.

Habitat Holdings - New York, NY

JUL 2016 - DEC 2016

Client: **NDA**

PROJECT/ PROGRAM MANAGER (CONTRACT)

Supervised and drove Modern Methods of Construction of Modular Homes both off-site and onsite. Reduced operating costs generated by 17 percent from streamlining production and **supply** processes. Controlled demand and **supply** spend across multiple end-to-end projects. Integrated **sales & operations planning**, **inventory optimization & supply planning**

- Provided weekly/monthly **project** status reports and financial updates for approved projects.
- Improved budget and **project** plans of prefabricated and precast homes; improved the use of technology in their strategic sourcing of the building construction **project** using **Microsoft Project** and Oracle eBS.
- Created and defined **project** SOW, plans, decks, timelines, layouts, and roadmaps for Board reviews and approval. Coordinated **project** alignment to avoid work duplication.
- Ensured compilation of parts, vendor selection, follow-up with various vendor teams, and quality checks.
- Identified **project** interdependence and clarified **project** concerns to reduce duplication of resources and overall expenses.

Odella Group Limited - USA, UK, AFRICA

JAN 2014 - MAY 2016

Client: **Gohier, Roadex Construction, ASCC, Airflow Engineering, FERMA, Crown Global**

GLOBAL PROGRAM AND CATEGORY MANAGER

Tactically involved in the **SAP** implementation of Order-to-cash and Procure-to-Pay with **SAP** and NetSuite. Improved capacity **planning** by 91 per cent in 2015 through effective **communication** and time **management**. Managed solution architects, **project** leaders, business analysts, and infrastructure teams. Led team sizes of 18 and 12 concurrently. Improved vendor programs & regular visits to suppliers' facilities

- Implemented **SAP** Order-to-Cash and Procure-to-Pay systems for global clients.
- Achieved 42% improvement in **sales** opportunities through strategic **planning**.
- Controlled \$3.44M budget for **supply chain** and vendor **management** initiatives.
- Adopted best-in-class sourcing and procurement strategies by proper contract estimations.
- Designed and developed the As-Is and To-Be schematic models for the center of excellence team.
- Gathered **data** from various sources, including **sales**, orders, customer behavior, and marketing performance from the e-commerce platform (Shopify)
- Improved ways of delivering **project** targets by 80 percent using PMIS by integrating with Netsuite Financial
- Managed **retail** clients and end customers both onshore and offshore by measuring and tracking KPIs.
- Developed the **Supply Chain Management** maps and Blueprints using **Microsoft Project** and Primavera.
- Monitored and executed projects to completion using methodologies like ASAP and Waterfall.
- Strategically managed multiple projects & delivered **project** deliverables through effective utilization SOP and standards for new and existing projects.
- Participated in the end-to-end 3PL integration scenarios for both inbound and outbound shipments. Implemented global **supply chain** and sourcing divisions and LSPs.

Wizcore Consulting Ltd - London, UK

AUG 2013 - DEC 2013

Client: **Rolls Royce, and 2 NDAs**

IT FUNCTIONAL PROJECT SPECIALIST (CONTRACT)

Configured **MM**, PP, SD, WM, and SRM implementation for their end clients based in London, United Kingdom. Prepared step-by-step documents which led to a 29% decrease in **data** center operations and was an Enabler in the design and **development** of the **SAP** Blueprints during SDLC. A sub-team leader of 5

- Organized schedules, follow up meetings, and working sessions to address all IT concerns.
- Worked with ASAP using **SAP** roadmaps from **Project** Preparation to Go-live.
- Successfully led the sub-team of **SAP** ABAP debuggers and provided status reports.

- Customized Company Codes, plants, storage locations, purchasing groups, purchasing organizations and master **data**;

Facilitated the installation/connection phases of the Master **data management**, **SAP** Unit Testing, Configuring deployment scenarios for the **data** migration and **data** validation processes.

- Configuring Business Scenario, Self-Service Procurement Business Scenario, Plan-Driven Procurement Business Scenario CPPR scenarios, Service Procurement Business Scenario, SRM-MDM Business Scenario, Strategic Sourcing Business Scenario, Spend **Analysis** Business Scenario, **SAP** SRM Business Scenarios Using **SAP** NetWeaver PI User Interface ITS to WebDynpro in **SAP**.

