

DAVID WHITE

Software Developer

PROFESSIONAL SUMMARY

Expertise in Javascript, Java, and modern web technologies, specializing in application development, modernization and performance optimization. Proficient in implementing state management solutions, REST API integration and leveraging skills in Redux, TypeScript, and Spring Boot to drive technological advancements. Committed to enhancing user experience and interface responsiveness while aspiring to innovate and lead in cutting-edge software development.

EMPLOYMENT HISTORY

SOFTWARE ENGINEER

Mastercard / Contractor

Aug 2024 - Present

Atlanta, GA

Designed and developed reusable UI components using StencilJS for an in-house library utilized across multiple applications, ensuring consistency and scalability.

- Implemented responsive and accessible user interfaces adhering to web standards and design best practices.
- Collaborated with cross-functional teams to integrate StencilJS components seamlessly into diverse application environments.
- Leveraged asynchronous programming to enable reactivity and improve the performance of UI interactions.
- Developed and maintained RESTful APIs in Java Spring, enabling secure and efficient communication between Mastercard applications.
- Authored comprehensive Confluence documentation for APIs and project architecture, enhancing team collaboration and knowledge sharing.
- Created and executed unit test cases and end-to-end (e2e) test cases to ensure functionality and reliability of UI components and APIs.
- Enhanced developer experience by contributing to robust CI/CD pipelines and ensuring high-quality code deployment.

SOFTWARE DEVELOPER - ANGULAR

Herff Jones / Contractor

Mar 2023 - May 2024

Indianapolis, IN

Redesign and implement strategic enhancements, resulting in a significant improvement in web application remediation, increasing from 20% to 70%. Improving the overall web client and user experience.

- Implemented presentation layer using HTML5, CSS3, TypeScript and Angular 9-14, resulting in a 50% increase in new user modules and a 20% decrease in legacy version modules.
- Engineered Frontend services for seamless integration with web and backend, database applications, boosting system performance and data retrieval speed by 40%.
- Utilizing Jest for comprehensive unit testing and ensuring code quality in software development projects.
- Overhauled the obsolete legacy source code of a production applications, resulting in increased usability and reduced run time performance by 50%.
- Skilled in implementing state management solutions using the NgRx and Redux patterns, ensuring efficient data handling and application scalability.
- Exemplary proficiency in leveraging Git for meticulous version control and Jira for streamlined project management, contributing significantly to collaborative excellence and optimized workflow across software development endeavors at my company.
- I conducted thorough code reviews using Jira, ensuring coding standards and project requirements. This process improved code quality, reduced bugs, and enhanced team collaboration, contributing to project success.

SOFTWARE DEVELOPER/CONTRACTOR - JAVA/ANGULAR

Booz Allen Hamilton / Contractor

Oct 2022 - Mar 2023

Waco, TX

Successfully modernized AngularJS application to Angular 2+ and Java 8 backend to Spring Boot 5, improving performance, user interface, speed, and aligning technology with industry standards.

- Utilized Java Stream API for Streamlined Data Processing: Leveraged Java Stream API techniques to optimize data processing and enhance performance in backend operations, contributing to the successful modernization of legacy systems.
- Implemented Dependency Injection with Spring Boot: Employed advanced Dependency Injection (DI) techniques using Spring Boot to streamline dependency management, promote modularity, and facilitate seamless integration with modern frontend technologies, resulting in a significant impact on project efficiency and scalability.

- Leveraged Angular 2+ for Enhanced User Experience: Utilized Angular 2+ features and capabilities to modernize legacy **AngularJS** applications, leading to a substantial improvement in user experience and interface responsiveness.
- Utilized Angular services and components: This enabled modular **development** and enhanced code structure, leading to a more organized and scalable frontend architecture. This approach significantly improved **project** delivery efficiency and maintainability.

SENIOR **SOFTWARE DEVELOPER**

Jamaica Custom Agency / United Nations

Sep 2018 - Aug 2022

Jamaica, W.I

Developed 70% of **web** applications using Angular (versions 6 to 10), creating dynamic, responsive, and scalable single-page applications (SPAs).

- Implemented core functionality and frontend-backend integration by writing Java APIs to support business logic and data flow.
- Leveraged expertise in RxJS and Angular services to implement reactive programming patterns, ensuring seamless asynchronous data handling.
- Designed and built single-page applications (SPAs) with a focus on user experience, performance optimization, and maintainability.
- Guided projects from conceptualization to Minimum Viable Product (MVP) and evolved them into fully functional, production-ready applications.
- Collaborated with cross-functional teams to translate business requirements into technical implementations while adhering to best practices.
- Ensured high code quality by writing comprehensive unit and integration tests for both frontend and backend components.
- Played a key role in troubleshooting and optimizing applications to meet performance benchmarks and user expectations.

EDUCATION

BACHELOR OF **SCIENCE IN **COMPUTER SCIENCE****

University of Technology, Jamaica

Aug 2011 - May 2015

Kingston, JM

SKILLS

Java, PHP, JavaScript, TypeScript, HTML, CSS, Angular, NGRX, Redux, RxJS, OOP, **Oracle** DB, MySQL, Git, REST **API**, **JSON**, Jest, Spring Boot.
