SUMMARY:

- Extensive knowledge of, and/or a proven record of success in a role, managing project engagements related to Data Center Converged **Infrastructure**, Servers, Virtualization, Storage, Networking and Application Layer Solutions with experience of how an IT organization implements technology to enable the business.
- Extensive knowledge of Entra ID, Intune, Active Directory, Virtualization, Storage and Project **Management**.
- Experienced in designing **cloud** environment worked with hosting vendors including **Azure (Microsoft)**.
- Migrate On-Premises Server from Data Center onto **Microsoft Azure Cloud**. Universal Print Connectors.
- Installed and Configure CMG connector for hybrid devices, co-manage and AAD devices to be able to manage while maintaining our hybrid environment.
- Mentored associates and consultants and served as escalation point for technical related project issues.
- Proactively find and manage issues with service performance, develop and drive the delivery of service improvement plans and continuous improvement activities on the product and **services**.
- Lead discussion and took part in the planning, development and delivery of internal projects including **functional** change and platform refresh.
- Take a lead role in creation, **management**, and implementation of Change per relevant Change Control procedures.
- Facilitate effective communications with all key stakeholders associated with Server, Desktop and Print **Services**.
- Produce robust **documentation** and presentation material for evaluating current environment and continue to produce road map for evolving to keeping up on latest platform.
- Supplied and put together **training** documents for all in-house employees and can serve as knowledge base for resolving issues or simply for reference.
- Knowledge of implementing and designing **Azure services**, conditional access, **windows** device **management**, along with mobile devices. Enterprise applications, RBAC, Resource Groups, Host Pools, and **Azure** VDI's. Compliance and Auto Enrollment.
- Involved in providing critical solutions for the Company to be able to transition to **Cloud** file share version called Egnyte.
- Familiar and performed **migration**, design, and implementation larger enterprise environment.
- Widely traveled during **migration** projects to Brazil, Venezuela, London, France, Spain, and Bahamas.

PROFESSIONAL EXPERIENCE:

Shorenstein Realty **Services** LP, San Francisco CA
Infrastructure Azure Engineer and Project Manager

August 2018 - Present

- Manage – Implement – Deployment - Configure of **Azure services**, Host Pools, Storage Groups, Enterprise Applications Remote Applications and Desktops. Resource Groups. MFA, Entra Connect. Stage-roll-out for retiring AD FS federated.
- Migrated Ping One SSO into **Azure** SAML.
- Managed – Implement Intune Devices along with configuring conditional access. **Configuration** profiles, Intune enrollment and auto pilot.
- Migrated CCH Work Paper application running in our Citrix environment and moved onto **Azure** VDI using multi-session clients and used remote applications for publishing applications and all internal applications onto **Azure**.
- Implemented UPC Universal Printing Connector for **Azure** ONLY joined devices and native UPC using printer **configuration** without on-prem print server required for printing from **Azure** joined devices.
- Configured and deployed CMG connector for our Hybrid devices, to be able to use resources, compliance settings and application deployment on both environments, AAD or AD on prem. In preparation for evaluating the workloads for **windows** device **management**. **Software** deployment and compliance moving onto **Azure** from SCCM on prem.
- **Security** Hardening for all physical and virtual servers using Crowd Strike, **Windows** Defender and SCCM Endpoint protection **software**. Frontline Digital Defense for phishing emails.
Assisted retiring our Phoenix data Centers onto Entra ID/ Intune.
- Implemented **Security** Baselines for **Windows** 10 devices to adhere to RIA compliance for our firm.
- Ensure prompt user notification of maintenance requirements and effects on system availability.
- Participate in various teams, meeting all deliverables and supplying high quality contributions.

- Operate and manage effectively within the IT Change Management and Release Management process.
- Perform network, server, and infrastructure application administration according to department standards.
- Performed SCCM Current Branch Upgrade from SCCM 2017 to SCCM 2023.
- Project Managed and rolled out Citrix 7.15 LTSR cu8 and produced a migration plan.
- Project plan and implemented our CCH Work Paper Manager to version 2021.
- Upgraded our Windows 2012 Forest and Domain to Windows 2019. DNS, Active Directory, WINS and DHCP servers. Upgraded all domain controllers from Windows 2012 to Windows 2019.
- Migrated AD FS on prem from Windows 2012 farm to Windows 2019 farm base.
- Responsible patch management for all Windows Devices.
- Mentoring and documenting process all the project lead and implemented.

SEPHORA, San Francisco, CA

July 2017 to November 2017

Senior Systems Engineer (Consultant)

- Worked on replacing DirSync server with Azure AD Connect in preparation for Azure Cloud AD 2012 migration in future.
- Installed and configured SCCM 2012 and 2007 VM's in the lab to perform proof of concept for migration of their retail environment 2007 POS systems to SCCM 2012. To integrate the Operations Manager as well in future 2018.
- Created GPO for deploying patch management, policies, standard and best practices.
- Aided with troubleshooting all client connectivity issues, deployment latencies and all server SCCM core issues.
- Conducted Proof of Concept for latest Azure cloud-service. Utilizing their IaaS offerings.

MEDIDATA SOLUTIONS, San Francisco, CA

September 2016 to June 2017

Senior Systems Lead Engineer (Consultant)

- Provided third level support for all issues dealing with outages occurring with data analytics and web transactional data.
- Supported all hosted applications in AWS and Azure, collaborated with Engineers on migration of high visibility applications to the cloud.
- Performed upgrade on SolarWinds environment.
- Worked with third party vendors such as central labs to ensure that all back-end clinical data changes follow the best clinical data management practices.

- Configured Medidata **software** products to meet customer specific requirements. Supplying feedback and insight on designing and scaling of **SaaS** and **cloud**-based environments and tools.
- Supplied strategic vision for choice, implementation, and support of technology solutions.
- Utilized various **monitoring** tools such as Nagios, New Relic, **Splunk** and SolarWinds for primary tool.

FEDERAL HOME LOAN BANK OF SAN FRANCISCO

March 2016 to

September 2016

Infrastructure Architect (Consultant)

- Supply service design and **management** including defining and keeping **infrastructure** administrative and operations **policies** (Runbooks, support procedures, etc.) and IT operations **management** tools **architecture**, **engineering**, and **optimization**.
- Design, test, implement and manage IT service continuity.
- Facilitate the development of patching and version **management policies** to allow the Operations team to perform monthly **security** patch and version **management** on all IT infrastructures consist of (Active Directory 2012, VMware 5.5, SCCM 2012 and (EMC and NetApp Storage).
- Develop strategies and direction for the solutions using current and emerging technologies.
- Translate business requirements into process designs.
- Plan and recommend hardware, system **management software** and **architecture**.
- Participate in the establishment of department goals and for implementing procedures and performance standards to achieve these goals.
