SUMMARY

Certified GIS Professional (GISP) with over 5 years of experience in geospatial analysis, data migration, and process optimization, recognized among the "25 GIS Professionals to Watch in 2025" and awarded URISA's 2024 Young Professional of the Year. Proven expertise in Safe Software's FME and Esri's ArcGIS Pro, with a strong track record of designing and implementing automated workflows to streamline data integration, transformation, and quality control. Skilled in geoprocessing, spatial analysis, and database design, with a focus on improving efficiency and data integrity. Adept at solving complex problems, managing multiple projects, and collaborating with cross-functional teams to deliver high-quality geospatial solutions.

EDUCATION

Master of Science in Geosciences - Geography Concentration

Dec. 2024

Georgia State University | Atlanta

GPA: 4.1/4.0

Bachelor of Technology in Remote Sensing & Geoscience Information System

Oct 2020

Federal University of Technology Akure

Thesis Title: "*Mapping of Flood Risk Zones using a Multi-Criteria Approach and Radar.*" Achieved a CGPA of 3.57/4.00, ranked in the **Top 1%**, awarded Second Class Upper ([view](#))

EXPERIENCE

Atlanta Regional Commission | Atlanta, GA

Jul 2024 - Present

GIS Analyst

- Utilized FME to design and automate workflows for data integration, transformation, and migration, improving efficiency by 30%.
- Developed ArcGIS Pro models and scripts to streamline spatial analysis and geoprocessing tasks, supporting decision-making for green infrastructure projects.
- Collaborated with cross-functional teams to document workflows, ensuring compliance with quality assurance and quality control standards.
- Conducted data audits and implemented quality control measures to maintain data integrity across GIS databases.
- Create Standard Operating Procedures (SOPs) to streamline workflows and ensure consistency across teams.

Georgia State University | Atlanta, GA

Dec 2022 – Jul 2024

Graduate Research Assistant

- Led research projects involving climate and landform data, utilizing GIS tools to aid in the instruction of geography and landforms.
- Spearheaded data collection and transformation for the Chicago Gang Map project with Dr. Coupet, utilizing web scraping to convert historical data into GIS-readable formats, resulting in impactful reports.
- Streamlined data collection processes using Python scripts to access geospatial APIs and manipulate datasets, reducing research time by 70% and increasing data accuracy.

Wylde Center | Decatur, GA

Jun 2023 - Aug 2023

ESG/Sustainability / Contract

- Translated intricate internal and external GIS data into concise summary information, facilitating informed decision-making for Wylde leadership and improving project approval rates by 25%.
- Synthesized geospatial ESG data into digestible reports and maps to enhance the Wylde Center's online engagement by 50%, significantly broadening outreach in sustainability topics.
- Mapped activities contributing to United Nations Sustainable Development Goals (SDGs) using spatial big data, ensuring Wylde Center's activities contribute to globally recognized sustainability targets.

Humanitarian OpenStreetMap Team (HOT) | Remote

Sep 2022 - Sep 2023

Geospatial Data Analyst | Contract

- Identified and addressed inconsistencies in geospatial data, leading to a 45% improvement in data accuracy and a 60% increase in reliability for operational use.
- Leveraged FME and ArcGIS Pro to create automated workflows for data integration and transformation, improving data accuracy by 45%.
- Conducted spatial analysis and geoprocessing to support disaster response and environmental conservation projects.

- Developed **training** materials and conducted workshops on FME and **ArcGIS** Pro for team members and partners.
- improving the utilization of GIS and CMMS technologies, supporting humanitarian interventions and public sector projects.

Nigeria Flying Labs/Agroexchange Technology Limited | Akure, Ondo State **GIS and Remote Sensing Manager**

Jan 2019 - Dec 2022

- Designed and implemented FME workspaces to automate data migration and transformation processes, improving workflow efficiency by 40%.
- Conducted spatial **analysis** and geoprocessing using **ArcGIS** Pro to **support** deforestation monitoring and climate adaptation strategies.
- Developed and maintained **geospatial** databases, ensuring data integrity and accessibility for **government** and international clients.
- Provided technical guidance on GIS workflows and tools, contributing to successful project outcomes and stakeholder satisfaction.
- Curated and maintained comprehensive **geospatial** databases for **government** clients (WeRobotics, AfDB, and the World Bank), driving an 80% increase in state revenue through optimized resource allocation.

Red Cross Disaster Cycle Services Unit | Various Locations **Volunteer Data Specialist**

Sep 2014 - Present

- Supported disaster response efforts during **Hurricanes Helene and Milton**, integrating GIS to map affected areas and allocate resources efficiently.
- Coordinated emergency services across diverse communities, ensuring equitable **support** delivery in crisis situations.

