

Jay Ahmed

Enterprise Infrastructure Solutions Architect

TOGAF 9 Certified Enterprise Infrastructure Architect/VMware Certified

jay89132@gmail.com

703-635-7950

SUMMARY

TOGAF 9 Certified Enterprise Infrastructure Solutions Architect with 15 years of IT Industry experience as **Solutions Architect & Technical Consultant**. Provided IT solutions and strategies to clients by using strong technical and analytical **skills**. Worked closely with **Project / Account Managers** by getting involved in **full project life cycle**, from High Level Design (**HLD**) to the Physical **Technology** model (**PTM**) using **TOGAF Architecture Framework**. Extensive **Presales experience** in Bid environment.

Over the years I have acquired extensive experience of latest **technologies** to deliver the following functions:

- **Act** as **Enterprise Architect** lead to deliver **Infrastructure** Solutions to support **enterprise** functions.
- Work closely with **Technology Leadership** to define and understand **technology** road maps and standards.
- Understand business requirements and propose **architecture solution** which fulfills those requirements in line with **enterprise technology** standards.
- Resolved design issues and working with performance **data** to align existing applications and **systems** with **architecture** road map.
- Supported exception processes and remediation plans for old and new **technologies** to adhere to **enterprise** standards.
- Work closely with **Project Management** and BAU teams to ensure the right **technology** components are proposed and **solution** in delivered within the expected timeframe as per defined roadmap.
- Identify all resource requirements and cost estimation of the proposed **solution**
- Provide end to end **leadership** from the **architecture** perspective and define **technology** standards for the **enterprise**.
- Provide **Architecture leadership** on complex solutions and programs having multiple architects and keeping view of the big picture of the overall **solution**.
- Provide **Architecture** guidance to BAU teams and **Change Management** teams to ensure the **solution delivery** and changes to the **systems** is in line of the **enterprise technology** standards.
- Excellent written and verbal communications **skills**.
- Possess **strong communication** and **documentation skills** at Technical and Non-Technical level.

EDUCATION & CERTIFIED TRAINING

- **BCS** (4 years Degree in **Computer Systems Engineering**, GPA 3.0)
- **TOGAF 9** **TOGAF 9 Certified Enterprise Architect**
- **VCP 4** VMware Certified **Professional (vSphere 4)**
- **VCP 5** VMware Certified **Professional (vSphere 5)**
- **CCNA** (Cisco Certified Network Associate)
- **MCSE NT 4.0** (**Microsoft** Certified **Systems Engineer**)
- **MCP + Internet** (**Microsoft** Certified **Professional**)
- **MCSE 2003** (**Microsoft** Certified **Systems Engineer**)
- **MCSA 2003** (**Microsoft** Certified **Systems Administrator**)
- **CNE** (Certified Novell Engineer)
- **CNA 4** (Certified Novell Administrator 4)
- **Compaq NT ASE** (Accredited **Systems Engineer**)
- **Cisco Wireless Aironet Wireless LAN Infrastructure Design Training**

TECHNICAL SKILLS SUMMARY

WindowsNT/2000/2003/2008/2012 Servers Windows 3.1/95/98/Me/NT4/2kPro/XP/Vista/7/8 Unix, SUN Solaris Red Hat Linux 6, MAC OS X	Active Directory Design & Implementation Microsoft Exchange Design & Implementation Microsoft SQL Design & Implementation Novell Netware 3.12, 4.11 & 6.0
Infrastructure Migration from Windows NT to 2000/2003/2008 and Netware to Windows 2000/2003	Internet Information Server IIS 6, 7.5 Novell NDS
Symantec Network Antivirus Security	Webtrends Enterprise and Internet Security
HP/Compaq Insight Network Manager & HP Open View, Dell PE1955 Blade Server	Backup Exec and Windows Native Backup
IP Firewall Configuration with Network Security using Access List & Port Level Access Restrictions IPSec VPN security with DES and Triple DES Encryption Wireless Security using WEP and SSID Port Scanning for Intrusion Detection & Ether peek Network Protocol Analyzer	Dell, HP Compaq, Gateway Servers System Hardware Configuration MCA, EISA, ISA, PCI & AGP architectures Intel & Adaptec Raid Controllers VMWare ESX Server Acronis Snap Deploy & Backup Symantec Antivirus / Veritas Backup Exec 11d Landesk Management Suite
Cisco, Netgear, Adaptec Routers, Catalyst Switches with VLAN Watch Guard & Netscreen VPN FIREWALL Cisco AP 340, AP 350 Wireless Access Points Adaptec & Linksys Wireless Cable/DSL Router HP MPX200 Series multi Function Router	VPN & NAT Network Address Translation DNS Domain Name Services DHCP Default Host Configuration Protocol HTTP, FTP & POP/SMTP Email Services SNMP Network Management

