SAP PROFILE:

- Performance areas include **Project Management**, **Functional Team Leadership**, hands on **SAP** configuration in **Sale and Distribution (SD)**, **Customer, Carrier and 3PL / LSP EDI**, **Logistics Execution (LE)**, **Transportation**, **Inventory Management (IM)**, **Warehouse Management (WM)** and **Media Sales & Distribution (MSD)**.
- **S/4HANA** – most recent version 2021. hands on S/4HANA solution build and company rollout experience on multiple projects.
- **Industry Experience** – Pharmaceutical, Life Sciences, Animal Health, Automotive, **Consumer Packaged Goods**, Beverage, Manufacturing, Building Products, and Public Sector / Defense.
- **Business Process Analysis** – Multiple projects of successfully leading teams through gathering business **process** requirements and building solutions within **SAP**.
- **Project Management** – **Project** Manager for entire **project** lifecycle of new **SAP ECC 6.0** implementation. Responsible for **Project** staffing, Risk **Management**, Budgeting and Issue Resolution
- **Cutover Lead** – several projects of successfully detailing interdependent cutover tasks and leading **cross functional** teams through all system cutover activities
- **Testing Lead** – Multiple projects of successfully defining the Testing Strategy, building out Test Plans, executing testing (Unit Testing, Integration Testing and User Acceptance Testing) and Defect resolution in highly complex environments.
- **SD Team Lead** – SD Team Lead for multiple full lifecycle **SAP** implementations and **optimization** initiatives. Managed Teams comprised of **functional** client and consulting resources as well as EDI and offshore ABAP consulting Resources.
- **SAP SD** – Several projects of successfully configuring and implementing the **SAP** SD Module utilizing ASAP Methodology and Solution Manager, including all SD and **Logistics** Execution functionality.
- **SAP 3PL Integration** – Multiple projects of successfully defining requirements and integrating Third Party **Logistics** providers with **SAP** for all inbound, outbound and internal **warehouse** moves, using EDI (940/945, 943/944, 846, 947) and xml.
- **SAP LE** – Experience designing processes and configuring the **Logistics** Execution Module with several clients, including all portions of Shipments, Shipment Stages, Route Determination and Output, Shipment Costing/Freight Payments and Internal **Warehouse** Processing.
- **Trade Promotions Management** – Experience working with Trade Promotions **Management** business processes for multiple **Consumer Packaged Goods** Companies, including Beverage.

SAP CONSULTING EXPERIENCE:

09/2023 – 10/2024 Lactalis Heritage Dairy

Chicago, IL

*Lactalis Heritage Dairy is a part of Lactalis, the largest dairy products group in the world, and is the second largest food products group in France. In 2020, Lactalis purchased the \$2B natural cheese business from Kraft. **Project Breakfree** was charged with establishing new business processes in an **SAP S/4 Solution** for the newly created LHD organization.*

Order to Cash Integration Lead

- Identified solution gaps related to **sales** order and order fulfillment processing. Wrote **functional** specifications and worked with developers on **development** and testing. Documented all **development** items in **Jira**.
- Coordinated EDI Integration Testing with 80 customers and 3rd party EDI provider. Worked on custom **development** for customer EDI invoice processing. Tested custom functionality with customers to drive **compliance** with customer standards. EDI Messages: 850, 810, 875, 880, 860, 856, 940, 945
- Defined master **data management** processed for O2C master **data**, including Business Partners, Pricing and Partner Profiles. Worked on interface with Vistex for Trade Promotions **Management Pricing**.

04/2023 – 09/2023 Exo Imaging

Santa Clara, CA

*Exo Imaging is a health information and medical device company. Exo plans to modernize medical imaging with a patented **high**-performance ultrasound platform that utilizes artificial intelligence, an easy-to-use handheld ultrasound device and an intuitive ultrasound **workflow** solution to streamline exam review, documentation, billing and archiving in one platform. As the Quote to Cash Lead, I focused on leading the customer team through defining processes for device and subscription **sales** within a pre-revenue startup company for the full S/4 HANA **project**.*

Quote to Cash Lead

- Defined all order to cash master **data** and business **process** requirements for all order to cash processes to sell and deliver medical devices and sell subscriptions to customers. Modeled all business processes in **SAP Signavio**.

