

STEPHEN OJONG AGBOR

Powder Springs, GA. 30127 | 16788659066 | stephen76agbor@gmail.com

PROFESSIONAL SUMMARY

DevOps Engineer | Automation Engineer | CLOUD ENGINEER | AWS SOLUTIONS ARCHITECT Enthusiastic, committed, and results-oriented Cloud DevOps Engineer | Solutions Architect, with about 18 years of total US work experience, including 8 years in the IT industry. Strong expertise in Continuous Integration / Continuous Deployment process, with a strong background in Linux Administration, Build & Release Management, Kubernetes, DevOps, and Cloud Administration. 5 years of experience working in an agile environment with a DevOps culture, and a long track record of successfully directing and executing tactical operations plans, including but not limited to supporting and collaborating with clients, technical teams and managers, migrating to the cloud, designing and building reliable, secure, efficient, and cost-effective cloud infrastructures, and automating and optimizing mission-critical deployments in the cloud, leveraging configuration management, CI/CD, and DevOps processes.

TECHNICAL SUMMARY | TOOLSET

- Cloud Automation: Terraform, AWS CloudFormation, Ansible, AWS Lambda, AWS Systems Manager, AWS SSM Parameter Store, Ansible, Jenkins
- CI/CD with Jenkins
- Source Control with GitHub
- Containerization with Docker
- Microservice Orchestration Management with Kubernetes, Helm, Amazon EKS, and Amazon ECS.
- AWS Security: AWS Security Hub, AWS Guard Duty, AWS Shield, AWS Firewall Manager, AWS Inspector
- Monitoring and Event Management: AWS CloudWatch (Events and Logs), AWS SNS, AWS S3
- Identity and Access Management: AWS Organization, AWS IAM, AWS AD Connector, Active Directory, AWS Workspaces, AWS Secrets Manager, Ping SSO, SAML, etc
- Governance and Compliance: AWS Config Rules, AWS Organization, AWS Control Tower, AWS Trusted Advisor, AWS Well-Architected Tool, AWS Budgets, AWS License Manager
- Programming Languages: Python, Bash Scripting, JSON, YAML,
- Application Delivery: Jira, Confluence, Jenkins, AWS Code Pipeline, AWS Code Commit, AWS Code Build, AWS Code Deploy
- Data Protection: AWS Certificate Manager, AWS KMS, Snapshot Lifecycle Manager, AWS Cloud HSM
- Self Service: Service CatLog
- Network: VPC, VGW, TGW, CGW, IGW, NGW
- Image and Patch: AWS SSM Patch Manager, AWS Golden AMI Pipeline
- Ops Analytics: Splunk
- AWS Platform: AWS CloudFormation, AWS Lambda, Amazon ECS, EKS, AWS Systems Manager, S3, VPC, EC2, ELB, RDS, SNS, SQS, SES, Route53, CloudFront, Service CatLog, AWS Auto Scaling, Trusted Advisor, CloudWatch, Dynamo DB, Glue, Event bridge
- AWS Migration: Phases (Assess, Mobile, Migrate, and Modernize), Tools (CART, ADS, Migration Hub, Cloud Endure, DMS, SCT etc)

PROFESSIONAL EXPERIENCE

System Engineer Bank of America

June 2023 – Present

- Jenkins
- Source Control with Bitbucket
- CI/CD with Jenkins
- Containerization with Docker
- Build, change, and version with Terraform
- Automation with Kubernetes
- Automation and configuration management with Ansible
- Maintained OpenStack system.
- Utilized Scrum and Agile methodology.
- Constructed a Microsoft Thread Modeling Diagram to visualize possible security threats to our application and measures that will be taken to prevent Security bridges to our application.
- Installing and designing Kubernetes clusters, running jobs, and deploying pods
- Configured Jenkins nodes to build jobs in the view of distributing the load of the Jenkins server and achieved parallel builds.
- Created automated process using bash shell scripts to perform user/group administration, file/directory security, authentication, and management to ensure users and groups have desired permissions.

