

SUMMARY:

- 17 years of experience in EDW & BI in Project and Functional Management, Business Requirement Analysis, Design, Modelling, Testing and Deployment, support in Retail, Banking and Financial, Insurance domains and Fintech.
- Knowledge and experience Lean / Agile development methodologies, across offshore-onsite models with significant client Site experience.
- Expertise in the role of Business/Functional/Technical Analyst in executing no- prem as well as on prem to cloud migration projects.
- Business process analysis and Redesign of data into Data warehouse/Data Lake/ Lake house model in Multi-dimensional or Data vault 2.0 architecture (Hub and spoke model).
- Physical model design in Databases like Snowflake, SQL Server, Oracle.
- Experience in Migration from on prem Datawarehouse (SSIS/SQL server based) to Azure Cloud/Snowflake/DBT/Fivetran based solution.
- Managed standardization, migration, transformation, validation, quality assurance, Orchestration and monitoring across multi-database platforms development through Medallion architecture, RAW/PREP/MART ELT Layers.
- Experienced modeling using ERD in Erwin.
- Data Engineering Technologies:
 - Snowflake, DBT, FiveTran, Python, ADF, SSIS, Qlik Compose, Qlik Replicate, IBM Cognos, Informatica Power Center 6x. Advanced SQL, PLSQL, TSQL.
- Snowflake Data Platform integrations –
 - User of Streamlit and cortex(creating Yaml files) with Snowflake data for use by executive decision maker over Summary tables.
 - Snowflake native integration solutions using SNOWPIPE, STREAMS, TASKS, STORED PROCEDURE, Clones, Time Travel.
 - Integration ADLS Blob storage files to snowflake via EXTERNAL STAGE, COPY, FILE FORMAT command.
 - Implementation Data Governance – Data Tagging and Masking PII data.
 - Expert is performing Complex transformations through SQL.
 - Experience in developing Airflow DAGs using Python.
 - Experience in developing pipelines from SQL server to Snowflake using ADF. Deploying and monitoring through historical and incremental run.
 - Data Optimizing performance using SQL tuning and clustering.
 - Good experience in creating YML files, Jinjas and Macros, Hooks, and operations using DBT.
 - Pendo to Snowflake via FIVETRAN, DBT and Airflow.
 - SFTP files ingestion into snowflake via Fivetran.

- Salesforce **data** ingestion through Qlik compose, CDC capture through compose.
- Workday ingestion into **snowflake** via Fivetran.
- Experience DBT models, Macros, Snapshots, Seeds, and Materializations.
- Experience in ETL using tools like Decision stream, Oracle PLSQL, SQL server Informatica stored procedure.
- Migration on Prem **data** warehouses to **cloud** migration process –
- **Business** Analytic Technologies –
 - **Power BI** - Experience using DAX functions in **Power BI** Measures. Knowledge of T-SQL queries, stored procedure and parameters, triggers, User functions, tables.
 - SSRS over SQL server, IBM Cognos **BI** over Oracle.
 - IBM Cognos experience – Migration and Dashboard and complex Analysis Development (Versions 6 to 10).

TECHNICAL SKILLS:

Databases	Snowflake , Microsoft SQL server, Oracle, DB2,
Cloud	AWS, Azure
Tools	Fivetran, DBT, Qlik compose & Replicate, Airflow, GitHub Microsoft BI Tools (Power BI , SSRS, SSAS, SSIS, Azure Data factory), IBM Cognos 11, Cognos 10.1.1, Cognos Report Net 1.1 MR3, Cognos 6.0 & 7.3 , Informatica 6.1 Power center. ER Win.7
Languages	Python , T- SQL, SQL (Advanced, Analytical), PL/SQL, Javascript.

EDUCATION / CERTIFICATIONS:

- Masters in Information Technology Management from Campbellsville university, USA.
- Masters in Computer science from Campbellsville university, USA.
- Masters in information systems from Osmania University, INDIA.
- Bachelors in computer application Osmania University, INDIA.
- Exercising leadership: Foundational principles – HarvardX.
- **SnowProCore Certified**

- **Oracle SQL Certified Associate.**
- **IBM Cognos Development certification.**

LinkedIn: <https://www.linkedin.com/in/nirmala-kanchi-57980ab2/>

PROFESSIONAL EXPERIENCE:

WEX, ME

May 2023 to present

WEX **Snowflake integration** project (called lakefront 2.0) has medallion **architecture** created as RAW, PREP, MART Layers. The ingestion worked on used **data** as product approach. Ingest the **data** in raw layer, mask PII in prep and have **data** available as summary tables in mart layer.

Environment: **Snowflake**, Fivetran, Qlik Replicate, **Python**, DBT core, AWS, Airflow.