FREDERICK C. CARTY

2858 Lamer Trace
Marietta, Georgia 30066

Cell 404-219-0639
fccarty@comcast.net

- Defined integration points between SAP and proprietary system used to control software subscription access. Wrote functional specifications and worked with developers on all integration.
- Worked with resources integration credit card processing through SAP S/4 Digital Payments functionality. Successfully configured and tested credit card interfaces with Stripe.

05/2021 – 03/2023 Novartis

East Hanover, NJ

Novartis is a multinational pharmaceutical company and one of the largest pharmaceutical companies in the world. The Lean Digital Core Project is focusing on getting Novartis on one SAP S/4 HANA platform, globally, to replace the existing 20 instances of SAP ECC. This used an Agile approach to define requirements and build and rollout the new S/4 HANA 2021 system.

Commercial Integration Lead

- Led country specific, Commercial Business Process workshops to identify the process hierarchy and define business process requirements. Captured and tracked business requirements in Jira.
- Identified the integration points between the new SAP S/4 global instance and legacy systems and third parties (EDI Customers, 3PLs, etc...) by business process and country. Served as a program ambassador, leading sessions with application owners on program impact, expectations and timing.
- Used SAP Change Request Management to track and changes required in S/4, CPI and legacy applications. Extracted SAP ChaRM data to enrich Jira data extracts to provide a single status view across all project workstreams.

12/2020 – 04/2021 Pregis

Chicago, IL

Pregis is a leading global provider and manufacture of innovative protective packaging materials and systems. Their products are used in a wide variety of industries. Pregis has steadily grown over the past 15 years organically and through acquisitions. As part of this project, we customized and rolled out the Pregis S/4HANA 1909 on-premise template to a recent acquisition.

FREDERICK C. CARTY

2858 Lamer Trace
Marietta, Georgia 30066

Cell 404-219-0639
fccarty@comcast.net

Quote to Cash Lead

- Determined business requirements and performed a Fit-Gap **analysis** compared to the existing Pregis Template. Designed business solutions, focused on using standard template functionality.
- Configured and tested S/4HANA 1909. Worked with business **data** owners to cleanse Business Partner Master **Data**, Pricing **Data** and Customer Material Info Records. Built LTMC load files for all QTC **Data** objects
- Worked with **data** migration lead to develop custom LTMC load programs for Business Partner **Sales** Area Partner Functions. Ensure **data** integrity for all migrated objects.

05/2019 – 11/2020 Zoetis

Parsippany, NJ

*Zoetis is the largest Animal Health Company in the world. Zoetis was previously a part of Pfizer but was established as an independent company in 2013. The Abaxis **project** was responsible for integrating serialized devices from an acquired company into the Zoetis **SAP** system. As the Team Lead for **Logistics** Service Provider Integration, I was responsible for working with the LSPs to ensure their systems could handle serialized products.*

Global **Logistics** Service Provider / 3PL Integration Team Lead

- Coordinated sessions with 12 **Logistics** Service Providers (APAC, LATAM, EuAFME) to communicate changes to existing XML and Text file interfaces (Material Master, Inbound Delivery, Outbound Delivery, **Inventory** Movements/ Status Changes and **Inventory** compare) to support serialized products
- Lead on-site assessment workshops with business and IT Team in Japan to determine the feasibility of adding the Japan market to the scope of the in-**process project**.
- Updated integration mapping specifications for all messages with LSPs. Defined, coordinated and executed testing scenarios to help ensure LSP **development** was working as designed. Managed defects and provided details for changes to LSPs. EDI Messages: 940/945, 943/944, 947, 846, 856

06/2015 – 04/2019 Eli Lilly

and Company

Indianapolis, IN

FREDERICK C. CARTY

2858 Lamer Trace
Marietta, Georgia 30066

Cell 404-219-0639
fccarty@comcast.net

Eli Lilly is one of the largest pharmaceutical companies in the world. The GATE27 project was responsible for implementing Lilly SAP at a recently acquired company, Novartis Animal Health. I was responsible for leading the Order to Cash Team for North America and South America through all phases of this end to end project.

