Experience

February 2023 - Present

RaceTrac Atlanta, Ga - Software Developer II

- Led the development of new automation for existing integrations using ASP.NET Core MVC, C#, Workato and SQL Server.
- Architected and implemented a microservices-based architecture for the company's internal end of month auditing platform and PowerBI Reporting.
- Worked with a team of developers to modernize and upgrade the company's legacy .NET applications.
- Reviewed code work for accuracy, functionality, and compliance with best practices.

June 2022 - February 2023

H-Wave Huntington Beach, California - .Net Developer Contractor

- Developed and maintained enterprise-grade software applications using C#.NET Framework, ASP.NET MVC, Windows Forms, and SQL Server
- Built and maintained a document management system to automate the business's massive consumption of TIFF documents to patient records.
- Integrated the document management system with custom built Patient Care Management System (PCMS)
- Worked with a team of engineers to deliver high-quality solutions on time and within budget

August 2021 - May 2022

NCR Atlanta, Ga - .Net Developer Contractor

- Developed new functionality for retailer specific upgrades of base enterprise application in an Agile development environment using .Net Core ecosystem.
- Integrated point of sale system with VeriFone payment terminals for Fipay communications to financial authorizers.
- Utilized Jenkins build tools to deploy and test code enhancements, while tracking modifications to the code base through SVN. and documenting the process in Jira for future consumption.

September 2019 - August 2021

Georgia MLS, Tucker, Ga - .Net Developer

- Built and maintained multiple MVC based web applications using C#, and the .NET Framework, powered by SQL Server backends. Simplified third party vendor integrations implementing Restful API architecture that met business requirements to increase efficiency in data retrieval..
- Showcased the ability to manage multiple concurrent priorities meeting deadlines through timely status updates with stakeholders minimizing scope creep and stabilizing individual velocity.
