

Arindam Banerjee

TOGAF and IBM L2 Certified Data Architect

Senior Architect with 20 years of strong experience in Data Architecture, Consulting, Pre-sales, Data Warehousing, Data Modelling, Building Information Strategy and Transformation, and Managing large teams in Global onsite-offshore delivery model in Banking and Financial domain. Proven experience in Cloud migration, Data Vault and JSON modelling. Skilled in scoping Industry Canonical Models and Guidewire Policy Center.

EXPERIENCE

Lead Architect & Data modeler, Truist Bank, Atlanta, US

IBM · August 2022 - Present

Created a data vault solution using Erwin for authoritative master data and led a team of data engineers to implement it using Informatica BDM and IICS.

Highlights:

- Created and managed a data vault using data vault 2.0 design principles.
- Created and maintained Application design document with necessary design decisions, HLD, LLD, DFD and other information.
- led 22 data engineers to implement the data vault and consumption layer.

Lead Architect & Data Modeler, USAA, San Antonio, US

IBM · Oct 2020 - July 2022

Created the data migration strategy from on-prem to AWS cloud for Property and Casualty (P&C) line of business and scoped legacy attributes to Guidewire Policy Center Native attributes

Highlights:

- Data Migration: Delivered 5 data layers to build a data pipeline from AWS S3 to the presentation layer to deliver data lake, integration and reporting capabilities.
- Guidewire: Integrated the external Rating agency (Earnix) in Guidewire with Re-Rating and Bulk-Rating business scenarios
- Data modeling: Modeled integration (3NF) and analytical layers

Lead Data Architect, Data Modeler, Northern Trust, UK

IBM · Sept 2018 - Sept 2020

Designed and built the normalized JSON model and analytical model to cater to event-driven real time data warehouse supported by a team of data modelers.

Highlights:

- Used Marklogic to store domain-driven event JSON's delivered via API and model them using Hackolade
- Identified and validated dimensional constructs using a bus-matrix technique
- Created Python based automation tool to parse IDA generated LDMs

Pre-Sales BDW SME, BIDV Bank, Vietnam

IBM · May 2018 - Aug 2018

Assessed the current state BIDV-MIS solution for the BDW data model & storage to determine the gaps and proposed the future state highlighting the technical capabilities required to achieve the 2025-2030 vision.

Provided guidance on creating reports for BASEL compliance

AREAS OF EXPERTISE

Information Architecture

Banking and Insurance Models

ETL Data Modeling ELT

Data Quality GDPR, PD

Stakeholder Management

Information Profiling JSON

Guidewire AWS Data Vault 2.0

EDUCATION

Bachelor of Technology

Major: Computer Science and Technology

Open Group Certified

Master Solution Architect

INDUSTRY MODELS

IBM Banking Data Model (BDW)

IBM Insurance Information Model (IIW)

Teradata Financial Services Logical Data Model (FSLDM)

FUNCTIONAL

Retail and Corporate Banking

Property and Casualty (P&C) Insurance

Trading Agency (TA)

Islamic (Takaful) Insurance

TECHNICAL

ERWIN Studio

Infosphere Data Architect

IBM Data Stage

IBM Infosphere Information Analyzer

DB2, Teradata, Oracle

Snowflake, Hackolade

Python Pandas, NumPy

Node Js

Marklogic, MongoDB

Technical **Delivery** Manager, Clydesdale Bank, UK

IBM India Pvt. Ltd. · Nov 2017 - April 2018

Led the highly escalated **project** to successful closure delivering high **quality** artefacts with agreed timelines using **stakeholder management** techniques and architectural documents

Highlights:

- Analyse, understand and document the gaps in the **project**
- Appraise the client **team** on the daily status
- Provide guidance to the offshore and onsite **team** and set realistic expectations
- Create and maintain **architecture** design **decision** document
- Led ETL **team** to create LLD, component level estimation which previously was missing.
- Introduced a global estimation model to avoid conflict.