Order to Cash / 3PL Team Lead / Cutover Lead

- Performed a Fit-Gap analysis of the Lilly SAP solution vs. the business processes of Novartis Animal Health. Identified key gaps for US Sales Tax, US Credit Card Payment Processing, US EDI Order processing, and Tax in Brazil and Argentina. Processing functionality was added to the Lilly SAP system to address these gaps. EDI Messages: 850, 810, 856, 940/945, 943/944, 947, 846
- Responsible for establishing a project plan to identify activities, ownership and monitor project status. Conduct weekly status calls with global Team to determine progress and any issues requiring escalation.
- Guided business Team Leads through the creation and execution of Cutover Plans. Tracked key Stabilization Issue from discovery through resolution and closure for a successful system Go-Live and Stabilization phase.
- Helped to build the S/4HANA Roadmap and prioritize activities to be completed, prior to the S/4 transition. Activities included transitioning to SAP Business Partners and determining if Settlement functionality would be a good fit for the business.

03/2015 – 05/2015 The Merck Group

St. Louis, MO

The Merck Group is a global Pharmaceutical, Chemical and Life Sciences company, based in Germany. The goal of this engagement was to help determine the overall SAP strategy for The Merck Group, including a planned life sciences company acquisition. We performed a process analysis, program analysis and system architecture analysis of the planned acquisition. As the SAP Process Lead, I was responsible for a Process Fit-Gap Analysis of the company they were planning to acquire compared to The Merck Group processes.

SAP Process Lead – WM / SD / MM

- Created presentation materials and lead a global team through process analysis workshops for Manage to Activate, Order to Cash, Forecast to Plan, Plan to Produce, Procure to Pay and Account to Report.

FREDERICK C. CARTY

2858 Lamer Trace
Marietta, Georgia 30066

Cell 404-219-0639
fccarty@comcast.net

- Consolidated **analysis** results into a final report for the client. Participated in review sessions with the client to provide details to support overall findings.
- Made recommendations for program and system changes that would allow the acquired company's **SAP** S/4HANA system to support The Merck Group's Life Sciences business, globally

05/2014 – 12/2014 Johnson Controls

Milwaukee, WI

*Johnson Controls is a multi-industrial company focused on automotive, battery and building efficiency industries. As the Order to Cash **Process** Lead, I was responsible for keeping the Order to Cash Team aligned with program vision and directives during this global template build.*

Order to Cash Team Lead

- Worked with global **process** team to build the Order to Cash **Process** Framework. Coordinated and facilitated **process analysis** sessions with all business units across North America, South America, Europe, Africa and Asia to determine **process** coverage and gaps.
- Educated key business stakeholders on the overall program roadmap. Identified how information gathered during the current phase would be used as a foundation in subsequent phases.
- Challenged existing business processes to identify common requirements across business units and geographies, resulting in a **high** degree of **process** "fit" for Order to Cash.

11/2013 – 04/2014 Carlisle Construction Materials

Carlisle, PA

*Carlisle is a diversified manufacturer and supplier of premium building products for the commercial and residential construction markets. As the **Logistics** Team Lead, I lead the team through an assessment and subsequent implementation of system and **process** improvements for Customer Service and **Logistics** Departments.*

Logistics Team Lead

- Facilitated workshops with Customer Service managers and team members to identify pain points in the Quote to Ship and **Transportation** processes. Documented workshop results for review and agreement across all teams.
- Conducted sessions with the **management** team to prioritize the recommended system and **process** changes. Created a roadmap for the implementation of the **optimization** opportunities.

FREDERICK C. CARTY

2858 Lamer Trace

Cell 404-219-0639

Marietta, Georgia 30066

fccarty@comcast.net

- Coordinated cutover activities for dry run and for system Go-Live across technical and functional teams in a mature SAP environment
- Designed and implemented solution for Optimal Plant proposal during Sales Order processing, focusing on a Lowest Cost to Serve model. Implemented master data management tools for Customer Master and Material Master to ensure consistency and data integrity.

7/2012 – 9/2013 BlackBerry

Atlanta, GA

BlackBerry is a global leader in wireless solutions, including handhelds, tablets and software development tools. As an Executive Consultant to the VP of Enterprise IT Services, I was responsible for leading a team through the analysis their existing SAP and Analytics environments and making recommendations for system and organizational improvements.