- Client, Server and Storage **Virtualization** using **VMware, VDI** (Virtual desktop **Infrastructure**) and **NetApp technologies, Storage Area Networks (SAN), Disaster Recovery** solutions for datacenters
- **Microsoft SQL & Oracle** Databases and **Microsoft Exchange** designs in clustered environment. Various business applications including **SharePoint** and **BizTalk**
- Experience in **enterprise** network **LAN & WAN infrastructure** design, **implementation**, and support.
- Worked closely with customers to **Design, Plan** and **Implement** their Projects. Experience of **Cisco Aironet Wireless LAN** Design and Deployments.
- **Managed a Team of Consultants** to adhere with Strict SLA and deliver projects on time. Designed and implemented **Active Directory and Exchange** infrastructures.
- Designed **VMware ESX** based **virtualization solutions and Datacenter Migrations**.
- Experience of Designing **LAN & WAN Infrastructure** and **Windows Server 2003/2008 Active Directory Infrastructure**.
- Experience in **Unix** and **Solaris** based datacenter designs.
- Installed and configured **Cisco Routers & Layer 3 Switches with VLANs**
- Experience with **Network Security** using **IPSec** on **VPN tunnels** and **Firewall Security** using **Cisco, Netscreen, Watch Guard** and **Netgear Routers**.
- Implemented **Enterprise TCPIP Networks** with **DNS, WINS, DHCP, POP/SMTP, FTP/HTTP, RAS, NAT** and **VPN** design with IP **management** and administration on **Static IP Subnets**.
- Experience with **Microsoft Exchange SQL Server, IIS, Active Directory** Integrated environment to **setup HTTP WEB, FTP** and **EMAIL Servers**.
- Migration from **Novell Directory Services (NetWare 6)** to **Active Directory**, as well as coexistence between AD, NDS, and other directory services.
- Migration from **Windows 2000** to **Windows 2003** and from **Windows NT** to **Windows 2000**.
- Managed desktop design for **Windows 2000** or **Windows XP Professional** using **Group Policy, Remote Installation Services**, and **Windows Installer** with **TCPIP & NetBIOS Protocols**.
- Experience with **VERITAS Backup Exec** and **Net Backup** client & server and **Windows NT/2000** built in **Backup Utility** on **EMC Clarion Backup systems**.
- Installed large scale **802.11b/g/ac Wireless LANs** using **Cisco AP 340/350 Access Points**.

PROFESSIONAL EXPERIENCE

Ernst & Young Enterprise Infrastructure Architect	Alpharetta, USA / London, UK	Oct/11 – March /16
--	-------------------------------------	---------------------------

As an **Enterprise Infrastructure Architect**, primary responsibility is to define Technical **architecture** for the organization based on business requirements and IT strategy. Defined IT Solutions in line with clients **Security** and **architecture** standards.