Solution Architect, Great Eastern Life (GEL), Malaysia

IBM India Pvt. Ltd. · Aug 2016 - Oct 2017

Delivered overall **solution** design document and implemented Insurance **Information** Warehouse (IIW) to consolidate 10 source **systems** including Islamic (Takaful) banking and led the ETL **team** to create reusable templated jobs for efficiency gains

Highlights:

- Created overall **solution** design document for the **project** covering application, **information**, **infrastructure** and **security architecture**
- Coordinated with multiple technical teams across BU to produce NFR, architectural decisions and scope identification and verification documents
- Represented IBM in the **architecture governance** board presenting and defending the **solution** artefacts
- Scoped and modelled the IIW to fit the client's purpose for both EDW and dimensional layer

Solution Architect, KEMET Electronics Corp, US

IBM India Pvt. Ltd. · Nov 2015 - Aug 2016

Created IT roadmap and **solution** blueprint for KEMET's BI journey to identify priority application **transformation** and reduce IT cost. This **engagement** started from pre-sales to successful **delivery** of a **PoC** applying the directions provided in the **solution** blueprint

Highlights:

- Led pre-sales **team** to present the IT vision to CTO, explaining different steps like CMM **analysis**, scope and context **analysis** to come up with a customized roadmap
- Developed **solution** blueprint document identifying processes, policies, **best practices** and guiding principles for each layer
- Successfully delivered a **PoC project** incorporating the **solution** blueprint to showcase cost reduction and efficiency increase

EDW Advisory **Architect**, Siam Commercial Bank, Thailand

IBM India Pvt. Ltd. · Aug 2015 - Nov 2015

Advised on the strategy to incorporate loan origination and processing system into Teradata FSLDM as part of SCB's effort to integrate multiple **systems** into it's existing EDW

Information Architect, The Global Fund, Geneva, Switzerland

IBM India Pvt. Ltd. · Apr 2014 - July 2015

Delivered Master **Data Management** (MDM) strategy and roadmap to obtain a golden copy of the master **data** from various source **systems**. Created a **data** model to ingest master **data** with audit capability

Highlights:

- Gather business requirements from business and translate them into a resilient **data** model
- Create value and vision driver on MDM **engagement**
- Align MDM **architecture** with IBM BI reference **architecture** and assess gaps
- Hold workshops with Business **analysis** to understand current IT and business challenges
- Arrange interview sessions with **Senior management** and IT operations to understand capability maturity state
- Formulate CMM as-is level and target level for different capability
- Create policies and **best practices** around **information governance**
- Formulate BI blueprint and roadmap to implement MDM **solution**.
- Identify and advise proper tooling options comparing different market leaders
- Create short-term and long-term milestones measured by appropriate KPI to arrive at the success criteria

Lead **Information Architect**, Bank of America Meryl Lynch (BAML), UK

IBM India Pvt. Ltd. · Jan 2013 - Mar 2014

Upgraded the legacy NOMAD system to scoped BDW incorporating customer, payments, demand deposits and GL balance business areas. Designed ETL programs to integrate the above business areas to provide reporting solutions to the client

Highlights:

- Created **Data** Warehouse vision and strategy, IT roadmap, Target Operating Model (TOM) and **solution architecture**
- Held weekly architectural design meetings with the IT teams and business partners to come up with mutually agreeable design decisions
- Leveraged Agreement, Location, Product, Classification, Event, IP, Condition, RI subject area from BDW model.
- Ensured that the **data** model is created according to the design principles.
- Created mapping document from physical **data** model for developers

Information Architect, Lloyds Banking Group (LBG), UK

IBM India Pvt. Ltd. · Apr 2012 - Dec 2012

Created Skeletal Outline **Solution** Document (SOSD) to transition from bespoke, BU-driven IT **architecture** to uniform IBM BI reference **architecture**. Successfully migrated 2 source **systems** into target **architecture**

Highlights:

- Created a capability roadmap by organizing a series of client-focused workshops.
- Delivered maturity models to show the as-is and future state.
- Provided impact **analysis** and advising on **best-fit** solutions.
- Introduced canonical modelling structures to reduce rework.
- Incorporated reusable design patterns to reduce the time taken to industrialize feeds.
- Formulated patterns for **Data** profiling and **quality** analytics.
- Produced logical **data** models for different source feeds.
- Mapped entities and attributes to TerraData FSLDM.

Other Technical Roles such as DataStage Developer and Technical **Architect** in India and US

IBM India Pvt. Ltd. · Apr 2007 - Mar 2012

SSIS Developer, Accenture Services, Hyderabad, From Apr 2004 - Mar 2007

Arindam Banerjee

- Atlanta, GA, US