- Conducting Accessibility Audit of applications
- Create Users and assign roles to them as depicted by the Bank's RBAC policy
- Configured SAML authentication to securely login to our application using an authenticator app
- Managed patching of Servers in our environment using Reserved Maintenance Window (RMW) / EPAS
- Created Ansible Playbook with a script to gracefully shut down our application before patching and to uncordon the servers after patching is complete
- **Monitoring** application with Splunk and Dynatrace

OpenShift Architect

Dec 2021 – May 2023

Crossvale Inc

- Consultant specializing in Red Hat **Infrastructure** technologies such as OpenStack, RHEL, Satellite, RHV, and Ansible
- Maintained OpenStack system
- Deployed and maintained VMware environment
- Modified Mistral workflow with pre-config, firstboot, and networking
- Utilized Scrum and Agile methodology

Technical Expertise:

- Created Golden AMIs for AWS deployments using **Terraform**
- Automated the process of provisioning **infrastructure** on AWS using **Terraform** and CloudFormation
- Deployed to EKS with DevOps tools on AWS (ECR, AWS Code Commit, AWS Code Build, and AWS Code Pipeline)
- Strong knowledge in **automation** of **Kubernetes** activities using CI/CD pipelines, to EKS Cluster using GitHub, Jenkins, **Docker**, Git-Ops Argo CD
- Logging and **Monitoring** EKS using Fluent DES and Kibana, Fluent Bit Kinesis and s3, and Prometheus and Grafana
- Configured Jenkins job with Maven build tool and accomplished continuous deployment by integrating Ansible and Jenkins using Jenkins's plugins
- Configured Jenkins nodes to build jobs in the view of distributing the load of the Jenkins server and achieved parallel builds
- Experience in the usage of data center **automation** and configuration **management** tools such as Ansible, **Docker**, etc
- Container orchestration using **Kubernetes**
- Installing and designing **Kubernetes** clusters, running jobs, and deploying pods
- Installing and configuring Jenkins
- Building, distributing, and parameterizing the builds
- Written the Ansible YAML scripts to configure the remote servers
- Implemented CI/CD pipeline for application deployment using tools like Git, MVN, Jenkins, Nexus, and SonarQube
- Managing and maintaining **Kubernetes infrastructure** and **Architecture**
- Configuration and support of **Kubernetes** Container Platform

Systems Manager, DevOps Engineer

Jan 2021 – Dec 2021

SavePoint Inc

- **Cloud Automation**: **Terraform**, AWS CloudFormation, Ansible, AWS Lambda, AWS, AWS SSM Parameter Store, Ansible,
- Microservice Orchestration **Management** with **Kubernetes**, Helm, **Amazon** EKS, and **Amazon** ECS
- AWS **Security**: AWS **Security** Hub, AWS Guard Duty, AWS Shield, AWS Firewall Manager, AWS Inspector
- **Monitoring** and Event **Management**: AWS CloudWatch (Events and Logs), AWS SNS, AWS S3
- **Identity** and **Access Management**: AWS Organization, AWS IAM, AWS AD Connector, Active Directory, AWS Workspaces, AWS Secrets Manager, etc
- Governance and **Compliance**: AWS Config Rules, AWS Organization, AWS **Control** Tower, AWS Trusted Advisor, AWS Well-Architected Tool, AWS Budgets, AWS License Manager
- Programming Languages: **Bash Scripting**, JSON, YAML,
- Application Delivery: Jira, Confluence, Jenkins, AWS Code Pipeline, AWS Code Commit, AWS Code Build, AWS Code Deploy
- Data Protection: AWS Certificate Manager, AWS KMS, Snapshot Lifecycle Manager, AWS **Cloud** HSM
- Self Service: Service CatLog
- Image and Patch: AWS SSM Patch Manager, AWS Golden AMI Pipeline
- Ops Analytics: Splunk
- AWS Platform: AWS CloudFormation, AWS Lambda, **Amazon** ECS, EKS, AWS Systems Manager, S3, VPC, EC2, ELB, RDS, SNS, SQS, SES, Route53, CloudFront, Service CatLog, AWS Auto Scaling, Trusted Advisor, CloudWatch, Dynamo DB, Glue, Event bridge
- Experienced with AWS **Cloud** platform and its features, which includes EC2, Elastic beanstalk, S3, RDS, CloudWatch, IAM, VPC, and Auto Scaling