- Defining **Infrastructure** components for the applications supported by structured and non-structured **data**.
- Propose **enterprise** solutions to meet business requirements adhering to IT standards.
- Provided **architecture leadership** for various acquisitions and mergers of different companies with Ernst & Young.
- Provided **data** Ware Housing solutions and Analytics using Tibco Spotfire and Fomvine tools.
- Creating High Level and Low Level Design for GIS integration with existing application **infrastructure**.
- Worked closely with the Business, **project management team** and BAU **team** to define complex end to end solutions. Leading **team** of architects for larger projects with having the big picture of the overall **solution**.
- Creating High Level and Low Level Design for GIS integration with existing application **infrastructure**.
- Projects **technologies** include SAP, VMWare, Wintel, Linux and Cisco networks
- Worked closely with **Project** Managers throughout the lifecycle of the **project**.
- Providing detailed **Infrastructure Architecture** across multiple Tiers with SQL 2012, IIS, VMWare ESX 5.5 hosting Wintel **technologies**.
- Enabled secure **data communication** and transfers using SSH based tools including MoveIT DMZ and Attachmate reflexion.
- Utilized ITSM Tool (Service Now) for **change management** and service deployment.
- **Enterprise** acquisitions and application / **infrastructure architecture** on Public & private **cloud** with SaaS solutions.

Metropolitan Police Technical Architect	Dec/10 – Sept/11
--	-------------------------

Primary responsibilities were to provide high level technical specification of SharePoint 2007 **infrastructure** to enhance event **management** capabilities of Metropolitan Police.

- Created high level **Solution Architecture** Design of SharePoint 2007 **infrastructure** for MPS.
- Developed the strategy for integrating SharePoint **infrastructure** with SAP and documentum.
- Defined the specifications for **development** and test environments within MPS **infrastructure**.
- Interacted with 3rd party suppliers to ensure adherence with the technical specifications and organizational goals.
- Provided GIS Integration with SAP and SharePoint using Silverlight and AJAX **Development**.

IBM UK Ltd

August/10 – Nov 2010

Infrastructure Architect

Worked on IBM's Major financial client QBE Insurance Ltd. based in central London. During this project, I carried out the infrastructure remediation project and datacenter migration from client's premises to IBM's datacenter.

- Creating high level design for technology refresh and upgrade projects within client environment.
- Ensure Architecture alignment with client it architectural goals.
- Delivered Architecture for PCI compliant Infrastructure.
- Provided end to end solution for P2V virtualization of existing server estate of 1200+ servers.
- Defined the virtualization criteria and worked closely with BAU teams to implement the design.
- Facilitating remediation of SQL2000/2005, Exchange 2007, Citrix and SharePoint 2007 Servers.
- Provided High Level design for upgrading existing VMware ESX3.5 Hosts to ESX 4.1
- Designed Storage Solutions based on HP EVA 8000, 3Par and MPX200 Multifunction Router.

Hewlett Packard

Nov/09 – July/10

Solutions Architect

Provide services as infrastructure specialist at Rolls Royce secure headquarters in Derby.

- Provided Physical design for Microsoft SCCM & SCOM within Rolls Royce infrastructure.
- Carried out intensive testing of package deployments and system builds using SCCM.
- Designed VMware vSphere4 infrastructure for production environment.
- Carried out design and implementation of HP DDMI into Rolls Royce infrastructure. Taught several applications using SAI editor into the DDMI environment.

Skandia UK Ltd

London, United Kingdom

Feb/09 – Aug/09

Solutions Architect

This role with Skandia involved working on the infrastructure of Skandia's Global infrastructure projects. Interacted directly with the customer to advise on infrastructure changes. Created documents for Proposal, High level and Low level architecture for the following projects.

- Virtualization solution for Isle of Man and Southampton Data centers with VMware ESX 3.5 and VMware Infrastructure with nWorks management interface.
- Designed Implemented Microsoft Dynamics CRM at Southampton Datacenter.
- Solution Design for HP EVA 8100 Storage Array with HP Blade servers on c7000 Blade Chassis.
- Windows Server 2003 & 2008 Active Directory Remediation. Design & implementation of Microsoft System Center Operation Manager (MSCOM) at Southampton Data center.
- Siebel upgrade for Skandia and Old Mutual Group infrastructure.
- Architecture for MoSes HPC Cluster using HP DL380 Servers with Microsoft Windows 2003 Compute Cluster.
- Designed and implemented Utimaco (Sophos) Safeguard Enterprise to provide enterprise level data protection.
- Designed and Installed 50 Cisco Aironet 3500i Wireless Access points with Cisco 5508 Wireless LAN Controller.
- Provided consultancy to improve service management procedures of onshore and offshore resources.