Role: Lead **Data Engineer**

- **Pendo product Saas** ingestion, **Salesforce data** ingestion, **Workday Raas report** ingestion, CSV **data** in **SFTP location** ingestion into **snowflake** Raw layer through **Fivetran**.
- **SQL server data** ingestion through **Qlik Replicate** log stream and child tasks.
- **Workday Raas ingestion** - workday API **integration** into S3 Via Airflow custom operators and aws packages and from S3 to **Snowflake** Via Fivetran.
- using **python** API calls using custom Airflow operators.
- Developing transformation through prep and mart layer using **DBT** - Creating Snapshots, incremental SCD type 2 loads, macros, generic and functional tests, **Data** masking. Use of Pytest and SQL fluff
- Migration and Redesigning Talend Form AI feeds through DBT, Type 2 incremental load design for summarized metrics combined table. Optimizing the SQL for **performance**. Using DBT contracts and Generic and custom tests to validated **data** on a daily basis.
- Orchestration using **Python** and **Astronomer Airflow** DAGs.
- New **snowflake** account was created for **Genesys data** in order to maintain compliance. Filtering lakefront 1.0 to enterprise account to remove flow of **Genesys data** by adding filters in **python** and Orchestration via **Airflow**. Testing and deployment.
- Using Cortex to access **Snowflake data** using natural language.
- Using Streamlit to access **snowflake data** and create Charts for **business** users

Chipotle, CA

Jan 2022 to March 2023

Chipotle Mexican Grill's Migration effort of Sales **Data** solution and Financial **Data** Mart and Offer Management Mart from existing SQL server warehouse and SSIS to **Cloud** solution using **Snowflake data** platform, Five Tran, DBT, Azure.

Responsibility: DBT, FiveTran, ADF and **Snowflake Solution Architect/**Data** Modeller.**

Role: Lead **Snowflake consultant/Architect**

1. **Analysis of **Data Architecture** of chipotles Sales **Data** solution and Financial **Data** Mart and Offer Management Mart from on existing SQL server, SSIS based solution.**
 - a. Analysis of existing SSIS ETL and Table structure, Key structure, historical and incremental load strategies, and **business** processes overall.
 - b. Multidimensional **modeling** of **Business** process, Review and documentation.
2. **Flatting the existing non-Dimensional model Sales **data** warehouse model to Multidimension Models.**
3. ****Business** Analysis, Requirement specification documentation, Technical documentation in confluence.**
4. **Design and develop the ELT (Replication, Staging, Core warehouse layer) solution for New Sales **Data** warehouse using **Fivetran, DBT, ADF and **Snowflake** based ELT.****
5. **Creating consumption layer view and summarized tables for the accounting Department, SOX compliance team to use. Developed **ADF** pipeline to fetch large ORDER ITEM tables source **data** into **snowflake** be used for SOX compliance.**
6. **Near Real time Updating Restaurant dimension from MDM Symarchy to **Snowflake** Dimension using **Snowflake** Task scheduled hourly using merge statement**
7. **QA test support, Release management through Azure Dev ops. Production Deployments through confluence Runbooks along with DBAs. Post Deployment Validation.**

Statestreet Corp, MA

Jan 2021 – Dec 2021

Financial **Services** and Bank holding company specializes in Assset Managment. Project involved consolidate reference **data** (securities, Security Ratings, market values, cross reference **data**) as ADLS based application landing area files into Reference **data** product **data** Mart. Reference **data** is **data** used by multiple businesses within state street as product repository.

Responsibilities: **Snowflake Solution Designer/**Developer**.**

- **Design and POC of **data** ingestion pipelines from different **data** sources (over the counter, Wall Street office, Record keeping service etc.) in **real time from files present in ADLS landing area to **Snowflake** based **cloud** Reference **data** product DataMart though event notification, file formats, snowpipes, stored procedure, streams, stage table to get **data** into RAW ODS and Custom build **data** logging repository.****
- **Use of **Data Vault architecture** with hubs, Satellite, and link for each of the **business** entities like **Securities, Index, and derivatives**.**

- Development, Testing and UAT support for **data** ingestion pipelines. Creation of Standard view and **Business** view for consumption by downstream applications.
- Use of IBM Engineering Life cycle management integrated for build creation, execution and scheduling with GIT for CI/CD.
- Unit test, Beta testing and deployment on a **bi**–weekly sprint.

ABB Inc, NC.**Jan 2019 to Dec 2020**

ABB Inc. **Snowflake Data Lakehouse Integration** from different sources.

Environment: **Snowflake, Power BI** Desktop, Azure **Cloud**, Qlik Replicate & Qlik Compose, Devops.