Executive Consultant – SAP Assessment

- Lead team of 3 management consultants through the analysis of complex, highly customized SAP environment to identify opportunities to identify risks, reduce licensing and support costs, as well as improve flexibility to adapt to a changing business environment.
- Established a structured approach to gathering data through executive interviews, management interviews, system reports, support reports, and financial reports to determine the existing situation, pain points and historical information.
- Coordinated the analysis of all data gathered to identify opportunities for improvement. Quantified the 10 high impact opportunities in terms of risk, impact and ROI to establish priority for the final recommendations. Presented a roadmap for the prioritized recommendations.

3/2012 – 6/2013 Coca-Cola Refreshments

Atlanta, GA

Coca-Cola Refreshments is the largest Coca-Cola Bottler in the world. As the Deployment Lead for Funds Management and Promotions Claims Management project, I was responsible for gathering all business requirement and building out the To-Be business process flows during this implementation of Accenture's CAS Trade Promotions Management software.

Deployment Lead – Funds Management / Promotions Claims Management

- Conducted requirements gathering sessions for Funds Management and Promotion Claims Management processes. Documented all requirements and formally presented for business signoff.
- Developed, documented, socialized and gained approval for all To Be business processes flows for Funds Management and Promotion Claims Management process flows across multiple departments.
- Designed Test Cases and Test Sets in HP Quality Center (HPQC) to facilitate scheduling and testing execution of Accenture's CAS software. Trained IT Team members on HPQC functionality.

FREDERICK C. CARTY

2858 Lamer Trace

Cell 404-219-0639

Marietta, Georgia 30066

fccarty@comcast.net

- Assisted with cutover activities across technical and functional teams for Funds Management, Claims Management and Trade Promotion Management
- Performed data transformation for Customer / Bottler specific Funding Rates to be loaded into CAS Software. Provided reports to Customer Teams to allow them to easily validate the transformed data.

FREDERICK C. CARTY

2/2011 – 2/2012 UCB

Atlanta, GA

UCB is a global bio-pharma company focusing on severe diseases in two therapeutic areas – Central Nervous System and Immunology. UCB also has a selective presence in primary care. As the Integration Lead I was responsible for gathering business requirements and ensuring they were addressed within the SAP solution during this rollout of a highly customized Global Template.

SD / 3PL Integration Team Member

- Worked with SD and EDI Teams through requirements gathering, building and testing the SAP solution in the SAP Global Template being implemented.
- Facilitated business requirements gathering for Chargeback processing, Fee for Service and Government Pricing. Designed and tested interfaces with CARS for Chargeback and Rebate Processing. Ensured compliance with
- Defined business requirements for Pharmacy Benefit Manager (PBM). Designed and tested interface with Model N for Rebate Processing for Commercial, Medicare Part D and Managed Medicaid Customers.
- Coordinated all integration testing efforts for Customer EDI Processing and Third Party Logistics (3PL) processing for multiple locations managed by UPS and Cardinal. Facilitated meeting to identify high level testing requirements and building the test plan using HP Quality Center. EDI Messages: 940/945, 943/944, 947, 846
- Worked with the business to identify project risks and determined best approach to mitigate those risks. Developed Work Instructions for processes with high change impact over the existing process.
- Performed Unit Testing of 50+ SD development objects. Worked with development team to resolve issues during Unit Testing

05/2010 – 02/2011 Centers for Disease Control and Prevention

Atlanta, GA

The CDC is the branch of the US Department of Health and Human Services with the mission of creating expertise, information and tools that people and communities need to protect their health. The Vaccine Tracking System (VTrckS) Project is charged with giving the CDC improved visibility of all vaccines in their supply chain. The overall goal of the project is to improve decision making ability regarding the distribution of vaccines. As the SD Team Lead, I was responsible for working with the CRM Team to ensure consistency and seamless integration between ECC 6.0 and CRM during this full lifecycle implementation.

