

BING HAN

Phone: (518) 207-7790 Email: hanb2@yahoo.com

SUMMARY:

- **Successfully designed and implemented ELK stack handling billions of documents from proof-of-concept to production for Microsoft, Cisco, FedEx, AutoZone, Veritas and Onboard**
- 5 years of **ElasticSearch**, **Logstash**, **Kibana** ELK experience (design, building and maintaining)
- 15+ years of professional IT experience.
- 5+ years of experience as a hands-on **Software Architect**
- Design and implement **data** modeling for **ElasticSearch** indexing and query to handle billions of documents
- Query optimization and performance tuning for **ElasticSearch** cluster
- Built business analytics layer on top of **ElasticSearch** aggregation framework
- Built application layer on top of **ElasticSearch** to support 500 **concurrent** users
- Utilize **Logstash** to collect **data** from multiple sources
- Utilize **Watcher** to send alert for slow queries and performance issue
- Utilize **Shield** to protect **ElasticSearch** Clusters
- Utilize **Kibana** to display **data** from **ElasticSearch**
- Strong multi-tier web application design, development and **implementation skills**.
- Great at analytical thinking.
- Business oriented approach to **software** development.
- Agile and test driving development.
- Object Oriented Programming at Server and Client sides.

Cloud: AWS, Google App/Compute/Container Engines

DevOps: Kubernetes, Chef, Puppet, Jenkins

Databases: **ElasticSearch**, **Cassandra**, **MongoDB**, SqlServer, Oracle, PostgreSQL/GIS, MySQL

Backend: Strong backend development experience.

- **ElasticSearch** indexing, querying, administration and performance turning
- Node.js Express framework
- Python Flask framework
- **Java** Spring MVC and Boot frameworks
- Microsoft ASP.NET, WCF, Web Service, MVC and Sharepoint
- LAMP, MEAN and ELK stacks
- SOA and REST **API** development
- AWS, Google Cloud, Azure development
- GeoServer for mapping engine
- Experience with Python, Node.js, **Java**, Groovy, C#, Unix Script

Frontend:

- Strong knowledge and hands on experience developing rich client with MVP/MVC framework
- Strong experience with Javascript, CSS, SASS, CoffeeScript
- Client side framework: Backbone.js, Knockout.js, ReactJS
- Template engines: Dust, Jinja2, underscore and jQuery templates
- Flex development: ActionScript 3.0
- Javascript mapping client: OpenLayers, Leaflet

EDUCATION:

- Rensselaer Polytechnic Institute, Troy, NY
Master of Science in **Computer Science**
- Beijing University of Aero & Astro, Beijing, China
Bachelors of Science in **Computing Aerodynamics**

PROFESSIONAL EXPERIENCE:

RedBing LLC

Elasticsearch Consultant (SME)

October 03, 2018 – Present

Client: Cisco, Microsoft

- Responsible design and implement ELK stack for more than 50 **data** sources
- Work with telemetry **team** to design and setup ELK stack to collect metrics and logs
- Designed and Implemented document level security pipeline
- Designed and implemented logging and analytics solution for cognitive excellence **team**

Syntel Inc - Fedex

ElasticSearch Program Architect

Nov 1, 2017 – Feb 22, 2019

- Responsible for overall **ElasticSearch** cluster design, query optimization, performance tuning and ELK administration with **Elasticsearch, Logstash, Kibana, Kafka** to handle billions of documents
- Design and implement **ELK** from proof-of-concept to production
- Utilizing Spring Boot for Microservice development to interact with **ElasticSearch** Tradetools **search**
- Utilizing Ruby on Rails to interact with **ElasticSearch** for name and address matching

Bingsnow LLC - Veritas Technologies

July 3, 2017 – Oct 30, 2017

ElasticSearch Engineer

- Using terraform and puppet to automate **ElasticSearch**, Marvel, Kibana, Shield, Logstash etc
- Migrating from on-premises **ElasticSearch** clusters to Azure cloud with billions of documents
- Worked with C# and **Elasticsearch API** for email indexing and searching

Onboard Informatics (New York, NY)

May 16, 2012 to June 29, 2017

Senior Software Architect and Full Stack Engineer

- Developed and maintaining www.addressreport.com based on Python with Flask, SASS, CoffeeScript, React.js **MongoDB, Elasticsearch, Logstash, Kibana** and Google App/Compute/Container engines
- Designed and implemented national property **API** suite hosted in AWS with **Node.js, Cassandra** and **ElasticSearch**
- Designed and implemented Listing **search** engine based on **Node.js** and **ElasticSearch** to support 500 **concurrent** users
- Developed **data** streaming processing by utilizing **Logstash, Google Pub/Sub service** to grab **data** from multiple sources
- Use Kubernetes in Google Container Engine for automating deployment, scaling and management of containerized **microservices**
- Built geocoding, zipcode, neighborhood and city microservices with Spring Boot hosted in google cloud
- Implemented a few **data** processing products by utilizing **Java, Oracle, SqlServer, Talend** and Alteryx
- Working closely with offshore development **team** to design Onboard Informatics Listing360 product to track, store and present user activities on Real Estate market by using ASP.NET, WCF and RabbitMQ.
- Re-architected web presentation layer codes, moved most of logic into client side to utilize client side caching and utilized **MongoDB** as a cache server to restore/retrieve json objects.
- Integrated **Alteryx BI** and ETL tools into Onboard Listings, Home Sales, AVM products.

- Built a drive time/distance engine with Osm2po open source **java** library.

Treo Solutions (Troy, NY)

July 16, 2009 to May 15 2012

Senior Full Stack Engineer

- Designed and implemented Healthcare Dashboard V1.0, 2.0 for payer, provider and physician with C#, Flex, Javascript, SqlServer and Sharepoint.
- Designed and implemented MyTreo Portal to let user to learn Healthcare trending, navigate through the system, manage documents etc.
- Designed an application template framework to work directly with existing **database** metadata **structure** to allow **SQL** programmer to easily satisfy customer **requirements**.
- Implemented authentication and authorization for documentation management system with Sharepoint Server
- Analyzed Treo Analytics Tool for areas of improvement and develop plans to implement the resolution.
- Work closely with other departments to ensure problems are solved promptly and effectively.

Pitney Bowes MapInfo (Troy, NY)

June 1, 2001 to July 15, 2009

Senior Software Engineer

- Designed and implemented a content management system for Business Intelligence **team** to store binding information and named resources by utilizing Adobe BlazeDS **data** service, **Apache** JackRabbit and Groovy.
- Implemented a web GUI to manipulate information stored in a content management system by utilizing Flex ActionScript 3.0
- Worked on MapMarker **Java** geocoding product for multiple countries.
- Worked as a member of mapping **team** in Enterprise **Java** projects for styles, marker placement, themes, legends, wms raster layer and GlobeExplorer **data** provider.
- Worked on MapXtreme 2005 which provides great supports for web and desktop developments, worked on MapInfo Session model, Web controls and User state management and for MapXtreme 2005 release.
- Responsible for designing, developing, deploying and maintaining testing system for MapXtremeJava Products.
