SUMMARY

Andrew is a skilled IT leader with 22+ years of experience in large-scale enterprise transformation initiatives in commercial and government organizations; specializing in enterprise architecture and information security and excels at aligning business, cybersecurity, and IT objectives through effective communication and innovation. He articulates a clear vision using a positive, persuasive, and motivative communication style that inspires. With equal conviction, he embraces idiosyncratic perspectives, encourages intellectual curiosity, seeks collaboration, questions assumptions, and welcomes change. Concordantly, he fosters a diverse and inclusive culture that promotes an environment of learning, respect, and dignity.

PROFESSIONAL EXPERIENCE

BUSINESS INFORMATION SECURITY OFFICER, Cybersecurity - Digital Channels & Innovation
TRUIST / March 2022 - Present

As primary cybersecurity advisor to the BREW web and mobile core banking portfolio, a key responsibility of my role is to facilitate business-aligned cybersecurity activities with a focus on enabling the business's strategy and strategic capabilities in a secure manner through collaboration with the Business Information Security Manager, cybersecurity disciplines, risk teams, and the stakeholders. In addition, my role supports the delivery of major security capabilities across the Divisional CIO products, advise on and remediate cyber risk for the business, and ensure business processes and procedures are compliant with Truist's information security policies.

- Aligns business objectives with the enterprise's cyber risk posture in partnership with Business Information Security Manager.
- Provides advisory support and cybersecurity education/training to business units and cybersecurity teams.
- Participates as contributing member to Truist Development Lifecycle Controls board ensuring cybersecurity requirements appropriation and alignment.
- Participates as contributing member to ongoing Cybersecurity Maturity Assessment initiative focused on enterprise cloud adoption.
- Identifies security requirements, provides problem resolutions, and influences/supports Information Security Policies.
- Measures and monitors progress at defined points in process to ensure timely and secure assessment deliverables.
- Creates and reviews security data analytics insights and metrics, develops key risk/performance indicators, and prepares reports/presentations for senior/executive audiences.
- Develops deep understanding of the business to have coherent cybersecurity discussions.

PRINCIPAL CONSULTANT, US Technology & Cybersecurity
CAPCO / July 2021 - January 2022

Engagement and delivery lead responsible for developing risk management strategies for capital markets clients with a compliance focus. Collaborated with clients and teammates to define security strategy and expand company's cybersecurity practice.

- Assessed client information security program organizational alignment, cloud adoption readiness, and governance.
- Assessed client information security program maturity against established frameworks.
- Developed tailored methodologies for qualitative analysis and synthesis of insights informing roadmaps, change control, and development lifecycle inclusive of security requirements and considerations.
- Conducted structured executive interviews and briefing/debriefing.
- Served as face of the organization to clients and mentored protégés providing guidance, direction, and performance reviews.

ASSISTANT DIRECTOR, Security Consulting
EY / Apr 2018 - Dec 2020

ANDREW NELSON

SENIOR TECHNOLOGY LEADER

Provided end-to-end security consulting services including architecture/design reviews, threat modeling, security risk/compliance assessments, risk treatment planning, knowledge sharing, facilitation of firm cloud platform educational initiatives, and emerging technology research. Lead security consultant for strategic global and multi-regional third-party cloud enablement.

- Responsible for security review of new enterprise cloud platforms, integrations, core services, and global platform applications.
- Conducted reviews of architectural designs, business requirements, and analysis of security posture.
- Conducted reviews to identify and prioritize security requirements for internal and client-facing platforms.
- Responsible for realization and prioritization of opportunities to align cross-functional information security team objectives with business strategy through program/process assessment.
- Performed risk assessments and executive briefing/debriefings.
- Provided oversight and drive of security, data privacy and risk remediation efforts for multiple programs with shifting priorities.
- Integrated security processes into the Agile development methodology and development lifecycle across global portfolios and service lines.

ANDREW NELSON

SENIOR TECHNOLOGY LEADER

ASSISTANT DIRECTOR, Enterprise Architecture
EY / May 2016 - Apr 2018

Provided strategic consulting support in global cloud enablement initiative, including business planning and IT strategy development across global portfolios. Responsible for security review of new enterprise cloud platform integrations, core services, and platform applications.