Role & Responsibilities: Business Analyst & Snowflake Solution Designer/Developer

- **Business** and Technical Analyst, **Snowflake** solution design for a given use case.
- Callidus to **snowflake integration**-
 - Movement of Azure Blob File into **snowflake** external stage using COPY command automated with tree of TASKS, Creation of stages/File format, Logic to Transform **data** in View SQL, procedure and inserting into Tables automated using Tasks.
 - Qlik Replicate Job to ingest **data** from MySQL, Exposing result in form of **snowflake** views to Callidus. Development, Test and UAT support, Production Migration. Process Documentation. DevOps for Change/Project Management.
- **Power BI** Report based on integrated Invoice/Sales/Delivery information –
 - Creating view over **Snowflake** Shares from across Asia pacific/Europe/Americas. Qlik Compose for automated merger of **data** from various regions. Refresh **Power BI** report.
- Conversion of Financial Views from SAP - with additional **Business** Items, **Business** Requirement Analysis of **Data** Item and logic documentation. **Snowflake** views to integrate Centralized Component Analytics view. Development testing and modifications of **snowflake** View definition. Adding Master Conversion files from Azure blob **storage** to **snowflake** table and integrating with **snowflake** view.
- Modifying Existing one-time load process to Capture Change **Data** (CDC) using Qlik Compose, **Snowflake**. Getting Qlik sense **data** through CSV file into **snowflake** using Stage, copy command automated via **Snowflake** procedure and Task. Using **Snowflake** Streams to Track changes to incremental load tables and only those records to maintain accuracy. Creating historical load workflow, Incremental CDC in Qlik compose. Summarizing Historical and Incremental load using view and providing file for ATLAS system through Azure blob.

Life touch Portrait Studio's, Eden Prairie MN.**Oct 2015-Jan 2019**

Environment: Azure SQL Server, Microsoft SQL Server 2019/2017(SSAS, SSIS, SSRS), Azure Data Factory.

Responsibilities: BI consultant. (Adroid system)

- Developed and maintained ETL jobs(SSIS), including ETL implementation and enhancements, testing and Quality assurance, troubleshooting issues and ETL/Query performance tuning.
- Report development using DAX formulas to create measures and calculated columns and Implementing role Level and row level security in tabular model.
- Interactive dashboards in Power BI using various visualizations such as bar charts, pie charts, and maps. Published to Power BI service. Automating daily and weekend batch jobs and monitor the scheduled activities and pipelines.

**Merck & Co. Inc & Filem Negara Malaysia, (National Film Division of Malaysia).
Aug '11- Oct '12**

Environment: Cognos 10.1.1, Oracle 10.2 . Cognos 8.4, DB2 9.7.4, IIS7.

Responsibilities: Project Management and Technical lead (HCL)

- **Canada Cognos Migration, Merck Korea Development** Project management and Lead performed Assessment of Effort for migration from Cognos Reportnet, 7x, to Cognos 10. And new reports and dashboard development
- **Merck USA GSIP** Modifying Framework Manager, prototype development and review. Development of reports for two cycles, Testing, and deployment of reports to production.
- Environment set up Cognos 8.4 and DB2 9.7.4 in 64 Bit Windows Server 2008 Enterprise Edition machines. Configuring IIS 7(WebDAV install), DB2 Content store. Framework Manager development. Development of Report using XQuery View from XML data type in query database.

JC Penney Company, Inc. Plano, TX. (Cognos consultant)

May' 10 – Mar'11

Environment: Cognos Report Net MR1.3, UNIX Server, Workbrain 5.0.2.0. Oracle 10.2

Responsibilities: Design and Development

Designed and development of Staffing Need Recap Report, Hiring Focus report. Creating maintenance forms (prompt Pages) in Workbrain for user input and connecting that with Cognos native SQL report.

- Use of features like Conditional block, graph, sections, and Conditional formatting (coloring cells based on values) ni Workbrain 5.0.2 and integrating with Cognos MR1.1. Performance Testing and UAT support.

-
- Design of **Supply chain Integration** to jtime Report - columns, Security implementation at prompt page (Workbrain maintenance form level) and at report page.
- Reports on employee productivity, time and attendance related and cost estimation in case of hourly employees.
- **LFSO (Labor Forecasting and Schedule Optimization) Enhancements** report and **Performance tuning**.

Daimler Financial Services, Fort Worth, TX (Cognos Consultant) Dec '09 – May '10

Environment: Cognos 8.4, DB2, Windows Servers. Cognos Migration project worked as Cognos consultant.

- Migration, testing and Beta support from **Cognos Series 7.4 to Cognos 8.4**. Conversion of 7.4 reports into Cognos 8.4 report studio.
- Migration and redevelopment of Cognos Cube and Drill through report to **Cognos 8.4** Report Studio. Series 7 Master Detail Reports, and Report with complex Sub queries and calculation at various levels.

