IT PROJECT MANAGER

CERTIFIED SCRUM MASTER

MICROSOFT CERTIFIED – AZURE FUNDAMENTALS

Experienced **Project Manager** with a strong background in managing complex **IT** projects, including **cloud** migrations, data center network transitions, and **infrastructure** upgrades. Proven ability to lead remote teams across multiple continents, ensuring seamless **project** execution and delivery. Skilled in utilizing ServiceNow for **change management** and asset tracking. Excellent communicator, consistently exceeding stakeholder expectations, and adept at resolving internal conflicts through collaboration and thoroughness.

SKILLS

Microsoft Office Products (Project, Word, Excel, PowerPoint)	Agile Methodologies Waterfall Project Management	Vendor Management ServiceNow
Automation -Ansible	Budget Management	CLOUD Migrations
Ensured GxP Regulatory Compliance Management	Manage Offshore Resources	Change

EXPERIENCE

KYNDRYL - PHARMACEUTICAL PROJECT MANAGER

2021 - PRESENT

- Led an iterative **project** to identify and mitigate **security** vulnerabilities in critical **software** applications, ensuring compliance with GxP regulatory standards. Applied Agile methodologies to manage the **project**, facilitating regular sprint **planning**, daily stand-ups, and sprint reviews to maintain continuous progress and adaptability. Monitored and tracked **project** status, risks, and issues using Azure DevOps (internal **communication** and tracking) and SharePoint (external **communication** and tracking), ensuring transparency and accountability throughout the **project** lifecycle.
- Manage schedule, **scope**, **risk**, issues, **budget** and track status of ongoing projects encompassing **Cloud** migrations from on prem **infrastructure** to Azure **CLOUD**, on prem server builds, Oracle upgrades, Citrix, AD and LDAP **services**, DHCP and Radius migrations, and operational activities involving SAN **infrastructure**, NAS, and enterprise Backup/Restore solutions (TSM)

- Utilize ServiceNow for CMDB asset **management** and for **change management** - opening changes, ensuring tasks are completed within the **change** window, and ensuring technical resources provide accurate and complete closure evidence
- Facilitated a Datacenter **migration** to an SDDC Network **Architecture**, successfully negotiating system downtime for cable / network switch replacement activities for over 300 Wintel and **Linux** servers in multiple datacenters with no rollbacks required and no significant negative user impacts reported. Tracked activities in Trello. Provided weekly Powerpoint updates to key client stakeholders
- Mitigated **risk** while ensuring timely delivery during the replacement of a legacy anti virus solution with CrowdStrike via Ansible automation
- Coordinated global resources to perform the **migration** of customer applications from physical servers to Azure Container Environment
- Manage the replacement of a legacy asset **management** solution with Snow License **Manager**
- Datacenter network migrations from MPLS to SDWAN successfully managing multiple vendors, downtime **negotiations**, and datacenter hardware installations. Tracked
- Led site takeover activities including **migration** to new telephony equipment, installation and configuration of new networking components (switches, LAN, WAN, Firewall, BlueCoats), and stand up of **infrastructure** servers (Wintel and **Linux**)
- Manage remote teams from Asia, South America, and Europe – successfully managing time zones and language barriers

IBM - HEALTHCARE PROJECT MANAGER**2018****- 2021**

- Utilize Agile methodologies to manage creation of a Cloud based DEV / TEST environment for use by developers. Windows and RHEL images along with custom, automated Enterprise integrations.
- Responsibilities include the delivery of RFS solutions for SOW and contract amendments.
- Vendor Management. Manage Dell EMC vScale implementation. Deployment of VMAX and Data Domains in multiple customer managed datacenters.

IBM - RETAIL SERVICE DELIVERY MANAGER**2018 - 2014**

- Interacted with the customer daily while working on-site at the customer location - serving as a liaison with various remote delivery teams (both inside and outside U.S.) investigating root causes for application problems.
- Ensured quality delivery of services and took corrective actions to provide accurate solutions in Request for Service process. Coordinated and managed changes required to implement the agreed upon solutions.
- Conducted weekly meetings with C-level and higher managers to provide status on all projects in the customer portfolio. Created and delivered presentations and reports on project goals and progress.
- Monitored and managed Service Level performance.
- Improved accuracy and reliability by driving and coordinating audit readiness and for delivery.
- Clarified and defined complex project requirements, budgets, and business cases, including Statements of Work, consulting with business partners and stakeholders.

IBM - GLOBAL SERVER BUILD PROJECT - INTEGRATION MANAGER**2009 - 2014**

- Ensured targets for on-boarding new accounts into the Global Server build centers were met in timely and efficient manner.
- Worked with Transformation Managers and technical resources, understanding account's existing server build process and translating that to comparable Global Server Build standardized delivery processes.
- Guaranteed that verification and review activities were performed while working closely with Technical Leads, writing, developing, and updating documentation that was accurate, complete, unambiguous, and concise.
- Provided training in Global Server Build processes and tools (Maximo) to new technical and managerial employees as integrated.

EDUCATION

BS, Computer Information Systems, Clark Atlanta University, Atlanta, GA 30314

Magna Cum Laude graduate, Dean's List
