202-681-0309 | berrygotthis@gmail.com

PROFESSIONAL SUMMARY:

- Around 12 years of professional total experience in application design, development and integration using MuleSoft RESTful, IIB, MQ and Java/J2EE technologies.
- Good experience in various Mule deployment models (On-Prem, CloudHub and Hybrid).
- Experience integrating applications using Mule ESB by creating complex flows with various protocols.
- Experience planning and installation of Mule EE and IIB. Experience developing on RESTFUL/SOAP web services in Mule ESB and DataPower.
- Experience using Salesforce and Workday APIs and integrating with application using Mule ESB.
- Experience in deploying Mule Applications to Mule ESB and Mule Cloud Hub along with experience in configuring logging and alerting in Cloud Hub
- Experience in RESTFUL client to interact with the services by providing the RESTFUL URL mapping.
- Good experience in Installing, configuring, and maintaining DataPower appliances XI50 and XI52 as Service security gateways and Service Integrators.
- Good experience in DataPower application support and administration. Extensive experience in SQL, Stored Procedures, Functions and Triggers with databases such as Oracle, and MS SQL Server.
- Hands on experience designing RAML specs, building APIs using API Kit in Mule applications.
- Experience in developing web-based applications using Java 5/6, JSP, Servlets, Mule ESB, Oracle OSB, EJB, Struts, Spring, Hibernate, JDBC, JavaScript, HTML Libraries and Web-Services etc.
- Executed the development process using agile methodology, which included iterative application development, monthly Sprints, stand up meetings, poker planning sessions, elaboration and customer reporting.
- Motivated, results-oriented and good team player with strong and friendly communication skill. Excellent communication, interpersonal, intuitive, analysis and leadership skills with ability to work efficiently in both independent and teamwork environment.

SKILLS:

- AnyPoint Platform: Mule ESB, IIB 9, API Designer, MMC, CloudHub, Runtime Manager, Exchange, AnyPoint Studio, VPC, V-Core, Workers.
- Web Technologies: HTML, WSDL, CSS, XML, AJAX, XSLT.
- Languages: C, C++, Java, J2EE, Dataweave, Python, Ruby

- IDEs: Eclipse, NetBeans, IntelliJ
- Databases: Oracle 9i, 10g, PL/SQL, HQL, MS SQL, IBM DB2
- Connectors: HTTP, Salesforces, FILE, FTP, WMQ, JMS, Database, Mongo DB
- Mule: Mule 3.9.x/4.1.x, Anypoint Studio 6.5/7.5 and MMC
- J2ee Technologies: Servlet, JSP, JSON, JDBS, XML.
- Tools & Utilities: SVN, GIT, Jenkins, Ansible, AWS, Artifactory, Nexus.
- Servers: Tomcat 6.1, Web logic 6.X/7.0, JBoss
- Operating Systems: Windows, Linux, AIX

PROFESSIONAL EXPERIENCE:

Sr. API (MuleSoft) Developer/Lead

September 2021 to

Current

Cadence Bank – Atlanta, GA

Responsibilities:

- Participate in writing batch jobs to run at specific schedule times and transformations using Data Weave
- Implement transformations, exception handling, testing & Security of Mule ESB endpoint through OAuth
- Formulated build and deployment using Maven to deploy artifacts to On-perm Server.
- Create Mule flows to integrate Data from various sources into Database, from ActiveMQ topics and queues, some transformations were also done at integration layer.
- Make use of Mule components such as Dataweave, JAXB, File Transport, SMTP Transport, FTP/SFTP Transport, and JDBC Connector.
- Configuring Mule process for fetching data from topic and makes web service calls to middle tier Mule ESB for processing and put data on Server.
- Implemented data transformation using XPATH, XSLT, Dataweave, Custom java classes.
- Used AMQP Endpoints to connect to RabbitMQ which is a messaging queue.
- Implemented build package tool using Maven and build code in Jenkins.
- Build and Deployment of services in Mule ESB server using both manual and automated process.
- Managed servers by Bamboo and Bitbucket for CI/CD process with Maven.
- Working with Salesforce CRM tools.
- Comfortable with stakeholders' communication
- Integrating applications using TIBCO Mashery platform including AWS, Azure, GCP,
- IBM IIB/ACE platforms, IBM Bluemix, Pivotal, and RedHat Openshift

Environment: Mule 4.3, Mule 3.8, AWS, S3, Anypoint Studio 6.5 and 7.6, Jenkins, Splunk, GIT, Java 8.1, JEE, Oracle 11g, Salesforce, SQL Developer, Jira, Anypoint MQ.

Sr. API (MuleSoft) Developer

August 2019 -

2021

US Bank | Minneapolis, MN

Responsibilities:

- Create RESTful APIs using API Designer and generated flows using RAML file.
- Create design document specifications, troubleshoots and testing.
- Leverage various connectors; Database, HTTP, Webservice Consumer, JMS, Objectstore, FTP and File etc.
- Leverage various routers; Choice, Scatter-gather, until successful and etc.
- Implement choice, global, custom exception handling mechanisms based on the business requirement in MULESOFT ESB.
- Used both SOAP UI and REST POSTMAN testing tools for testing the Web services developed using SOAP and RESTful respectively.
- Implement transformation logic with DataWeave with custom Java Classes and used Data weave to transform xml to custom JSON files.
- Implement exception handling, testing & Security of Mulesoft ESB endpoint through OAuth.
- Plan, prepare and execute cutover activity and support hyper-care.
- Designed and documented and API strategy, persistence and exception handling strategy.
- Performed CloudHub admin role like creating environment, Users, Business group, roles, VPC and other.
- Leverage SOAP UI and REST POSTMAN tools for testing the Web services developed using SOAP and RESTful respectively.
- Migrate flows and configurations from Mule 3.8 to Mule 4.3.
- Automate application build and deployment with Jenkins, Maven, Git and Nexus

Environment: Mule 4.3, Mule 3.8, AWS, S3, Anypoint Studio 6.5 and 7.6, Jenkins, Splunk, GIT, Java 8.1, JEE, Oracle 11g, Salesforce, SQL Developer, Anypoint MQ.