BELL ENERGY SERVICES (Oil and Gas) - London, UK

JAN 2009 - JAN 2013

Client: **ExxonMobil, Shell, and Chevron**

PROJECT MANAGER

Managed multiple projects through portfolio **project management**, training and ensured **compliance** with all **project** book required documents. Managed the implementation of **SAP MM/APO/SCM** ERP and WMS network infrastructure. Improved operations by 23% in 2012 by managing multiple projects. Penetrated the oil market by 15.2% in 2011 due to **SAP** introduction. Led a team of 8 members.

- Managed **SAP** ERP and WMS implementations for Shell, ExxonMobil and Chevron.
- **Sales** increased by 65% through system **optimization** and **data**-driven decision-making.
- Directed **cross-docking** and **supply chain** integration projects.
- Monitored, tracked, and controlled all tickets to ensure **project** completion and informed **leadership**.
- Managed **warehouse management** status including but not limited to **cross-docking** and drop shipments.
- Provided training for all **SCM** agents. Managed direct and drop shipment activities.
- Drove the execution & integration of Cycletest scenarios.
- Managed stock transfers, purchase and **sales** orders with **Microsoft** Dynamics AX, **SAP** ERP and WM.
- Supported **supply chain management** principles and **SAP** best practices.
- Created and defined **project** SOW, network infrastructure plans, timelines, layouts, and roadmaps.
- Supported the creation of user-friendly designs to enhance customer experience on their e-commerce website.
- Directed and coordinated the OTC and P2P activities for the IT Department for their Master **Data Management** for Release and Deployment with respect to **data** mapping and **data** migration.
- Help to streamline **supply chain** complexities in WMS, TMS and delivery by using the real time advanced modeling and forecasting (10 warehouses across 21 **Distribution** Centers)
- Interfaced the customization, configuration, and implementation of your **SAP MM/WM/PPDS/APO** operational activities.
- Prioritized strategically on demanded products by demand and **supply planning**, **cost analysis**, and variations.

Full-Proof Consulting - Lagos, NG

MAR 2007 to DEC 2008

Client: **Anabel**

PROCUREMENT AND SOURCING LEADER

Organized sourcing strategies and supplier selection appraisal/criteria; Introduced **SAP** ERP/WMS into their demand and **supply planning**. Decreased **problem** identification time and increased average incident response time by maintaining ERP databases and controlling **supply chain** activities and customer relationships.

- Organized sourcing strategies and supplier selection appraisal/criteria.
- Initiated marketing strategies for team and coordinated market actions.
- Managed B2B operations with scorecard analytics and KPIs to track outbound and inbound deliveries.
- Tracked KPIs and metrics to assess the success of the e-commerce platform during performance monitoring.
- Prepared ad-hoc reports for end consumers, expected products & gathered information for **retail** applications.
- Configured and supported core **SAP** financial and **logistics** systems like P2P, WM, PPDS, **TM**, CPM and CMS

FrontPage Company - Lagos, NG

JAN 2004 - JAN 2007

Client: **Gucci, Rossi, Prada, Ferre**

SUPPLY AND DEMAND PLANNER - INVENTORY MANAGER

Increased **inventory** visibility with demand and **supply planning** with **SAP** ECC/PPDS/**EWM**. Configured SKUs using **SAP MM**, PPDS, and **WMS**. Manufactured items were daily stored and recorded in the **warehouse**.

- Optimized **inventory management** systems using **SAP** ECC and RFID technologies.
- Improved daily stock **reporting** accuracy by 80%.
- Configured **SAP MM** and PPDS modules for **supply chain** forecasting.
- Configured their bill of quantities and BOM explosion.
- Monitored stock levels to ensure adequate **supply** of demand without overstocking using the e-commerce platform
- Improved enterprise system by 66% by controlling stock checking and sorting items in **inventory**.
- Provided 1st level support for the Oracle eBS, **SAP** PPDS, OTC and P2P **process** a super user.
- Enhanced **inventory** and order responses by accurately monitoring demand and **supply** forecasts with **SAP** ERP/**SCM**.
