

Professional Summary

- Full-stack **.Net (C#)** software engineer with 15 years of software development experience taking projects from concept to production.
- Seasoned in agile methodology and development support through all stages of the software development cycle.
- Expert in user experience design.

Technical Skills

Web UI Stack	HTML (including HTML 5 Semantic tag use), JavaScript, jQuery, LESS/CSS (including CSS 3), Bootstrap, Angular (7+)
.NET Stack	C#, LINQ to SQL, Entity Framework, .Net Web API, .Net MVC, .Net Core, Moq, NUnit, AutoMapper, Azure Functions
Tools Used	Visual Studio, VS Code, SSMS, Adobe Master Suite, Team City, Jenkins, PowerShell, Subversion, Git, TFS, NuGet, Jira, Confluence, NPM, Bower, Angular-CLI, Docker, Kafka
Databases	MS-SQL Server, MySQL
Programming Disciplines Practiced	Test-driven development, object-oriented design, SOLID principles, Clean Architecture, Agile SCRUM methodology, Domain Driven Design, UX Centered Design

Experience

WEX: May 2022 – Present

Full-Stack Software Engineer

- Development support on backend and front-end customer facing sites. The technology stack for development included **Angular, .Net Core Web API (C#), EF Core, SQL Server, Kafka, Azure Functions and Docker**. Wrote unit tests with **NUnit**. Azure DevOps continuous integration was used to deploy to server environments. Code repository we use is Github Enterprise.
- I helped drive new development for future business ventures. Advocating for Domain Driven Design on some products and Azure cloud architecture. Since our team size tripled, the standards put forward helped our team of developers quickly get up to speed and continued our effort to write clean code.

FIS: November 2017 – May 2022

Full-Stack Software Engineer

- Development support on a multi-faceted payment processing system. The technology stack for development includes **Angular, WCF Service, .Net Web API for Restful Web Services(C#) and SQL Server**. Wrote unit tests with **MSTest**. Used **TFS** for version control and builds. And used **Octopus** for deployments.
- Learning Azure cloud under architects for future migration to the cloud. Technology stack includes **.Net Core, Docker, Azure SDK and Azure Kubernetes**.

InfoWorks: September 2016 – October 2017

Full-Stack **Software** Engineer

Client: PopHealthCare

- Provided **development** support for converting an in-house thick client platform to a **Web** platform. The technology stack included **MS SQL Server**, **.Net Core Web API** and **Angular**. The tools used were **MS Visual Studio**, **MS VS Code**, **Angular-CLI** and **MS SQL Server Management studio**.

Client: Ascend - Maximus

Provided **development** support for client's Preadmission Screening and Resident Review (PASRR) online application. Built on **ASP.Net MVC 5** framework that uses **Microsoft SQL Server**, **Entity Framework 6** and **Web** Sites on **Microsoft Azure** platform.

ClockShark: May 2016 – July 2016

Full-Stack **Software** Engineer (Contract)

Provided **development** support for customer facing time tracking **Web** and Mobile application. We used **ASP.Net MVC** framework and **JavaScript** Libraries (**KnockOutJs** and **SammyJs**) with a data layer comprised of **MS SQL Server** and **ADO.Net**.

Ingram Content Group: May 2014 – June 2016

Full-Stack **Software** Engineer

- **Development** support and processes **lead** on **.Net** Develop for several in-house corporate products. **.Net MVC**, **SQL Server**, **KendoUI (Telerik) Reporting Tools**
- Refactored code by applying unit tests to legacy code, code cleanup, created plan to convert data **project** dependency to **Restful service API**.

Ingram Content / ProQuest Coutts Information Systems

Software Engineer

- Provided **Web** application support for the legacy MyiLibrary product (team and product purchased from Ingram – see previous position for product description).
 - Provided **Web** application support for the legacy MyiLibrary product, an application built on the **.Net 2.0 framework**, **SQL Server** and client technologies (**Web Forms**, **javascript**, **jQuery**) serving over 5000 customers with millions of users.
- Provided **Web** application **development** support for upgrading the MyiLibrary product to a **responsive design** **Web** application. Building the upgrade using **.Net MVC 4** and **Web API**, **SQL Server**, **HTML5** and **SPA supporting JavaScript** libraries (ie **AngularJS** & **RequireJS**).

Education**Bachelors of Arts, Media Communications**

Minor in **Computer Science**

California State University, Sacramento 1997

Mark Pine

- Woodstock, GA, US

Contact Information