2019

Truist financial | charlotte, NC

Responsibilities:

- Collaborate with Business Analyst and PM to understand **integration** requirements.
- Create **API** interface with RAML 0.8 and Swagger in Design center and Anypoint studio.
- Create **integration** workflows using **Mule** ESB 3.9.x framework and implement transformation logic with Dataweave.
- Configure routing using scatter gather, choice router, foreach scopes.
- Implement global error handling, catch exception handling, choice exception handling and rollback exception handling.
- Follow best practices such as externalizing property file, secure sensitive credentials with secure property holder.
- Used secure proper++++ jar tool to generate hash for credentials using AEL algorithm.
- Deploy and scheduled **mule** project to on-prem runtime with MMC.
- Produce and consume both **SOAP** and **Restful** web services.
- Promote code from development to testing and production environments.
- Create Flows, Sub Flows, and DataMapper transformations in **Mule** configuration.
- Create complex queries with joins, sub-queries, and nested queries in SQL queries.
- Participate in trouble shooting and problem solving of the Integrations.
- Participate in **agile** – methodologies to do requirements gathering, analysis and planning.
- Create High level, detailed design, topology and testing documents.

Environment: ActiveMQ, **Salesforce**, **JMS**, EJB, HTML, XML, Design patterns, **MuleSoft** ESB 3.5/3.9, **API** Manager, AnyPoint Studio 5.0/6.5, **Java**, JSP, Spring, Webservices, UML, Junit, jQuery, Mongo DB.

October 2016

Cardinal Health | Dublin, OH

Responsibilities:

- Conduct client meetings, capture requirement and translate to implementation.
- Create message flows in Message broker to do XML to copy book transformation routing and **Database** retrieval using ESQL and **Java**.
- Create message flow for purge process using timer nodes.
- Create Message flows to process flat files using File nodes and MQ nodes.
- Create Web services (consumer and producer) in IIB/Message Broker by using **SOAP** and HTTP nodes.
- Create XSDs, WSDLs and also implemented **Restful** web services utilizing XML and JSON message formats.
- Implement error reporting to support team by using email nodes.
- Create common ESQL functions, Reusable sub flows in IIB.
- Create sub flows for error logs and audit logs by using Log4j.

- Developed Message flow services using ESQL Compute Node, FileNodes, Timer Nodes, Email nodes, and Routing Nodes.
- Create test cases and involved in integration testing and bug-fixing for message flows during UA (User Acceptance) testing.
- Coordinate with test and QA teams to fix the defects.
- Participate in administration tasks using MQSC commands like creating Queue Managers, Queue, Channels, Process Definition, Name Lists, backup and recovery.
- Create Message modelling with DFDL and also created message sets using MRM.
- Fix critical issues and provide the solution in less turnaround time and participated in crisis calls.

Environment: Integration Bus (IIB v9), WMB 7 (Fix Pack 3), WMQ 7 (Fix Pack 5), Unix, XML Spy 2013, Notepad++, RFHUtil, SoapUI 4.5.1, Hex Edit, Oracle 11g, SQL Developer

Java Developer

PacWest Bancorp | Los Angeles, CA

April 2012 – September 2014

Responsibilities:

- Implement and configured the Java beans using Spring MVC and Hibernate.
- Implement Hibernate persistence layer modules using EJB Java Persistence API (JPA) annotations and Entity Manager.
- Used Hibernate in data access layer to access and update information in the database.
- Implement complex Web based UI using Struts, Ajax and Java Script.
- Worked on implementing Ajax / jQuery methods in retrieving the data from JSON files and loading the data on the HTML elements.
- Implement validation using JavaScript.
- Implement Presentation layer using JSP, Servlets, HTML5.
- Implement the Servlets for processing the data on the server.
- Database designed and created of tables, constraints, normalization, PL/SQL packages, functions, and Stored Procedures.
- Implement the database connectivity using JDBC with Oracle Database.
- Create Class Diagrams and sequence diagrams using UML.
- Prepare Java/J2EE development structure for Maven.

Environment: Spring, Hibernate, JSF, APACHE CXF, Web Services, JavaScript, CSS, AJAX, Html5, JSP, Java Server Pages Standard Tag Library (JSTL) & SERVLET, DB2, PL/SQL, JDBC, UML, Eclipse, JUnit, MAVEN, Xml, GWT (Google Web Toolkit), Apache Tomcat, Linux.

EDUCATION DETAILS:

Bachelor's degree in Information System from BAIS - AAUSC in 2012.

CERTIFICATIONS:

MuleSoft Certified Developer version 3 and 4.

Berhan Tessema

- FAIRMOUNT HGT, MD, US
