Summary

- Experienced Laboratory Technician with a demonstrated history of working in the higher education industry, skilled in Communication, French, English, Java, MySQL, HTML, CSS, JavaScript, Python, and more.
- Strong research professional with a Bachelor's Degree focused in Computer Science from Kennesaw State University.
- Successful at using programming technologies such as Java, MySQL and .Net to develop code.
- Disciplined and reliable professional with excellent critical thinking skills and problem-solving abilities.
- History of developing apps, improving programs, and checking code.

Experience

Oracle SQL/.NET Developer

State of Georgia

Oct 2022 - Present - Atlanta, Georgia

"The mission of the Department of Revenue is to administer the tax laws of the State of Georgia fairly and efficiently to promote public confidence and compliance, while providing excellent customer service. The Georgia Department of Revenue, created in 1938, is the primary tax-collecting agency."

Achievements/Tasks:

- Design, code, test, modify, install, and debug software applications that integrate with OpenText Intelligent Capture (Captiva) and related applications.
- Research and analyze system problems, create solutions, and develop program documentation.
- Translate business requirements into development tasks for secure and maintainable code.
- Communicate to business users the required information on business inquiries.
- Modify and create PL/SQL and SQL queries in both Oracle and SQL server databases.
- Perform daily job functions to ensure complete processing of taxpayer documents including the mitigation of processing errors.
- Investigate and develop skills in new technologies.

SQL/.NET Developer

Summitworks Technologies

Mar 2022 - Sep 2022 (7 months) - South Plainfield, New Jersey

"SummitWorks provides a full range of Custom Software development and Information Technology Support Services, Product delivery & implementation, Knowledge Process Outsourcing (KPO), and Off-shore Staffing and placement solutions. We are here to provide the knowledge and expertise in the SharePoint, .NET, Java, iOS, Android development and Analytical and Reporting Services arena."

Achievements/Tasks:

- Optimized RDBMS by normalizing tables, indexing tables, using views, foreign keys, joins, triggers, and stored procedures and secured Databases by using Prepared Statements.
- Used Entity Framework to map model classes in C# to MySQL Tables.

- Created Models in C# using concepts of OOP: Encapsulation, Inheritance, abstraction, and Polymorphism.
- Involved in all phases of the **Software Development LifeCycle** process (SDLC): Gathering Needs, Design, Development, Testing, Documentation, and Deployment.

CCSE Laboratory Technician

Kennesaw State University - (CCSE) College of Computing and **Software Engineering**

Sep 2021 - Dec 2021 (4 months) - Marietta, Georgia

"Kennesaw State University's College of Computing and **Software Engineering** (CCSE) is one of the best in the country, with each of its degree programs being recognized nationally. We offer both undergraduate and graduate degrees in **Computer Science**, **Information Technology**, **Software Engineering**, **Computer Game Design and Development**, and **Data Science and Analytics**. We are accredited by the CAC Accreditation Commission of ABET in **Computer Science**, **Information Technology** and **Software Engineering** and Game Development."

Achievements/Tasks:

- The Lead Lab Technician works under the **supervision** of the CCSE IT Lab Manager and the UITs as primary support for the College of Computing and **Software Engineering**.
- I provided analysis, design, development, testing, and deployment of technology equipment in CCSE lab classrooms. I developed and maintained all **systems**, **applications**, security, and network configurations as well as troubleshoot all PC, Mac, and peripheral-related issues within the CCSE labs.
- In addition, I deployed rollouts of new **software applications** and **computer** hardware upgrades.

Software Engineer Intern

Up Cancer

Aug 2021 - Dec 2021 (5 months) - Moo

Team Up Cancer is an organization led and founded by Rico Dence, a Chronic Myeloid Leukemia survivor, whose goal is to advance cancer treatments available to patients by changing government legislation.

Achievements/Tasks:

- As a **Software** Engineer Intern, I contributed to the creation of a Customer Relationship **Management** (CRM) that will help educate, engage, and empower those affected by young adult cancer. This is done by planning, developing, and writing code for artificial intelligence and **computer programming**.
- I wrote clear and clean code for use in projects.
- I created new and innovative integrated content **management systems** using the Java **programming** language.

SQL Server Developer

PKFokam Institute of Excellence

Jan 2020 - Dec 2020 (1 year)

For its pupils, the PKFokam Institute of Excellence has created flexible, useful, and well-suited curricula.

Achievements/Tasks:

- Improved in-application **SQL** statements' stability, reliability, and performance by 30% while creating databases that were user-centered.

- Optimized **RDBMS** with the use of views, foreign keys, joins, triggers, and stored procedures; also, secured databases using prepared statements.
- Acquired **business** expertise for describing the models to application teams or the company and fixing model/data-related issues.
- Made use of Java™ Database Connectivity (JDBC) to allow my Java programs to access database **management systems**.

SQL Developer

Afriland First Bank

Jan 2019 - Dec 2019 (1 year)

Afriland First Bank is a full-service bank in Cameroon.

Achievements/Tasks:

- In a team with over 3 **SQL** & Java Developers, we designed four or more on-site databases while retaining a group of 25 databases, which led to a 10% reduction in production expenses and an increase in departmental productivity overall.
- Came up with improvements to the database layer in collaboration with the application **developer** and strive to implement them in the subsequent releases.
- Developed database and application standards and design to help ensure program performance, scalability, and maintainability.
- I used Java OOP ideas to specify how to organize my Java program effectively, which improved the readability and reuse of my code.

SQL Database Developer

United Express

Jan 2018 - Dec 2018 (1 year)

United Express was established in 2017 with the goal of creating a novel interurban transportation service in Cameroon.

Achievements/Tasks:

- Worked on creating conceptual, logical, and physical data model designs with the right structure and relationships at the early phases of the **software lifecycle** to profile data and get the best performance.
- Performed database defragmentation and optimized all **SQL** queries, which resulted in a 15% increase in database performance and loading time.
- Created and managed sophisticated views, functions, and stored procedures for relational databases.
- Designed completely automated client **administration systems** using Java to effectively maintain client accounts.

Education

Kennesaw State University

Bachelor's Degree (Complete), **Computer Science**

Jan 2021 - Dec 2021

PKFokam Institute of Excellence

Bachelor's Degree (Partial), **Computer Science**

Aug 2017 - Dec 2020

Skills

Scene Builder • Visual Basics • Analytical Skills • Data Structures • Databases • Software
Development • .NET Framework • ASP.NET • JSON Web Token (JWT) • Microsoft SQL Server