HONORS & AWARDS

• 2024 URISA Young Professional Scholarship Award, URISA	2024
• GGA Virtual Map Competition 2024, Georgia Geospatial Association	2024
• Top OSM Editors of 2020 & 2021 Innovation in Mapping, USAID, YouthMapper, GEOCENTER	2021
• Top 10 Finalist, Google Africa Developer Training Program, Google Developers	2021
• Finalist, BuildforSDG Challenge 2021, Meta and Andela	2021
• Top Finalist, Nigeria Drone Business Competition, Global Air Drone Academy	2021
• Top 10 Finalist – AfricaVsVirus Hackathon, Africa Development Bank (AfDB)	2020

SKILLS

Technical Skills (Statistical, Field Equipment, Programming, and **Geospatial):** Data Science (Python and R language), Stata, SPSS, Machine Learning, EVS, EQuIS, AWS, Git, Matlab, Leapfrog, JavaScript, ArcSDE, PyTorch, SQL Databases, DAX, Statistical Skills, **Database** Archiving, Data Mining, Ability to use Microsoft Office Suite and Excel, Adobe Photoshop, Blender, AutoCAD, SPSS, Socrata, Tableau, GeoODK, KoBoToolbox, GeoDa, QField, PowerBI, Acquiring **Geographic Information**, Organizing **Geographic Information**, **ArcGIS** Pro, ArcMap, QGIS, ENVI, Analyzing **Geographic Information**, Google Earth Engine, GWR, SAP, Esri, Microsoft SharePoint.

FME (Safe **Software):** Advanced proficiency in designing and automating workflows for data integration, transformation, and migration.

ArcGIS Pro: Expertise in spatial **analysis**, geoprocessing, and linear referencing.

Geoprocessing & Spatial **Analysis:** Skilled in advanced spatial **analysis** techniques, including geometric network **analysis** and data mining.

Database Design & Management: Proficient in designing and maintaining **geospatial** databases, quality control, quality assurance, ensuring data integrity and accessibility.

Process Improvement: Experience in optimizing workflows and implementing quality control measures to improve efficiency and data accuracy.

Python Scripting: Proficient in developing scripts to automate GIS workflows and integrate **geospatial** APIs.

Technical Documentation: Skilled in creating **training** materials and procedural documentation for GIS workflows.

Project Management: Process Optimization, Systems **Analysis**, Quality Assurance.

Web GIS Development: Experience Builder, Web AppBuilder, GeoEvent Server

Regulatory Compliance: Knowledge of federal, state, and local laws related to water utility operations.

Soft skills: decision-making, independent work, collaboration, ability to communicate (oral and written), leadership, teambuilding, teamwork, problem solving, flexibility, critical thinking, listening skills, readiness to learn quickly and adapt to new systems, and time management.

PRESENTATIONS

- Paper Presentation, “Exploring Intra-Annual Variations of Urban Effects on Precipitation in the Atlanta, GA, USA Region,” 79th Southeastern Division of the American Association of Geographers (SEDAAG) Meeting (Greenville, South Carolina. November 23-25th, 2024).
- Paper Presentation, “Exploring Intra-Annual Variations of Urban Effects on Precipitation in the Atlanta, GA, USA Region,” Graduate Climate Conference 2024 (Seattle, Washington. November 1 – 3rd, 2024).
- Paper Presentation, “Exploring Intra-Annual Variations of Urban Effects on Precipitation in the Atlanta, GA, USA Region,” 2024 North American Cartographic **Information** Society's Annual Meeting (Tacoma, Washington. October 16–19th, 2024).

- Paper Presentation, “Cancer Mortality and Demographic Patterns in the United States,” Georgia Geospatial Association (Virtual, September 2024 Lunch and Learn honoring winners of the 2024 map competition).
- Poster Presentation, “Navigating the Flood Frontier: A Geospatial Odyssey in Ondo, Nigeria,” Citizens' Climate Lobby (CCL) Southeast Conference (Greenville, South Carolina. April 6 - 7th, 2024).
- Conference Presentation, “Exploring the OpenStreetMap Contribution Decline in the United States and Beyond,” State of the Map US (Richmond, Virginia. June 8 - 11th, 2023).
- Lightning Talk, “A multigenerational approach to disaster monitoring and mapping,” GISFest (Virtual, November 12th, 2022).
- Abstract presentation, “Mapping of Flood Risk Zones Using Multi-criteria Approach and Radar: A Case Study of Ala and Akure-Ofosu Forest Reserves” North American Cartographic Information Society's 42nd Annual Meeting.
- Public presentation, “Soil Productivity Index Workshop and the Public Presentation of the Soil Productivity Index Rating Map of Kebbi State, Nigeria,” FEED THE FUTURE, IFPRI, USAID & Michigan State University for Nigeria Agricultural Policy Project (Kebbi, Nigeria. March 9th, 2022).

CERTIFICATIONS

-
- | | |
|---|------|
| • Professional Certificate in Geographic Information Systems (GISP), Georgia State University | 2024 |
| • Deep Learning, Meta | 2022 |

PROFESSIONAL DEVELOPMENT

-
- **FME Training:** Completed advanced training in FME for data integration and transformation.
 - **ArcGIS Pro Workshop:** Attended workshops on advanced spatial analysis and geoprocessing techniques.

KEY ACHIEVEMENTS

-
- Automated data migration workflows using FME, reducing processing time by 30%.
 - Improved data accuracy by 45% through the implementation of quality control measures and automated workflows.
 - Developed Python scripts to streamline data collection and transformation, reducing research time by 70%.