- Optimizing **Docker** builds and ignoring files during **Docker** builds
- Container logging, adding metadata with labels, load balancing with containers
- Container orchestration using **Kubernetes**.
- Installing and designing **Kubernetes** clusters using KOPS and EKS, running jobs, and deploying pods
- Scaling **Kubernetes** Cluster using HPA and Cluster Autoscaling
- Developing scripts for build, deployment, maintenance, and related tasks using Jenkins, **Docker**, and **Kubernetes**
- Implemented CI/CD pipeline for application deployment using tools like Git, Jenkins, **Docker**, **Kubernetes**, and Nagios
- Knowledge of Site Reliability Engineer concepts SLO/SLI/On-call/Error Budget

Jr DevOps Engineer

Jun 2019 - Jan 2021

Ceva Logistics LLC

- Worked closely with customers, internal staff, and other stakeholders to determine planning, implementation, and integration of system-oriented projects
- Designed | developed aspects of migration journey assess, mobilize, and migrate phase including leveraging CART, ADS, Migration Evaluator, DMS, **Cloud** Endure etc
- Implemented **security best practices** in AWS including **access** key rotation, multi-factor authentication, role-based permissions, enforced strong password policy, configured **security** groups and NACLs, S3 bucket policies etc
- Managed and monitored all installed systems for the highest level of availability
- Optimized cost through reserved instances, selection and changing of EC2 instance types based on the resource need, S3 storage class and S3 lifecycle policies, leveraging Autoscaling, etc
- VPC peering with other accounts allows **access** and routing to service and users of a separate account to communicate
- Responsible for installation, configuration, **management**, and maintenance of Linux systems, including managing users and groups
- Monitored end-to-end **infrastructure** using CloudWatch and SNS for notifications
- Designing for high availability and business continuity using self-healing-based architectures, fail-over routing policies, multi-AZ deployment of EC2 instances, ELB health checks, Auto Scaling, and other disaster recovery models
- Leveraged AWS **Control** Tower, AWS Organization, etc., to set up and govern a secure, multi-account AWS environment based on the company's requirements.

Linux administrator

Sep 2016 - May 2019

Nova Southeastern University

- Created more than 200 Users and assigned permissions to them, created directories and files, changed files' location, and listed files and directories to make sure users have **access** when necessary
- Created automated process using **bash** shell scripts to perform user/group administration, file/directory **security**, authentication, and **management** to make sure users and groups have desired permissions
- Worked with application administrators to examine and analyze applications when **it** is slow, erroneous, or non-functional, to make sure users have a faultless experience
- Designed and implemented backup and Disaster recovery strategies with RMAN
- Performed logical backup using traditional export | import and Data Pump
- Collaborated with the UNIX/LINUX system Administrator to configure any software and hardware requirements that will function with the university's Database
- Helped build **Windows** and Linux systems from bare metal, both virtual and physical machines
- Scheduled daily and weekly backups to improve systems recovery after crashes to prevent massive future loss of vital **information**.

CERTIFICATIONS

Microsoft Certified: DevOps Engineer Expert	2025
Microsoft Certified: Azure Administrator Associate	2025
Professional scrum master I	2020

EDUCATION

Ph.D. Conflict Analysis and Resolution Nova Southeastern University – FL	2017
Master of Arts: Conflict Analysis and Resolution, Nova Southeastern University – FL	2012
Master of Law: International Law, Utrecht University, Netherlands	2005
LL. B (BA): Law, Yaoundé University II, Yaoundé, Cameroon	2001