**Hewlett Packard
Solutions Architect**

Nov/08 – Feb/09

My role with HP as Solutions Architect involved providing technical solutions for various clients to meet their business requirements. The role involved resolving technical issues that may arise during the solution development life cycle. Working on Bids and documenting solutions based on RFP and SR. The solutions involved the following key technologies:

- Virtualization solutions with **VMware ESX 3.5 and VMware Infrastructure**
- Solution Design for **Microsoft SharePoint 2007** authenticating Internal and External users
- **Windows Server 2003 & 2008 Active Directory** Design and implementation with **Microsoft Operations Manager (MOM)** and **Microsoft Dynamics CRM**.
- Implementation of **Exchange 2007** into existing Active Directory Forest.
- Expansion of existing **HP EVA 8100 Storage Array** and implementing new services using **DL380 G5 Servers**.
- **Network & Firewall** configurations with application & information security

**CSC (Computer Sciences Corporation)
GIS Solutions Architect**

Dec/07 – Nov/08

Joined CSC as a Solutions Architect to provide high level architecture and implementation plans for various technologies at different clients. Carried out presales activity at Transport for London to win business for CSC. Created documents for solution Proposal, HLD and Physical Design. The projects involved the following:

- **Windows Server 2003 & HP Unix** Datacenter upgrades and consolidation and implementing HP OpenView
- High level Architecture for implementing **HP Service Manager** and **Service Center** at TFL.
- High level Designs for **Enterprise Security** and **Symantec Antivirus**
- **Virtualization** of existing server estate into unified environment using **VMware**.
- Virtualized desktop Infrastructure of Department of Health using **VMware Virtual Desktop Infrastructure (VDI)**
- Application migrations and upgrades of **IBM AIX**
- Solution Design for **Enterprise Management** using **LANDesk**
- High level Design for **BMC patch management**
- **Active Directory** integration and migrations
- **SAN** upgrades and **backup solutions**

Worked on various government projects including

- **Transport for London**
- **BAE Systems**
- **Department of Health**

**SMCI / Ejada (ALINMA Bank project)
Infrastructure Architect / Project Lead**

Aug/07 – Nov/07

Worked as a Senior Consultant to provide IT Architecture of ALINMA Bank in Riyadh. Lead the infrastructure team of 15 design consultants to deliver the Network and Platform Architecture of ALINMA Bank.

- Provided Network and Platform Architecture using **TOGAF Framework** for ALINMA Bank
- Ensured the Architecture is in line with RFPs provided by the customer
- Platform Architecture included **High Performance Computing HPC** and highly available redundant replication links between datacenters.
- Work with integration and implementation to ensure the design is according to the principals defined by network and Platform Architecture

DELL UK / Getronics Bracknell, United Kingdom
Solutions Architect / Technical Consultant

Sep/05 – Aug/07

Worked as **Solution Architect & Design Consultant** to lead the Projects for **Dell Professional Services**. Provided Consultancy **Designed Technical Solutions** for Dell Customers. Implemented **Active Directory, Exchange** and **Backup Exec** Solutions in **VMware** and **SAN** Environments for more than **100 Clients**. Worked with Dell Accounts **team** to win projects by creating Bids, translating business requirements into technical requirements. Created Statement of work (SOW) and cost the **project** with Hardware and resources to create a proposal. Took ownership of technical design and **delivery** for entire **project**. Carried out great deal of presales activities at dell and won projects like Shell, Verifone and Servisair.