FREDERICK C. CARTY

2858 Lamer Trace
Marietta, Georgia 30066

Cell 404-219-0639
fccarty@comcast.net

Solution Architect / 3PL Lead / Cutover Lead

- Served as primary architect for overall solution for sales order entry and fulfillment. Coordinated cross functional meetings with CRM, MM, Funds Management, EDI and Development Teams to ensure a consistent vision of the solution to be implemented. EDI Messages: 850, 856, 940/945, 943/944, 947
- Worked with Development, Basis, Analytics and Functional SAP Teams to coordinate all cutover activities for system Go Live. Conducted checkpoint calls during Go Live weekend and ensure all dependencies were completed prior to moving to subsequent tasks.
- Designed and built solution for integration with the Third Party Logistics (3PL) warehouse for order fulfillment and Inventory Management. Configured Individual PO Processing for Direct Ship Items.
- Facilitated project review meetings with consulting team and client project team. Ensure client understanding of solution being delivered and open questions where additional detail is required.
- Ensured high level of quality in contractual deliverables for project milestones, including Functional Specifications for Development Objects, Configuration Documentation and the Go Live Transition Schedule. Maintained standards in Solution Manager for project documentation.
- Drove formal testing and error resolution activities. Present options for resolving errors and document decisions taken by the team. Ensure Test Scripts are executed properly.

05/2009 – 05/2010 Cisco Systems, Inc.

Lawrenceville, GA

Cisco is a world leader in communication technology and information technology industries. Cisco has grown successfully through acquisitions over the past 10 years. The Joint Orderability Project was integrating Cisco's Oracle Application 11i Environment with Scientific Atlanta's SAP ECC 6.0 Environment. As a Project Manager, I was responsible for helping to get the project back on track, while ensuring we had the right solution in place.

Project Manager / Cutover Lead

- Performed project review for overall analysis of why the previously scheduled Go Live dates were missed and why they had to be rescheduled for 6 months later.

FREDERICK C. CARTY

2858 Lamer Trace
Marietta, Georgia 30066

Cell 404-219-0639
fccarty@comcast.net

- Reviewed the solution architecture and design for the Order to Cash solution for Golden Tax in China, making recommendations for **process** improvements and solution design improvements.
- Successfully Lead the Team through multiple Cutover / Go Lives for initial and subsequent **project** phases which included creating and maintaining our Go Live schedule / checklist, facilitating status checkpoint meetings throughout the Go Live Period and ensuring issues were resolved in a timely manner.
- Tracked deliverables and reported to **project** sponsors to ensure **project** deliverables were completed on time and resolve all issues.
- Organize **cross functional** sub-teams including business and IT members to drive specific issues to resolution.

10/2008 – 2/2009 UCB

Atlanta, GA

*UCB is a global bio-pharma company focusing on severe diseases in two therapeutic areas – Central Nervous System and Immunology. UCB also has a selective presence in primary care. As the **Logistics** Team Lead, I had overall responsibility for all **logistics** areas, including SD, **MM**, QM, PP-PI, PM and WM. In addition to overall **Logistics** responsibility, I had hands on responsibility for SD in an ECC 6.0 environment.*

Logistics / 3PL Team Lead

- Lead the **Logistics** Team consisting of **MM**, QM, SD, WM and PP resources through a Fit-Gap **analysis** of the existing **SAP** environment compared to a new Global Template for 3 different legacy **SAP** systems in four different countries as a part of their global business transformation.
- Learned the Global Template with limited documentation and very limited access to Global Template Owners. Learned the existing **SAP** environments for each country with limited access to system and **process** owners.
- Facilitated workshops with Legacy **SAP** system support team and Global key users to ensure they understood the Global Template and potential changes to their business processes.
- Final **analysis** was approved by legacy **SAP** system owners and global template owners and built into a roadmap for their rollout. **Project** was successfully completed on time and on budget, resulting in follow on rollout work being awarded to the consulting company

5/2006 – 12/2007 Informa

Boca Raton, FL

Informa is a leading supplier of specialist information to global academic & scientific, professional and commercial communities via publishing, events and professional improvement businesses. As the project manager for the full lifecycle implementation, I worked to determine project scope and schedule to staff the project. I managed the daily activities on the project to ensure a successful, on time, delivery of the solution.

SD Lead / Cutover Lead

- Performed initial project scope assessment to determine staffing requirements and project schedule. Worked with Team Leads to formalize project schedule in Solution Manager. Conducted on-boarding activities with new team members
- Facilitated requirements gathering workshops to define business requirements around subscriptions (Renewal Processing, Billing and Revenue Recognition) and intellectual property management. Worked with internal SAP resources to resolve functional and technical issues.
- Designed, built and tested Logistics solution with Powerhouse Warehouse Management System (WMS), including warehouse shipping orders, stock transfer shipment advice/receipt, shipping advice, delivery information message, warehouse stock adjustment and customer returns processing.
- Lead team of 12 consultants / subcontractors through Blueprinting, Realization, Final Preparation and Go-Live phases and prepared them for post Go-Live systems support. Coordinated all system cutover activities for Go-Live weekend. Developed and implemented Global Support Strategy for live SAP instance, including the use of Solution Manager.

