SUMMARY

Dynamic, senior IT programmer/analyst with astute problem-solving skills and proven expertise in production support which minimizes downtime. Highly experienced with demonstrated proficiency in designing and coding **mainframe** applications. Technical Lead with training and mentoring strengths, contributing to turnover reduction and enhanced skill acquisition and retention. Impacts organizations through simplified processes which reduce failures, minimize downtime, improve availability, and facilitate system maintenance and enhancements.

Areas of Expertise

Db2 Native SQL Stored Procedures	COBOL	Db2
CICS	MQ Series	JCL , Clists, ISPF, SPUFI, Utilities
IMS DB/DC	VSAM (IDCAMS)	Production Support
Xpediter	Debug	FileAid
File Manager	DFSORT	Batch Pipes

PROFESSIONAL EXPERIENCE

TCS, New Jersey

07/2024 — Present

Mainframe Developer

- Provided production support for a major international bank's Private Banking area.

INFOSYS Ltd., New Jersey

07/2021 — 03/2024

Technical Lead

Supported two of Infosys' top clients – both are international investment banks.

- Converted VSAM files to RLS VSAM in the Coupling Facility in preparation for High Availability (HA).
- Analyzed and remediated programs, removing code that caused **CICS** region affinities, also for HA.
- Helped migrate MQ Queues to Queue Sharing Groups in preparation for HA.
- Tabulated the use of a heavily used key field in preparation for expanding the size of the field, effecting 100s of programs.
- Documented the data flow of the weekend batch.
- Wrote a **Db2 stored** procedure to calculate the business days between any two dates.

Decision Research Corporation (DRC), Philadelphia, PA

11/2020 — 04/2021

COBOL Developer

Supported one of DRC's client – a top 10 homeowners insurance company.

- Learned SQL Server by reviewing some existing examples.
- Successfully rolled out additional policy discount options to 4 States by **writing** SQL Scripts.
- Analyzed production problems and wrote SQL scripts to correct the data.
- Identified issues in Micro Focus **COBOL** programs and reported them to management.
- Monitored the nightly batch and reported issues, either resolving these issues or passing the details to the group responsible, depending on the nature of the problem.

ADVANCED PROGRAMMING GROUP (Client: State on New Jersey), Trenton, NJ 09/2018 — 06/2020
Consultant

Worked on a team converting the probation application from legacy **COBOL** to newer technologies.

- Wrote **Db2** Native SQL **Stored Procedures** for the cloud-based probation replacement system. These **Stored procedures** not only retrieved and updated the **mainframe** database for the cloud-based application, but also performed a number of data-related and business rule calculations.
- Conceived of, designed, and wrote 2 **Db2** functions. One to convert **stored** dates, which had been converted from IDMS to D2 and were **stored** in a format not recognizable by **Db2** as a date, to a format recognizable by **Db2**, and one ,to convert the **Db2** date back to the format for storing in the database.
- Analyzed legacy **COBOL/Db2** code for the Probation system, extracting and documenting the business rules buried within the code. This code was machine generated (having been previously converted from IDMS), making the effort more challenging. Taught myself IDMS to be able to also refer to the original programs to speed up the analysis.
- Educated a Tech Lead on MQ capabilities and definition.

JUDGE TECHNICAL SERVICES (Client: JP Morgan Chase), Wilmington, DE 10/2017 — 04/2018
Consultant

As a member of an **Agile** team in the Consumer Card division:

- Automated the process of switching to the stand-in **mainframe** when maintenance was being applied to the primary **mainframe**. Previously this was a lengthy process that involved multiple groups an many manual steps. The change impacted about a hundred programs. The testing was rigorous including end-to-end testing with all the consumer digital platforms (referred to and endpoints).
- Wrote an online **CICS/Db2** program to display a cross-reference between a customer and the actual custom card art image for their card, instead of a generic image, appropriately sized for the device they were using (e.g. phone, tablet, laptop, etc.).

TEKMARK (Client: Bank of America), Jersey City, NJ 04/2016 — 06/2017
Consultant

Hired to assist in the bank's Broker Dealer Separation (BDS) which separates the retail bank from the investment bank as mandated by the SEC.

- Made various changes to **COBOL** programs – both batch and online – as required by the BDS mandate.
- Modified the monthly trades extract using batch pipes and reduced the run time from 10 hours to 2 hours.
- Converted older programs to Cobol5 to keep current with **IBM**'s supported compilers.
- Retired old systems, deleting all parts of the retired jobs from the bank's inventory, thereby reducing cost by eliminating the need to analyze the code for BDS-related changes.
- Made a number of Business-As-Usual (BAU) changes, allowing the core application teams to focus on BDS.

ROKUNIGO LLC, Gloucester City, NJ 07/2015 — 04/2016

Rehabbed two houses in a low-income area of Philadelphia.