- Technically evaluate the requirement by discussing with the customer and understand the business needs. Mainly for **Exchange 2000/2003** and **Active Directory 2000/2003** Implementations and Migrations in SAN environment
- Provided **Enterprise Management** Solutions using **LANDesk** to deploy Windows Operating **Systems** and patch **management**.
- Acted as **Solutions Design Consultant** to evaluate customer's requirements and provide solutions for Active Directory, Exchange, Network & SAN **infrastructure** using ITIL procedures..
- Designed and **Deployed Symantec Antivirus Enterprise** in large Active Directory Integrated environments.
- Designed **Best** Practice Solutions based on customer requirements and Managed Rollouts.
- Managed complete solutions for the customers including **Infrastructure Health Checks, Design, Deployment** and **Active Directory, Exchange** and **Application Migration** Projects.
- Carried out High Level **Health Checks** for **Dell / EMC SAN** and **Network Infrastructure** for **WHSmith, Shell and Multiplex**. Carried out Health Check on **Citrix Farm** at **Interserve** and recommended changes and upgrades.
- Provided **PCI DSS** compliance consultancy to **Shell** and **WHSmith**.
- Designed and implemented **VMware Solutions** with Windows Server 2003 Virtual Machines.
- Managed projects from Design to **Implementation** by leading a **team** of technical consultants of different areas of expertise.
- Designed Datacenter Solutions based on **Unix, SUN Solaris** and **Windows** Servers using **High Performance Computer Clusters HPC**.
- Provided Consultancy for **Network Infrastructure** and **Topology Design** and using **Cisco** and **Dell SAN Equipment**, including **Dell / EMC CX3-20, CX500** and **DAE** using **Brocade Switches** and zoning the hosts with **FC HBAs**. Experience on **Dell PE1955 Blade Servers**.
- Document **Exchange / Active Directory** Design and **Implementation** Plan.
- Managed **Data Centre Moves** for up to 500 Servers.
- Communicate with Dell Installations **Team** and the customer at all levels during the course of the **project** and provide regular updates to ensure the progress accourting to the customer's requirements.
- Ensured the successful **delivery** and sign off the **project**. Communicated with the customer at all levels to make ensure satisfaction with the **delivery** of the **project**

Rolls Royce / EDS	<u>Derby, United Kingdom</u>	Jan/05 – Aug/ 05
Active Directory & Exchange Design Consultant		

Worked as part of a **team** to Rolls Royce Global Active Directory Design **Project**. This is a massive **project** to Migrate from NT 4.0 to **Windows 2003 Active Directory Multi-Forest Network** with migration of **33,000 users** from Exchange 5.5 to 2003.

- Designed Exchange 2003 **infrastructure** in Multi Forest environment using resource and account forest model.
- Designed the **Active Directory Site Topology** for 115 Global locations of Rolls Royce network.
- Devised the site replication Strategy for KCC Chatter Reduction between Sites.
- Carried out Logon Script design and created scripts for creating Site-Links between Global Active Directory Networks.
- Designed Migration and **implementation** strategy for **Exchange 2003** in Multi-Forest environment.
- Designed Group Policies to implement **Security for Active Directory Resources** in Multi Forest Environment.
- Documented the **Design Documents** and carried out peer reviews for **project implementation** strategy.

O2	<u>Slough, United Kingdom</u>	Oct/04 – Dec/04
Active Directory & Exchange Consultant		

Primary responsibility is to provide Technical Consultancy & 3rd line support to O2 users and migrating **Exchange 5.5 to 2003** & upgrade servers from **Windows NT 4.0 to Windows 2003** for a network of **3500 users**.

- Identified key problem areas in O2 NLBS server clusters that were drastically bringing the network performance down.
- Carried out on-site Exchange 5.5 to 2003 Migration for 16000 users.
- Worked with Windows 2003 Active Directory **File and Print security** & NTFS permissions using GPO.
- Administered SUN Solaris Servers in the datacenter.
- Upgraded Windows NT clients to Windows XP.

Macrovision UK Limited
IS Administrator

Maidenhead, United Kingdom

Jan/04 – Oct/04

Primary responsibility is administration and support of corporate LAN/WAN connected via VPN to 4 locations in Europe and head office in California having **1500 users**.