- Co-developed and implemented cloud technology strategy, future state architecture, roadmaps, reference architecture, and program execution for IT Cloud Services enablement.
- Conceptualized and disseminated comprehensive roadmaps and target architectures for global cloud enablement with a focus identity and Active Directory extension and IAM support model.
- Developed regional and global cloud platform architecture models, designs, standards, and on-premises AD cloud extension.
- Spearheaded global bulk application cloud candidacy assessment initiatives enabling prioritization of application dispositions.
- Led on-premises cloud extension initiative enabling legacy application migration capability.
- Served as an integral member of the cloud design authority and the EA Core Azure team.
- Recognized as a primary resource to approve architectural designs for the enterprise cloud infrastructure review board.

EXECUTIVE PRACTICE ADVISOR, Infrastructure Architecture
CARES / Oct 2014 - May 2016

Served as a vital member of the leadership team charged with establishing a new organization/program spanning multiple state agencies with the embodied mandate to modernize, consolidate, and broaden the accessibility of subsidized critical support program eligibility and enrollment services for individuals and families in need. Serving as Lead Infrastructure Architect and an active member of the executive leadership team, shared accountability \$100M project budget, reporting to executive oversight committee. Responsible for security review of new enterprise cloud platform integrations, core services, and platform applications.

- Instrumental in establishing/growing the organization from nine to 107 employees within 12 months.
- Directed four cross-functional teams providing support, strategic guidance, and supervision of overseeing managers.
- Developed/implemented strategies to establish long-term objectives supporting sustainable organizational operations.
- Aligned organizational objectives with extended team backlog and timelines.
- Authored Infrastructure Architecture plan aligned with organizational key initiatives.
- Authored requirements in compliance with NIST 800-53 rev 4, IRS 1075, and CMS MARS-E 2.0.
- Developed Azure Gov cloud infrastructure architecture designs/model.

WINDOWS SOLUTION ARCHITECT
FISERV / Dec 2013 - Oct 2014

Responsible for end-to-end delivery of infrastructure solutions to external customers. Worked with Development, Product, and other Infrastructure Services teams. Delivery of infrastructure solutions included a variety of skills including infrastructure architecture; hands-on build-out and configuration of the infrastructure, as well as project technical lead ensuring projects are delivered within scope and on-time.

- Authored Infrastructure Architecture plan aligned with organizational key initiatives.
- Responsible for end-to-end delivery of infrastructure solutions to external customers conformant to architectural standards.
- Infrastructure architecture delivery lead for varying engagements with shifting requirements; hands-on build-out and configuration of infrastructure as well as projects technical lead.
- Partnered with and aligned cross-functional teams to design and implement highly available .NET, IIS, and related Microsoft technologies.
- PowerShell development of automation / integration solutions.
- Technical SME to project teams regarding Active Directory, IIS, System Center Operations Manager (SCOM), System Center Configuration Manager (SCCM), SQL Server, Microsoft Cluster Server, SQL Server, and Threat Management Gateway (TMG).
- Authored technical documentation such as, solution design and architectural documents, infrastructure architecture designs, and solution decomposition documents.

GLOBAL ACTIVE DIRECTORY ARCHITECT
NOVELIS / Apr 2013 - Sep 2013

Tasked with architecting a new single-forest/single-domain global Active Directory environment for merger organizations, both existing and future. The defined key success indicators were principled under the overall goal to align the acquisition organizational structures and entities with the enterprise, accounting for all requirements of and in conformance with enterprise requirements.

- Developed standards derived from requirements such as, AD Site and OU structure, delegated authority model, Group Policy deployment model, AD Sites and Subnets, DHCP/DNS, naming conventions, and AD schema extensions for operational support.
- Developed and implemented automation components for process and assurance requirements; leveraged, PowerShell, Group Policy item-level targeting, delegated authority, and reporting.

ANDREW NELSON

SENIOR TECHNOLOGY LEADER

- Organized and identified contributors, stakeholders, and led composition of **project** plan for executive stakeholders.
- Led and organized **implementation** of new Active Directory environment and critical subsequent transitions and migrations to develop repeatable migration and transition process.
- Facilitated educational and **training** initiatives for technical domain, regional, and site admin roles and responsibilities.
