Software Development Life Cycle | Software Development Testing | Configuration Management

PROFESSIONAL SUMMARY

Forward-thinking **Salesforce Developer** boasting 5+ years experience in creating and executing software solutions to enhance business productivity. Highly experienced in all aspects of the software development lifecycle, end-to-end project management, from concept to development and **delivery**. Consistently recognized as a hands-on leader, skilled at creating and implementing innovative solutions that drive business efficiency and profitability.

PROFESSIONAL EXPERIENCE

Salesforce Developer

May 2023 - December 2023

Booz Allen Hamilton | Remote - Atlanta, Ga

- Developed and implemented custom solutions using **Salesforce** platform, including creating custom fields, developing triggers and LWC's, deploying **workflow** rules, and creating **Apex** classes.
- Improved **customer** engagement by 20%, cut lead-to-order conversion time by 50% , and increase **customer** satisfaction by 10% through automating processes using **Salesforce** triggers and custom **API** integrations.
- Utilized **Salesforce** components such as Flows, Process Builder, and VisualForce Pages to improve scalability and usability for various processes.
- Enhanced application performance and scalability by debugging, refactoring and optimizing existing **Salesforce** components.
- Executed end-to-end testing to ensure solutions met **customer** requirements.
- Created documentation and support for all new and existing solutions developed on the **Salesforce** platform.

Applications Engineer

March 2022 - May 2023

A & E Engineering | Remote - Greer, SC

- Used C# and .NET framework to architect, design, and develop software systems that streamlined car manufacturing processes.
- Performed black box and white box unit testing supporting applications built in C# and Blazor
- Builds highly scalable, performant, and secure cloud infrastructure and applications.
- Performed in cross-functional project teams with **data** scientists and machine learning engineers to diagnose and remedy manufacturing software issues.
- Built reusable components, tools, and processes that are shared across teams and codebases for rapid development and scaling.
- Built and plans project processes using Azure **DevOps**.
- Used AWS EC2 instances to automate scaling, deploy servers, and manage storage.
- Optimized embedded device software efficiency by 13% and improved **system** stability by 35%.

Software Engineer

June 2016 – March 2022

Goldmine Properties | Dacula, GA

- Modified HTML, Python, and JavaScript web pages to optimize performance for faster loading and browsing.
- Developed products throughout the software lifecycle to boost business efficiency.
- Implemented process controls to supervise and monitor project progress. Consistently recognized for completing projects ahead of time with \$53K cost savings.
- Performed aspects of agile software development including user story writing, release and iteration planning, agile **modeling** and design, coding, unit and **integration** testing, code reviews, and software documentation.

- Built **automation** tools, processes, and developed a true **DevOps** Model.
- Conceptualized and implemented 10+ critical functional tests and debugging tools for mobile systems.
- Transformed and improved performance power evaluation accuracy by 15% by overhauling test software.

Network Engineer (Shift III - Contract)
TDC Systems **Integration** | Atlanta, GA

November 2020 – February 2021

- Provided Tier II engineering support to the helpdesk team by handling all network trouble tickets.
- Monitored network trends and built reports to capture the status of network health.
- Contributed to the design of new networked systems to ensure that **security** was an utmost priority.
- Created and maintained network documentation as it related to network configurations, network diagrams, and processes which improved operations by 43%.
- Configured and maintained network-integrated systems and supported teams with network configurations.
- Performed network configuration changes in accordance with change management processes.
- Assisted with vulnerability assessments and incident response activities on mission-critical resources and recommended and implemented process improvements as necessary to facilitate collaboration and improve cyber **security** operations.
- Performed root cause analysis for service interruption recovery, implementing preventative measures to deploy in the enterprise.

Freelance Software Engineer

August 2018 – November 2020

- Developed MOM'd, a scheduler web application, using Heroku PostgreSQL, Sequelize, PassportJS, and EJS templating.
- Conceptualized and developed voidIt, a food scanner web application utilizing ReactJS, QuaggaJS, and Open Food Facts **API**.

Software Engineer (Full Stack Flex Program)
DigitalCrafts | Atlanta, GA

August 2018 – April 2019

- Built, tested, and deployed a web application using the MERN stack.
- Built, tested, and deployed APIs.
- Built, tested, and deployed a front-end web application using React.
- Setup **Continuous Integration** (CI) and **Continuous Delivery** (CD) pipelines to deploy a React application.

EDUCATION AND TRAINING

****Salesforce** Development Program**
 TalentStacker | Remote | Jan 2023

Full Stack Flex Program Certification (27 Weeks Bootcamp)
 DigitalCrafts | Atlanta, GA | April 2019

High School Diploma
 Midtown High School | Atlanta, GA | May 2013

CERTIFICATIONS

Salesforce Certified Administrator
Salesforce Certified **Developer** (projected May 2024)
 CompTIA **Security+**

TECHNICAL SKILLS

JavaScript, Python, VisualForce, Lightning Web Components, Copado, SOQL, JIRA, **APEX**, HTML