2/2006 – 6/2006 Smith & Nephew

Memphis, TN

Smith & Nephew is a global industry leader in each of their Business Units: Orthopedic Reconstruction, Orthopedic Trauma, Endoscopy and Advanced Wound Management. As the SD Team Lead for this Logistics implementation within an existing SAP environment, I ensured integration with legacy systems worked successfully.

SD / WM Team Lead

- Lead workshops with business personnel to define business process requirements and configured solution for transfer of goods from manufacturing location to distribution warehouse. Documented solution for intracompany stock transport order processing.

FREDERICK C. CARTY

2858 Lamer Trace

Cell 404-219-0639

Marietta, Georgia 30066

fccarty@comcast.net

- Built solution for integration with third party warehouse management system (WMS) for Delivery processing and returns processing.
- Wrote functional specifications for SD development objects and worked with developers to ensure all requirements were addresses and process worked properly.
- Used Solution Manager as the single repository for project documentation and to manage the project lifecycle.

7/2005 – 11/2005 Hubbell Lighting, Inc.

Spartanburg, SC

Hubbell Lighting, is one of the largest lighting distributors in North America, Hubbell offers industrial, institutional, commercial, roadway, outdoor, landscape, emergency/ exit and harsh environment products. As a member of the Warehouse Management and Distribution Team, I defined requirements and configured process solutions for internal warehouse processing and outbound delivery processing in SAP.

Warehouse Management Consultant

- Defined Picking Strategy requirements for warehouses and configured in SAP. Ensured material master data was properly converted and maintained for inbound and outbound processing. Defined custom goods movement types for internal processing.
- Lead business team through requirements gathering and building an SAP solution for internal warehouse processing including Cycle Counting, and managing storage bins.
- Designed integration between SAP and third party shipping application, Connect Ship, for outbound customer delivery processing, using the SAP Express Ship Interface (XSI)
- Defined process for Transportation planning and configured in SAP. Identified Output requirements for picking, packing slip, BOL, Master BOL and commercial invoice. Worked with offshore resource to ensure business requirements were addressed.
- Worked with business subject matter experts to define returns processing. Wrote functional specifications for Sales Order user exits to accommodate returns processing.

5/2004 – 6/2005 Georgia-Pacific

Atlanta, GA

Georgia-Pacific Corporation is one of the world's leading manufacturers and marketers of tissue, packaging, paper, building products and related chemicals. As a Shipping and Transportation Team Member, I recommended system and process enhancement based on SAP functionality. While working with the rollout of SAP to additional facilities, I conducted all aspects of System Test for SD and LE on a well-established, highly customized system.

Shipping and Transportation Consultant

- Worked with business team members to define transportation processing requirements and reporting requirements. Recommended solutions based on standard SAP functionality and best business practices. Manage project caseload using Clarify CRM.
- Analyzed interface with third party logistics software package, Red Prairie. Coordinated Red Prairie system changes with SAP transportation changes to meet changing business

FREDERICK C. CARTY

2/2004 – 5/2004 Bell Helicopter

Dallas, TX

Bell Helicopter, a division of Textron, Inc., is a leader in the manufacture and maintenance of helicopters and other aircraft for commercial and military applications. As the Supply Chain Management Team Lead, I lead the team through the Project Preparation and Blueprinting phases of the ASAP methodology. The Maintenance, Repair and Overhaul (MRO) Project at Bell is building an SAP solution to support the business of full aircraft life cycle management for their customers based on the SAP Aerospace and Defense Industry Solution as well as industry best practices.

Supply Chain Management Team Lead

- Facilitated workshops with client Subject Matter Experts (SME's) to define business requirements for Contracts Management, Order Fulfillment, Materials Management and Warehouse Management functional business areas. Identified Project Systems solution for business processes including progress payments for contracts.
- Assisted Core Team members in flow-charting 'To-Be' business processes based on business requirements, existing SAP functionality and customization for other Textron Inc., companies, using the same instance of SAP.
- Identified gaps between business requirements, existing SAP functionality and customization, which has already been done on the SAP system. Determined reporting requirements based on government contractual obligations, business needs and Contract Department performance measurements.
- Trained Core Team members on standard SAP functionality including Order Management, Pricing, Billing and Shipping. Defined interfaces with legacy systems based on overall vision of business process flows and integration points with other financial and logistics business areas.