- Administration **Windows 2000 & 2003 Active directory** with 1100 users divided into 5 Domains.
- Migrated Windows 2000 & **Exchange 5.5** Servers to **Windows 2003 & Exchange 2003**.
- Administered **Global Network** between **US & UK** offices.
- Used **MOM** for detailed diagnostics & troubleshooting.
- Using daily Backups on **Veritas Backup Exec Version 8.6** and administering Exchange 2000 Server.
- Installed UNIX Servers in **enterprise** environment.
- Implemented Corporate-wide **Symantec Antivirus Corporate Edition Antivirus Server** based **solution** and configured LIVE update Scripts and scheduled daily automatic Virus scans.
- Constantly monitoring 3COM Switches and maintaining **Netscreen Firewall** between 4 subnets and 1 DMZ.
- Installed **Remote Access** & Configured **VPN** on **Netscreen 100** Switch and created **Security Policies**.
- Integrated **Novell 5.0** with Active directory and migrated users from **NDS** to **Active Directory**.
- Installed and configured **Microsoft Media Services** on Windows 2003 Server for broadcasting meetings over the Intranet.
- Provided **Security** & Managed network resources e.g. **FTP, WEB and Email** Servers with **SQL 2000 and Exchange 2000**.
- Setup Active Directory resource **access security** between multiple domains.
- Created and applied **Group Policy Objects** for Domain & OUs & applied VB Scripts.
- Used Video Capturing devices and worked with different Digital Audio and Video file formats.
- Managed Active Directory Integrated **DNS & DHCP** Servers & worked with IPSec on Windows Servers.
- Providing support to QA and **Development** Engineers and ensuring 100% availability of network resources throughout corporate Network.
- Provided support to in house Engineers and LABs.

ICI (Imperial Chemical Industries)
IT Consultant

Slough, United Kingdom

Dec/03 – Jan/04

- Windows XP **Systems** configuration for DNS, DHCP and Network Settings for ICI Corporate Active Directory Domain of **10000 users**.
- Large scale Migration from Windows NT Workstation to Windows XP.
- Migration of Lotus Notes 4.6 to Lotus/Domino 6.
- **File and Printer sharing & security** configuration on Active Directory **Enterprise** network.
- Migrated Files and printers from Windows NT 4.0 to Active Directory.
- Configured Citrix for remote applications.
- Hardware Troubleshooting and roll over from NT Workstation 4.0 to Windows XP **Professional** on Dell Laptops.

Dell USA Inc.
Onsite Consultant

Austin, TX USA

Apr/03 – Jun/03

Provided Technical consultancy and carried out System installation to Dell customers in Northern Virginia. Conducted pre sales Technical evaluation and site surveys. Defined scope of work to Dell where CQ was created. Carried out installations after the project was sold.

First Mount Zion Baptist (Dell Customer) Dumfries, Virginia USA (CLIENT)

Installed Windows 2000 Network with Active Directory, **Exchange 2000 and SQL Server 2000**. Installed SNA Server and ISA Server for Internet. Installed and Configured WatchGuard SOHO – 6 VPN Router/Switch/Firewall and enabled Remote Access using PPTP and MUVPN. Installed DNS Server for Name resolution. Created user accounts and group policies to access shared Files and Printers on the Network. Configured Dynamic DNS for automatic remote IP consistency.

Dick Keller Automobiles (Dell Customer) King George, Virginia USA (CLIENT)

Installed Windows 2000 Based Network with active directory domain on Dell Power Edge 1600 Server and Client PCs. Configured Routing and Remote access on the server with DNS, DHCP Services. Updated the Data Format from old versions to newer versions and migrated to Windows 2000 Server. Installed Veritas BackupExec for automatic backups.

Consult America Inc.
Network Engineer

Springfield, VA USA

Aug/01 – Oct/03

Provided Consultancy Services for design and implementation of Windows 2000 based Networks.

- Carried out site survey and pre sales meetings and quoting the project.
- Administered Windows NT 2000 based network with Active Directory and Internet Information Server. Installed Windows XP on Client computers.
- Created Users and Group Policies and Directory restrictions.
- Configured Enterprise network with Microsoft Exchange Server, DNS, DHCP, and Routing services with NAT.
- Provided consultation on SAN clusters.
- Migrated Windows NT Workstation to XP.
- Installed Web hosting services and domain configuration for corporate clients.
- Provided technical support to company users with network optimization.
- Installing Network Equipment such as Hubs, Switches and Routers.
- Configured Windows NT 2000 Servers With Active Directory and ISA Server & Workstation Operating Systems.
- Installed CAT5e structured cabling using Patch Panels & RJ-45 Interface and provided data connections.