- Removed old plaster and lathe from the walls and ceilings and replaced with new sheet rock
- Replaced All electrical outlets with grounded ones. Replaced some of the old wiring inside the walls.
- Replaced the flooring throughout both houses.
- Painted all walls and added new appliances.
- Completely repainted the outside of the houses.

- Brought the houses not only up to code, but up to the more stringent requirements of Section 8. As a result of this effort, these houses are now the nicest ones on the block and are both occupied by low income families.

CAPITAL ONE, Wilmington, DE

07/2013 — 07/2015

Senior Software Engineer (2014-2015)

Softworld (Client: Capital One) (2013-2014)

In-sourced support of the Systematics suite of applications previously performed by FIS.

- Successfully completed training given by FIS on GN (the Systematics 'hub') and XH, (the middle-ware for the bank's branches, its ATMs, and the consumer online banking platform).
- Enhanced GN and XH programs as needed – including applying updates from FIS.
- Provided production support to GN.
- Trained 5 team members in aspects of GN including P.A.R.M.S., the Data Dictionary, and GN-specific file structures.
- Wrote new programs for Agiletic's Escrow system (AW) – a non FIS application running under the Systematics umbrella.
- Supported AW during the migration of escrow accounts from IM (FIS' retail banking application) and ST (FIS' savings time application) to AW over a four month roll-out.

PRIOR EXPERIENCE

KFORCE (Client: JPMorgan Chase), Newark, DE

04/2013 — 06/2013

Mainframe Developer

APEX SYSTEMS INC. (Client: Wells Fargo, formerly Wachovia), Philadelphia, PA **09/2010 — 08/2011**
Technical Architect

TEK SYSTEM, (Client: Bank of America), Hopewell, NJ
Senior programmer

03/2010 — 09/2010

IT-101 INC., (Client: PMA), Blue Bell, PA
Senior Programmer

05/2008 — 12/2009

DATA INC., (Client: Merrill Lynch), Hopewell, NJ
Lead Analyst

03/2007 — 08/2008

MISI (Client: Merck), West Point, PA
Lead Analyst

08/2005 — 03/2007

PSCI (Client: Independence Blue Cross), Philadelphia, PA
Lead Analyst

08/2004 — 07/2005

Business Software Solutions, Mount Laurel, NJ
Technical Lead

09/2003 — 07/2004

M-LOGIC INC., New York, NY
Consultant

12/2002 — 05/2003

Bankers Trust (Acquired by Deutsche Bank), Jersey City, NJ
Team Leader

02/1997 — 07/2002

EDUCATION

HNC, Computer Science earned at the Grimsby School of Technology, Grimsby, England

PROFESSIONAL DEVELOPMENT

Management of Information Systems at Drexel University, Philadelphia (ongoing with a current GPA of 4.0)

PROGRAMMING LANGUAGES

COBOL, **CICS**, IMS DC, **Db2** **Stored Procedures**, WebSphere MQ, **JCL**, TSO Clists, ISPF Dialogs, SQL.

DATABASE SYSTEMS

Db2, IMS DB, MS SQL Server, MS Access, VSAM

Summary

Results-oriented, dynamic, senior IT programmeranalyst whose problem solving skills and proven expertise in production support minimize downtime. Highly experienced with demonstrated proficiency in the design and coding of **mainframe** and clientserver SQL-based applications. Senior team member with training and mentoring strengths contributing to reduction in turnover reduction and enhanced skill acquisition. Impacts organizations through simplified processes, reduced failures, minimized downtime, improved availability, and enhanced functionality. Specialties: **COBOL**, **CICS**, **DB2** and **DB2 Stored Procedures**, WebSphere MQ, IMS DBDC, **JCL**, VSAM, TSO Clists, ISPF Dialogs, QMF, SPUFI, VB 6.0, **DB2**, MS SQL Server 6.5, MS Access.

Work History

Total Work Experience: 15 years

- **Mainframe Developer** TCS
Jul 01, 2024
- **Technical Lead** Infosys Ltd.
Jul 01, 2021
- **Software Developer** Decision Research Corporation
Nov 01, 2020
- **Consultant To The State Of New Jersey Applied Programming Group**
Sep 01, 2018

- **Consultant To JP Morgan Chase Judge Technical Services**
Oct 01, 2017
- **Consultant To Bank Of America Tekmark Global Solutions**
Apr 01, 2016
- **Construction Manager Rokunigo LLC**
Jul 01, 2015
- **Senior Software Engineer Capital One**
Jan 01, 2014
- **Consultant To Capital One (Later Converted To Employee Softworld Inc.**
Jul 01, 2013
- **Consultant To JP Morgan Chase KFORCE**
Apr 01, 2013
- **Systems Engineer/Consultant To Verizon Wireless Softpath Systems LLC**
Apr 01, 2012
- **Technical Architect (Consultant To Wells Fargo) APEX Systems**
Sep 01, 2010

Education

- **Bachelors** | Drexel University
- **Wintringham High School (England)**