6/2003 – 12/2003 Delphi

Troy, MI

Delphi is a Tier 1 Supplier for all major Automotive Manufacturers. As a member of the Sales and Distribution Team for Delphi's Delco Division SAP Rollout, I worked to ensure business processes are in place to address Customer EDI Requirements (Inbound Orders, Forecasts and JIT Delivery Schedules and outbound ASN and Invoices). This includes Sales and Distribution and Logistics Execution Configuration as well as developing Reporting/Interface specifications and working with ABAP programmers through program completion.

FREDERICK C. CARTY

2858 Lamer Trace
Marietta, Georgia 30066

Cell 404-219-0639
fccarty@comcast.net

SD / EDI Team Lead

- Developed **data** for initial **development** and testing scenarios, including Customer Master **Data**, Material Master **Data**, EDI Partner Profiles, Customer Material Info Records, Pricing and Scheduling Agreements (Standard Scheduling Agreements, Scheduling Agreements w/ External Agents, Delivery Orders and JIT Scheduling Agreement **Data**).
- Created transactional **data** for Integration Testing for all aspects of Order Fulfillment processing including, Scheduling Agreements, JIT Calls, Deliveries, Packing, Shipments, and Billing Documents and the related Outputs for EDI. EDI Messages: 850, 830, 862, 856, 810
- Directed efforts with individual plant sites to cleanse **data** to be converted, in preparation for **SAP** Go-Live. Coordinate effort with **Data** Conversion Team to ensure legacy **data** corrections were applied.
- Responsible for developing and executing integration test scenarios, using Mercury Interactive Test Director, for all areas involving Inbound and Outbound Customer EDI and custom **reporting**.
- Analyzed EDI business processes, including **data** contained in EDI Transmissions. Recognized **cost** savings by working with customers to determine which messages were not utilized or required.
- Defined business **process** to address scenarios in which materials need to be shipped to customers but a Purchase Order and pricing is still being negotiated.
- Analyzed Customer business **process** and **data** to determine the best manner in which to manage their business processes in **SAP**. Defined which Customers were to use Delivery Order Processing in **SAP**.

6/2002 – 6/2003 Defense **Logistics** Agency

Columbus, OH

*As part of the Department of Defense, the Defense **Logistics** Agency is responsible for the **distribution** of food, clothing, medical supplies and other hard **goods** to US Military Services and foreign governments. My primary role on this **project** was in the Subsistence Business area. I analyzed business processes to identify requirements for interfaces with existing systems for the Order Fulfillment Area on this Accenture managed **project**.*

Senior SD/MM **Consultant**

- Analyzed highly customized **SAP** system to identify and resolve issues with interfaces, extensions and converted **data** during system Go-Live. Re-processed IDocs and determined

data issues causing failures and required interface enhancements for 60+ **Sales** and **Distribution** Interfaces.

- Documented and enhance Business **Process** involving Third Party Order Processing. Facilitated meetings with Financial Consultants and Business **Process** Owners to ensure prompt vendor payment for purchasing activities based on a three-way match between the Vendor Invoice, the Customer **Goods** Receipt and the PO.
- Developed Training materials and train client Support Team Members on System functionality and proper troubleshooting for efficient issue resolution. Manage client expectations regarding error resolution time. Trained client end users on **SAP** Portal functionality.
- Analyzed cyclical, daily, weekly and monthly Batch job processing for potential enhancements. Establish thresholds for processing time and inactivity times to allow support resources to effectively resolve processing issues.
- Defined Technical specifications for ABAP Reports based on Business **Process Analysis** and desired Executive **reporting** functionality. Create ABAP Queries to improve the successful processing of previously failed inbound IDoc Transactions.
- Analyzed **data** and work with Business **Process** Owners to define requirements for interfaces. Coordinate the **Development** lifecycle and verify successful implementation of desired functionality.

