| • Windows | • Attention to Detail |
| • Microsoft Word Excel | • Time Management |
| • Technical Writing | • Project Management |
| • Action Oriented | • Security Life Cycle |

PROFESSIONAL EXPERIENCE

HKG IT Consulting – Detroit, MI
Cyber **Security** Analyst

July 2017 - Present

- Implemented **system security assessment** based on FISMA, NIST Cybersecurity Framework, and NIST information **security** standards and guidance, including FIPS 199, FIPS 200, NIST SP 800-53, and NIST SP 800-53A.
- Prepared **Security Assessment** Reports (SAR) to provide stakeholders with information regarding their systems' **security** posture according to NIST SP 800-53 Rev4 controls.
- Conducted Self-Annual **Assessment** (NIST SP 800-53a)
- Monitored and responded to **security** events generated from different **data** sources including **intrusion detection** systems.
- Knowledgeable in **computer** theory and understanding the **IT** standards including the OSI model, as well as the methods for exploiting those standards.
- Adequate knowledge of COSO, COBIT, SSAE 16, ISO27001 **PCI-DSS** and HIPAA frameworks.
- Conducted kickoff meetings to collect information about the **system** and categorize systems based on NIST SP 800-60.
- Utilized NIST SP 800-60 and FIPS 199 to classify the systems and categorize their C.I.A.
- Performed **security** assessments by reviewing **System Security** Plans (SSP) to create Kick-Off Presentation Slides, **Security Assessment** Plans (SAP), and **Security Control Assessment** (SCA) matrices.

- Conducted **vulnerability assessment** ensuring risks were assessed and appropriate measures were taken to mitigate them.
- Developed **risk assessment** reports that identified threats and vulnerabilities which also evaluated the likelihood vulnerabilities can be exploited, assessed their impacts and identified the **risk** level.
- Developed and updated **System Security Plan (SSP)**, **Security Assessment** and Authorization (SA&A) artifacts such as FIPS 199, **Security** Tests and Evaluations (ST&E), **Risk** Assessments (RAs), Threshold **Analysis** (PTA), Privacy Impact **Analysis** (PIAs), E-Authentication, Contingency Plan, Plan of Action and Milestones (POA&Ms).

Overlake Hospital- Scrum Master
Bellevue, WA

August 2016 - July 2017

- Facilitate all scrum events (sprint planning, daily scrum, sprint review, and retrospective) at regular cadence, building consensus, promoting ownership and full engagement.
- Proactive coaching to the team with recommendations for continuous improvement of processes to optimize team productivity.
- Align work with Business Analyst, Project Manager and teams to help gather both business and functional requirements needed to write user stories and acceptance criteria.
- Improves team productivity by improving software development **practices**/processes within managed Scrum Teams and across the organization
- Ensure teams have clearly defined and established Definition of Ready (DOR) and Definition of Done (DOD)
- Expertise in lean agile methods, performed training and mentorship to agile teams with coaching in technical and business aspects.
- Using team retrospectives to promote a culture of continuous improvement by ensuring that all input and results are collected in the backlog and enforced.
- Ensuring progress visibility and **monitoring** by using a **system** tool to monitor key metrics such as sprint burndown, release burn-up velocity report, and distributing progress to key stakeholders.
- Contribute to successful team building by coaching on the art of writing user stories, release preparation using the pace of the team, and planning and sizing techniques.

Covenant Hospital – Saginaw, MI
Scrum Master/Release Manager

March 2016 - August 2016

- Motivated cross-functional team coordination as part of my responsibility to align and gather feedback for process improvement.
- Removed impediments for the scrum team with strategic methods and leadership
- Led and facilitated the daily stand-ups, sprint planning, retrospectives, and backlog refinement
- Supported the product owner in managing customer expectations for project deliverables and managed internal stakeholder **communication** with the scrum teams
- Scrum Teams and organizations are guided and coached on how to apply agile values and principles, as well as the Scrum Framework for customer satisfaction.
- Promoted empowerment of the team and encouraged a sustainable pace with high levels of quality for the team which improved employee retention.
- Coached the development team and Product Owner to enhance **practices**, productivity and self-organization by encouraging a strong culture of innovation within the teams to hold to standard and delivery commitment.
- Assisted teams with internal and external contact, as well as enhancing transparency, improved accountability and information dissemination.