Prudential Financials (Retirement Services), Hartford, CT Oct'07–Nov '09

Environment: Cognos 8.3, DB2 8.1 (SQL), **Microsoft** SQL server 2005, ER win7.

Responsibilities: Systems Consultant Lead (TCS & CMC - Americas) for Retirement Product Cube project.

- Requirement Analysis and documentation POC through prototype for the **Data** Cube project using Cognos 8 using IQD. **Modeling** using **ERwin7**
- **As in lead in Infrastructure setup installation** of DB clients, SQL server and **Cognos 8.3**. Capacity planning infrastructure, documentation, and support. **User configuration, Migrating code between environments, monitoring server and report queue, Performance Tuning**
- Creating **FM Models, packages** for cube and **publishing**.
- **Design and development of Cubes** using Cognos 8.3 Transformer using **Time based partitioning**. Generating the cube monthly and production problem handling.
- Report development **Analysis studio report, drill through reports from Cube** using Report Studio.
- ETL development using SQL server stored procedures, Unix Shell script.

Farmers Insurance Group, Simi Valley, CA. Design Analyst. March'05 – Sep '07

Farmers Group, Inc., CRN Management Reporting project

Environment: Cognos ReportNet1.1 MR3, Cognos 8 **BI Power** Play Enterprise Server 7.3, Powerplay for windows, Powerplay Transformer, Impromptu Administrator, Cognos Decision Stream, Oracle 9i Rel 2. Cognos **Power** Play Enterprise Server 7.3, Powerplay for windows 7.3, Powerplay Transformer 7.3, Impromptu Administrator, Cognos Decision Stream, Oracle 9i

Responsibilities: Technical lead and **developer**.(Wipro)

- Installation, Configuration, and maintenance of Cognos Reportnet 1.1 MR3.
- **Migrating Summary tables ETL used for reports and cubes from Decision stream to Informatica **Power** center Client.**
- **Migrating the Existing Cognos series 7 Project to ReportNet 1.1 MR3 (Analysis, Design, Development and Support), **Optimization** of Report generation time and ETL processes. Designing ReportNet Reports for migration to Cognos 8.**
- Migration and modifications of **Frame Manager Model** based on **business** changes. Trouble shooting any issues raised – **Performance**, Functionality.
- **Development of Complex Report Studio reports - Drill through reports, Ad hoc Reports Query Studio reports, Master- Detail reports, burst table and reports.**
- **Optimizing Reports by using Native SQL based report design and FM model review to generate optimized SQL.**
- **Optimize ETL Stored procedures. Cognos Decision Stream7.1 ETL builds and PLSQL stored procedure**
- **Cognos Series 7 Reports development in Impromptu Administrator 7(interactive, Drill through).**
- **Production support Cognos server Administration – Monitoring report queue, Publishing **Power** play cubes to portal, Setting server properties. Resolving Problem tickets for Production. Multi-dimensional Models and cubes.**

Summary

Experience in ETL & BI applications - Project and Functional Management, Business Requirement Analysis, Design, Modelling, Testing and Deployment, support across Retail, Banking and Financial, Insurance domains. Data Engineering Technologies: Snowflake, DBT, FiveTran, Python, ADF, SSIS, Qlik Compose, Qlik Replicate, Power BI, SQL Sever, DB2, Oracle, IBM cognos, Azure Cloud, AWS Cloud

Work History

- Lead Data Engineer (WEX)/ Snowflake Consultant Globallogic
- Cognos Consultant Jcpennys
- Snowflake Solution Designer Statestreet Group
- Technical Lead - (Client: Prudential Retirement) Cmc
- Technical Lead (Client : Merck & Co. Inc & Filem Negara Hcl Technologies
- Snowflake Consultant / Onsite Coordinator Chipotle Mexican Grill

- **Snowflake** Solution Designer/**Developer**. Statestreet
- **Snowflake** Consultant (Client ABB Inc.) Wipro
- Senior Design Analyst (Client - Farmers Insurance Wipro
- Cognos Consultant Daimler Truck Financial **Services** Usa
- Cognos Consultant (Client J C Penny) Tiara Consulting **Services**
- **Business Intelligence** Consultant Life Touch Portrait Studios Eden Prairie Mn.
- Cognos Consultant Daimler Financial **Services** Dcfs Usa

Education

- **Masters** | Information Technology Management
- **Bachelors** | Computer application
- **Masters** | Information system
- **Masters** | Computer Science

Skills

- **business** analyst and **data** modeller - 15 years
- datawarehouse concept - 15 years
- sql - 15 years