10/2000 – 11/2001 **Sachs Automotive**

Florence, KY

*Sachs Automotive of America is a Tier 1 Supplier of Shocks and Struts to BMW, Chrysler, Ford, GM, Polaris and Toyota. As the Lead SD **Consultant**, I was responsible for all aspects of the **Sales** and **Distribution** Module, as well as the outbound portions of **Logistics** Execution.*

SD Team Lead

- Defined and flow-charted existing business processes within the client to facilitate gap **analysis** while defining SD Module specifications. Utilized As-Is **process** flows as a baseline for comparison with **process** flows in **SAP** resulting in client acceptance and well-documented **process** flows. Defined and flow-charted **Project** Systems requirements to track **development** of prototypes.
- Configured SD Module, including Industry Solution Automotive 2.0, based on customer specifications and **SAP** knowledge to ensure that all business processes were **functional** and

customer requirements for EDI processing were addressed, including industry specific Scheduling Agreements (Forecast & JIT), Delivery Order Number (DON)/Release Authorization Number (RAN), Deliveries, Handling-Unit **Management** processes, Automatic Billing, Retro billing. EDI Messages: 850, 830, 862, 856, 810

- Communicated with the client's parent company in Germany to ensure **compliance** with corporate global standards for **SAP** configuration. Worked with technical consultants and programmers, ensuring business processes were addressed and improved and technical issues were resolved.
- Developed **Data** Migration Strategy for all Customer Master **Data**, Pricing Data, and Customer specific Material **Data**, analyzing **data** for irregularities to ensure all legacy system information was correct and complete prior to being migrated into **SAP**. Ensured 100% **data** integrity for all SD **data**.
- Analyzed client business practices and defined SD business needs taking in consideration requirements from other logistical and financial modules. Recommended **process** improvements to increase efficiency and reduce costs based on industry best practices utilizing **SAP** IS-Auto functionality.
- Worked with EDI consultants to ensure all inbound EDI would be processed seamlessly and all outbound EDI messages would comply with Chrysler, Ford, GM, Polaris and Toyota requirements.
- Developed and managed Unit Testing scenarios for SD as well as Integration Testing scenarios for integration points with other modules and EDI. Validated **data** and ensured complete and correct configuration within the SD Module, including Handling Unit **Management** and Summarized JIT Calls.

2/2000 – 9/2000 ZF Batavia

Batavia, OH

*ZF Batavia, formerly a Ford Transmission manufacturing plant, is now a Tier 1 Supplier of Transmissions to Ford and Mazda. As a member of the SD Team, I was responsible for configuration of SD Scheduling Agreements, EDI requirements **analysis**, and Customer Returns Processing.*

Senior SD **Consultant**

- Analyzed client business practices and defined SD business needs taking into consideration requirements from other logistical and financial modules. Recommended **process** improvements to increase efficiency and reduce costs based on industry best practices.

fccarty@comcast.net

- Determined Pricing Requirements for product lines and configured pricing scenarios including customer discounts, rebates and statistical pricing conditions. EDI Messages: 850, 830, 862, 856, 810
- Developed Training Materials and Trained Core Team members on all aspects of the SD Module in a “Train the Trainer” format, resulting in the Core Team being prepared to train the end users.
- Documented all business processes as they would occur within the organization at the completion of the SAP implementation including: Executive summaries for Directors, SAP functionality for Core Team Members, Processes scripts for end-users, quick reference cards for shop-floor personnel.

10/1997 – 1/2000 Procter and Gamble

Cincinnati, OH

One of the world's largest consumer product manufactures, Procter and Gamble has been dedicated to using information systems to enhance their business. The strict development standards they maintained, allowed over 200 proprietary applications to work properly with each other as well as commercial applications such as MS Office and SAP GUI. My primary roles involved call center management and project management for new application roll-outs.

Consultant

- Developed and coordinated testing effort to ensure proprietary applications and SAP GUI would function properly on new proprietary Operating System.
- Analyzed business metrics generated from call center technologies such as HP's IT Service Manager 5.7 and Lucent Centre Vu Supervision ACD 8.0.
- Managed internal Customer Support Call Center for the remote Sales Staff. Served as primary point of contact for proprietary applications. Worked with data vendor to establish Service Level Agreement for issue resolution.
- Managed deployment project responsible for the writing of proposals, strategic planning, scheduling, and implementation of an e-mail infrastructure change for 3,500 users. Successfully migrated all messages resulting in 100% data integrity. Provided 3rd level support for end-users and conducted implementation and transition training for local call centers.