Installed Network using Gigabit Ethernet Cables using Intel 460T Switches with multi-gigabit Ethernet backplane using 802.1Q-based VLANs. Installed Windows 2000 Servers with Active Directory. Created User and Group Policies and network services such as DNS, DHCP and Cisco 1600 Router to provide Internet. Installed NetWare 6.0 server in Active directory integrated environment using **Gateway Services for Netware**. Used Netbackup for Scheduled backups.

Logistic Solutions Inc.
Network Engineer

Piscataway, NJ USA

Oct/00 – Aug/01

- Surveying sites and planning for installation.
- **Enterprise Network Setup** with **Windows NT Servers** with domains. Installed **Windows NT/2000** Servers for **proxy** and content filtering.
- Configuration of IEEE 803.1Q based **VLANs** on **Intel 500 series Layer 3 Switches**.
- Installed and Configured **Cisco 340 & 350 802.11b Wireless Access Points**.
- Used **Cisco 3660, 2500 & 1600 Routers** for **NATing** and provide **DHCP** services to wireless clients.
- Configured **Compaq handheld** computers to **access** wireless network.
- Completed 22 Projects in USA.

Schools of Innovation Windows 2000 based Wireless LAN Internet Connectivity Project

Installed Windows 2000 based 802.11b wireless LANs in different locations in USA. Installed wired TCP/IP based Windows 2000 LANs with MS Exchange, MS ISA Server, Active Directory, DNS, DHCP Servers. Provided Internet Connectivity using Cisco 1600 and 2500 Routers using NAT and Cisco ACL for Internet **Security**. Conducted site survey and installed wireless LAN integrated with wired Windows 2000-based TCP/IP Network. Installed Similar Networks on 20 locations in USA.

ABM Data Systems

Karachi, Pakistan

Apr/98 - Sep/00

Senior Network Engineer

Mainly responsible for networking projects at various client sites. Provided consultancy by visiting customers and analyzed their requirements to improve their system. Job Included the following

Karachi Institute of Information Technology <http://www.kiit.edu.pk> (CLIENT)

- Provided troubleshooting support & reconfiguration of corporate customers' LANs primarily based on **Windows NT/2000 & Novell NetWare** operating **systems**
- Designed and implemented local and wide area Networks according to requirements of the clients evaluated after thorough study of floor maps and traffic load calculations.
- Supervise the structured cable installation.
- Installed 10Base-2, 10BaseT and 100Base-TX with BICC Brand REX and AT&T structured cabling using Patch Panels & RJ-45 Interface.
- Installed installation of Intel 8000 and 9000 series routers, 140T, 330T Hubs and 500 Series Switches
- Installed GIGABIT Matrix using Intel 510T and 550T Switches.
- Configuration of IEEE 802.1Q based VLANs.
- Configuration and Installation of **Microsoft Internet Information Server**.
- Installed & configured Windows NT with DHCP, DNS, WINS, RAS, SNMP, PROXY and Reverse Proxy Services with POP & SMTP email Servers using LDAP.
- Configuration and installation of 3COM PS/40 Port Switch Manageable Hubs, 1100 and 3300 Series Switches
- Installation and Configuration of **3COM Transcend Manager Version 6.0** on the Campus Wide Network.
- Installed and configured **WebTrends Enterprise Version 3.0** to monitor Internet usage and log **analysis**.

Karachi University (CLIENT)

Implementation of a Local Area Network at **research** LAB in Department of applied Physics at Karachi University using secure firewall for Internet connectivity. Installed Netscape Suite spot Server with **LDAP e-directories** containing user **information** and server **access**. Design of Campus wide Network of Karachi University using Intel 400 Series Switches and 330T Hubs. Internet connectivity of Karachi University using Cisco 2510 router and Remote **access** provided with Cisco 3660 **Access** Server.
